THE WORLD'S FINEST CEILING FANS™

The Casablanca collection represents the successful synergy of elegance, versatility, efficiency, endurance and comfort. Each ceiling fan is created with an eye for timeless design, assembled with care from high-quality parts and engineered for superior energy efficiency to be a classic fixture in a home that is enjoyed for generations.

WHAT'S NEW

Casablanca's latest introductions include 10 new ceiling fan collections in an array of timeless styles that will add a breath of fresh air to every room of your home – indoors and out!

QUALITY IN EVERY DETAIL™

Casablanca stands alone in its approach to the design, engineering and manufacturing of ceiling fans. We have made a long-term commitment to quality and invite you to compare the features of a Casablanca fan with any competitive product. Every detail is given meticulous attention – from design to components and manufacturing to ease of installation. Casablanca's attention to detail adds value to every fan, providing unprecedented performance for the life of your investment.

MOTOR

Rather than buy "off the shelf" generic motors, Casablanca designs, engineers, and manufactures motors that provide power and quiet operation for a variety of applications.

XTR200™

Strikes the perfect balance between power and efficiency and is utilized on higher-end, indoor/outdoor models to provide maximum movement.

DIRECT DRIVE™

Designed and engineered for specific applications to work flawlessly for the life of the fan. Many Direct Drive™ models are ENERGY STAR® qualified.

DC

Don't let the size fool you. This high-efficiency permanent magnet direct current motor is extremely powerful. It's ENERGY STAR® qualified and four to five times more efficient than typical fan motors.

XLP-2000™ and XLP-2100™

The workhorses of the Casablanca product line for more than 10 years and used in a number of top-selling models. These motors deliver exceptional performance and noise-free operation for the life of the fan.

XLP PLUS®

An enhanced version of the XLP motor, it is larger and more powerful than any competing motor in its class and is utilized in bigger fans and those with longer blade spans.

1 BOTTOM PLATE

The bottom plate encloses the lower part of the motor housing. Casablanca uses a variety of materials including solid die-cast virgin zinc, heavy-gauge deep-drawn steel, and structurally reinforced resin for enhanced beauty, protection, and quiet operation.

2 SWITCH HOUSING

The switch housing encloses primary fan controls. It features heavy-duty, die-cast virgin zinc or steel for exceptional durability. In addition, the exclusive design allows for easy installation of Casablanca light fixtures, providing a finished, integrated look.

3 MOTOR HOUSING

Casablanca offers die-cast and steel construction, for unmatched motor durability. The housing's plated or handpainted finish stays bright and beautiful throughout decades of use, with no more care required than dusting with a soft cloth.

4 PERMA-LOCK™

The PermaLock™ system connects the fan to the downrod. Casablanca's 3/4"-diameter PermaLock™ design provides improved appearance and stable connection. This works in perfect combination with the patented Hang-Tru® canopy. (See pages 134-135 for more details.)

5 BLADES

Unrivalled in the industry, Casablanca's blades are crafted with six layers of wood in a cross-laminated pattern and finished with two outer layers of real furniture-grade wood veneer for lasting beauty and durability. Some Casablanca fans feature carved wood blades for exceptional design detail.

6 BLADE HOLDERS

Casablanca's blade holders provide an essential link between blades and motor. The blade holders are made of heavy-duty, reinforced die-cast virgin zinc and are tested thoroughly for reliable performance.

EVERY CASABLANCA FAN IS BACKED BY 120-DAY IN-HOME SERVICE

Should your Casablanca fan not meet your satisfaction, we will send a trained representative to your home to service it. Simply call us at 1-800-715-0393 for referral to your local Authorized Service Center. If In-Home Service is not available in your area, Casablanca offers pre-paid freight to make it easy for you to send the fan to the Casablanca Factory Service Center. It will be repaired and returned to you at no charge.

Casablanca's Comprehensive Warranty, the most extensive in the ceiling fan industry, also includes:

LIFETIME MOTOR WARRANTY

All Casablanca fan motors, even on Damp- and Wet-rated models, are guaranteed for life.

ONE-YEAR PARTS AND ELECTRONICS WARRANTY

Each fan includes a one-year warranty on finish, component parts, accessories, and electronics.

With this extensive coverage, you can enjoy the beauty, quality, and performance of your Casablanca products for decades to come.

BEAUTY HAS NEVER BEEN SO EFFICIENT

Casablanca is dedicated to creating fans that work smarter, not harder, so that each element is fine-tuned to contribute to overall savings in energy costs. The powerful Casablanca motors move more cubic feet of air per minute (CFM) while using significantly less energy. Fan blades are set at the optimum pitch to provide maximum airflow at each speed setting. Even at the highest setting, each fan consumes about the same amount of power as a 100-watt light bulb.

Many Casablanca fans are ENERGY STAR® qualified and provide even greater energy efficiency (look for the ENERGY STAR logo throughout this catalog). Specific fan models are equipped with highly efficient compact fluorescent bulbs, and are California 24 compliant for maximum energy savings.

For your convenience, we've included this informational energy chart on every ceiling fan page:

Airflow: X,XXX cfm	Electricity Use: XX w	Airflow Efficiency: XX cfm/w
-----------------------	--------------------------	---------------------------------

38" to 48" ceiling fans have airflow efficiencies ranging from approximately 71 to 86 cubic feet per minute per watt at high speed.
49" to 60" ceiling fans have airflow efficiencies ranging from approximately 51 to 76 cubic feet per minute per watt at high speed.

MONEY SAVING TIP: Operating a fan in an empty room wastes energy, so turn it off when leaving the room.

CANDELIER™ II

Add the warm, intimate ambience of candlelight to a spacious room with the Candelier II ceiling fan. The fixture's ingenious design features 48 candles in varying heights and colors nestled around an Oil-Rubbed Bronze ring that houses a sleek, three-blade ceiling fan. Candles are fitted with LED bulbs that effectively capture the natural flickering motion and incandescent glow of real candles.

FEATURES

- XLP-2000™ motor / lifetime motor warranty
- 48" diameter / 30° blade span / 20° blade pitch
- Set of 3 exclusive Candelier Dark Walnut blades included
- Includes uplight with 48 LED flickering bulbs and 48 candles
- Includes eight 10-watt halogen downlights with bulbs
- Minimum 9' ceiling required
- Includes exclusive hanging system
- Low Ceiling Adapter (LCA) is not compatible
- Sloped Ceiling Adapter (SCA) is not compatible

VICTORIAN®

This is where it all began...the original Casablanca fan. The Victorian series marries classic turn-of-the-century appeal with contemporary innovation and convenience. The richness of the ornate design is enhanced with badge-style blade holders. Optimum performance is achieved with a 15" blade pitch.

FEATURES

- XLP-2000™ motor / lifetime motor warranty
- 54" or 46" blade span / 15" blade pitch
- 4- or 5-blade configuration
- Multiple blade finish choices available (blades sold separately)

19TH CENTURY®

In the electric era of the 1800s, fans were characterized by spiral ceiling rods and centrally placed blade holders. The 19th Century fan pays tribute to these early traditions and adds elements of classic gaslight designs. The intricate, ornate patterns recall decorative influences of cast metal parts and tin-type moldings reminiscent of the period.

FEATURES

- XLP-2000™ motor / lifetime motor warranty
- 54" blade span / 14" blade pitch
- Set of 4 exclusive blades included
- Low Ceiling Adapter (LCA) is not compatible
- Requires additional hanging support (included)
- Minimum 9' ceiling required — uses 12" downrod (included)
- Extra-long downrods require outer sleeve (see pages 134-135)
- Decorative canopy cover may not be used if installed on a sloped ceiling or with a Sloped Ceiling Adapter (SCA)

NEW ORLEANS CENTENNIAL®

The New Orleans Centennial is a faithful replica of a 100-year old ceiling fan discovered in the French Quarter of New Orleans. The elaborate cast motor housing and lacy, scroll brackets recreate the wonderful ambience of a Southern parlor in a time gone by.

FEATURES

- XLP-2000™ motor / lifetime motor warranty
- 54" or 48" blade span / 15° blade pitch
- 4- or 5-blade configuration
- Multiple blade finish choices available (blades sold separately)

VICENTE

With the grandeur reminiscent of a beautiful Spanish fountain, or hermosa fuente, the Vicente makes a dramatic statement in even the largest rooms. When embellished with its decorative 13-inch downrod, its flourishes command your attention. But it's the fan's performance that holds you enthralled.

FEATURES

- DirectDrive™ motor / lifetime motor warranty
- 56" blade span / 15" blade pitch
- Set of 5 exclusive blades included
- Integrated 75-watt uplight with five 15w bulbs included
- Integrated 100-watt downlight with two 50w T4 halogen bulbs included
- 13" decorative and 5" standard downrods included

VITA™

With its angled planes and streamlined curves, the distinctive Vita is the first contemporary offering from Casablanca to include an upright, which casts a soft, incandescent glow on the ceiling. Additional lighting is provided by a halogen-lit center bowl that indirectly illuminates a glass outer ring.

FEATURES

- XLP Plus® motor / lifetime motor warranty
- 52" blade span / 13° blade pitch
- Set of 5 exclusive blades included
- Integrated 90-watt upright with six 15w bulbs included
- Integrated 100-watt downlight with two 50w T4 halogen bulbs included
- Uplight and downlight can be controlled independently
- Low Ceiling Adapter (LCA) is not compatible
- Requires additional hanging support (included)

TWAIN™

This exquisite fan has been forged to replicate the look of ornamental castings from furniture displayed in 19th-century English parks. The lattice-weave pattern on the fan body, cast type on the upper motor housing, botanically inspired blade irons, and integrated lighting with faux alabaster glass make the Twain one of a kind.

FEATURES

- XTR200™ 30mm motor / lifetime motor warranty
- ETL rated for damp or humid locations
- 60" blade span / 14° blade pitch
- Set of 5 exclusive outdoor carved featherwood blades included
- Moisture-resistant motor / stainless steel hardware

ACCESSORIES

CSLK-11
Snow White Concert Breeze Light Fixture
shown mounted to ceiling

CSLK-73
Oil-Rubbed Bronze Concert Breeze
Light Fixture shown on Panama 6675G

CONCERT BREEZE LIGHT FIXTURE

A light fixture and sound system all in one, the Concert Breeze mounts to most Casablanca fans, or directly to your ceiling. This groundbreaking Soundolier® technology utilizes an exclusive 2.4 GHz wireless system that's easily adapted to your television, stereo, MP3 player or any other audio source for 360 degrees of hi-definition sound.

FEATURES

- Mounts to most Casablanca ceiling fans or directly to ceiling
- CSLK-11 and CSLK-73 rated for damp locations
- CSLK-45 rated for indoor use only
- Compatible with many audio sources such as MP3 players, televisions and stereos
- Remote control included for separate operation of light and audio functions
- Integrated 120-watt bowl light fixture
- Includes three 40w candelabra bulbs

FINISHES

- CSLK-11 Snow White (Swirled Marble glass)
CSLK-73 Oil-Rubbed Bronze (Italian Amber Scavo glass)
CSLK-45 Brushed Nickel (Swirled Marble glass)

COMPATIBLE FANS

Academy	Cottage	Key Largo II	Utopian

*Pulchra model only
**Compatible when used in indoor or damp locations only

CONTROL

Soundolier® Remote

To ensure things stay on the "cool" side, the system's hand-held remote control is designed to be used in addition to the technology seeker's desire to control the room's mood, both through sound volume and light brightness level.

SOUNDOLIER®
Integrated Wireless Technologies

CONTROL OPTIONS

INTEGRATED CONTROLS

With simple two-wire installation and intuitive Integrated Controls designed exclusively for – and included with – specific fan models, Casablanca fans are easy to install and even easier to use. The Integrated Controls include such features as adjustable fan speed and direction settings, lighting levels, and even home security, for total environmental enhancement.

Intel-Touch3® (W-84 Dual Light, W-85 Single Light)

This sophisticated wall-mounted system controls six fan speeds (in either the forward or reverse direction) and full-range light dimming for perfect room comfort and ambience. Safe-Exit™ provides 20 seconds of gradual light dimming, showing you safely to the door. Home-Safe™ is a home security feature that controls lights in an irregular sequence, making a home appear occupied. The Fan Minder™ feature incrementally reduces fan speed, maintaining comfort at night. The Light Minder™ feature saves energy by turning lights off automatically after two hours.

Direct-Touch® (W-74SL, W-74DL)

Simple and straight forward, the Direct-Touch wall-mounted control offers four forward and reverse fan speeds, plus full-spectrum light dimming and advanced programmable features including Safe-Exit™, Home-Safe™, Fan Minder™ and Light Minder™. Includes a CFL mode.

Advan-Touch® (W-63 Dual Light)

Wall-mounted or hand-held, Advan-Touch combines a user-friendly design with a large LCD display and intuitive controls for fan and lighting with programmable features. Advanced programmable features include Safe-Exit™ and Home-Safe™. Use one Advan-Touch to control several fans, or purchase an extra control to operate one fan from different locations. Includes wall plate bracket.

DC 6-speed

Six-speed control with full-range light dimming and reversing.

Versa-Touch2® (W-72 Single Light, W-73 Dual Light)

The refined Versa-Touch2 hand-held remote provides three forward and reverse fan speeds, full-spectrum light dimming and memory and has an optional wall plate bracket. Versa-Touch2 may be used alone to control several fans, or purchase extra controls to operate a single fan from different locations. Includes wall plate bracket.

Primo-Touch® (W-505)

This hand-held remote for select fans provides three forward and reverse fan speeds, full-spectrum light dimming and memory. Includes wall plate bracket.

ACCESSORY CONTROLS

Casablanca also offers a complete line of optional Accessory Controls, which allow homeowners to optimize the functionality of their fans based upon personal preferences. The Adapt-Touch™ control adds remote control convenience for 3-Speed and 4-Speed Casablanca fans with a Hang-Tru™ canopy. Casablanca also offers wall-mounted Accessory Controls for both fan and light control with either slide or rotary operation.

Intel-Touch3® (W-64 Dual Light, W-65 Single Light)

This sophisticated wall-mounted system controls six fan speeds (in either the forward or reverse direction) and full-range light dimming for perfect room comfort and ambience. Safe-Exit™ provides 20 seconds of gradual light dimming, showing you safely to the door. Home-Safe™ is a home security feature that controls lights in an irregular sequence, making a home appear occupied. Includes wall plate bracket.

Direct-Touch® (W-75SL, W-75DL)

Simple and straight forward, the Direct-Touch remote control offers four forward and reverse fan speeds, plus full-spectrum light dimming and advanced programmable features including Safe-Exit™, Home-Safe™, Fan Minder™ and Light Minder™. Includes a CFL mode.

Adapt-Touch™ (W-52)

Add remote control convenience to Casablanca 3-Speed and 4-Speed models. Adapt-Touch easily converts new or existing Casablanca 3-Speed and 4-Speed pull-chain models equipped with a Hang-Tru® canopy to remote control operation. Features include three fan speeds, instant off and full-range light dimming (on models equipped with a light fixture), all from the palm of your hand. The hand-held remote includes a switch plate bracket for wall mounting, and the receiver is quickly installed in the Hang-Tru® canopy. Use one Adapt-Touch to control several fans, or purchase extra controls to operate a fan from different locations. Note: The W-52 is not recommended for use in outdoor locations.

WRF3-XX

Three-speed remote control with full-range light dimming and reversing. Compatible with Four Seasons III and Four Seasons III Hugger.

Single and Dual Rotary Controls (W-41, W-81)

Optional rotary for 3-Speed and 4-Speed models. Available with XT1200 and XLP-2000 motors. Provides four separate fan speeds, an industry exclusive. Noise-free circuitry and quiet operation (dimmed and White included). Dual rotary control W-81 also provides full-range light dimming and requires third wire for installation.

Single and Dual Slide Controls (W-24A, W-24W, W-28A, W-28W)

Optional slide for 3-Speed and 4-Speed models. Provides four fan speeds, noise-free circuitry and quiet operation. Not for use on XT1200 and XT2000 motors (dimmed and White). Dual slide control W-28A and W-28W also provide full-range light dimming and requires third wire for installation.

ACCESSORIES

HANGING SYSTEM

Casablanca makes installation a do-it-yourself, one-person operation. Casablanca's patented Hang-Tru® hanging system supports the fan from the ceiling, leaving both hands free to make wiring connections. The self-centering ball makes sure the fan hangs straight, even on ceilings with up to 32-degree slope (for greater slopes, use a Sloped Ceiling Adapter).

Casablanca's threaded Perma-Lock™ downrod locks the fan permanently in place and is the sturdiest, easiest to install downrod on the market. Higher ceilings? Casablanca offers optional downrods in lengths up to 96" to satisfy virtually any installation requirement.

EXTRAS INCLUDED

Everything you need is included with your Casablanca fan, including light bulbs, batteries for remotes, and even a handy screwdriver. Casablanca delivers "Quality In Every Detail."

LOW CEILING ADAPTER (LCA*)

LCA* (limited finishes). Reduces fan height by 3 1/2" from standard downrod (3" for Direct Drive models). (Canopy measures 2 1/4 x 6.25" diameter). NOT for use with Academy, Academy Gallery, Alessandra, Atria, Barolo, Bel Air, Bel Air Halo, Bungalow, Candelier II, Continental, Four Seasons III Huger, Holliston, Isotope, La Fleur, Le Grande, Mailbu Star, Marrakesh, Mission, Modena II, New Orleans Centennial, 19th Century, Panama Halo, S3, Siena, Silhouette II, Stealth, Twain, Trident, Vermont, Verrazano, Vita, Whitman, or Wilderness fans or Avalon blades. Also not for use with Cottage Wet, Estrada, Four Seasons III Outsider, Heritage, Lansai, Panama Damp, Utopian, or Wailea when installed in a damp or wet location.

Low Ceiling Adapter (LCA)

SLOPED CEILING ADAPTER (SCA-P)

Use Model SCA-P for slopes from 32 degrees to 50 degrees. If using the SCA-P with Academy, Academy Gallery, Bungalow, Holliston, Mission, Modena II, S3, Star, Starlet, Verrazano, Vita or Whitman, you must purchase a Hang-Tru® canopy (Part #192220xx) specify finish to match fan. Use hanger pack included with fan.

Sloped Ceiling Adapter (SCA)

19TH CENTURY OUTER SLEEVE (RS69XX)

Sleeve must be ordered with appropriate extension pipe:

8" sleeve for 12" pipe, 14" sleeve for 18" pipe, 20" sleeve for 24" pipe, 26" sleeve for 30" pipe, 32" sleeve for 36" pipe, 44" sleeve for 48" pipe, 56" sleeve for 60" pipe, 68" sleeve for 72" pipe.

EXTENSION DOWNROD LENGTHS (MODEL PL*XX)

6", 12", 18", 24", 36", 48", 60", 72" and 96" (1"= finish to match fan, x= downrod length). See ceiling height/downrod length guide below.

SUGGESTED EXTENSION DOWNRODS

Note: For best performance and appearance, an extension downrod should be used with your Casablanca fan when installing on a high or sloped ceiling. Casablanca offers an extension downrod that is 1/2" longer than the standard downrod. The chart lists the minimum ceiling height and suggested downrod length. For safety reasons, the fan blades must be a minimum of 7 feet above the floor. For more information, see your Casablanca dealer.
Gallery Edition models include coordinating blades, light fixture and glass. Fans with the notation "Requires Additional Hanging Support" are packaged with the necessary hardware.
