WHERE INNOVATION COMES TO LIGHT

CML
INNOVATIVE TECHNOLOGIES
WHERE INNOVATION COMES TO LIGHT

CML Innovative Technologies is leading in innovative lighting solutions ; our 1350 employees are specifically dedicated to the design, production and distribution of miniature light sources and miniature lighting systems. Our worldwide operations and know-how allow us to continually exceed our customers requirements.

CML Innovative Technologies est leader en solutions innovantes d'éclairage ; nos 1350 collaborateurs sont dédiés à la conception, la production et la distribution de sources et de systèmes lumineux. Notre savoir-faire et nos implantations mondiales nous permettent de mieux servir nos clients et de répondre aux niveaux d'exigences les plus élevées.

CML Innovative Technologies ist der führende Hersteller für innovative Beleuchtung ; unsere 1350 Mitarbeiter sind tätig in Entwicklung, Produktion und Vertrieb von Beleuchtungsquellen und -Systemen. Unsere Erfahrung und unsere weltweiten Standorte machen es möglich, unseren Kundenservice stets zu verbessern und auch für die höchsten Ansprüche eine optimale Lösung zu finden.

CML Innovative Technologies è leader in soluzioni innovative d'illuminazione ; i nostri 1350 collaboratori sono dedicati alla concezione, la produzione e la distribuzione di sorgenti e di sistemi luminosi. Il nostro know-how e le nostre aziende mondiali permettono di servire meglio i nostri clienti e rispondere a livelli di esigenze più elevate.

Lamps

Wedge Base.....	5
Plastic Wedge Base	12
Wire Terminals	14
Based Wire Terminal	17
Surface Mounted.....	18

Socketed lamps

Twistlock.....	24
Connectors pins	41
To be crimped.....	47
Based	49
WB Silicon caps	50

Upon request our engineering department can provide additional services for many types of our products portfolio. Please contact us for further information.

Custom lighting solutions. Based on customer's specifications, we can assemble, crimp or solder any type of light sources on a stamping circuit or a Printed Circuit Board.

Electrical circuit type	Lamp Type	Light source type Socketed Lamp Type	LED Type
Stamping circuit	Wedge base	Twistlock / EBS / PC (some) / Connector pins	PLLC2 / PLLC4
PCB	Wire Terminal	Twistlock / SMD / EBS / PC	PLLC2 / PLLC4 Through-hole

Services to customize the lamps light output:

- For colored light output: silicon color caps or lacquering of the glass body,
- For better light homogeneity: frosting of the glass body,
- For focusing the light output: designed with a lens.

Service to customize the design and the perceived quality of the final application:

- Various socket colors available to facilitate the component's integration or maintenance,
- Different gas-filling available to improve the brightness or the lifetime.

Surface treatments:

- Tinning for a better electrical conductivity, a protection against corrosion and a easier soldering process,
- Galvanization for a better adherence, impermeability, and mechanical resistance

Service to adapt the product to your industrial process:

- Torsion of pins in a right-angle position,
- Delivery on tape or reel,
- Specific packaging: customization of the boxes or blisters with an ad-hoc labeling.

CML Innovative Technologies respects the European regulation EC/2002/95:

all our products are lead free manufactured so as to comply with the directive in force.

Our competitive advantage relies on the in-house manufacturing of the lamp filament. It converts electrical energy into light.

Filament shapes:

Straight wire (no coils) ~ up to around 2V

Single coil ~ up to around 28 or 36V

Coiled coil ~ over 28 or 36V

Filament mounting: (ANSI coding)

The factor determining the filament shape is primarily the voltage of the lamp in relationship to the size of the glass bulb. For any given rating, the filament shape changes according to the size of bulb.

V	W	A	Light Output (Lm)	Filling	Life Hours

PC H57	14	100	0,5	6,3

Various color sockets available upon request.

Silicon caps available upon request on PC H57, standard on PC M25.

PCM25 Series:

- 2 versions available: contacts can be positioned on different sides of the socket body.
- PC board thickness: 1,5 mm.

PC H and PC M Series available in all mentioned range of Voltage, Wattage and Current.

Please contact us for detailed specifications.

PC H29

PC H35

Series	Voltage (V)	Current (mA)	Light Output (Mscp)	Light Output (lm)
PC H29 Series	12 - 28	20 - 100	0,02 - 0,52	0,3 - 6,5
PC H29	14	65	0,16	2,0
PC H35 Series	12 - 28	20 - 100	0,02 - 0,52	0,3 - 6,5
PC H35	14	100	0,5	6,3

Various color sockets available upon request.
Silicon caps available upon request .

PCH Series available in all mentioned range of Voltage, Wattage and Current.
Please contact us for detailed specifications

SMD 27/1

Series	Voltage (V)	Current (mA)	Light Output (Mscp)	Light Output (lm)
SMD 27/1 Series	12 - 28	20 - 100	0,02 - 0,52	0,3 - 6,5
SMD 27/1	6.3	100	0,2	2,5

Silicon caps available upon request

SMD 27/1 Series available in all mentioned range of Voltage, Wattage and Current.

Please contact us for detailed specifications.

SMD 50

SMD 70

Series	Voltage (V)	Current (mA)	Light Output (Mscp)	Light Output (lm)	A
SMD 50 Series	12 - 28	20 - 100	0,02 - 0,52	0,3 - 6,5	
SMD 50	14	48	0,1	1,3	4,8
	14	100	0,5	6,3	5
