Champion Fiberglass, Inc. is the leading manufacturer of fiberglass conduit, strut and bridge hangers for electrical and mechanical markets.

Champion Fiberglass began production of epoxy fiberglass conduit and fittings in 1988. The company has the most advanced production facilities for manufacturing fiberglass conduit in North America. A well-trained and highly efficient work force utilizes proprietary high-speed winding equipment and high temperature curing ovens to ensure consistent production standards to produce the highest quality fiberglass conduit on the market.

In 1989, Champion Fiberglass developed the first conduit from epoxy resins that had flame resistance and low smoke characteristics, meeting the most stringent codes and specifications. Today this conduit system has been integrated into the **CHAMPION DUCT®** system and is **UL** and **CSA listed** for both below and above ground use.

Another milestone evolved in 2006 when Champion Fiberglass completed development of a Phenolic Conduit System, **FLAME SHIELD®**. It is now the number one choice conduit for subways, including tunnels and stations. **FLAME SHIELD** conforms to the **NFPA 130** requirements, including the 2010 edition.

In 2008, **CHAMPION HAZ DUCT®** (XW Type fiberglass conduit) was allowed for use in **Class I Div 2** installations, per the **National Electrical Code (NEC)**. This was accomplished by Champion Fiberglass after having worked with UL and NEC on this issue for many years.

Champion Fiberglass is an **ISO 9001:2008 Certified Company**. We offer our customers innovative solutions with the highest quality products and customer service available in our industry. Our headquarters and manufacturing are located in Spring, Texas.

Corrosion Resistance Guide14

CHAMPION
STRUT®

CHAMPION STRUT® - the obvious solution for corrosive environments.

- **Corrosion resistant.** (See the corrosion resistance guide on page 14)
For assistance, contact our engineers for proper selection.
- Complete system of fiberglass components.
- Includes strut (channel) and a wide variety of fittings, threaded rods, nuts and accessories.
- Available in both POLYESTER and VINYL ESTER resins.
- Supplied in standard 10 ft. lengths.
- Offers the following advantages:
 - Competitively priced in comparison to stainless steel
 - Resistant to sunlight (UV resistant)
 - Easy to field drill and cut
 - Lightweight
 - Fire retardant

All of the strut and most of the fittings are manufactured by the PULTRUSION process where continuous strands and mats of glass fiber are immersed in the resin and then pulled through a heated die. Many different shapes can be manufactured by this process. Special UV additives along with a polyester surfacing veil are added to give the components increased UV and corrosion resistance.

TEMPERATURE & PHYSICAL PROPERTIES

(See Pages 6-7 for Load Data and Deflection for each individual section)

EFFECTS OF TEMPERATURE

Temperature °F (°C)	Approximate Percent of Strength	
	Polyester	Vinyl Ester
75° (24)	100%	100%
100° (37)	90%	100%
125° (51)	78%	100%
150° (65)	68%	90%
175° (78)	60%	85%
200° (92)	52%	70%

Strength properties are reduced when continuously exposed to elevated temperatures. Working loads shall be reduced based on the above. If unusual temperature conditions exist, consult the factory.

TYPICAL PHYSICAL PROPERTIES

Tensile Strength	40,000 psi	(275 MPa)
Flexural Strength	45,000 psi	(310 MPa)
Flexural Modulus	2.5 x 10 ⁶ psi	(17.2 GPa)
Compressive Strength	25,000 psi	(172 MPa)
Specific Gravity	1.7	(1.7)
Coefficient of Thermal Expansion (Longitudinal)	5 x 10 ⁻⁶ in/in/°F	(2.8 m/m/°C)
Moisture Absorption	<1%, 24 hrs. at 70°F	(<1%, 24 hrs. at 21°C)
UL94 Flammability Classification	V-0	(V-0)
ASTM E84 - Flame Spread Index	<25	(<25)
- Flammability Rating	Class I	(Class I)
Surface Resistivity	<1.0 x 10 ⁴ Ω	(<1.0 x 10 ⁴ Ω)
Volume Resistivity	<1.0 x 10 ⁶ Ωcm	(<1.0 x 10 ⁶ Ωcm)

DEFINITION OF LOAD DATA

All load data are given for the two most common cases:

- Concentrated load (often called point load)
- Uniform load, i.e. where the load is spread evenly across the span length

CS-S-15-10-P/V*

* Use P for polyester resin and V for vinyl ester resin.

CS-S-11-10-P/V*

* Use P for polyester resin and V for vinyl ester resin.

CS-S-15D-10-P/V*

* Use P for polyester resin and V for vinyl ester resin.

CS-S-11D-10-P/V*

* Use P for polyester resin and V for vinyl ester resin.

during concrete pour

BEAM CLAMPS

Allowable load = 300 lbs.
Recommended safety factor of 3.
Set screws included with clamps.

Vinyl Ester Beam Clamps	Part No.
Single for 3/8" FRP Threaded Rod	CS-BC-3/8
Single for 1/2" FRP Threaded Rod	CS-BC-1/2
Double for 3/8" FRP Threaded Rod	CS-DC-3/8
Double for 1/2" FRP Threaded Rod	CS-DC-1/2

SUPPORT RACKS

Part No.	Tray Width	Dimensions in. (mm)	
		A	B
CS-SR-06-P/V*	6 (152)	10 (254)	10 (254)
CS-SR-09-P/V*	9 (229)	13 (330)	12 (305)
CS-SR-12-P/V*	12 (305)	16 (406)	13 (330)
CS-SR-18-P/V*	18 (457)	22 (559)	16 (406)
CS-SR-24-P/V*	24 (610)	28 (711)	19 (483)
CS-SR-30-P/V*	30 (762)	34 (864)	22 (559)
CS-SR-36-P/V*	36 (914)	40 (1016)	25 (635)

Allowable load = 750 lbs.-based on total load, uniformly distributed over the width of the rack. Safety factor = 2

* Use P for polyester resin and V for vinyl ester resin.

FIBERGLASS CLEVIS HANGERS

Design loads have a 3:1 safety factor at 120°F. Insulation may be required at higher temperatures.

"NON-METALLIC" UNIVERSAL PIPE CLAMPS

For rigid steel, PVC coated steel, PVC schedule 40 & 80 and filament wound epoxy fiberglass conduit (IPS only). Made from a special grade of glass reinforced vinyl ester resin. Standard fasteners are non-metallic bolts and hex nuts. See page 11-12 in this catalog.

If stainless steel fasteners are preferred, add letter "S" to part nos. below.

CHAMPION BOLT

Sizes: 3/8", 1/2", 5/8", 3/4"
Material: Long glass fiber reinforced polyurethane.

CS-SEAL-C

CHAMPION SEAL FIELD CUTTING SEALANT

- Seals exposed fibers after field cuts
- Champion Seal exceeds vinyl ester material in corrosion resistance
- Restores gloss and luster to weathered fiberglass
- Seals exposed FRP threads after installation of threaded rod and hex nuts

Available in 12 oz spray

STRUT TO BEAM CLAMP ASSEMBLY

CHAMPION STRUT® Beam Clamps allow easy attachment of Champion strut assemblies to a wide range of structural members. They are made from glass reinforced vinyl ester. To estimate the length of strut required, take the width of the I-beam and add 5". Maximum recommended loading: 200 lbs.

EACH ASSEMBLY INCLUDES:

FOUR CHANNEL
NUTS

FOUR FIBERGLASS
BOLTS

TWO CLIPS

DOUBLE BOLT ASSEMBLY

Part No.	Assembly Description	Std. Qty.
CS-IC-3/8	Double bolt for 3/8"	1 assembly
CS-IC-1/2	Double bolt for 1/2"	1 assembly

STRUT POST BASE

Part No.	Size
CS-PB-S	Post Base for S-15 Strut
CS-PB-D	Post Base for S-15D Strut

CHAMPION THREAD™ Fasteners and Hanging Systems are specially developed to give optimum strength and chemical corrosion resistance. The systems are excellent for all structural, mechanical and electrical applications where components must be corrosion resistant. All nuts are hex type and standard tools can be used for easy assembly.

FRP HEX NUT

Part No.	Size
CS-HN- 3/8	3/8" - 16 UNC
CS-HN- 1/2	1/2" - 13 UNC
CS-HN- 5/8	5/8" - 11 UNC
CS-HN- 3/4	3/4" - 10 UNC
CS-HN-1	1" - 8 UNC

Supplied in 8 ft.
(2.4m) lengths.

FRP THREADED ROD

Part No.	Size
CS-TR- 3/8	3/8" - 16 UNC
CS-TR- 1/2	1/2" - 13 UNC

UNIVERSAL INSTRUMENT PIPE SUPPORT

The universal instrument pipe support system is manufactured from 2" filament wound epoxy resin conduit for increased stiffness and corrosion resistance. The outside diameter is 2 3/8" which is identical to 2" steel pipe (or PVC). The system is non-conductive and resistant to sunlight. The base is made from vinyl ester resin, with an 8" square base, specially designed with side bracing for extra bending support. The instrument pipe support is delivered fully assembled, or available in individual components if so desired. The 2" non-metallic u-bolt is an excellent device for attaching instruments, gauges etc. (Shaded components not included.)

SINGLE FLOOR MOUNT

Catalog No.:
CS-IS1- (dim) A
(Where A is defined
per sketch below.)

WALL OR FLOOR MOUNT

Catalog No.:
CS-IS2- (dim) A - (dim) B

DOUBLE FLOOR MOUNT

Catalog No.:
CS-IS3- (dim) A - (dim) B - (dim) C

MULTIPLE INSTRUMENT FLOOR MOUNT

Catalog No.:
CS-IS4- (dim) A - (dim) B - (dim) C

PUSHBUTTON STATION

Similar to the instrument pipe support system, with 2" vinyl ester square tubing. The base is made from vinyl ester resin, with an 8" square base, specially designed with side bracing for extra bending support.

Catalog No.: CS-PB- (dim) A - (dim) B - (dim) C

CORROSION RESISTANCE GUIDE

The corrosion guidelines tests were performed by immersing coupons for 30 days in the chemical at the temperature shown. This is a very severe test. It has been shown that **CHAMPION STRUT®** can often be used for chemicals listed as “Not Recommended” (NR). Real cases often are limited to fumes, vapors and occasional splashes at the temperatures indicated. Polyester is the standard resin used in the **CHAMPION STRUT System**, however a vinyl ester resin system is also available.

This information is provided solely as a guide since it is impossible to anticipate all individual site conditions. For specific applications which are not covered in this guide, and may require screening tests to evaluate resin system suitability, consultation with the factory is recommended.

Ferric Salts	P	P	Sodium Sulfate	P	P
Ferrous Sulfate	P	P	Sodium Sulfide	V	V
Fluoboric Acid, Sat'd	P	V	Sodium Thiosulfate	V	NR
Fluosilicic Acid 0-35%	V	V*	Styrene	NR	NR
Formic Acid, Vapor	P	P	Sulfur Dioxide, Dry or Wet Gas	P	P
Fuel Oil	P	P	Sulfuric Acid, Vapor	P	P
Gasoline	P	P*	Sulfurous Acid	V	NR
Glycerine	P	P	Tannic Acid	P	P
Hydrochloric Acid 0-10%	P	P	Tartaric Acid	P	P
Hydrochloric Acid 10-36%	P	V*	Toluene	NR	NR
Hydrofluoric Acid	NR	NR	Trisodium Phosphate	V	V
Hydrogen Chloride, Dry or Wet Gas	P	V	Water, City	P	P
Hydrogen Peroxide	NR	NR	P – Polyester resin system V – Vinyl ester resin system NR – not recommended * – some limitations apply - consult the factory		
Hydrogen Sulfide, Dry or Wet Gas	P	V			
Kerosene	P	P			
Lactic Acid	P	P			
Lime Slurry, Sat'd	P	P			

Information in this table is based on data supplied by raw material suppliers and collected from many years of similar industrial applications.

Temperatures represent standard test conditions and are not minimums or maximums. **CHAMPION STRUT** products may be acceptable at other temperatures for some chemicals, but should be tested to determine specific suitability.

The recommendations or suggestions contained in this table are made without guarantee or representation as to results. We suggest that you evaluate these recommendations and suggestions in your own laboratory or field trial prior to use.

CERTIFICATE OF REGISTRATION

This is to certify that

Champion Fiberglass Inc.

6400 Spring Stuebner Rd., Spring, Texas 77389 USA

operates a

Quality Management System

which complies with the requirements of

ISO 9001:2008

for the following scope of registration

Manufacture of fiberglass conduit and fittings.

Certificate No.: CERT-0065909

File No.: 1058413

Issue Date: September 28, 2012

Original Certification Date: November 6, 2009

Current Certification Date: November 5, 2012

Certificate Expiry Date: November 4, 2015
