

CANALES METÁLICOS PORTACABLES

TARIFA DE PRECIOS B-1 **JUNIO 2010**

CANALES METÁLICOS PARA CABLES ELECTRICOS

AISCAN, S.L., presenta en esta tarifa de precios Junio 2010, su nueva línea de canales metálicos perforados y ciegos.

Construidos con chapa de acero de alta calidad, perfilados y galvanizados sendzimir o por inmersión en caliente, todo ello según la vigente normativa, son la más reciente expresión de las últimas tendencias estéticas y funcionales a nivel internacional en este tipo de productos.

La tapa, cuando ésta es necesaria, se coloca a presión con mucha facilidad, pero de forma que sea difícil extraerla y no se pueda desprender accidentalmente. En el interior de esta tarifa, pueden encontrar una detallada y sencilla descripción gráfica (pag.4).

Aportamos al mercado eléctrico, un nuevo sistema de unión de tramos de bandeja sin tornillos, que se puede considerar sin lugar a dudas el más seguro y rápido existente. Este sistema, patentado y desarrollado por el departamento técnico de AISCAN, S.L., hace posible la unión de dos tramos rectos en 2 seg. (dos segundos), lo que representa un significativo ahorro de tiempo en el montaje. También lo mostramos gráficamente en el interior (pag.5).

Los accesorios para cambios de dirección, tanto en sentido horizontal como vertical, son de 90° y 45°, preformados curvos, para así adaptarse mejor a la trayectoria de los cables cuando cambian de dirección o de plano. También de esta manera, se consigue una estética agradable de la instalación, muy importante, dado que normalmente queda a la vista.

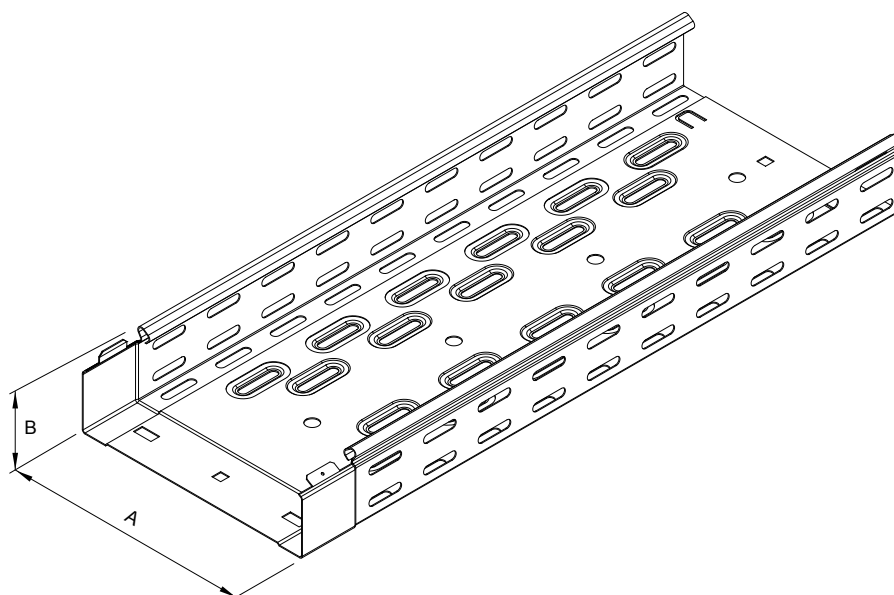

Tanto los tramos rectos como los accesorios, se fabrican en cuatro alturas de ala: 35, 60, 80 y 100 mm, a fin de conseguir una mayor economía, al poder elegir el canal más adecuado, dependiendo del volumen y el peso de los cables que deberá contener.

La amplia gama de soportes, con sistemas de pared en sentido horizontal y vertical, suspensiones de techo y separadores de suelo, completan esta oferta, que ha sido elaborada para la satisfacción de nuestros clientes más exigentes.

Bajo demanda, podemos suministrar todos los productos de esta tarifa en acero inoxidable o cualquier otro tratamiento anticorrosivo.
