

ACDelco®

Brake Pad

Catalogue: Issue 5

Brake Pad warranty

ACDelco Brake Pads are warranted nationally against faulty workmanship and materials for a period of 1 year or 20,000km (whichever comes first) from the purchase date.

WARRANTY CONDITIONS

This warranty does not cover:

- / Normal wear & tear.
- / Loss of time, inconveniences, loss of use or any other consequential damages.
- / Labour for removal, and replacement of the unit, from the vehicle unless prior written approval has been obtained from ACDelco.
- / Parts which have been subjected to deliberate abuse.
- / Conditions resulting from abnormal wear, negligence, alterations or accidents.
- / Incorrect fitment.
- / Parts used in an incorrect application or parts that are not used for their intended purpose.

DISCLAIMER

Certain information in this catalogue has been compiled from data published by original equipment manufacturers and other parties. ACDelco is unable to warrant the accuracy of third party data, and does not accept responsibility for loss or damage of any kind caused as a result of such data being inaccurate.

About ACDelco durastop brake pads

ACDelco DURASTOP BRAKE PADS

ACDelco Durastop Disc Brake Pads are an ideal choice when it comes to quiet, confident braking.

ACDelco Durastop Disc Brake Pads provide drivers with confident braking over a wide range of operating temperatures and conditions. The ACDelco Durastop Disc Brake Pad range covers a wide range of vehicle applications and offers a longer wearing, low dust formulation with excellent stopping performance.

Features & Benefits

- / Every ACDelco Durastop Disc Brake Pad has been formulated to the vehicle's requirements to ensure safe and consistent stopping ability.
- / ACDelco Durastop Disc Brake Pads provide optimum noise suppression and performance using unique formulations and combined with shims, slots and chamfers where needed.
- / Each disc brake pad backing plate is protected by a premium powder coated finish, ensuring professional protection and appearance.
- / The ACDelco Durastop Brake Pad compounds are selected to suit specific vehicle applications and the materials utilised are 100% asbestos free.
- / ACDelco Durastop Disc Brake Pads friction levels are very stable across a broad range of operating temperatures, and create low levels of dust.
- / All ACDelco Durastop Brake Pads are designed to provide you optimum performance and durability.

About ACDelco

high performance brake pads

ACDelco HIGH PERFORMANCE BRAKE PADS

ACDelco High Performance Brake Pads have a high friction rating pad material that has been tested and proven to provide exceptional stopping performance consistently across a wide range of operating temperatures.

ACDelco High Performance Brake Pads are ideal for performance and heavy duty applications, providing braking confidence in extreme conditions including emergency stopping, repeated downhill braking and towing applications.

ACDelco High Performance Brake Pads are ideal for high speed touring, towing and competition driving and are available for limited applications, as set out on page 39 and 40.

ACDelco High Performance Brake Pads are an extension of the Durastop range and are highlighted with a yellow label and an X at the end of the part number. Eg: Standard Durastop Part ACD1331 and High Performance Part ACD1331X.

Features & Benefits

- / High performance friction material
- / Consistent braking performance over extreme temperatures
- / Designed for performance and heavy duty applications
- / Provides braking confidence in extreme situations
- / Fitment of product does not void your new car warranty

Brake Disc Rotors

disc thickness variation or DTV

WHAT IS DTV?

Disc thickness variation (DTV) is where the rotor or disc varies in thickness as measured in the diagram.

WHAT DOES IT CAUSE?

As the disc rotates through the calliper the variation in disc thickness results in a variation in braking pressure applied by the disc pads to the rotor. This variation in braking effort is translated to vibration that can be felt through the vehicle. (e.g. Pedal pulsing, steering shimmy, floor pan vibration)

HOW DOES IT OCCUR?

Uneven wear of the rotor during service. This means DTV often does not become apparent until 10,000 to 15,000 kms after disc machining or replacement. Poorly serviced callipers can accelerate the occurrence of DTV.

HOW DO YOU MEASURE IT?

Measure the thickness of the rotor 25mm in front of the outer edge using a Vernier calliper. This measurement should be taken at a minimum of 10 points around the circumference. There should be no greater than 0.1mm variance in any of the measurements.

HOW DO YOU FIX IT?

Machine or replace the rotor to ensure rotor run out is reduced to a minimum. Overhaul callipers and ensure slide pins move freely and piston seals are in good condition.

Brake Workshop Guide

how to machine, clean & test disc brakes

DISC MACHINING & PREPARATION

1. Machine disc using the slowest feed rate. Do not take heavy cuts. The final cut should be minimal depth to minimise any grooving on the surface.
2. After machining, clean the disc with 240 grit emery on both surfaces (do this while the disc is spinning on the lathe) to obtain a smooth non-directional surface finish.
3. Finally clean the disc surfaces off with a solvent such as acetone or MEK. Do not use an oil based solvent.

CLEANING THE DISCS

1. Disc machining may leave a fine film of graphite on the disc surface. When picked up by semi-metallic pads, the graphite has a lubricating effect and braking may be affected. Always clean down the disc surfaces using a non oil based solvent, after machining. Never use petrol as it contains waxes which can remain on the disc surfaces after the solvents evaporate. The waxes act as a lubricant, reducing braking efficiency.
2. After fitting, once again wipe down the disc. Only use a clean rag and a non oil based solvent.
3. Check that the brakes have been repaired and fitted correctly using the following testing procedure. Remember to tell your customer that unnecessary, hard braking shortens pad life.

BEDDING-IN

Anytime you replace brake pads you should follow the manufacturers recommended bedding in procedure. As a guide (in a safe and controlled environment).

1. Accelerate to 50km/h.
2. Apply the brake pedal using moderate to firm pedal effort, reducing speed to 5km/h.
3. Drive 200 to 300 metres accelerating to 50km/h.
4. Repeat 8 to 10 times.

Note that excessive heating or hard use when new will cause brake pad glazing and affect brake pad performance.

Brake Pad application list

Information in this application listing section has been compiled from data published from Original Equipment Manufacturers and other parties. This data may change from time to time and ACDelco is unable to warrant the accuracy of this data and does not accept responsibility for loss or damage of any kind caused as a result of such data being inaccurate.

Brake Consumables

brake fluid & brake parts cleaner

**ACDelco BRAKE FLUID
SUPER DOT 4 - 500ml**
92147062

This is a premium quality brake fluid specifically formulated to meet GMH HN1796 specification and suits all Holden vehicles built prior to January 2008.

For use on:

- / Disc brakes
- / Drum brakes
- / Clutch systems

**ACDelco BRAKE FLUID
GLOBAL DOT 4 - 500ml**
92238374

This brake fluid is a premium quality brake fluid specifically formulated to meet GMH HN2456 specification and suits all Holden vehicles built from January 2008.

For use on:

- / Disc brakes
- / Drum brakes
- / Clutch systems

ACDelco BRAKE PARTS CLEANER
88900163

Oil, grease, grime, and brake fluid build up on brake component can cause improper operation.

Benefits:

- / Removes soil, grease, grime and dust.
- / Cleans disassembled brake parts.
- / Also can be used for cleaning some electrical contacts, carburetor linkages, starters, alternators, electric motors.
- / Dries without leaving residue.

Disc Brake Rotors

fit with confidence!

ACDelco's capability to maintain extremely tight tolerances coupled with well researched design elements result in significantly improved disc rotor performance.

Features & Benefits:

- / ACDelco disc brake rotors are engineered to Original Equipment design criteria and manufactured to the demanding TS16949 quality standard in QS9000 rated facilities.
- / A focus on high quality casting materials, tight machining tolerances and key design features, ensure that ACDelco disc brake rotors deliver high levels of replacement brake performance.
- / To ensure optimum performance on initial fitment all ACDelco Brake Disc Rotors are balanced during the machining process.
- / ACDelco disc brake rotors are engineered to minimise brake shudder, improve thermal efficiency and reduce brake noise.
- / All ACDelco disc rotors carry a 12 month / 20,000km national warranty.

ACDelco Product Range:

ACDelco offers a comprehensive product range of Quality Automotive Parts.
