INNOVATIVE SOLUTIONS from ATEK SENSOR

The MRS (Magnetic Rotary System) is developed to enable precise arc and angle measurements on the circumference of a rotating circular object, e.g. rotary tables. In contrary to the classical measurement systems utilizing rotary encoders, MRS is free from measurement uncertainties caused by the angular deviations at the circumference as the diameter of the table gets larger. MRS is easy to install, simple to use. The system comprises magnetic tape, twin sensors, a controller with a display and accessories for installation. The system works contactless, thus free from any mechanical wear and vibrations or jamming.

MRS – MAGNETIC ROTARY SYSTEM

SPECIAL FEATURES

- High degree of reliability
- Angle Measuring
- High Durability
- High Accuracy with double Sensor
- Magnetic measuring process
- Clockwise / Anticlockwise Inkremental Measur
- Various diameters
100mm – 10.000mm

MRS Series are mainly used in ;

- Indexing Table
- Testing Machines
- Printing Machinery
- Telescopes
- Wind and Solar Panel Systems
- All Angle Process

LTM is a high precision potentiometric industrial linear motion transducer with a long lasting conductive track suitable for absolute position measuring in control and Measurement applications. Designed for the direct, absolute measurement of displacement or length in control regulation and measuring applications.

High resolution (0.01 mm) combined with a stroke length of up to 1000 mm permits the accurate measurement of linear displacement.

LTM Series Potentiometric Linear Transducers are mainly used in ;

- Press brake Machines
- Horizontal Band Saw Machines
- Transfer Machines
- Hydraulic Machines
- Sheet metal working machines
- Bending presses
- Plastic & Metal Injection Machines
- Textile Machines
- Robotics/materials handling
- Profile Cutting Machines
- CNC Pipe Twisting Machines

SPECIAL FEATURES

- High resolution up to 0,001 mm resolution
- Sturdy metal case
- Best technology in compact dimensions
- Shielded metal enclosure
- Easy mounting by gluing
- Contact-less and wear free system
- High resistance to vibrations
- Protection class IP67
- Resistant to humidity
- High accuracy
- Reliability reading transducer
- Measuring lengths of up to 100 m.
- Connection cable up to 20 m.

MLS-1 Magnetic Linear Encoder Systems:

The purpose of these sensors is to measure linear displacements on industrial machines & automation systems. High precision Magnetic Linear Encoder MLS-1 System operates with incremental principle. It consists of a sensing head and a magnetically encoded tape. Magnetic tapes are commonly made from a magnetic tape itself made from Strontium ferrite merged into a plastic or rubber (elastomer) matrix which is then bonded onto a steel support. The sensing head glides over the tape, with a gap up to 2,5 mm. Thus, since the system works on the principle of magnetism, in contrary optical systems it is highly immune to contamination from oils, dust etc. The tape has alternating magnetic north/south poles at a certain distance called the pole pitch. As the sensor is moved along the magnetic tape it detects the displacement and produces an output signal equivalent to that of an incremental encoder or a linear scale. Resolution is up to 1 μ m. Distance (gaps) of up to 2,5 mm (approx. 50 % of the pole width) above the magnetic tape are permitted. Also, accuracy classes of $\pm 5 \mu$ m is achieved. These properties make it ideal for use in harsh, dusty industrial environments such as wood industry.

MLS1 Sensor HEAD Technical Specifications

Resolution Types	5 μ m , 10 μ m , 25 μ m and 62,5 μ m or on request
Output Circuit	Push-Pull or TLL RS 422 Line Driver
Output Signals	A, /A, B, /B, Z, /Z
Input Current	Max. 40mA per channel
Power Supply	10...30VDC $\pm$ %20 or 5VDC $\pm$ %5
Dimension	See drawing
Housing Material	Aluminium
Connections	Up to 100m cable length on request
Gap between tape and sensor	Up to 2.5mm (Depend on pole pitch)
Travel Velocity	3 m/s
Magnetic Tape Type	B5 nitrile rubber temperature magnetic tape
Measure Accuracy	See Magnetic Tape
Repeatability	± 1 Increment
Operating temperature range	-25...+85°
Protection Class	IP67

Magnetic Tape :

The magnetic band is supplied with a non-magnetic stainless steel cover for physical protection; for its fixing an adhesive tape is pre-mounted.

As shown above, the B5 magnetic tape is composed by three layers:

B5 Magnetic Tape Specifications

Operating temperature	-40°C to +120°C
Polar Pitch	5 mm , 2mm
Accuracy Class	$\pm 50 \mu$ m /m
Temperature coefficient	11 $\pm 1 \mu$ m /K
Storage temperature	-40°C to +120°C
Water Protection	CrNi 17 7 stainless steel carrier nitrile rubber high temperature magnetic tape

1 - A flexible magnetic tape made of plastic material (Resistant to debris, liquids and oils)

2 – Cover Strip (Upside) :A magnetised steel tape used to create a shield against any external magnetic disturb. Although, it's glued to the upper plastic layer in order to supply the correct mechanical consistency to the magnetic tape.

3 - Cover Strip (Downside) The third part is the most rigid one and therefore is supplied separately due to transport and application needs. It must be stick to layer 1 by the user. The steel tape is magnetically neutral and employed to mechanically protect the magnetic tape.

SPECIAL FEATURES

- High resolution up to 0.001 mm
- Use with MLS1 Sensor Head
- Tape in flat and rugged aluminum profile
- Stainless steel cover protect
- Best technology in small dimensions
- Shielded metal enclosure
- Easy mounting
- Contact-less and wear free system
- High resistance to vibrations to knocks
- Protection class IP67
- Resistant to humidity
- High accuracy
- Reliability reading transducer
- Measuring lengths of up to 100 m.
- Connection cable up to 20 m.

MLS-2 Magnetic Linear Encoder Profile System:

The MLS-2 Magnetic Linear Encoder Profile System consist of an unguided MLS1 sensor head and B5 magnetic measuring tape in PS2 Aluminium Profile System. They are incremental systems without contact for linear measures. The highly rugged, flexible plastic magnetic tape is applied to a metal support profile. With a special industrial adhesive layered strip, B5 Magnetic Tape is attached to the overside of the profile system. A sturdy stainless steel sheet cover is available for additional protection. Shock-proof, PS2 Profile System (aluminium case for the model **MLS-2**) can be used in many applications easily.

Function of the aluminium carrier:

1. Guaranteeing mechanical stability. Thermal expansion is determined by expansion of the steel carrier. This results in optimal adaption for use in machines made from a steel construction.
2. Providing magnetic closing for the magnetic system consisting of the individual poles and the ferromagnetic backing itself. Applying a ferric steel carrier results in up to 30% higher magnetic field. Special care was taken to find the optimum stainless steel alloy for our standard tape.

The MLS-2 Magnetic Linear Encoder Profile Systems are incremental systems without contact for linear measures. The capacity to measure distances longer than a meter, easy assembling, absence of parts that contact/rub, a waterproof transducer and a water-oil-dust-shaving resistant strip make this system suitable for a large number of applications, while taking position measurements of machinery within industries such as: machine tools, automatic-, wood-, marble-, glassworking machinery, etc. The measure transducer integrates in the same device, a sensor sensitive to a magnetic field, an electronic signals conversion circuit, and an output circuit. The sensor running on the magnetic tape produces a signal which, opportunely amplified and worked out, is changed into an incremental position signal for interfacing with displays, PLC, CNC, axes control, etc.

- Masking tape inside Aluminium
- Resistant to moisture and many fluids
- Extensive ruggedness against dust etc.
- The highly rugged, flexible

The highly rugged, flexible plastic magnetic tape can be applied to a machine tool easily. With a special industrial adhesive layered strip, B5 Magnetic Tape can be attached to the overside of the profile system.

The magnetic material is magnetised in defined and even distances and works as a solid measure. The magnetic scale retains its firmness by means of a spring steel base.

P2 PROFILE MECHANICAL DIMENSION

SPECIAL FEATURES

- Incremental Encoder output A,B
- Contact-less and wear free system
- Robust shielded metal enclosure
- Protection class IP67
- Resistant to dirt, humidity and dust
- Compact design
- Requires no cleaning or Maintenance
- High tolerance to shock and vibration
- Measuring lengths of up to 100 meters

MLS-3 Magnetic Linear Encoder Scale;

- The encoder forms a compact unit. The scanning unit is guided within the housing along scale.
- Long-life linear motion guide bearing system
- The scale, scanning unit and guide are protected against contamination by an aluminum extrusion and elastic sealing lips.
- The coupling elements between the scanning carriage and transfer web are designed to transfer motion in the measuring direction only. Pitch or other motion of the connecting web in a direction perpendicular to measurement is compensated without affecting accuracy

MECHANICAL DIMENSION

APPLICATIONS:

The areas of application for MLS-3 position sensors are wide and varied. Sealed linear encoders are ideal for applications requiring measurement of length with high accuracy and resolution in harsh environments with airborne liquids and particles such as coolants, lubricants, chips and swarf.

Typical areas of application:

- Machining centers
- Lathes, Milling, Drilling, Grinding machines
- Electrical discharge machines
- Sheet metal working machines
- Welding machines
- Bending presses
- Robotics/materials handling
- Measuring machines installed near production equipment
- Linear units/linear drives
- Linear guides
- Marble Machines
- Wood Cutting Machines/PVC Profile Cutting Machines
- Glassworking machinery etc.

SPECIAL FEATURES

- Incremental Encoder output A, B, Z, /A, /B, /Z
- RS422 differential quadrature output
- Excellent stability of the signals
- Contact-less system
- Robust shielded metal enclosure
- Fully Sealed, Protection class IP67
- Resistant to dirt, humidity and dust
- Withstands shock and vibration
- Single reference marker
- Magnetic system with no optics to fail or become contaminated
- Self-adjustment of the clearance between the guide and the carriage.
- Compressed air inlet at the scale end blocks
- Shielded and armoured power cable with a stainless steel braid
- Double protection along the sliding side (four lip seals)

The MLS-4 linear encoders are specifically designed to meet the strenuous demands of the press brake industry. MLS-4 cost-effective encoders offer unsurpassed durability with high resistance to shock, vibration and contamination. In this new encoder, the four ball bearings of the carriage are guided along in the aluminum housing. The combination of these two high quality materials makes for excellent wear resistance.

MECHANICAL DIMENSION

MLS-4 Self-Aligned System is designed for press brake and bending machine applications;

The large forces required in metal forming operations can provoke machine deformation which in turn puts strain on the linear encoder. This strain will affect the performance of the linear encoder and may lead to a reduction of accuracy or repeatability in the forming operation. In order to solve this problem is designed The MLS-4 incremental linear encoder, especially for press brake applications.

Especially it is recommended for applications with a measuring length of up to 2040 mm in high-speed and high-vibration environments and small places. The special design of the mounting points minimizes accuracy errors due to temperature changes. On the other hand, the MLS-4 Series includes a special support that further improves its behavior against the vibrations caused by the machine.

The reader head of this linear encoder has a connector. The linear encoder is supplied as a pre assembled unit. The linear encoder and reader head are connected to the aluminum support and it can be connected directly to the machine.

SPECIAL FEATURES

- Industrial Rotary Encoder
- Incremental or Absolute System
- Small and Economical Encoder
- Magnetic measuring process
- High and Various resolution
- Various solid shaft diameter
- High Speed

Our manufacturing facility is uniquely equipped to produce small quantities of a wide range of products. The result: high performance, low cost encoders. Small economical shaft encoder series. Suitable application uses include; Industrial machines, elevators, robots, plotters, cutting machines, injection moulding machines, rotary x-y table, NC machine and other position or angle measurement.

TTL	: 5 VDC ±%5 Power Supply
	: 5 VDC TTL RS422 Line Driver Output
Option	: 24 VDC ±%20 Power Supply
	: 5 VDC TTL RS422 Line Driver Output
	Please on request !

Cable Length

2M	=2M
5M	= 5M
10M	= 10M

* optional
between 5M to 50M

SPECIAL FEATURES

- Optical Incremental Encoder output A,B,Z
- 5 V TTL / RS422 Line Driver Output
- Two square wave signals. TTL output with 90 deg. phase difference
- Robust shielded metal enclosure
- Accuracy: $\pm 5 \mu\text{m/m}$, $\pm 10 \mu\text{m/m}$
- With single/double sealing technologies resistant to dirt, humidity and dust
- Compact design, easy mounting
- High Resolution: 0,001 mm, 0,005 mm
- High tolerance to shock and vibration
- Measuring lengths: 50 mm up to 12000 mm
- 60 m/min traversing speed
- Reference mark every 50 mm

ALS Optical Linear Encoder Systems:

ALS Series sealed Optic Linear Encoder Scales are protected from dust, chips and splash fluids and are ideal for operation on machine tools. An aluminum housing and elastic sealing lips protect the scale, scanning carriage and guideway from chips, swarf, dirt and splashwater. The scanning carriage travels in a low-friction guide within the scale unit. It is connected to the external mounting block by a coupling that compensates unavoidable misalignment between the scale and the machine guideways.

Sealed linear encoders are available with full-size scale housings for high resistance to vibration up to 12000 mm measuring length.

Series	Measurement Strokes	Protecting
ALS-4	50 mm – 450 mm	Single Sealing
ALS-5	50 mm – 1000 mm	Single Sealing
ALS-6	1100 mm – 12000 mm	Single Sealing

Special Design Features:

- Scale and scanning unit protected by aluminum housing
- Scanning unit guided on scale 5 via ball bearings
- Coupling between scanning unit and mounting block to compensate small errors in machine guideway

ALS4 Series

50 mm – 450 mm
Single Sealing

ALS5 Series

50 mm – 1000 mm
Single Sealing

ALS6 Series

1100 mm – 12000 mm
Single Sealing

ALS TECHNICAL SPECIFICATIONS

Output Circuit	TTL, RS422 Line Driver	
Output signals	A, /A, B, /B, Z, /Z	
Power supply	5VDC	
Dimensions	See drawing	
Housing Material	Aluminium	
Reference Mark	1 reference mark every 50 mm.	
Travel velocity	60 m/min	
Repeatability	±1 increments	
Operating temperature	0 to +50 °C	
Storage temperature	-40 to +55 °C	
Protection Class	IP54	
Cable length	50-500 mm scale	3 m armoured cable
	600-2000 mm scale	5 m armoured cable

Signal Name	Cable Colour	Conn. D-sub, (9 pin) Pin no.
A	GREY	1
/B	BROWN	2
+V	RED	3
0 V	BLACK	4
/A	BLUE	5
B	GREEN	6
/Z	YELLOW	7
Z	WHITE	8
GROUND	SHIELD	9

Resolution

0,001 = 1 µm
 0,005 = 5 µm
 S = Sinusoidal

Measuring Stroke

200 = 200 mm
 500 = 500 mm
 1000 = 1000 mm
 2000 = 2000 mm

Signal Output Type

6 = A, /A, B, /B, Z, /Z

Cable Length

3M = 3M

Z-Signal: Standart = every 50mm
 * Optional = One Z reference signal

ADR10-3M - Milling

ADR10-2M Milling

ADR10-2L Lathe

SPECIAL FEATURES

- 2 or 3 Axis Measuring
- Inch/Metric Conversion
- ABS/INC Function (Absolute/Incremental Interchange Operation)
- Find Mechanic Zero Position
- Radius / Diameter Readings
- Zero Reset / Data Preset
- 1/2 - find the center on selected axis
- Recall the last coordinate positions.
- Linear Error Compensation
- Segmented Error Compensation
- Pause/Sleep Mode
- Memory Back-up
- Set scale directions
- Scientific calculator function
- Store 99 sets of datum points
- Simple ARC (R) Function for arc or radius machining
- Bolt Hole Circle (Pitch Circle Diameter) - 5 simple steps to get the co-ordinates for all the holes equally spaced out on the pitch circle
- Lathe Function
- Shrink Function
- Electrical Discharge Machining Depth Control

APPLICATIONS :

The ADR series has been designed for users requiring either two or three axes. The compact range of ADR Readouts are constructed in a die-cast casing with a clear, easy to read LED digital display. The ADR Readouts controls offers a host of features. The ADR Readouts are mainly used in lathes, milling machines, shrink machines, sheet metal working machines, grinding machines, erosion machines, machining centers etc. with optic or magnetic linear encoder scales (e.g. ATEK ALS Series or ATEK MLS Series)

SCALE MODELS

MLS Magnetic Scales

ADR TECHNICAL SPECIFICATIONS

Number of axis	2 or 3 axis
Resolution	0.001 mm, 0.005 mm , 0.010 mm
Display Function	8 Digit LED Display; green color
Response Speed	60 m (198.6 feet) / min
Power supply	AC 93-250 V , 30 VA, 50-60 Hz
Dimensions	10.25" x 7.0" x 2.0"/3.0" (260 x 180 x 50/75 mm)
Connections	D-sub (9 pin)
Inputs	Encoders with TTL quadrature square wave output as standard
Quantizing error	±1 counts
Operating temperature range	0 to +40 ° C
Storage temperature range	-20 to +70 ° C

ORDER SPECIFICATIONS

Model No

ADR10 - 2 M = for Milling, Bohwerk and etc
ADR10 - 3 M = for Milling, Bohwerk and etc

ADR10 - 2 L = for Lathe
ADR10 - 3 L = for Lathe

2 Series = Two Axis
3 Series = Three Axis

The ALC Series universal programmable impulse counter of signals from Linear Encoder ,Rotary Encdor sensors , NPN -PNP proximity sensors, mechanical switches. Which secures high accuracy, stability and easy operation of the instrument.

SERIES	DIMENSIONS	PROJECTION	INPUT
ALC44 Counter	44 x 44 mm	-999....9999	TTL , Push Pull Encoder, NPN – PNP Proximity
ALC77 Counter	72 x 72 mm	-999999....9999999	TTL , Push Pull Encoder, NPN – PNP Proximity
ALC94UNI Counter	96 x 48 mm	-99999....999999	TTL , Push Pull Encoder, NPN – PNP Proximity
ALC77P Batc Counter	72 x 72 mm	-999999....9999999	TTL , Push Pull Encoder, NPN – PNP Proximity
ALC77T Tachometer	72 x 72 mm	-999999....9999999	TTL , Push Pull Encoder, NPN – PNP Proximity

Special Design Features:

- 600 Khz High Speed Input Frequency
- 4 Digit programmable projection ALC44
- 6 Digit programmable projection ALC94
- 7 Digit programmable projection ALC77 Series
- Prescale can be adjustable (0,000001 to 9999999)
- Tare, Hold, Reset, Offset , Const, Functions
- Excitation

ALC44C – ALC77C – ALC94UNI Serisi UP / DOWN COUNTERS

ALC44 – ALC77 – ALC94UNI Serie Counters

- Linear Encoder Inputs (A , B , Z Inputs)
 - Two Measuring channels (A , B)
 - Measured Unit
 - Linear Encoder
 - Rotary Encoder
 - NPN – PNP Proximity / Mechanical switch
 - 2 and 4 relay outputs
 - Tare, Hold, Reset, Offset , Conts Functions
 - Power Supply 24VA/VDC yada 86 – 265 VAC (110 yada 220VAC)
 - ALC 94 multifunction Counters
- Selectable Input (Encoder , Tachometers , Batch Counters

ALC77 Series Other Counter - UP / DOWN COUNTERS

ALC77 D DOUBLE LINE UP / DOWN COUNTER

ALC77 B BATCH COUNTER

ALC77 T TACHOMETER

- 72 x 72 x 96,4mm mechanical dimensions
- Projection "range -999999...9999999
- Sensör Girişi (A , B)
- Measured Unit
 - NPN – PNP Proximity / Mekanik switch
- ALC77D : Input Frequency 600 Khz
ALC77B : Input Frequency 500 Hz
ALC77T : Input Frequency 5 Khz
- Power Supply 24VA/VDC yada 86 – 265 VAC (110 yada 220VAC)

ALP 44

ALP77

ALP94

ALP Series Instruments, 4 digit panel programmable measuring displacement and angle by means of linear potentiometers

ALP-V Series Measuring instruments for 0...10VDC voltage.

ALP-A Series Measuring instruments for 0/4...20mA current.

ALP94UNI Instruments, 6 digit panel programmable Multifunction measuring instruments with the option of configuring the type of various analog inputs

SERIES	DIMENSIONS	PROJECTION	INPUT
ALP44	44 x 44 mm	-999....9999	Potentiometric
ALP44 V	44 x 44 mm	-999....9999	0...10VDC Analog
ALP44 A	44 x 44 mm	-999....9999	0 / 4...20mA Analog
ALP77	72 x 72 mm	-999....9999	Potentiometric
ALP77 V	72 x 72 mm	-999....9999	0...10VDC Analog
ALP77 A	72 x 72 mm	-99999....999999	0 / 4...20mA Analog
ALP94 UNI Multifunction	96 x 48 mm	-99999....999999	Potentiometric and Analog 0...10VDC 0 / 4...20mA

Special Design Features:

- 4 Digit programmable projection ALP44 , ALP77
- 6 Digit programmable projection ALP94
- Tare Function
- Automatic Calibration
- Excitation
- Analog Outputs
- High sampling rate

ALP44 and ALP77 Series Measuring Instruments

ALP44 and ALP77 Instruments

- ALP44 : 48 x 48 x 96,4 mm Dimensions
ALP77 : 72 x 72 x 96,4 mm Dimensions
- Measured Unit
ALP Linear Potentiometer
ALP-V Range 0..10 VDC
ALP-A Range 0...20 mA / 4..20 mA
- Output 2 relay
- Projection range -999...9999
- Power Supply 24VAC , 220VAC , 24 VDC

ALP94 UNI UNIVERSAL Instruments

- 96 x 48 x 114 mm Dimensions
- Multifunction Inputs in one instruments
 - Linear Potentiometer
 - Voltage 0..10 VDC
 - Current 0...20 mA / 4..20 mA
- Output 4 relay
- Projection range -99999...999999
- Data Output RS232 , SSI
- Power Supply 24VAC , 110 VAC , 220VAC , 24 VDC

ADP44 Digital Potentiometer

- 48 x 48 x 96,4 mm Dimensions
- Resolution: 10000 step
- Decimal point: 0 ~ 3 digits
- Ramp Function available
- Analog output: 0-10VDC
- Display: One line, 4 digits
- Power Supply 24VAC , 110 VAC , 220VAC , 24 VDC

- Pressure Ranges; 0...1 Bar to 0...2000 Bar
- Excellent Resistance to corrosive
- Stainless Steel Case
- Economical Price
- Output Signals
4 - 20 mA and 0 - 10V

BT214 Flush Diaphragm Series

BT210 Industrial Series

APPLICATIONS

- Hydraulics
- Pneumatics
- Water Technologies
- Air Conditioning / Heating
- Testing Technology
- Process Control
- Industrial Robot

The pressure transmitter BT is used to measure pressure in liquid or gaseous media, in the hydraulics, pneumatics, in machinery and equipment, as well as the process technology. The stainless steel membrane is completely vacuum-tight, extremely burst-proof and can be used with all standard media. High accuracy and robust and compact structure guarantees a broad range of possible applications.

Technical Specifications

Pressure Range	0...1 BAR to 0...2000 BAR
Output Signals	0 - 10 VDC , 4 –20 mA
Input Signal	24Vdc (10~36Vdc)
Operating Temperature	-40 ° ~ 125 ° (104°~257°)
Over Pressure	1,5 x FS
Accuracy	0,5 %FS; 0,2 %FS (Optional)
Electrical Connection	Hirschmann Connector
Process Connection	G1/4 , G1/2 and G1
Case	Stainless Steel

MELT PRESSURE & TEMPERATURE SENSORS

MPT SERIES

- Good Stability and Anti-Jamming capability
- Economical Price
- Zero and Span Adjustable
- Various Amplified Signals Optional
4 - 20 mA , 0 - 10V or 3.33mV/V
- Flexible Capillary or Rigid Stem
- Internal 80% Shunt Calibration
- Strain gage Wheatstone bridge
- Diaphragm is 15-5PH stainless steel with TiN coating
- 100bar-1500psi, our diaphragm is 316SS corrugated one

Technical Specifications

Pressure Range	0...350 BAR or 0..700 BAR standard (optional 150 – 2000 BAR)
Output Signals	0 -10 VDC , 4 -20mA , 3.33mV/V
Input Signal	24Vdc (10~36Vdc) and 10VDC
Operating Temperature	900°F - 400°C
Over Pressure	1,5 x FS
Accuracy	%FS 0,3
Electrical Connection	6-pin socket (optional 5 pin or 8 pin)
Process Connection	½" -20 UNF-2A standard, (optional M14 x 1.5 , M18 x 1.5)
Case	Stainless Steel
Protection Class	IP 65
Thermocouple	J Type (FeCu Ni) or K Type (NiCr-Ni) with socket

Melt pressure transmitter convert process into an amplified signal for long distance transmission free of noise interference. It can provide various 4-20mA, 0-10VDC and 3.33mV/V directly input upper control system.
