

V-LINE™ Cabinet Systems Next Generation

VLNGCD-10

 **COOPER B-Line**

Product Introduction

Today's competitive electronic enclosure market requires cost effective products that deliver superior performance and function. Cooper B-Line developed the V-LINE™ cabinet platform to support the growing need for a competitively priced solution.

Many innovative features are designed into the V-LINE cabinet platform, offering valuable benefits for users. The heart of the system, the cabinet frame, has standard features, such as, fully adjustable mounting angles with RMU markings, removable and replaceable cable entry plates, and leveling feet. The frame can be fitted with a range of options including solid or vented side panels, a variety of door styles, and top or bottom panels. The V-LINE cabinet features excellent aesthetic characteristics and is built to the high quality standard our customers have come to expect over the years from Cooper B-Line.

All of these features, good looks and high quality are offered at a competitive price point, making the V-LINE cabinet an excellent choice for anyone needing to house data communications equipment while watching the bottom line.

The V-LINE™ Cabinet Advantage

Removable cable entry knockout plates

Range of single & double door options with a variety of locking choices

Fully adjustable 19" rails. 29 1/2" wide cabinet offer offset and 23" mounting

Square hole or #12-24 tapped hole mounting rail options

Doors can be configured left hand (LH) or right hand (RH) hinged

Open base with infill panel & filter options

Fully configurable top panel assembly

Lockable side panels

Extensive range of mechanical and electronic locking options

Plain & vented side panel options

New ganging knockouts allow cabinets to be ganged with or without side panels

Leveling feet supplied as standard with optional castor availability

Fully welded steel frame structure

Standard cabinet finish is a Black hard wearing epoxy polyester powder coat paint, color reference RAL 9005. Cabinets are also available finished in Light Gray, reference NCS 1502-Y, but may be subject to increased lead times.

The V-LINE™ cabinet platform is designed to provide high quality enclosure solutions to the market at competitive prices and short lead times. Ordering the V-LINE cabinet solution can be done by ordering individual components or ordering a configured enclosure solution with a single part number.

Use the following matrix to build the part number for your desired V-LINE cabinet configuration.

Step 1	V	V-LINE Cabinet Range	Options					
	42	Cabinet Effective Height	24U	38U	42U	45U	47U	
	24	Cabinet Overall Width	24 = 24"		29 = 29 1/2"			
	42	Cabinet Overall Depth	24 = 24"	30 = 30"	36 = 36"	42 = 42"	48 = 48"	
Step 2	A	Mounting Rail Type	A = 19" Square Holes B = 19" #12-24 Tapped Holes		C = 23" Square Holes * D = 23" #12-24 Tapped Holes * * Only on 29 1/2" wide cabinets			
	C	Mounting Rail Position	L = Offset Left* R = Offset Right* C = Centered		* Only on 29 1/2" wide cabinets			
Step 3	V	Front Door	V = High Flow Vented LH W = High Flow Vented RH X = High Flow Vented Split* S = Solid LH T = Solid RH U = Solid Split* N = None		A = Acrylic LH B = Acrylic RH C = Vented Acrylic LH D = Vented Acrylic RH F = Split Fan Door* * Only available with T & D locking options.			
	X	Rear Door						
	S	Locking Options	S = Swing Handle (single point) C = Combo Handle (single point) T = Swing Handle (3-point)		D = Combo Handle (3-point) P = i-PAL Handle (2-point) N = None			
Step 4	S	Left Hand (LH) Side Panel Configuration	S = Solid Full Height* T = Solid Split** V = Vented Full Height* W = Vented Split** N = None		* Not available on 42U x 48", 45U x 48", & 47U x 48" options			
	S	Right Hand (RH) Side Panel Configuration					** Not available on 24U high options	
Step 5	V	Top Panel Configuration	S = Solid Top V = Vented Top N = None	2 = 210 CFM Fan Top 4 = 420 CFM Fan Top 5 = 550 CFM Fan Top	1 = 1100 CFM Fan Top* * Not available on 24" wide deep units			
Step 6	B	Finish	A = Gray B = Black					
Step 7	+	Accessories	See Pages 17 - 26					

What features do you require for your electronic cabinet solution? Whatever you require, you can be sure that the V-LINE cabinet platform from Cooper B-Line will meet your needs. For assistance with selecting the optimal cabinet solution for your network, contact a Cooper B-Line sales representative or call our sales engineering department at (800) 851-7415.

Network Cabinet

Most day to day network installations incorporating low density active equipment, as well as low volume structured cabling systems, can be accommodated into what has evolved to be an industry standard network cabinet.

V-LINE™ Network Cabinets are comprised of the following features:

- Welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- Acrylic glazed door with vented styles fitted front, supplied with standard locking swing handle (door right hand hinged)
- Plain steel door fitted at the rear and supplied with standard locking swing handle (door right hand hinged)
- Plain side panels fitted both sides
- Vented top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

If the standard specification cabinets shown do not meet your application requirements, use the “Easy Step Configurator” on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Details subject to change without written notice.

For applications housing structured cabling systems, it is often necessary to employ wider cabinets to adequately accommodate the back bone cabling, as well as provide space to manage the patch cords.

V-LINE™ Cabling Cabinets are comprised of the following features:

- 29 1/2" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- Acrylic glazed door with vented styles fitted front and configured with standard locking swing handle (door right hand hinged)
- Plain steel door fitted at the rear and configured with standard locking swing handle (door right hand hinged)
- Plain side panels fitted both sides
- Vented top panel
- Supplied with pack of Fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

If the standard specification cabinets shown do not meet your application requirements, use the "Easy Step Configurator" on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Server Cabinet

Forced air remains the most common and reliable method for cooling electronics. Most common servers and switches incorporate fans to draw cool air into the unit and exhaust warm air out of the unit.

Although other environmental considerations need to be made, the number one priority when specifying a suitable server cabinet configuration is to ensure sufficient air is able to both enter the cabinet and be exhausted out of the cabinet. This is most commonly achieved by fitting high flow vented doors offering around an 80% free area on the front and the rear of the cabinet.

Cooper B-Line recommends the use of wider cabinets when side to side heat dissipating equipment, such as switches, are deployed. See the V-LINE™ Switch Cabinet details on page 9 for further details and suggestions.

For higher density applications the V-LINE range offers a series of modular accessories designed to help enhance the internal operating environment within the cabinet space, helping to avoid hot air crossover and the risk of hot spots.

V-LINE™ Server Cabinets are comprised of the following features:

- 24" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented doors fitted front and rear, configured with standard locking swing handles (doors right hand hinged)
- Plain side panels fitted both sides
- Plain top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

If the standard specification cabinets shown do not meet your application requirements, use the “Easy Step Configurator” on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Details subject to change without written notice.

For applications where side to side vented equipment is installed, Cooper B-Line recommends the use of wider cabinets configured with the mounting rails fitted centrally. This cabinet configuration allows the supply of air to be adequately provisioned at the equipment air intake location and helps to avoid back pressure at the equipment exhaust. Like the V-LINE™ Server Cabinet range, the V-LINE Switch Cabinet can be fitted with a range of modular accessories designed to help enhance the internal operating environment within the cabinet space. These enhancements help to avoid hot air crossover and help reduce the chance of hot spots.

V-LINE™ Switch Cabinets are comprised of the following features:

- 29 1/2" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented door fitted front, configured with standard locking swing handle (doors right hand hinged)
- High flow double vented doors fitted rear, configured with standard locking swing handle (doors right hand hinged)
- Plain top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

If the standard specification cabinets shown do not meet your application requirements, use the “Easy Step Configurator” on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Co-Locate Cabinet

The V-LINE™ Co-Locate Cabinet range is a completely new addition to the cabinet platform. This cabinet is available in two bay and three bay configurations, in 36", 42" and 48" depth variants.

V-LINE™ Co-Locate Cabinets are comprised of the following features:

- 29.5" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Fitted with internal cable chases to provide secure cable access to each bay
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented doors fitted at the front and rear of each bay, configured with standard locking swing handles
- Plain lockable side panels fitted both sides of each bay
- Plain top panel
- Supplied with pack of 50 off #12/24 cage nuts and screws
- Supplied fully assembled and palletized

If the standard specification cabinets shown do not meet your application requirements, use the "Co-Locate Easy Step Configurator" on page 11.

Accessories and additional options are available as detailed on pages 17 - 26.

Features:

- 16 gauge (1.5mm) steel construction
- Door design allows for 180° opening even when ganged together
- Factory set-up is for right hand hinge with a single point swing handle lock (except split doors which are three point swing handle locks)
- Doors are easily field reversible
- Doors are field upgradeable to 3-point latching with combination and electronic locking options
- Overall cabinet depth = frame depth + front door depth + rear door depth, each door is 1" (25.4mm) deep
- Each door is fitted with an earth grounding point
- High flow vented doors incorporate an 80% free area mesh to provide optimal air management

Doors can be factory configured with a number of locking options depending on the door type.

Standard Key Locking Swing Handles

The default standard locking option on all single door assemblies is a single point locking swing handle keyed alike. All double door assemblies are configured with a 3-point keyed alike locking swing handle assembly. 3-point locking on single door assemblies are available as an optional upgrade.

Mechanical Combination Swing Handles

Available as an optional upgrade these handles can be configured to operate in either single point or 3-point locking configurations on single door assemblies. Only available as an optional upgrade in 3-point configuration on double door assemblies.

i-PAL Electronic Swing Handles

Using HID proximity card technology, the i-PAL range of handles can be configured to operate in either a stand alone or networked configuration over an Ethernet network (requires i-BOX Ethernet controller). The i-PAL range can be configured to operate in either single point or two point locking configurations.

Cable Entry Knockout Plate

Plastic Bushing

Removable / Replaceable Cable Entry Knockout Plates & Plastic Bushings

These plates are designed to help maximize the area available for cable entry into the V-LINE cabinets while eliminating large open areas that would limit security, aesthetics and the ability to keep contaminants and debris out. Four of these plates are included with each frame. These 13" (330mm) x 3³/₄" (95mm) removable plates feature three 2¹/₂" (58mm) / 3" (76mm) concentric knockouts allowing numerous different cable entry options in each corner of the V-Line cabinet frame. The bottom panel also includes four cable entry knockout plates that include the same benefits as the top panel knockout plates. Optional plastic bushings fit in the openings to enhance appearance and offer additional protection for the cables.

Details subject to change without written notice.

Brush Strips Cable Opening Plates

These plates are designed to maximize the area available for cable entry into the enclosures while limiting air leakage out of the cabinet and limiting the entry of dust and debris. These 13" (330mm) x 3 3/4" (95mm) removable plates install perfectly in the space where the cable entry knockout plates (part # VOZIP) are installed on the frames. The bottom panel also includes four spaces where this plate can be used for the same benefits when bringing cables in from the bottom of the enclosure.

79903836536	VBCOK

Mounting Rail Offset Kits

If a mounting rail offset is needed, this kit is available as a retrofit option. The offset kits allow the 19" mounting rails to be offset to the left hand or right hand side of all V-LINE™ 29 1/2" wide cabinet configurations.

UPC Number	Cooper B-Line Catalog Number	Description
79903839324	VLMROK19B	Universal 19" Retro-fit Rail Offset Kit
79903839325	VLMROK23B	Universal 23" Retro-fit Rail Offset Kit

Air Dam / Cable Manager Kit

This kit is used to provide a means of combining cable management fingers to organize patch cords and brush strips to help manipulate airflow through the cabinet. The 11U high cable management fingers are installed between the rack mounted equipment and the mounting rails. The brush strip sections are secured to the back of the mounting rails with plastic push-in fasteners and do not interfere with any available mounting spaces. Cable management fingers can be purchased separately.

Cabinet Ganging Kit

The V-LINE™ Cabinet frame has been updated to include a simpler ganging facility. Each cabinet frame has knock-outs in the side members, allowing frames to be butted side by side, and simply fastened together. This feature allows the cabinets to be ganged with or without side panels fitted.

Ganging kits include six (6) bolts and six (6) flange nuts

UPC Number	Cooper B-Line Catalog Number
79903839125	VLGK

Cabinet Earthing Kit

The universal cabinet earthing kit includes the appropriate number of earth leads and hardware, which helps provide the appropriate earth continuity. Throughout, the frame and cladding components are in compliance with EN60950 Clause 2.5.11. For V-LINE co-locate cabinet assemblies, one earth kit will be required per bay configuration.

Enhanced Vertical Cable Manager Kit

Developed to provide enhanced vertical cable management, these new cable manager kits have been designed specifically to complement the 29½" V-LINE™ cabinet platform. The 2¾" wide units can be fitted on the left hand and right hand side of the cabinets with the mounting rails positioned centrally. The 5½" wide units can only be fitted on the left or right to match the optional mounting rail offset configurations.

- Can factory fitted or easily retro-fitted in the field
- Split doors for improved operation and easy removal
- Integral cable tie lances and multiple mounting points for twist and lock cable management arms
- Steel material with UL 94V-0 black plastic components
- Black RAL 9005 epoxy polyester powder coat paint finish
