

Pilot Burners

BASO Gas Products LLC

J Series BASO® Combination Standing Pilot Burner

Description

This Series of pilot burners is used for standing pilot applications and is available in many tip arrangements. The J990MDA-2 is a universal replacement pilot burner for J12_DDA, J13_DDA (D12 and D13) types with No. 9 tip arrangements.

The J991MDA-2 through J999MDA-2 models are universal replacement pilot burners for J10_DDA, J11_DDA (D10 and D11) types (see the *Selection Chart* for tip arrangements).

The pilot burners are individually packed in a plastic bag with one natural gas inlet installed, one LP gas inlet fitting, and necessary parts for mounting.

J Series BASO® Multi-Mount Universal Standing Pilot Burner

J999MHA-2

J999MKA-2

J999MYA-2

Description

The J Series multi-mount universal pilot burners are used in standing pilot applications and are available in three models. Mounting brackets on all four sides of each burner permit adaptation to almost any application.

The pilot burners are individually packed in a plastic bag with one natural gas inlet installed, one LP gas inlet fitting, and necessary parts for mounting.

Features

- Three tapped holes in each bracket for vertical adjustment
- Natural gas and LP gas inlet fitting supplied
- Necessary parts for mounting furnished in each package

J Series/Q90 Series BASO® Pilot Burner Assemblies

J115DGA Standing Pilot

J992HXW Intermittent Pilot

Q90AA Pilot Kit

Description

The J Series/Q90 Series pilot burner assemblies are replacement pilots for previously OEM-only products. These pilot burner assemblies are used with Intermittent Pilot Ignition (IPI) and Standing Pilot systems.

The standing pilot burners are individually packed in a plastic bag. The intermittent spark pilot burners and Q90's are individually packed in a box.
