CABLE STRUCTURE

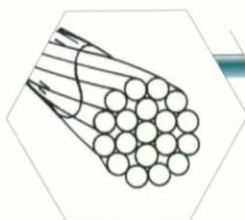

P.T.F.E. STAINLESS

Rust proof pre-stretched stainless steel with flat surface for durability and precision coated with P. T. F. E. (Polytetraflouroethylene) for extra durability, all weatherproofing, friction free performance.

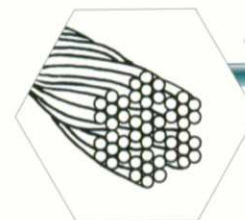

P.T.F.E. GALVANIZE

Pre-stretched galvanize steel with flat surface for precision coated with P.T.F.E. (Polytetraflouroethylene) for all weatherproofing and friction free performance.

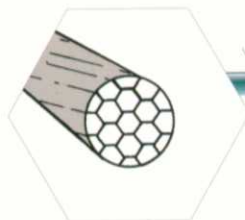

NYLON COATED

Coated cable for corrosion resistant and frictionless.

7x7 STRAND

Flexible 49 strands that handles all curves and turn.

SLICK STAINLESS

Rust free pre-stretched stainless steel with flat surface for low friction and long lasting.

STAINLESS STEEL

A rust free for long lasting and durability.

SLICK GALVANIZE

Pre-stretched galvanize steel with flat surface for less friction.

GALVANIZE STEEL

Tried and true, cost effective and durable.
