TRAILER STRAPS

B/A STRAPS MEET OR EXCEED OEM SPECIFICATIONS. STRAP CONFIGURATIONS CAN BE CUSTOM MADE TO YOUR SPECIFICATIONS

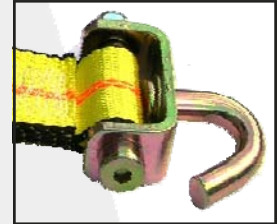

Length
8'

Part#
BA-SJR100

Tie Down Strap with Swivel J Hooks, Tire Grippers & Ratchet

WLL: 3,670 lbs

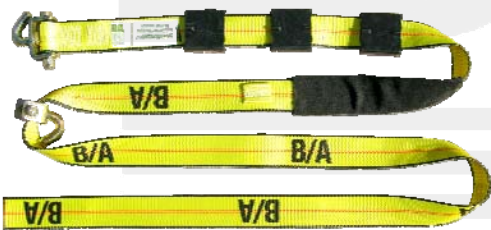

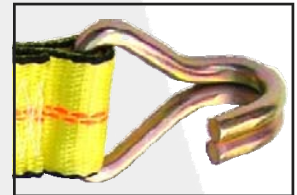

Length
8'

Part#
BA-R100

Tie Down Assembly with Double J Hooks, Tire Grippers & Ratchet.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

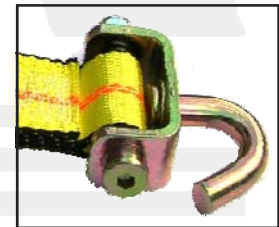

Length
10'
12'
14'

Part #
BA-3053-120
BA-3053-144
BA-3053-168

OEM Grade Replacement Straps with Swivel J Hooks, Tire Grippers, and Protective Sleeve.

WLL: 3,670 lbs

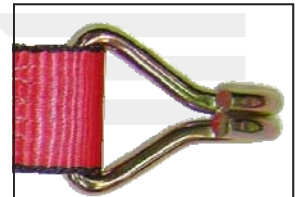

Length
10'

Part #
R-BOYDSTUN

Boydston OEM Double J Hook Strap with Bolt Loop.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

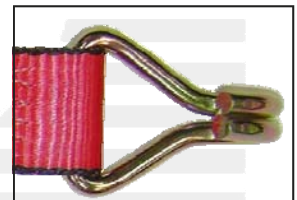

Length
10'

Part #
R-BOYDSTUN22

Boydston OEM Double J Hook Strap with Tire Grippers & Bolt Loop.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

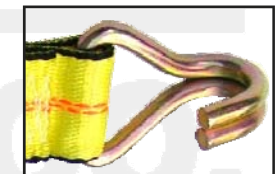

Length
7'6"

Part#
BA-900LW1

Strap with D-Ring, Double J Hooks & Tire Grippers.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

Warning: Never exceed Work Load Limit (WLL)

TRAILER STRAPS

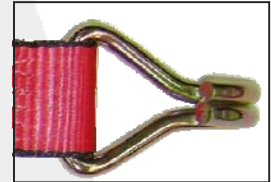

Length
10'

Part #
R-BOYDSTUN10

Boydston OEM Double J Hook Strap with Bolt Loop.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

Overall
Length
8'2"

Part#
BA-106

Tie Down with Double J Hooks, Tire Grippers & Grab Hook.

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

Overall
Length
8'2"

Part#
BA-SJ106

Tie Down with Swivel J Hooks, Tire Grippers & Grab Hook.

WLL: 3,670 lbs

Overall
Length
9'2"

Part#
BA-PSR103

Tie Down Assembly with Perpendicular Swivel J Hooks, Tire Grippers & Ratchet.

*For Trailers with Small Holes in Decking

WLL: 3,670 lbs

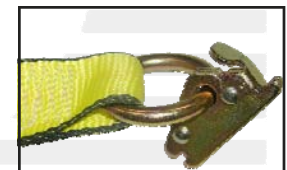

Overall
Length

Part#
BA-ES101

Three O Ring E-Track Tie-Down with Ratchet.

WLL: 3,330 lbs

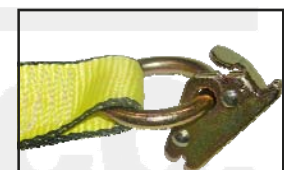

Overall
Length
9'4"

Part#
BA-ES100

Tie Down Assembly with Swivel E Track Fittings, Tire Grippers & Ratchet

WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

TRAILER STRAPS

Part# BA-B2021
Tie Down Basket with Ratchet and Chain
WLL: 3,330 lbs
*Basket can be sold separate B/A Part# BA-B2019

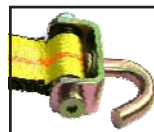

Part # BA-300
Basket Strap with Grab Hook & 2 Double J Hooks
WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

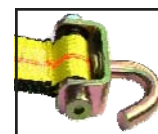

Part # BA-305
Basket Strap with 2 Double J Hooks & Ratchet.
WLL: 1,665 lbs as a 2 Point Tie Down
3,330 lbs as a 3 Point Tie Down

Part # BA-SJ300
Basket Strap with Grab Hook & 2 Swivel J Hooks.
WLL: 3,330 lbs

Part # BA-SJ305
Basket Strap with Swivel J Hooks & Ratchet.
WLL: 3,330 lbs

RATCHETS

B/A RATCHETS MEET OR EXCEED OEM SPECIFICATIONS

Part # 38-10
2" Ratchet
WLL: 3,670 lbs

Part # 38-20
2" Wide Handle Ratchet
WLL: 3,670 lbs

Part # 38-17
2" Ratchet with Forged
Finger Hook
WLL: 2,000 lbs

Part # 38-17-H
Forged Finger
Hook
WLL: 2,000 lbs

Part # 38-27
2" Wide Handle Ratchet with
Forged Finger Hook
WLL: 2,000 lbs

Part # 38-22D
2" Wide Handle Ratchet
with Snap Hook
WLL: 2,200 lbs

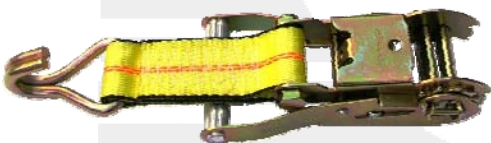

Part # 38-12-H
Snap hook with
spacers

Part # 38-20SJ1
2" Wide Handle with Swivel
J Hook
WLL: 3670 lbs

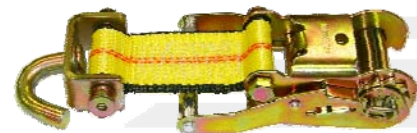

Part # BA-10011
Swivel J Hook w/
1.5" Bracket

Part# BA-R100-S

Part# 38-20

Part # 38-20SJ2
2" Wide Handle Ratchet with
Web & Swivel J Hook
WLL: 3,670 lbs

Part# BA-10012
Swivel J Hook w/
2.25" Bracket

Warning: Never exceed Work Load Limit (WLL)

CHAIN SPECIFICATIONS

THE USE AND CARE OF 1/4" & 5/16" AUTO TRANSPORT CHAIN

The Work Load Limit of 1/4" grade 70 transport chain is 3,150 lbs. and the Work Load Limit of 5/16" grade 70 transport chain is 4,700 lbs. This is the maximum safe load for which the chain is designed and applies to new chain and attachments for direct, straight tension in an undamaged condition. Corrosion, wear, damage or improper loading applications reduce the safe working load limit.

ALWAYS FOLLOW INSTRUCTIONS PROVIDED BY THE TRAILER MANUFACTURER AND THE VEHICLE MANUFACTURER TIE DOWN SPECIFICATIONS.

The following is a partial list of factors that will adversely affect chain and should be avoided:

- Bending: Chain is designed for straight tension. Bending chain links over corners, edges or even itself will cause localized high stress areas due to this bending. This can result in local stresses that can overload a single link while the nominal stress on the chain segment is much lower. The severity of such loading increases as the sharpness of the edge and/or the bending angle increases.
- Shock Loading: Dynamic of shock loading can cause instantaneous high loads (peak loads). These loads can generate significant force and cause an overload even when static forces are below work load limit stresses.
- Short Hooking: The standard design grab hooks will cause the link in the grab hook to shear at loads up to 20% below that of a chain in straight tension due to localized bending. The grab hooks are entirely suitable for chain loaded to the work load limit, but will cause preferential failure if the work load limit is exceeded.
- Wear: Wear decreases the chain cross section which reduces the load carrying capability proportional to the decrease in the cross sectional area in direct tension. Reduced cross section can be even more detrimental in bending conditions.
- Corrosion: Corrosion is detrimental for two reasons. First, it will decrease the cross sectional area as noted above. Second, corrosion generally creates pits which act as stress risers or stress concentrators.
- Fatigue: Fatigue is the initiation and incremental growth of a crack under cyclic loading. The loads necessary to initiate and propagate the crack are generally well below the static force necessary to induce failure. Therefore, the entire previous load history of the chain is a factor in fatigue.
- Stretched Chain or Coupling Links: Any chain that exhibits any stretched links or couplings has to have seen a force in excess of the proof test and should be replaced and destroyed immediately. Welded coupling link should never be pulled (loaded) in any manner except a straight pull (the ends of the links). Applying a load to the side of the link can cause premature failure. This also applies to chain links.
- Drag Damage: For obvious reasons, any chain that has been dragged needs to be replaced and discarded. Even drag damage to only one link ruins the safe work load of the entire assembly. A chain is only as strong as its weakest link.
- Cross Deck Hydraulic Loading: When vehicles on one floating ramp are tied to ratchets on another portion of the trailer, hydraulic loading of the chain occurs. These forces can be extremely high. Therefore, "cross loading" should never be done.
- Tie Down Angle: Follow the trailer manufacturers instructions and tie down the vehicle on all four corners. This loading secures the vehicle and prevents any forward or backward motion during transport.

DO NOT OVER TIGHTEN CHAIN

AUTO TRANSPORT 1/4" CHAIN ASSEMBLIES

B/A PRODUCTS MANUFACTURES A COMPLETE LINE OF AUTO TRANSPORT CHAINS. AVAILABLE IN 1/4" GRADE 70 AND 5/16" GRADE 70 CHAIN. ALL ASSEMBLIES ARE MADE WITH PLATED CHAIN & HOOKS. WELD LINKS ARE SELF COLORED UNLESS FULL PLATING IS SPECIFIED. AVAILABLE IN ANY LENGTH AND HOOK COMBINATION.

1/4" Grade 70 chain with Forged Mini Datsun, Grab, R & T Hooks.
