for a better world™

ABB Low Voltage Products for the Contractor/Installer

Within this catalogue, you will find products for contractors/wholesalers available from stock from ABB Low Voltage Products in the UK and via our expanding distributor network which can be located in the links section of our website: <http://www.abb.co.uk/lowvoltage>

As well as our range of contractor/wholesaler products contained in this catalogue, we have a comprehensive range of industrial products too, with the same emphasis on providing items from stock, all of which are included in our catalogue **ABB Low Voltage Products for Industrial and Automation**.

ABB has a reputation for manufacturing and supplying quality low voltage components, the result of our on-going research and development programme. Our product ranges are supported by full and extensive technical documentation and page 6 shows some of the major supporting catalogues. In addition, a visit to our website at <http://www.abb.co.uk/lowvoltage> will provide you with a wealth of product information including catalogue downloads, cad drawings and product configurators.

General Information

Wholesales and Stockists

We have created two dedicated publications focussing on our core products for industrial automation and contractor/installer markets.

You will find information on our stocked products including brief technical specification, short code, order code and product hierarchy. (Example below)

1

Polycarbonate Enclosure 9kW ... 37kW 4 pole						Product Hierarchy 4000002	
Rating@415v			Dimensions mm				
1th A	AC22	kW	H	W	D	Order Code	Price £
32	25	9	125	100	107	S47K5N-B	25.80
40	40	11				S415KN-B	32.81
63	63	22	170	140	108	S418KN-B	51.95
80	80	37				S426KN-B	73.21

The Product Hierarchy has been included to assist in identifying discounts for particular product ranges when used in conjunction with the customer discount structure file.

By focusing on core products, we are confident that the majority of your requirements can be satisfied from stock by selecting products from the Low Voltage Essentials catalogues. Of course, our full range of products is still available to you, but on factory lead times.

We have also included complimentary items that support other products in our range. These products are not normally stocked.

As a customer, you can also take advantage of the services provided by our web based on-line solutions.

From this portal you can obtain price and availability, check order status, obtain copy documentation and place orders on-line 24/7/365. If you have not already registered, you can do this by talking to your local ABB sales engineer.

About Voltimum

ABB is a founder member of Voltimum which was launched in 2003.

Voltimum is an internet portal for the electrical industry and is active in 6 countries within Europe.

The portal is backed by 7 leading European manufacturers of electrical installation products who have invested over 20 million euros in the project.

Other manufacturers join the Voltimum online catalogue regularly as they see this unique initiative as an opportunity to increase the awareness of their products, being used on a daily basis by electrical contractors.

The initiative was first announced to the press in October 2000 and since then technical architecture of the portal has been designed and developed. Also in this period, 6 locally based teams were put in place to develop the portal in each country, adapting the portal to the needs of the local market and working with local providers of appropriate content.

Voltimum is headed by Bruno Hamon who is based in the Company's HQ in Geneva.

Technology of Choice

Smart Home & Intelligent Building Control

**NEW IN THIS
ISSUE**
SEE PAGES 78

KNX and ABB i-bus® KNX Intelligent Building Control.

In many areas of our private and working lives, the increasing level of automation is a trend that confronts us on a daily basis without actually being noticed.

1

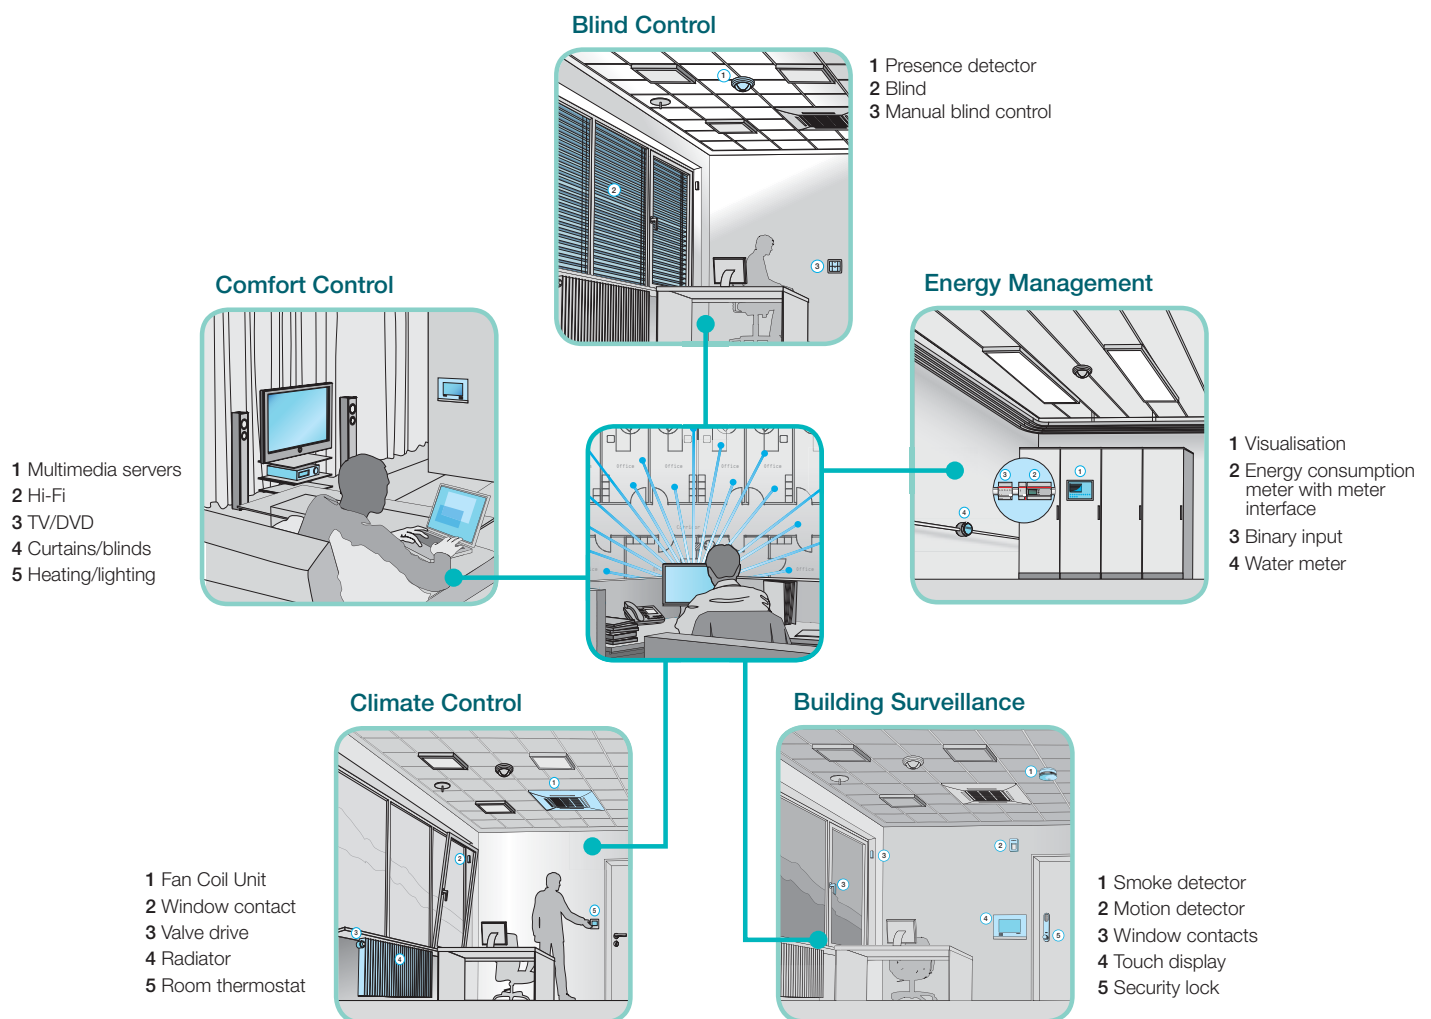

ABB Busch-iDock

recharging the soul with a position for sound

**NEW IN THIS
ISSUE**
SEE PAGE 76

1

A fixed place for music in your life with the new Busch-iDock in the charger without a jumble of cables. For a wall with sound the Busch-iDock with its simple elegance blends with every environment discover it's additional functions.

Whether relaxing or stimulating.

Sound waves have a direct influence on body and mind. And therefore on one's well-being. That is why music as an integral part of life deserves a permanent place in the living environment, since it can have a decisive influence on the atmosphere in a room. To match one's personal style.

The Busch-iDock offers each iPod* or iPhone* a fixed place in the home.

The Busch-iDock with its simple elegance blends with every environment. With the Apple* remote control the iPod* or the iPhone* are easy to operate from a distance. Even MP3 players from other manufacturers can be connected to a 3.5 mm jack socket. The Busch-iDock offers excellent interplay with the Busch DigitalRadio or the integration with Busch AudioWorld®.

Industrial Plugs and Sockets up to 125A - 690V to IEC Standards

**NEW IN THIS
ISSUE**
SEE PAGES 97

ABB Cewe has produced Industrial Plugs and Sockets for over 60 years in Nyköping, Sweden. Long experience in development and production has resulted in a wide product range with high quality and a robust ergonomic design. Continuous development is made to meet the customer's requirements, and to take environmental aspects into consideration

1

Easy & Safe products for adequate functionality and ergonomic design

Tough & Safe products for best performance in demanding and heavy-duty applications.

Critical & Safe products for the highest safety

ABB Industrial Plugs and Sockets have the solution for products in industrial environments with high demands on safety, durability, reliability and cost saving for the end user.

- **Safety**

Tested and approved by third party testing laboratories.

- **Durability**

Materials used give a high durability in tough conditions and environments.

- **Reliability**

High quality contacts ensure reliability.

- **Cost saving**

Designed for quick and easy installation.

IP65 Plastic IP55 Metal Enclosed Starters

**NEW IN THIS
ISSUE**
SEE PAGES 58

DOL with or without isolator
DOL Reversing with or without isolator
Star Delta with or without isolator
Heating & Lighting Enclosed Contactors

- Smoothly styled modern IP66 enclosed DOL starter IEC947-4-1
- Generous cabling space for easy installation
- Combined contactor/overload assembly can be unclipped from DIN rail to ease installation
- Support for 400v 3ph or 230v single phase
- Overload supplied separately

IP65 Metal Enclosed Switches & Switch Fuses

**NEW IN THIS
ISSUE**
SEE PAGES 52

Load Break Switches 3 - 4 pole 20 ... 800A
Switch Fuses 3 - 4 pole 20 ... 800A

1

Load Break Switches

- IP65 rated (not suitable for external installation)
- Powder coated textured finish (RAL 7035)
- All 3 pole switches include detachable neutral link (OT160 solid link)
- Hinged lid complete with lock
- Padlockable pistol grip handle as standard
- Removable gland plates fitted top and bottom

Switch Fuses

- IP65 rated (not suitable for external installation)
- Powder coated textured finish (RAL 7035)
- All switches are supplied with fuses and removable gland plates
- All 3 pole switches include detachable neutral link (OT160 solid link)
- Hinged lid complete with lock
- Switch Fuses are internally rated IP20 on incoming terminals up to 63A
- Padlockable pistol grip handle as standard
- Switch Fuses 100A are supplied with incoming terminal shrouds not fitted to allow customer connections

Dedicated products for Solar Energy

1

The UK Government have introduced a new initiative aimed at encouraging the nationwide adoption of renewable energy technologies.

Always ready to meet any new demand from the market, ABB has developed a whole range of reliable products dedicated to photovoltaic applications.

The Feed Tariff

Called the Feed-in Tariff, this initiative will see owners of renewable energy equipment being paid not only for the energy they use but also the amount of surplus energy they supply to the UK National Grid.

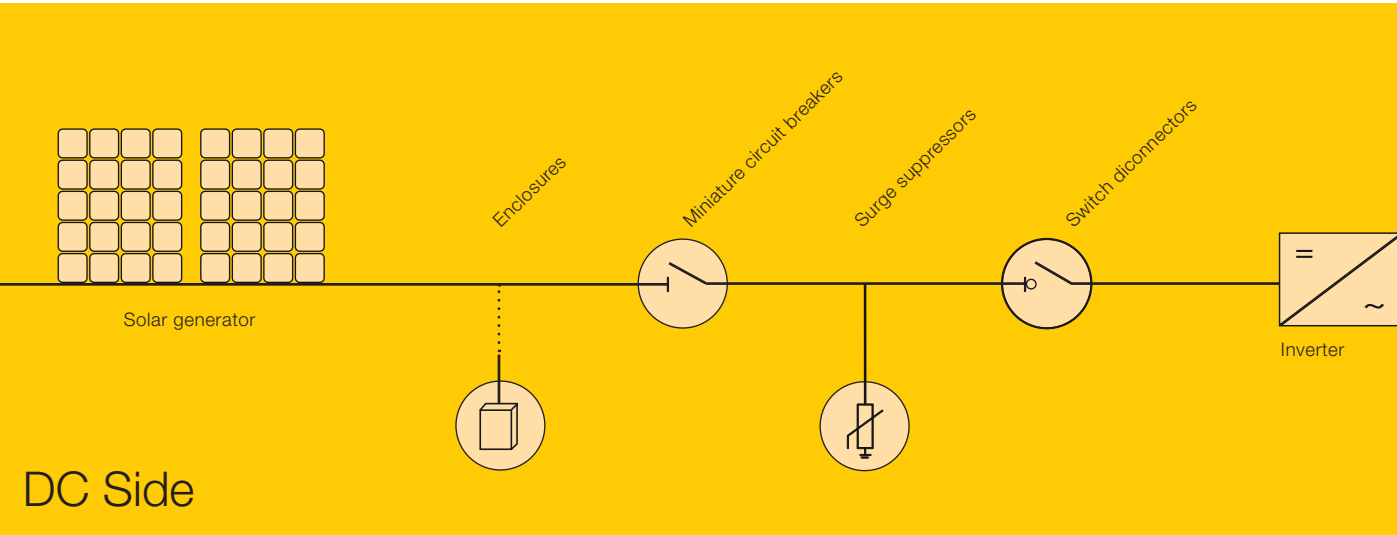

Inspired by similar schemes already operating in continental Europe, the UK Feed-in Tariff initiative is aimed at residential, commercial and industrial users of renewable energy sources. A table of the technologies covered are listed below.

How does the Feed-in Tariff Work?

The Feed-in Tariff is based on the amount of energy produced by a renewable energy source, plus where surplus energy is produced, a bonus to cover energy exported to the National Grid. By effectively paying producers more for the energy they don't use, the system is also aimed at encouraging energy efficiency.

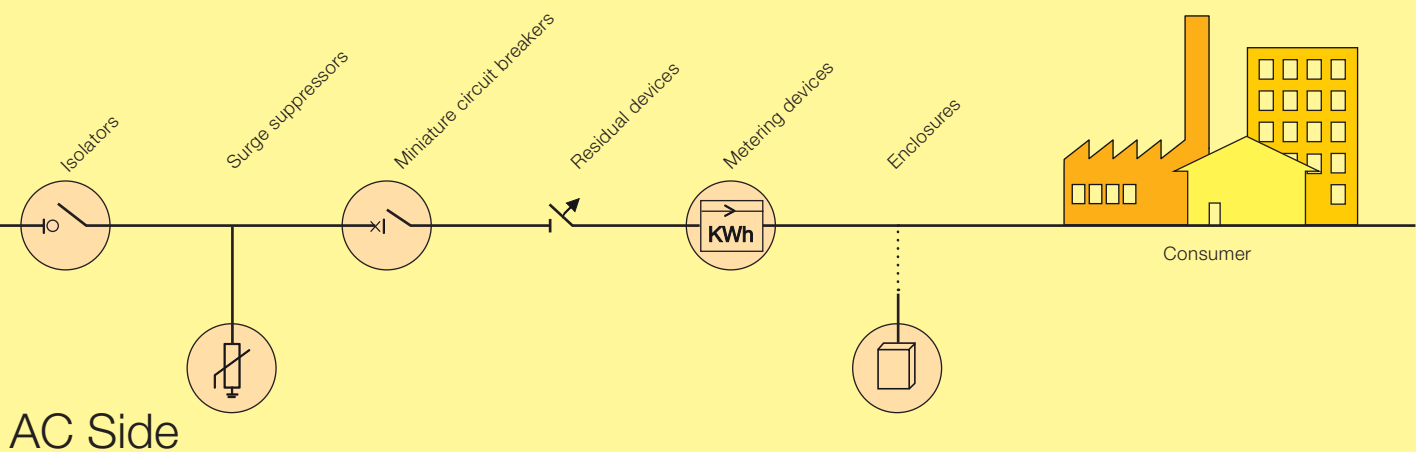

To cover periods when the renewable energy source may be not producing sufficient electricity to cover demand, additional energy may be imported from the National Grid, with the user paying their electricity supplier for the amount consumed.

Technology	Tariff amount (pence per kWh) for installation fitted periods:		
	April 2010 - March 2011	April 2011 - March 2012	April 2012 - March 2013
Solar photovoltaic <4 kW (new)	36.1	36.1	36.1
Solar photovoltaic <4 kW (retrofit)	41.3	41.3	41.3
Solar photovoltaic >4 - 10kW	36.1	36.1	33.0
Solar photovoltaic >10 - 100 kW	31.4	31.4	28.7
Solar photovoltaic >100 - 5MW	29.3	29.3	26.8

From the string on the direct current side through to the alternate current grid connection point. ABB's products include:

- String boxes
- Switch-disconnectors
- Interface relays
- Fuse disconnecting switches and fuses
- Surge arresters
- Miniature circuit breakers
- Residual current-operated circuit breakers
- Energy meters
- Consumer units and enclosures suitable for outdoor installation

- Add tripping curve for B or C eg: S201B6

Type B - Suitable for small inrush or switching surges, heating loads and tungsten lighting

Type C - Suitable for moderate switching surges for short duration. eg. discharge lamps.

Type A Distribution Boards

Type A - SP&N Distribution Boards

- Constructed to BSEN60439 part 1 & 3. IP30 to BSEN60529. Finished in RAL7035
- Supplied without incomer, see incomer options page below
- Earth and neutral bars included
- Neutral link to incomer included
- Busbar rating 100A - 230v

Protecta - Type B Distribution Boards

Split Load Type B - TP & N Distribution Boards

A range of three phase MCB distribution boards which allows the option of metering in each section. This makes these units suitable for individual monitoring of the power and lighting circuits within an installation.

General Description

- Constructed to BS EN60439 part 1 & 3
- Enclosure finished in RAL7035
- Busbar rated 250A
- Voltage rating at 230/400v 50Hz
- Integral door latch with key
- Incoming devices 125A & 250A
- IP Ingress protection IP41 BSEN60529
- 4+4 - 24+24 TP&N ways
- Incoming devices are included
- Earth and neutral terminals included
- Reversible door
- Includes 2 meters DAB13000

Meter Modules

Distribution Board 3 phase kWh meter module fitted with Type DAB13000 Meter multi function with pulsed output

- Extension box with CT's, wiring loom and MCB to pick up voltage.
- Can be mounted top or bottom of board.
- Modbus, maximum demand and M-bus version available

DC Injection Brakes

Powerbrake

Modules

Solid state injection brakes provide frictionless fast, smooth braking of single and three phase AC induction motors by injecting a controlled DC current into the motor windings: this introduces a stationary magnetic field which exerts a braking torque on the rotor.

DCB5A

- Reduced stopping time
- Increased production
- Increased safety in hazardous machines
- Smooth controlled stopping
- No wear on moving mechanical parts
- Adjustable braking torque and stop time
- Easy installation
- Maintenance free

Concept BS Series Wiring Accessories

Concept BS

...concept in every detail

For over 125 years our products have mirrored the growth and development changes in electrical wiring technologies. Quality and reliability of our products have always been our first priority. Having a concept in every detail was, is and always will be our secret to success.

With its unique design - its square rocker combined with a slight curve on the top and bottom - concept bs is the best choice to meet your pursuit of EWA products with high quality and attractive design.

Domestic Equipment

Busch iDock Future

Busch iDock Future

The Busch iDock offers each iPod* or iPhone* a fixed place in the home. The Busch iDock with its simple elegance blends with every environment. With the Apple* remote control the iPod* or the iPhone* are easy to operate from a distance. Even MP3 players from other manufacturers can be connected to a 3.5 mm jack socket. The Busch iDock offers excellent interplay with the Busch Digital Radio or integration with Busch AudioWorld®. It can also be used with the Concept bs series.

iDock

- 8230-84 Busch iDock set, white (future) - iPhone not included
- 8218 U Busch iDock single unit, insert only - iPhone not included
- 8254-84 Busch iDock cover plate, white (future) - iPhone not included

*Apple, the Apple logo, iPod classic, Ipod nano and iPod touch are trademarks of Apple inc., which are registered in the USA and in other countries. iPhone is a trademark of Apple inc. Apple is not responsible for the function of the device or its conformity with safety standards and regulatory standards.

The ABB Busch AudioWorld (R) offers more functions and devices for various applications, like microphone consoles (i.e. For use in surgeries), DIN-rail amplifier for Busch iDock (i.e. Hotels) and much more. For more information please contact technical department.

Domestic Equipment

Dimmers

High Wattage Dimmers

- DIN Rail Mounted

The ideal component for public and commercial buildings to cope with higher loads. The MDRC Dimmer allows step by step increase in load capacities up to 27,000 watts. The unit can be installed in the distribution board and can be controlled by one push switch. Inter-changeable cover cap on the top of the module, which can be used for maintenance purposes. Choose from Rotary Control Cap, Push Button or Timer for central control. Each module (6584-500) comes with ready-made line jack (RJ12) for capacity expansion.

Universal Master Dimmer (MDRC)

For switching and dimming incandescent, 230V Halogen, LV Halogen with conv. or Electronic Transformer. Light level memory, capacity-expansion with 6584-500, low noise, short circuit protected, overload protected.

Rated: 230V
Rated Frequency: 50/60Hz.
Rated Power: 60-500W/VA

Universal Central Module (MDRC)

To be used with 6583-500, combination of up to 6 modules (3,000W/VA)

Rated: 230V
Rated Frequency: 50/60Hz.
Rated Power: 60-500W/VA

Control Unit (MDRC)

For controlling up to 2 x 9 groups, on site operation via control input 0-10VDC/0-20mA, special adjustable functions ie: cleaning light, vacation, group control.

Rated: 230V
Rated Frequency: 50Hz.
2 x Control Signal Outputs

Push Button Cap

To be used with Master 6583-500 to replace original cover, resting on Master Dimmer

Rotary Knob Cap

To be used with Master 6583-500 to replace original cover, resting on Master Dimmer

Timer Control Cap

To be used with Master 6583-500 to replace original cover, resting on Master Dimmer

KNX

Overview

ABB i-bus® KNX Intelligent Building Control.

In many areas of our private and working lives, the increasing level of automation is a trend that confronts us on a daily basis without actually being noticed.

Automation in buildings aims to combine individual room functions with one another and to simplify the implementation of individual customer preferences. KNX is the logical development for implementing traditional and new requirements in electrical building installations and thus replacing conventional installation techniques. The intelligent installation bus system efficiently performs the conventional functions and offers an additional broad range of expanded features, which could not be realized without a bus system. ABB offers consultants, system integrators and electrical installers a comprehensive product range with ABB i-bus® KNX, in order to meet the challenges posed to electrical building installations both today and in the future.

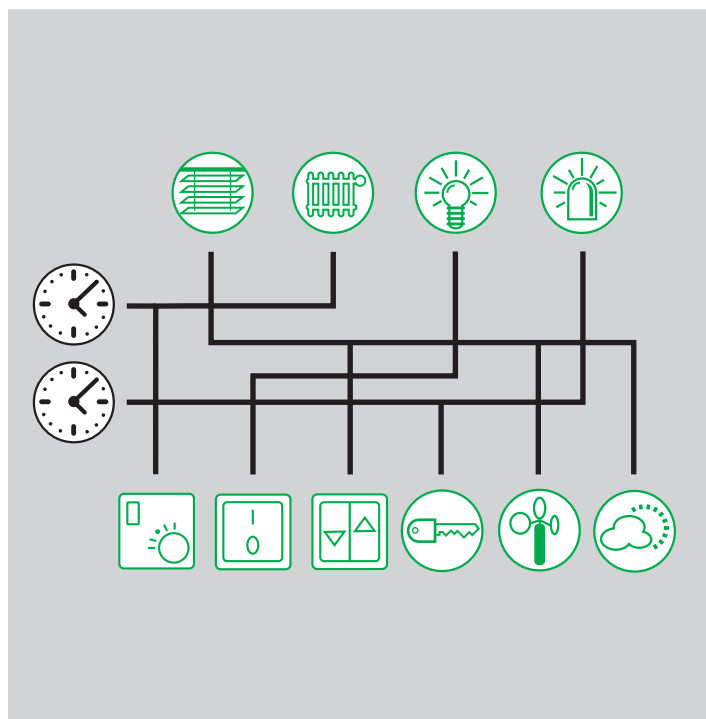

The KNX system is the leading intelligent control system for buildings world-wide. KNX resulted from the merger of major bus systems, including the well-known EIB (European Installation Bus) that has been successfully on the market since 1992.

What does KNX stand for? KNX is the first globally standardized system for the automation of residential and commercial buildings in accordance with the international standard

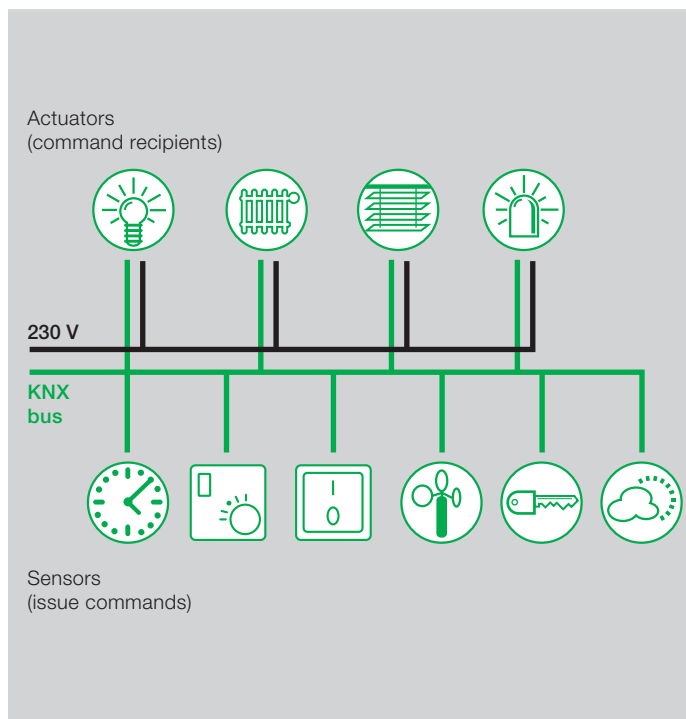

(ISO/IEC 14543-3), the European standard (CENELEC EN 50090, CEN EN 13321-1 and 13321-2), the Chinese standard (GB/Z 20965) and the US standard (ANSI/ASHRAE 135).– KNX has established a clearly defined system platform where the KNX products of different manufacturers can be operated with one another. Both the data protocol and the devices are certified compliant to the KNX standard. KNX thus guarantees the net-workability, interoperability, is both upward and downward compatible and thus future-proof. Just one common software tool is required for planning, engineering and commissioning of all KNX installations. Both the manufacturers and the KNX Association support professionals during planning, commissioning and maintenance world-wide. Comprehensive training opportunities are available for beginners and experienced users in certified training centres. More than 200 internationally certified manufacturers are members of the KNX association. More than 22,000 qualified KNX partners plan, install and integrate KNX systems worldwide. Thousands of buildings, ranging from private houses to airport complexes around the world, are equipped with more than 10 million KNX products.

5

The conventional solution: Many separate cables, separate functionality, little flexibility

The intelligent solution: KNX – a system, a standard, many interoperable functions for maximum flexibility

Cewe Industrial Plugs & Sockets

Overview

The ABB Industrial Plugs and Sockets are a part of the comprehensive ABB program of high quality low voltages products for industries, buildings and OEM's.

ABB Cewe-Control has manufactured Industrial Plugs and Sockets for over 60 years in the factory located in Nyköping, Sweden. Long experience of developing and manufacturing plugs and sockets within ABB has resulted in a wide product range of high quality and a robust ergonomic design. Covering products up to 125 A and 690 V, all tested and approved for IEC standards.

The design and material used have continuously been improved to meet the customer's requirements, and to take the environmental aspects into consideration.

ABB Industrial Plugs and Sockets have the solution for products in industrial environments with high demands on safety, durability, reliability and cost saving for the end user.

- **Safety** - tested and approved by third party testing laboratories.
- **Durability** - materials used give a high durability in tough conditions and environments.
- **Reliability** - high quality contacts ensure reliability.
- **Cost saving** - designed for quick and easy installation.

You will find all you need in the ABB Industrial Plugs and Sockets product range. One supplier for all your needs and worldwide availability.

Perfect performance

All Plugs and Sockets in our range comply with high standards of quality meeting different required tasks. Some are made of heavy-duty plastics (PBT), others of metal. Some have advanced features while others have a straight forward functionality. Perfect for demanding customers.

Perfect productivity

The result is that you can rely on all our Plugs and Sockets to help you maintain a high up-time in your operations. No unscheduled or unwanted interruptions, allowing you a high degree of flexibility.

Perfect safety

Safety is also very important. By choosing ABB Plugs and Sockets you minimize the risk of short circuits. You also ensure maximum personal safety for anyone nearby or around your equipment.

Perfect for the job

Different applications and environments require different products. To make your choice of products easier, we have categorized our range into three groups. All groups have however one feature in common - Safety!

- Select Critical & Safe products for the highest safety in fixed installations.

- Select Tough & Safe products for best performance in demanding and heavy-duty applications.

- Select Easy & Safe products for adequate functionality and ergonomic design.

The structure of our main catalog is based on these three groups. Look for the three different symbols to make your choice.

ABB Industrial Plugs and Sockets – a complete offer

- Approved according to IEC 60 309-1, -2, -4
- Range from 16 A up to 125 A.
- IP 44 (splashproof) and IP67 (watertight).
- All contacts are self cleaning and calibrated, to maintain the accurate contact pressure, quality and performance over time.
- Plugs and Sockets for 63 and 125 A have pins and sleeves carriers in glass fiber reinforced polyamide.
- For devices in the Critical & Safe and Tough & Safe range, all external screws are made of stainless steel.
- Clear terminal markings inside and at the front of the devices.
- Switched interlocked socket-outlets for vertical or horizontal mounting.

Cewe Industrial Plugs & Sockets

Easy & Safe

Without saving on the quality the Easy & Safe is the range that has an ergonomic design and full of small practical features. The device has a natural designed grip that makes it easy to work with during connection. The combined cable clamp / cable gland, where the strain relief is created by tightening of the gland nut, has a locking mechanism that will continuously apply pressure to the cable.

The installation is easy done due to the clear terminal marking. After connecting the cables the housing is easily closed by a twist. The plastic material PA is used to provide a device that meets requirements of quality and safety.

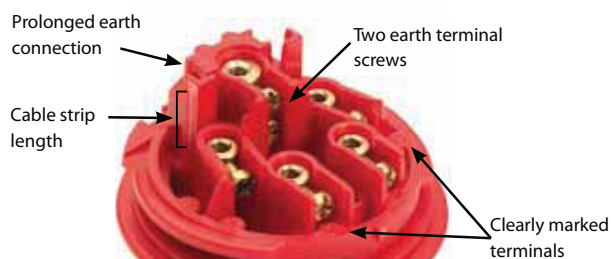

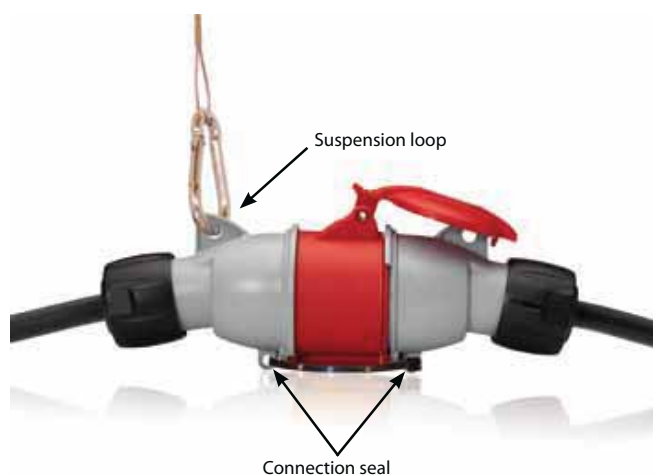

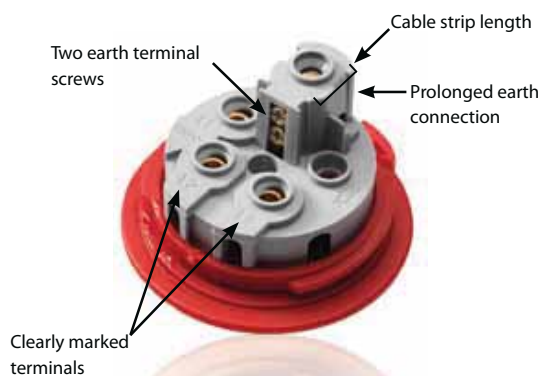

For the user, small features are included such as a sealing / locking feature to avoid accidental disconnection of for example a PA system. A suspension function that enables the user to hang the connector/plug that is not used on the wall or connect to a flexible wire in the ceiling (drop feed).

Features

- IP44 Splashproof
- 16 - 32 A
- PA6 plastic material
- IEC 60 309-1, -2
- Superior grip
- Compact design

Applications

- Light industry
- Construction sites
- Farms
- General equipment

Combination of hard and soft plastic material - both flexible and hard

Cable gland tightening torque

Cewe Industrial Plugs & Sockets

Tough & Safe

**Tough
& Safe**

Tough & Safe is the range for applications in environments that have high demand of functionality and safety. The robust housing is made of PBT plastic. The range Tough & Safe is available as watertight (IP67, 16 - 125A) and splashproof (IP44, 63A). The devices are equipped with internal and external cable clamps. The 125A devices are equipped with two screws on each terminal.

Features

- IP67 Watertight or IP44 Splashproof
- 16 - 125 A, 50 - 690 VAC
- IEC 60 309-1, -2
- All external screws are made of stainless steel.

Applications

- Industry / workshops
- Harbours / shipyards
- Mines
- Food & beverage

Clear marking, at the front and the rear of the terminals
Ground \perp
Neutral N
Phase L1, L2, L3

Internal and external cable clamp

Clean brass pins

External screws made of stainless steel

Type: 463P6W

Robust plastic housing that withstands most chemicals found in industrial environments

Two screws at each terminal to assure safe and reliable cable connection
Stainless steel (125 A)
Brass (16 - 63 A)

Rear terminals, raised lettering, identification contacts

Watertight chloroprene onion skin grommet

Type: 463C6W

Cewe Industrial Plugs & Sockets

Critical & Safe

Critical & Safe is the range for applications with high demands on safety, durability and performance. Perfect for applications with frequent connection / disconnection, and to use in public areas.

The housing is made of PBT or aluminum. PBT is a tough plastic material that withstands heavy-duty usage and most chemicals found in industrial environments. The aluminum housing is a mix of aluminium and silicon called Silumin, which gives an excellent protection against corrosion while being robust and tough against impact and sun light.

Features

- IP67 Watertight or IP44 Splashproof
- 16 - 125 A, 50 - 690 VAC
- IEC 60 309-2, -4
- All external screws are made of stainless steel

Applications

- Heavy / chemical industry
- Sawmills
- Airports
- Hospitals

Type: 4125MVS6WH

Brass threaded inserts

Padlockable handle

Space for wiring and easy access for cables

Material that withstands heavy-duty usage and most chemicals found in industrial environments

Mechanically interlocked to prevent making and breaking under load

Clear terminal marking, inside and outside the box

Ground \perp

Neutral N

Phase L1, L2, L3

Cover and mounting screws made of stainless steel

Rugged hinge mechanism pivots 180° for easy access during installation and maintenance

Pre-wired IEC receptacle accepts all manufacturer's IEC 60 309-2 plugs

DC Switching & Protection	110 - 111
AC Switching & Protection	112 - 113

The photovoltaic (PV) is seeing steady growth in the UK and is set to expand further.

ABB offers a wide range of products to the installer specifically for PV application.

The following pages offer an overview of these products.
For further information or assistance with PV, please consult us.

Solar PV

products for renewable energy

The UK Government have introduced a new initiative aimed at encouraging the nationwide adoption of renewable energy technologies.

Called the Feed-in Tariff, this initiative will see owners of renewable energy equipment being paid not only for the energy they use but also the amount of surplus energy they supply to the UK National Grid.

Inspired by similar schemes already operating in continental Europe, the UK Feed-in Tariff initiative is aimed at residential, commercial and industrial users of renewable energy sources. A table of the technologies covered are listed below.

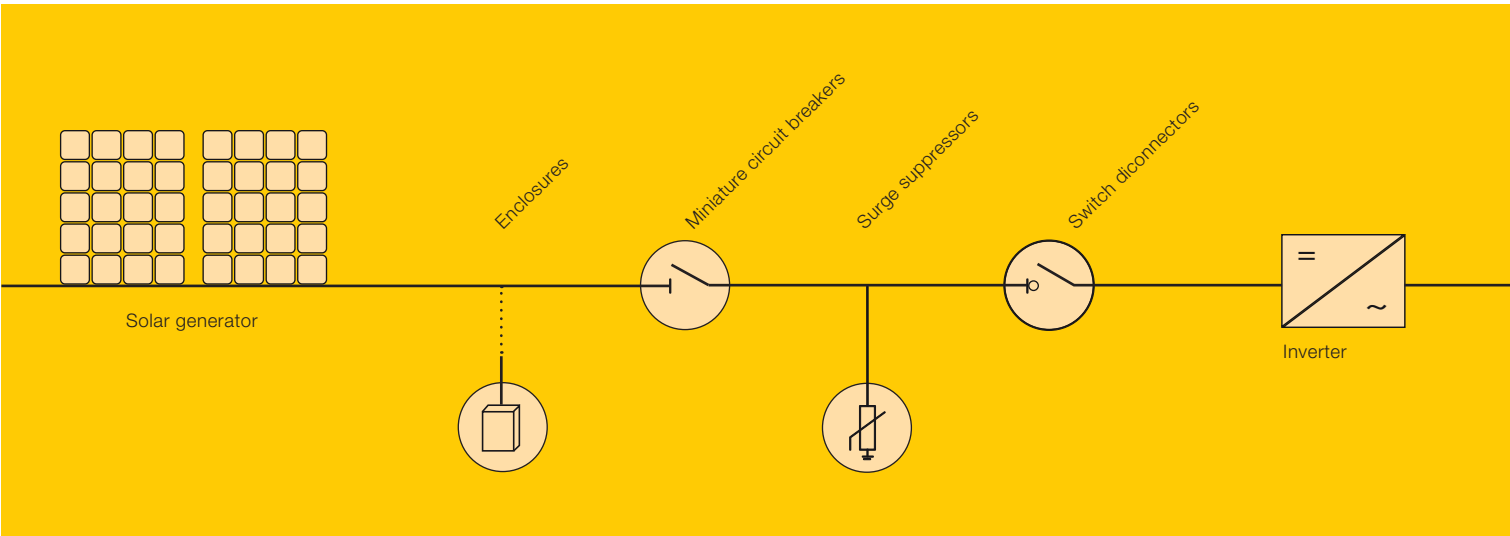

How does the Feed-in Tariff Work?

The Feed-in Tariff is based on the amount of energy produced by a renewable energy source, plus where surplus energy is produced, a bonus to cover energy exported to the National Grid. By effectively paying producers more for the energy they don't use, the system is also aimed at encouraging energy efficiency.

To cover periods when the renewable energy source may be not producing sufficient electricity to cover demand, additional energy may be imported from the National Grid, with the user paying their electricity supplier for the amount consumed.

Technology	Tariff amount (pence per kWh) for installation fitted periods:		
	April 2010 - March 2011	April 2011 - March 2012	April 2012 - March 2013
Solar photovoltaic <4 kW (new)	36.1	36.1	36.1
Solar photovoltaic <4 kW (retrofit)	41.3	41.3	41.3
Solar photovoltaic >4 - 10kW	36.1	36.1	33.0
Solar photovoltaic >10 - 100 kW	31.4	31.4	28.7
Solar photovoltaic >100 - 5MW	29.3	29.3	26.8

Solar PV

products for renewable energy

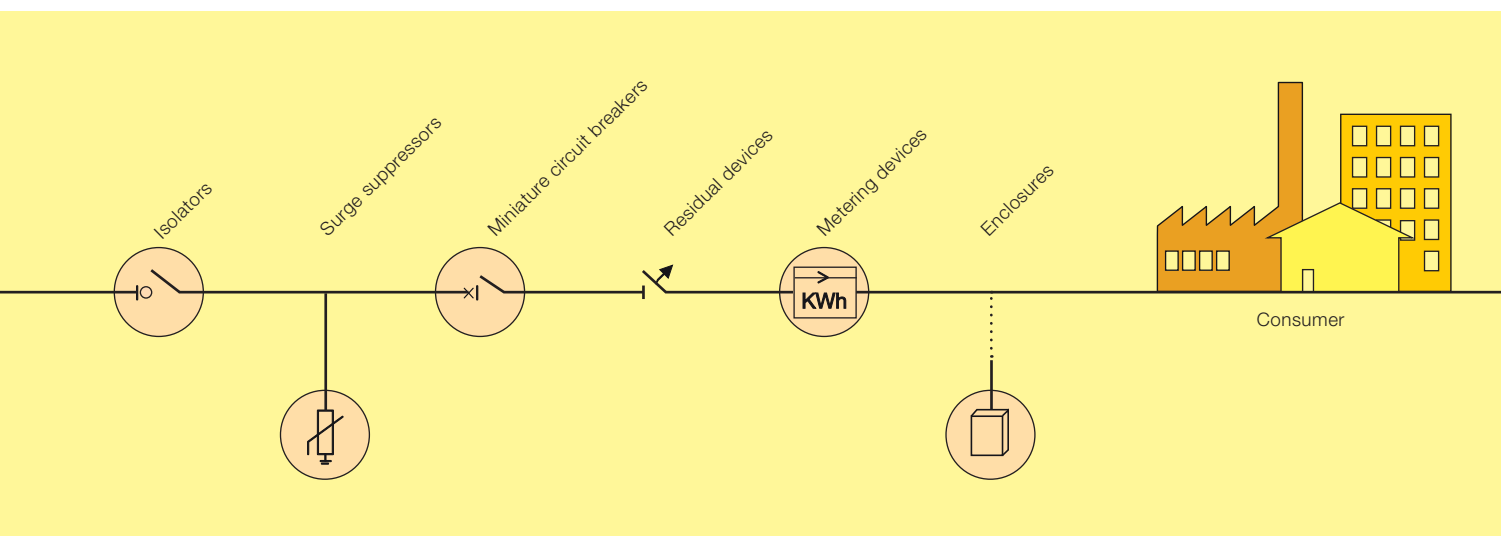

The components of photovoltaic systems

The efficiency and quality of a system are measured by the efficiency and quality of each individual component

An accurate choice of components, especially the modules and inverters, is of fundamental importance if a photovoltaic system is to be a success. Before it can be considered a good investment, a photovoltaic system must be able to function efficiently for at least 20 years in all weathers and under the blazing sun.

What is commonly called the “BOS” (Balance of System), i.e. the “rest of the system” (electromechanical equipment for protection, control and isolation purposes, cables), undoubtedly plays an important role in ensuring that people and the buildings connected to the system are properly protected, and that there is an adequate production of energy over the years. From an economic viewpoint, it is even more important for each individual component of a photovoltaic system to be chosen on the basis of the warranties provided by the product and by its manufacturer than it is for a normal electric system. This is because the operating specifications of each device must remain unchanged throughout the entire life cycle of the system and the relative investment.

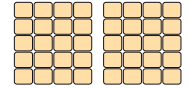

Always ready to meet any new demand from the market, ABB has developed a whole range of reliable products dedicated to photovoltaic applications and able to meet all installation requirements, from the string on the direct current side through to the alternate current grid connection point. ABB's products include string boxes, miniature circuit breakers, switch-disconnectors, residual current-operated circuit breakers, interface relays, energy meters, fuse disconnecting switches and fuses, surge arresters, consumer units and enclosures suitable for outdoor installation, all specially designed for these applications. ABB can also provide a series of “plug & operate” solutions, i.e. finished, wired and certified switchgear able to suit the requirements of a vast range of installations: from the individual string for domestic use to the large solar park.

AC Side

Solar PV

DC Side - Switching & Protection

S800 PV MCBs

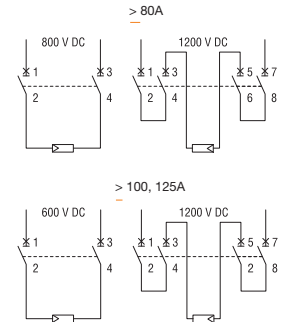

S800 PV-S miniature circuit-breakers and S800 PV-M switch disconnectors can be used in networks up to 1200 V d.c. (four-pole version). These products and their vast range of accessories (auxiliary contacts, release coils) can be used to create countless system configurations. The main features of S800 PV-S circuit-breakers are:

- interchangeable terminals
- fault signalling lever in the central position
- contact status displayed for each individual pole
- no restrictions as to polarity or power direction in the wiring
- use of the rotary door operating handle

Connection

Photovoltaic panel network
in earth-insulated systems

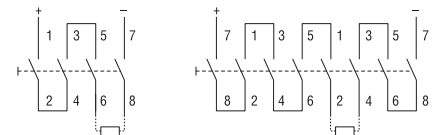

OT Isolators

OT series disconnectors are available with 16 A to 125 A rated current values in 3, 4, 6 and 8 pole versions, depending on the direct current voltage used.

The main features of OT disconnectors are:

- quick make-break mechanism with independent tripping function (in the OT 45...125 versions).
- accessories that are snap-fitted on the circuit-breakers
- OT 45 ... 125 switch-disconnector mechanism for installation on DIN channel.
- can be locked with a locking adapter

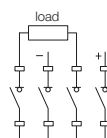

Tmax PV Disconnecter

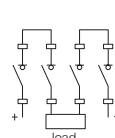

Tmax PV series disconnectors are available with up to 1600 A class DC-22B rated operating current values, for 1100 V d.c. maximum rated operating voltage. The switching devices of the Tmax PV series are the first box disconnectors for direct current high voltage available on the market. They are certainly of interest for use in any type of photovoltaic installation since they are ideal for all disconnecting requirements.

The main features of Tmax PV disconnectors are:

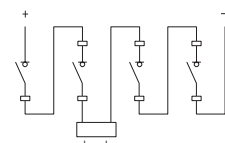

- Comprehensive range. There are 6 different sizes, from the compact T1 (which can be fixed to DIN channel) to T7, available in the two versions with operating lever and motor control
- Excellent performance-dimensions ratio
- Wide choice of accessories to suit every requirement

Circuit Diagram
Valid for T1D PV, T3D PV,
T6D PV, T7D PV,

Circuit Diagram
Valid for T4D PV, T5D PV

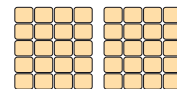

Circuit Diagram

Solar PV

DC Side - Switching & Protection

E90 Fuse Disconnectors

The E 90 PV series fuse disconnectors has been designed for up to 1000 V direct current voltage with DC-20B class of use. The E 90 PV series is specifically used for protecting photovoltaic systems against overcurrents and provides a reliable, compact and inexpensive solution since it uses 10.3 x 38 mm cylindrical fuses. The main features of E 90 PV fuses connectors are:

- Handle opening through 90° that allows the horizontal fuse to be easily inserted even when wearing gloves or using the thumb
- Only an additional 17 mm larger in the open position than in the closed position
- 25 mm² terminals with knurled terminal cage to allow the cable to be clamped in a better way
- Fully compatible with electric screwdrivers
- Pozidrive screws for flat-head and cross-point screwdrivers
- Lockable in the open position using the padlocks commonly available on the market, so as to ensure safe maintenance work
- Can be sealed in the closed position to prevent improper use
- Cooling chambers and ventilation slits to facilitate heat dispersion
- Versions with indicator light are available

OVR PV Surge Arresters

ABB provides a wide range of surge protection devices that have been specifically designed for photovoltaic systems.

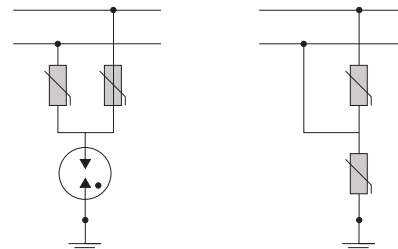

The main features of the OVR PV surge arresters are:

- built-in thermal protection with 25 A d.c. breaking capacity*
- removable cartridges for easy maintenance with no need to isolate the line
- remote signalling contact for monitoring the operating status (TS versions)
- no subsequent short-circuit current
- no risk if the polarity is reversed

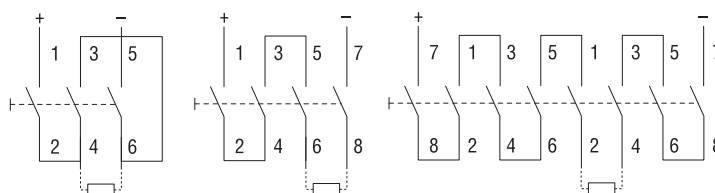

***Note:**

For surge protection device installed at points of the network where short circuit current exceeds 25A DC suitable protection must be provided

OTP Enclosed Disconnectors

- IP65 rated
- Grey plastic enclosure
- Standard handle - Red/Yellow (padlockable in the off position)
- Cable entries top and bottom

Solar PV

AC Side - Switching & Protection

S200M MCBs

The S200 M protect installations against overload and short circuit, ensuring reliability and safety for operations. They are selectively switchable, even under load, in the event of a fault or for maintenance purposes. The standstill times are minimised thanks to the devices' reclosing capability. These devices offer users confidence thanks to their 100% factory testing. The devices, with their wide range of accessories, are suitable for international use.

The S200 M are known for their ease of maintenance – thanks to a special type of fastening for easy removal of the device from its present installation. Supply is possible from above or below, also for busbars. Without busbars, two terminal sections can be used. The tripping behaviour caters to customer requirements (B, C, D, K, Z characteristics)

E200 Isolators

The isolator is used as a master switch on the AC side. It offers reliable and safe switching under load. Ease of maintenance is guaranteed by the special fastening for easy removal of the device from its present installation. The wide range of accessories facilitates use of all applications.

F200 PV-B RCCBs

Residual current devices ensure protection of people and installations against fault current to earth and fire risks. An RCD B type is required on the AC side in case of lack of electrical separation between the AC and the DC side. The devices save money and improve global efficiency by using PV connectors without an internal insulation transformer. The devices, with their wide range of accessories are suitable for international use. The RCCBs F202 PV B and F204 B are intended for installation of single and three phase PV converters. they protect against fire risks and leakage currents.

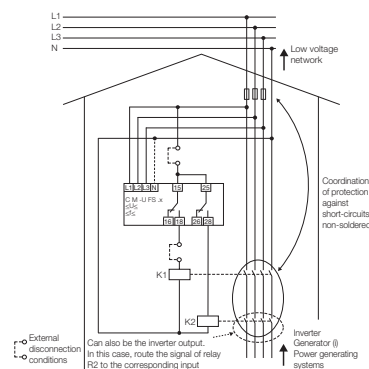

CM-UFS Interface relay for connection to the power grid

Even small distributed generating systems need to be connected to the power grid with guarantees as to completely safe operation, especially when the energy flow towards the network must be shut off for maintenance or if a fault occurs in the network itself.

Rapid disconnection is essential if hazardous situations for the people who must work on the lines are to be avoided. This sort of protection can be achieved with an automatic monitoring device able to immediately detect faults in the network. The CM-UFS interface, which conforms to both the Italian ENEL Distribuzione Directive for connections to the electricity main and to German DIN V VDE 0126-1-1, answers to the need for safety for both the installations and the operators in the case of faults and malfunctions in the public power grid during parallel operation.

The main features of the CM-UFS interface relay are:

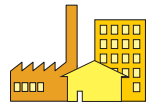

- Undervoltage protection
- Overvoltage protection
- Minimum frequency protection
- Maximum frequency protection
- Installation on DIN channel, dimension 22 mm
- Configurable connection for the neutral conductor
- 3 LED to indicate the operating status
- Power supply from the circuit under control
- Measurement of the true RMS value
- Can also be used for monitoring single-phase systems
- 2 switch contacts (SPDT)

Solar PV

AC Side - Switching & Protection

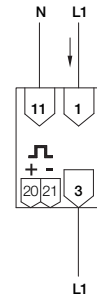

ODINsingle DELTAplus Modular Energy Meters

Modular energy meters are ideal for metering and monitoring the energy produced by a photovoltaic system. All the meters are tested and comply with the European MID directive, which allows the meters to be used whenever the energy readings must be used for payment quantification purposes. The terminal boards can be sealed so as to prevent the meter's programming functions from being accessed and to safeguard the inputs of the measuring signals.

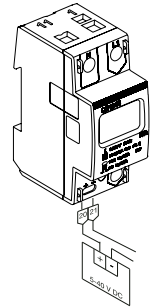

ODINsingle:

- Accuracy class B (1)
- MID certified for sub-billing purposes
- Direct connection in single-phase systems of up to 65 A
- OD1365 with pulse output
- OD1365 with re-settable register
- LCD display, excellent visibility in all lighting conditions
- Front LED for checking load

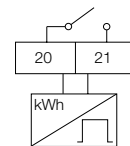

Direct connection

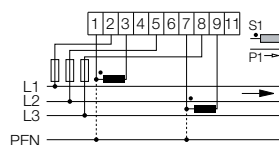

Pulse output

DELTAplus:

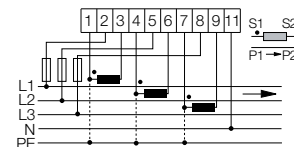

- Accuracy class B (1)
- MID certified for sub-billing purposes
- Connection by current and voltage transformers
- Active energy metering in three phase systems
- With programmable pulse output
- Electric parameters, voltage, current, power and frequency displayed
- Installation assessment: phase presence and sequence
- Front LED for checking load

Pulse output of active energy meters

Threephase system with neutral

Threephase system without neutral

String Boxes

Fuse Disconnectors E90 PV

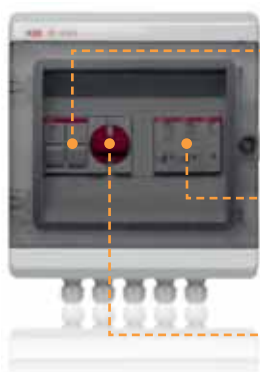

E90 PV have been designed for up to 1000 V d.c. voltage values (class DC-20B) and are ideally used in photovoltaic systems to isolate the individual strings and protect them against short circuits. All ABB string boxes are supplied with fuses as part of the standard equipment.

Surge Arresters OVR PV

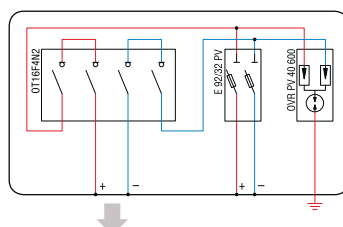

All ABB string boxes are equipped with OVR PV series surge arresters specifically designed for photovoltaic applications. Only a specifically designed product can ensure that the cartridge functions properly until the end of its useful life, without the risk of short-circuits or dangerous polarity reversals.

Disconnectors OT

High-performance, readily available OT disconnectors stand out for their high voltage values and compliance with the most advanced international standards. They are an excellent choice for small systems both cost-wise and as to performance.

Full range of product and technical information place this part number in a search engine and download
9AKK105152A5119

Note:

The following string boxes show options for 1, 2, 3 and 4 string.
Please consult us for other variations.

Terms and Conditions

1. GENERAL

- 1.1. Whenever ABB Limited ("ABB") has referred to Orgalime S 2000 in an offer or order acknowledgement, Orgalime S 2000 and this Addendum shall apply to the resulting contract. If the Purchaser refers to other conditions, such conditions shall apply only to the extent ABB agrees to them in writing.
- 1.2. The Purchaser represents that it has access to the Orgalime S 2000 general conditions.
- 1.3. In the event of any contradictions between this Addendum and Orgalime S 2000, this Addendum shall prevail.

2. DEFINITIONS

- 2.1. In Orgalime S 2000 and this Addendum,
 - (a) "Article" shall refer to an article in this Addendum;
 - (b) "Clause" shall refer to a clause in Orgalime S 2000;
 - (c) "Orgalime S 2000" shall mean Orgalime's General Conditions for the Supply of Mechanical, Electrical and Electronic Products, August 2000 edition;
 - (d) "Product" shall mean all goods and services to be provided by ABB under this contract as described in ABB's offer;
 - (e) "Purchaser" shall mean the other party to this contract; and
 - (f) "Supplier" shall mean ABB.

3. STANDARD PRODUCTS

- 3.1. Unless agreed otherwise in writing, all Products are to factory standard, including in respect of documentation, manuals, reports, finish and packing.
- 3.2. The Product is not warranted to be fit for any particular purpose, unless specified and warranted by ABB in writing.

4. DRAWINGS AND DESCRIPTIONS

- 4.1. Where ABB is to submit drawings for approval, the Purchaser approves or otherwise within the time given in the contract, or, if no time limit is specified, within fourteen (14) days of receipt, failing which they shall be deemed to have been approved.
- 4.2. The contract language shall be in English. All contract communications and documentation shall be in English.

5. VARIATIONS

- 5.1. Either party may request variations to the contract in writing. Where the parties agree to vary the contract, the parties shall also agree any revised scope, purchase price and/or delivery date prior to ABB undertaking the variation work.
- 5.2. No such variations shall be effective unless agreed in writing and signed by both parties.
- 5.2. If during the contract there are changes in laws, orders, regulations, standards or by-laws, which affect the cost or time of performance of this contract, then an equitable adjustment shall be made to the date(s) and price(s) resulting therefrom.

6. DELIVERY, PASSING OF RISK

- 6.1. The Purchaser shall inspect the Products and notify ABB in writing of any loss, shortage, excess, or transit damage within forty-eight (48) hours of delivery and permit ABB immediate rights of inspection and investigation. Failing which, any remedial costs shall be the responsibility of the Purchaser.
- 6.2. The Purchaser shall only be entitled to request proof of delivery within five (5) days of receipt of ABB's invoice, failing which, delivery is deemed to have taken place. ABB shall provide such proof within five (5) days of receipt.
- 6.3. For the avoidance of doubt, risk in the Product shall pass to the Purchaser at the time specified in the applicable

INCOTERMS. From the time when risk in the Products passes until the time when title passes to the Purchaser in accordance with Article 8.3, the Purchaser shall insure the Products for their full value with a reputable insurer and hold the proceeds of any sale or claim on such insurance policy on trust for ABB, remitting to ABB the proceeds upon demand.

7. PAYMENT & VAT

- 7.1. Payment shall be made by the Purchaser no later than thirty (30) days from the date of the invoice. Time of payment is of the essence of the contract and ABB reserves the right to suspend the provision of Products to the Purchaser where any amounts are overdue under the contract or under any other contract until all such amounts have been paid. No queries concerning an invoice will be considered later than fourteen (14) days from the date of its issue. Payment may be made via BACS.
- 7.2. Payment shall be made in the currency quoted by ABB.
- 7.3. Without prejudice to any other right or remedy, ABB will be entitled to set-off any amount otherwise due to the Purchaser under this contract or any other contract against any sum or sums which the Purchaser is or may be liable to pay ABB or recover any such amount as a debt.
- 7.4. Where ABB has entered into a "Credit Agreement" with the Purchaser, the Credit Agreement with its credit limit shall form part of the contract. To the extent permitted by applicable law, if in ABB's reasonable opinion there are grounds for doubting the creditworthiness of the Purchaser at any time, such as but not limited to, the Purchaser's failure to pay ABB's invoice on this contract or any other contract when due and/or the Purchaser exceeding its agreed credit limit with ABB, then ABB may refuse to proceed with orders or suspend delivery of Products to the Purchaser, under this contract and any other contract, agreement or arrangement entered into with the Purchaser whether independent of or connected to this contract without being in breach of contract and without incurring any liability to the Purchaser.
- 7.5. The purchase price is strictly net and exclusive of VAT.

8. RETENTION OF TITLE

- 8.1. Until title in the Product has passed to the Purchaser, the Purchaser shall keep the Product clearly marked as being ABB's and store it separately from the Purchaser's own equipment. ABB shall be entitled during normal business hours to enter the Purchaser's premises in order to inspect the Product.
- 8.2. Should the contract be terminated by ABB for any reason before title in the Product has passed to the Purchaser, or ABB has grounds for doubting the creditworthiness of the Purchaser (cf. Article 7.4), ABB shall be entitled during normal business hours to enter the Purchaser's premises and recover the Product. ABB reserves the right to dispose of any Product so recovered.
- 8.3. To the extent permitted by law, title to the Product shall remain with ABB until it has received payment in full due under the contract and any other sums due (together with any interest which may have accrued) in respect of any other goods or services previously or subsequently supplied by ABB to the Purchaser under any other agreement. When such payments have been received by ABB title shall pass to the Purchaser.
- 8.4. Notwithstanding any appropriation by the Purchaser to the contrary, all payments made by the Purchaser to ABB shall be appropriated first to the Products which have been resold by the Purchaser and then to the Products which remain in the Purchaser's possession or control.
- 8.5. If the Purchaser resells any Products in which title has not passed to the Purchaser, the proceeds of such resale shall (as between ABB and the Purchaser only) be made by the Purchaser as agent for ABB.

Terms and Conditions

9. LIABILITY FOR DEFECTS

9.1. Except as expressly set out in Orgalime S2000 and this Addendum, all conditions, warranties and representations, implied by statute, common law or otherwise, in relation to the supply, non supply or delay in supplying the Products are excluded to the fullest extent permitted by law and the warranties, as stipulated in Clauses 22-36 and Article 9.2, are exclusive and in lieu of all other warranties, conditions, terms, representations, statements, undertakings and obligations whether expressed or implied by statute, common law, custom, usage or otherwise, all of which are excluded to the fullest extent permitted by law.

9.2. Save as stipulated in Clauses 22-36, the necessary repair, replacement or re-performance shall constitute ABB's total liability to the Purchaser for defects in design, material or workmanship.

10. FORCE MAJEURE

10.1. Should a Force Majeure event occur, the delivery date(s) shall be extended by a period equal to the duration of the Force Majeure event plus a reasonable time to overcome the consequences and all additional costs and expenses incurred by ABB shall be paid by the Purchaser in addition to the purchase price.

10.2. For the elimination of any doubt, "circumstances beyond the control of the parties", (cf. Clause 39), shall be deemed to include, without limitation, any acts of God, act of terrorism, sanction, blockage, import restriction or any other act or failure to act of any state or national government authority.

11. EXPORT RESTRICTIONS AND NON-AUTHORISED USE

11.1. Unless expressly agreed otherwise in writing by ABB, the Product is provided on strict condition that:

- a) the Product is solely for civil use;
- b) the Product is not to be supplied to any country whether directly or indirectly or for any application where such supply or application is prohibited by any law or regulation binding or effective in that country, in the UK, the US or the country of manufacture;
- c) the Product will not in any way be installed, used or applied in or in connection with the operation of any nuclear facilities such as but not limited to nuclear power plants, nuclear fuel manufacturing plants, uranium enrichment plants, spent nuclear fuel stores or research reactors; and
- d) whenever ABB so requests, the Purchaser shall provide ABB with an end-user certificate, which shall be on such terms and in such form as ABB may require and signed by the end-user confirming that it shall comply with Article 11.1 (a) to (c). Until such time as ABB has received such end-user certificate, ABB shall be entitled to suspend the performance under this contract. The end-user certificate shall form part of this contract. The Purchaser agrees and accepts that it shall be liable for any acts or omissions in relation to the use of the Products (including (without limit) the acts or omissions of its employees, agents, subcontractors, customers, any end user of the Products and/or any third party) in breach any of the provisions set out in Article 11.1 (a) to (c) and further agrees that such a breach shall be deemed a fundamental breach of contract by the Purchaser, and shall entitle ABB to terminate the contract forthwith by giving notice to the Purchaser.

11.2. The Purchaser shall comply with all laws and other restrictions on the export, re-export or import of any Product or technology licensed under the contract as may be imposed from time to time by the UK or US Governments or their agencies, and shall procure such export licence or other Government approval as may be required. The

Purchaser shall require that all third parties receiving such Product or technology from the Purchaser comply with this requirement. ABB shall assist the Purchaser in every reasonable way in obtaining of such licences at the Purchaser's cost.

11.3. The performance by either of the parties of an obligation under this contract, which performance requires an export or import licence or other government approval, and any other obligation affected shall, to the extent it is necessary, automatically be suspended until such licence or approval as mentioned in Article 11.2 is given. If such licence is not granted within a reasonable time or is revoked by the appropriate authorities, ABB shall be entitled to terminate this contract, and the Purchaser shall indemnify ABB on demand for any loss or damage which ABB may suffer or incur as a result of such termination.

11.4. ABB may at its reasonable discretion, without breaching the contract, delay, withhold or refuse the provision of services to be undertaken in any territory or upon any site deemed by ABB to be unsafe or unfit for ABB's personnel, upon notice of which the parties may agree to reschedule or remove said portion of services from scope.

11.5. The Purchaser shall keep ABB, its officers, directors, employees, agents and advisers indemnified against any and all claims and liabilities arising out of any breach by the Purchaser or any for whom the Purchaser is liable (which shall, without limitation, include the end-user) of any of the provisions set out in this Article 11.

12. CONFIDENTIALITY

12.1. The Purchaser shall keep all information communicated to the Purchaser in connection with this contract, or otherwise concerning ABB's business, secret and confidential, and will not use the same except for the purposes of performing this contract.

13. INSURANCE

13.1. ABB shall maintain Employer's Liability insurance as required by law and Public/Products Liability insurance in respect of its obligations and liabilities under the contract for an amount of two million pounds (£2,000,000) per one event and in the aggregate. ABB shall upon request produce to the Purchaser evidence of satisfactory policies of insurance in the form of its Brokers letter.

14. INDEMNIFICATION

14.1. If Products are to be manufactured or any process is to be applied to Products by ABB in accordance with a specification submitted by the Purchaser, the Purchaser shall indemnify ABB against all losses, damages, costs (including legal costs), expenses, liabilities and claims suffered or incurred by ABB in connection with infringement of any intellectual property rights of any third party resulting from ABB's use of the Purchaser's specification.

15. LIMITATION OF LIABILITY

15.1. To the maximum extent permitted by law, and notwithstanding anything to the contrary in this contract, other than the express provisions for liquidated damages, in no event shall ABB be liable to the Purchaser, whether as a result of breach of contract, warranty, guarantee, indemnity, tort (including negligence), strict liability, statutory duty or otherwise, for any of the following damages or losses, in each case whether direct or indirect, such as, but not limited to:

- | | |
|-------------------------------|-----------------------------|
| (a) loss of revenue, | (b) loss of profit, |
| (c) loss of contract, | (d) loss of business, |
| (e) loss of use, | (f) loss of production, |
| (g) interruption of business, | (h) loss of operation time, |
| (i) costs of capital, | (j) economic loss, |

Terms and Conditions

- (k) costs in connection with interruption of operation, or
- (l) any special, incidental or consequential loss or damage, howsoever caused even if ABB was advised of the possibility of them in advance.
- 15.2. To the maximum extent permitted by law, and notwithstanding anything to the contrary in this contract, ABB's total liability in respect of any and all claims for damages or losses, caused by breach of contract, warranty, guarantee, indemnity, tort (including negligence), strict liability, statutory duty or otherwise, which may arise in connection with its performance or non-performance under this contract shall not exceed in the aggregate the total purchase price.
- 15.3. The Purchaser acknowledges that the contents of this Article 15 have been especially brought to the Purchaser's attention, and agree the exclusions and limitations on liability are reasonable in the circumstances.
- 16. LIMITATION PERIOD
- 16.1. Subject to law as regards personal injury and death, the Purchaser shall have no claim against ABB, in contract or in tort, in relation to anything performed or delivered under this contract (including claims for defective Products, services or goods), unless ABB has been notified in writing of such claim within twenty-four (24) months of delivery of the Product.
- 17. TERMINATION
- 17.1. Should
 - (a) the Purchaser's payments be overdue by more than fourteen (14) days;
 - (b) a breach of the contract occurs in the circumstances set out in Article 11.1(d) or in Article 19.1;
 - (c) proceedings be commenced to wind up the Purchaser (except for the purpose of solvent amalgamation or reconstruction);
 - (d) any composition or arrangement with the Purchaser's creditors be made;
 - (e) the Purchaser be put into administration, or if a receiver is appointed;
 - (f) the Purchaser stops or suspend payment of its debts or is unable to, or has no real prospect of being able to, or admits an inability to, pay its debts as they fall due or fails to satisfy any judgment debt in whole or in part within fourteen (14) days; or
 - (g) the Purchaser ceases or threatens to cease to carry on the whole or a substantial part of its business or is dissolved;ABB shall be entitled (without incurring any liability to the Purchaser) to terminate the contract immediately by notice in writing to the Purchaser, and thereupon to recover any loss or damage ABB has suffered or incurred as a result of such termination.
- 18. EXCLUSION OF THIRD PARTY RIGHTS
- 18.1. The parties do not intend that a person who is not a party to this contract shall have any rights to enforce any term of this contract.
- 19. MISCELLANEOUS
- 19.1. The Purchaser shall acquaint itself and comply with ABB's Code of Conduct as displayed on ABB's website (<http://www.abb.com>) as may be updated or modified from time to time.
- 19.2. This contract constitutes the complete understanding between the parties and save in respect of fraud supersedes all previous representations, negotiations and agreements in respect thereof. Neither party shall be bound by any terms other than as expressly provided in this contract or as subsequently agreed between the parties in writing.
- 19.3. The Purchaser shall not use the name or logo of ABB or product designations on any letter heading, publication, advertisement or other literature without prior written approval of ABB, such approval shall be at ABB's sole discretion.
- 19.4. The Purchaser may not subcontract, transfer or assign any of its rights or obligations in connection with this contract.
- 19.5. The invalidity, illegality or unenforceability of any provision of this contract shall not affect the validity of the remaining provisions. If any provision proves to be invalid, illegal or unenforceable, the parties shall replace such provision by a valid new one having an effect as close as possible to the original provision.
- 20. GOVERNING LAW
- 20.1. This contract shall in all respects be governed by and construed in accordance with the laws of England and Wales. The parties agree that the United Nations Convention On Contracts For The International Sale Of Goods 1980 shall not apply to this contract (even if the UK or any part thereof should accede to the said convention).
