

# Construction

More models. More options. More attachments. More *history*.

# *One Tough Animal*™

**IR** Ingersoll Rand  
Compact Vehicle Technologies

# Land Clearing/Site Development

Keep what you want. Clear the rest.

Four steerable axles on the **Bobcat all-wheel-steer loader** make it easier to get in and around your site. You also get greater control and maneuverability—plus all-wheel-steer loaders come standard with two-speed and joystick controls.

**Brushcat® Rotary Cutter**

Switch between  
all-wheel steer and  
skid-steer modes.

“With the power of the loader and rotary cutter it was almost like mowing grass. We cut the trees up into small enough pieces that no cleanup was required afterwards.”

Cal Westcott • Bureau of Land Management • Fairbanks, Alaska

**Why bulldoze down everything in sight with large equipment?** Only Bobcat provides the machines and attachments allowing you to choose which trees and landscape features stay and which ones go – giving you the option of keeping mature landscape features and saving you money on new trees, fill and other materials.

**Flail Cutter** clears brush and small trees up to 3-in. in diameter.

**Chipper** grinds branches and reduces volume 10-to-1.

**Brush Saw** clears brush and small trees up to 15 feet tall.

**Stump Grinder** grinds 45-in. diameter stumps without repositioning.

**Industrial Grapple** easily clamps, sorts and removes debris.

**Root Grapple** quickly clears your worksite of roots and debris.

# Demolition

Tougher than your next job.

Demolition demands durability, and so does Bobcat®. Our **skid-steer loaders** were made for the demolition industry, so world-class strength was built right in – from the solid axles and low-maintenance chaincase, to the heavy-duty steel tailgate and protected hose routings.

“ We’ve tried other machines, but they can’t handle the work without breaking down. We like the success we’ve had with our Bobcat equipment. ”

Ray Jones, Project Manager • E. Luke Green Company • Johnson City, Tennessee

Whether you’re tearing out the smallest backyard patio or cleaning up major demolition sites, Bobcat’s got you covered with **more models, more options and more attachments**. More models, ranging from the 36-inch wide 463 loader to the rugged S300 with a rated operating capacity of 3,000 pounds. More options, like a Special Application Kit with Lexan front door. More attachments, including the hardest-hitting breakers – so you can do every job faster and better.

**Breaker** delivers up to 875 ft.-lb. of impact energy.

**Drop Hammer** breaks flatwork with up to 3,600 ft.-lb. of impact force.

**Industrial Grapple** easily clamps, sorts and removes debris.

**Planer** turns your loader into a milling machine.

**Wheel Saw** cuts cleanly through asphalt and concrete with wire mesh.

**Rotating Grapple** – versatile excavator grapple attacks debris from any angle.

# Excavating/Utility

Getting down under in tight quarters.

Bobcat® offers all the tools you need for effective excavation, *including a number of excavators and compact loader backhoes*—all tough enough for trenching, backfilling and compacting with ease.

**Rotating Grapple** handles loads from any angle and digs straight down in tight areas.

**Clamp** — works with a grapple or bucket to grasp and move material.

**Plate Compactor** easily compacts trenches and difficult-to-reach areas.

**Power Tilt® Accessory** — wrist-like action moves side-to-side up to 180 degrees.

What could possibly be done to improve the revolutionary Bobcat Zero House Swing **compact excavators**? They already offer 320 degrees of motion inside the tracks for working in tight quarters...plus the FastTrack™ drive system that increases speeds to over 5 mph while adding pushing and turning power. How about 15 different attachment options to improve your excavating business?

“ The 331 is perfect for operating in confined areas, and our new 435 Zero House Swing excavator is a fast-moving machine that is great for digging and loading trucks, all from a single position. The 435 can't be beat for placing objects such as sections of concrete sewer. ”

Chet Lynch • Horizon Contracting • Swainsboro, Georgia

# Grading

Controllability for precision grading.

Bobcat® **compact track loaders** offer you greater drive torque control for the best digging performance. Bobcat's track undercarriage is designed for easy maintenance and excellent tractive effort for pushing piles of heavy material. Bobcat tracks will keep you working in soft, wet and muddy ground, where other machines stop dead!

**Why grade with just a bucket** when you can add one of several hydraulically-adjustable grading attachments with fingertip controls? Or move up to the laser-guided box blade or grader to improve accuracy to +/- 1/4 inch.

**Laser-Guided Grader** assures grade accuracy to +/- 1/4 in.

**Tilt-Tatch** rotates attachments to work on grade or cut drainage swales.

**Combination Bucket** allows you to doze, dig, dump, load, level and grapple.

**Dozer Blade** backfills and trenches foundations, provides precision control for challenging grades.

“ I prefer finish grading as it allows me to be creative. Of course, the T300 provides a big boost to creativity and productivity because of the exceptional power it delivers to the grading site. ”

Pat Nichter • TCB Grading • LaGrange, Kentucky

# Concrete/Asphalt

Road warrior.

Whether you're breaking up 18" of concrete or building the road ahead, you can expect consistent, world-class power and performance from Bobcat® compact equipment and dozens of interchangeable attachments.

**Sweeper** sweeps up material in forward and reverse.

**Curb Planer** mills concrete curbs to create smooth approach from driveway to street.

**Concrete Mixer** mixes concrete on site.

**Concrete Pump** places concrete in hard-to-reach areas.

Take control of the concrete. The **Bobcat 16-inch surface planer** uses a high-speed motor and 185 bits to assure a smooth finish at speeds up to 45 feet per minute. The **curb planer** cuts finished approaches from the street to new driveways with the ease of fingertip control. And for big jobs, try the **40-inch planer** with Bobcat's high-flow loaders.

See other Bobcat market literature for more information of interest to asphalt and concrete contractors.

“Concrete is unforgiving. You either get it right or you don't. You can take a real hard lick if you don't finish a concrete project in a timely fashion. The dependability of Bobcat equipment has enhanced our business. It has never failed us.”

Danny Bentley • B&B Concrete Construction, Inc. • Orange, Texas

# Builders

Day saver from start to finish.

Extend your reach and capabilities on any jobsite with the **VersaHANDLER® telescopic tool carrier**. It's a powerful way to get your toughest jobs off the ground, and with over a dozen interchangeable attachments—from augers and angle brooms, to pallet forks and grapples—it makes quick, easy work of backfilling, grading, truss placement and cleanup.

“ Compared to what I had been renting, the Bobcat telescopic not only cost less, but it could do more. It made sense to buy it. It's great for moving materials, and for excavating and grading. All in all, I couldn't be happier with an equipment purchase. ”

Tim Crump • Superior Surfaces • Charleston, South Carolina

Whether you do the work yourself, or sub it out, Bobcat equipment keeps your jobs running smooth. **Plus, with more than 70 quick-change attachment options**, you can do literally everything from land clearing to landscaping.

**Angle Broom** keeps streets clean and free of debris.

**Pallet Fork** – hydraulic pallet fork adjusts easily with fingertip control.

**Dumping Hopper** maneuvers anywhere to collect jobsite waste.

**Soil Conditioner** levels ruts for a more presentable jobsite.

# No one offers more compact equipment!

Bobcat® compact equipment and attachments for construction, land clearing, site development, demolition, excavating, utility projects, grading, concrete and asphalt work, and builders.

## Mini Track Loaders

With more than 20 available attachments, Bobcat mini track loaders allow you to work where only shovels and wheelbarrows could before. Easy to operate, economically priced—the only mini track loaders offering a removable platform to give you ride-on or walk-behind capability.

## VersaHandler® Telescopic Tool Carriers

Reach over sidewalks or fences and save yourself time, labor and money! VersaHandler telescopic tool carriers are ideal for transporting heavy materials, grading, backfilling, excavating, lifting, loading, unloading and cleanup.

## Toolcat™ 5600 Utility Work Machine

The world's first utility work machine – attachment carrier, loader, pickup truck and utility product all rolled into one. Plus, more than 25 front-mounted attachments are available.

## Utility Vehicles

With three Bobcat utility vehicles to choose from, including a new 4x4 unit featuring the IntelliTrak® drive system, which automatically engages and disengages four-wheel drive, you'll be able to tackle tough jobs on the roughest terrain.

# Here are more good reasons why Bobcat compact equipment is the world leader!

## Power Bob-Tach™ Mounting System

Change non-hydraulic attachments without leaving the cab. To connect or disconnect, simply flip a switch.

## Enclosed Cab with Heat & Air Conditioning

A deluxe enclosed cab with heat and air conditioning helps you handle the summer heat, and keeps you comfortable even in the worst winter weather.

## HIGH FLOW

## High-Flow Hydraulics

Added hydraulic flow increases the performance of specific attachments, making you more efficient and productive.

## Two-Speed Travel

Reduces travel time over longer distances within and between jobs.

## Engine and Hydraulic Systems Monitor with Shutdown

A standard feature on most Bobcat loaders, excavators and utility work machines, this system monitors vital machine functions, such as engine coolant

temperature, engine oil pressure and hydraulic oil temperature. If a monitored function is out of normal operating range, the system provides an audible alert, a warning message or code and, depending on the severity of the function, may shut down the machine to avoid catastrophic failure.

## Control Options

Many Bobcat loaders offer three configurations for operation:

- Standard Mechanical Hand and Foot Controls
- Optional Advanced Control System (pushbutton select of hand or foot operation of lift and tilt functions)
- Optional Selectable Joystick Controls (pushbutton select of two different hand control patterns); includes speed management, horsepower management and foot throttle

## Training Resources

Train operators and technicians in the safe operation and servicing of Bobcat equipment. Operator training courses, safety videos and other training materials are available in English and Spanish versions through your Bobcat dealer's parts department or online at [www.bobcat.com](http://www.bobcat.com).
