**Cyalume Technologies**, the world leader in the chemiluminescent industry, manufactures a full complement of dependable Military grade **CHEMLIGHT®** brand and Industrial grade **SnapLight®** brand lighting solutions for use in power outages, military operations and training, industrial accidents, and natural disasters.

In 1970, Cyalume partnered with the U.S. Navy to develop the first lightstick. We continue to aggressively design and develop innovative light technologies making Cyalume the undisputed world leader in chemical light technology.

All of Cyalume's products are manufactured with the highest degree of quality, meeting ISO 9001 standards throughout the manufacturing process. Only the safest, environmentally friendly, and highest-grade materials are used.

Cyalume Technologies is proud to be the sole manufacturer of chemiluminescent light products to the United States Military and NATO, both directly and with our National Industries for the Blind partners.

### Trusted by the military worldwide...

Proven effective by military forces worldwide for over 40 years, ChemLights enhance both night time tactical operations and training safety. Many of the military land, sea, and air applications are enshrined in doctrinal literature from standard operating procedures to tactics, techniques, and procedural manuals. Customers such as the Department of Homeland Security, enforcement agencies, and FEMA have adopted uses for ChemLights similar to the military and developed unique applications of their own.

Continually advancing the world of chemical lights, Cyalume has developed a new patented phthalate-free

formulation for all ChemLight products. Now available with a hook and gate top that allows more versatility when in use. ChemLights are available in visible and non-visible colors. They are non-flammable both before and after activation, maintenance free, non-toxic, and waterproof. They produce no sparks or flames. ChemLights are the only chemical light product that meets the Defense Logistics Agency (DLA) and NATO Maintenance and Supply Agency (NAMSA) specifications. National/NATO Stock Numbers (NSN) are printed on each military-spec product.

### MINI CHEMLIGHT®

Small and compact enough to fit anywhere, the Mini lightstick is a dependable source of light for military and law enforcement applications. Recommended for reading maps, cockpit lighting, shipboard fire-fighting "bread crumbs", identification, and medical kits. Individually foil-wrapped for light/moisture protection. Available in a variety of colors and sizes; providing up to 4 hours of illumination.

## 6" CHEMLIGHT® LightSticks

Field tested and proven effective, 6" ChemLights are easy to use, easy to identify and dispose of during military and federal government operations and trainings. Recommended for shift signals, drop zones, and hazard markers. Perfect for survival, first aid, and evacuation kits. Individually foil-wrapped for light/moisture protection. Available in a variety of colors; providing up to 12 hours of illumination. A high intensity, 30 minute ChemLight is available in a variety of colors. A 5 minute Ultra-High intensity ChemLight is available in orange.

## Surface Trip Flare

Proven by the U.S. military, the Surface Trip Flare is safe for use in any environment, under any conditions. When triggered by a trip wire, it activates a 6" ChemLight lightstick. Recommended by SWAT teams for maximum flexibility during nighttime operations. Non-flammable and non-toxic; it will not start a fire like a pyrotechnic trip flare. Ideal for nighttime intrusion spotting for any security observation post. The Surface Trip Flare is reusable - just insert a new ChemLight and it's ready to use again. An ultra high-intensity lightstick is recommended for use with this unit. Each Surface Trip Flare includes one ultra high-intensity ChemLight, trip cord, and mounting hardware for any surface.

## 15" IMPACT® LightSticks

The only lightstick that activates on impact, providing instant illumination. When near gas or oil, or any combustible materials, the 15" IMPACT stick is a dependable source of emergency lighting that is safe for use in all environments. Recommended for confined space lighting, vehicle repairs, building searches, bundle drops, refuel/rearm sites, and hazard markers. Available in a variety of colors; providing up to 12 hours of illumination. A 5 minute ultra-high intensity IMPACT lightstick is available in orange. 15" Non-IMPACT lightsticks are also available.

### When Your Safety Depends on Light...

With a simple bend, snap, and shake, SnapLight® Industrial grade, phthalate-free chemical lightsticks provide instant light for all emergency situations. Each SnapLight creates 360° of illumination, and is visible up to 1 mile. They are non-toxic, non-flammable, waterproof, and emit no heat or sparks.

All SnapLights can be paired with an optional handle, cone adaptor, or magnetic base for increased performance. Available in a variety of colors, sizes, and durations; SnapLights are ideal for all safety applications. See product description for details.

### 6" SnapLight® LightSticks

In an emergency situation, every second counts. Flashlights can limit your ability to see and cannot always be relied upon. The dependable 6" SnapLight is easy to use, identify, and dispose of when in emergency situations. Customized to your needs, 6" SnapLights can be color coded to your own safety rules and procedures. Providing 360° of light, the 6" SnapLight is recommended for personal use during evacuations, power outages, camping, auto safety, and utility work. Perfect for survival, first aid, and evacuation kits as they produce no heat, spark, or flame. Individually foil-wrapped for light/moisture protection. Available in a variety of colors; providing up to 12 hours of illumination. A high intensity, 30 minute SnapLight is available in white, yellow, and red.

## 8" Ultra High-Intensity Flare Alternative

Developed as a safe, environmentally-friendly alternative to traditional incendiary flares currently used by law enforcement, safety workers, and consumers. The 8" Ultra High-Intensity lightstick is the new dependable instant light solution. Designed to be practical with an easy to use, maintain, and operate approach, the new 8" Flare Alternative lightstick has proved useful for safety workers as the Next Generation Flare™. The 8" Flare Alternative with reflective strip enhances visibility up to 1 mile during emergencies. The attached wire stand allows easy setup and activation. With a new-patented formulation, the 8" Flare Alternative provides superior performance in cold and warm climates and is used in wet or dry weather. Ideally used at accident scenes, vehicle breakdowns, as hazard markers, and to alert drivers of obstacles in the road. Meets DOT Non-Hazardous Standards. Available in ultra high intensity orange; providing 30 minutes of illumination.

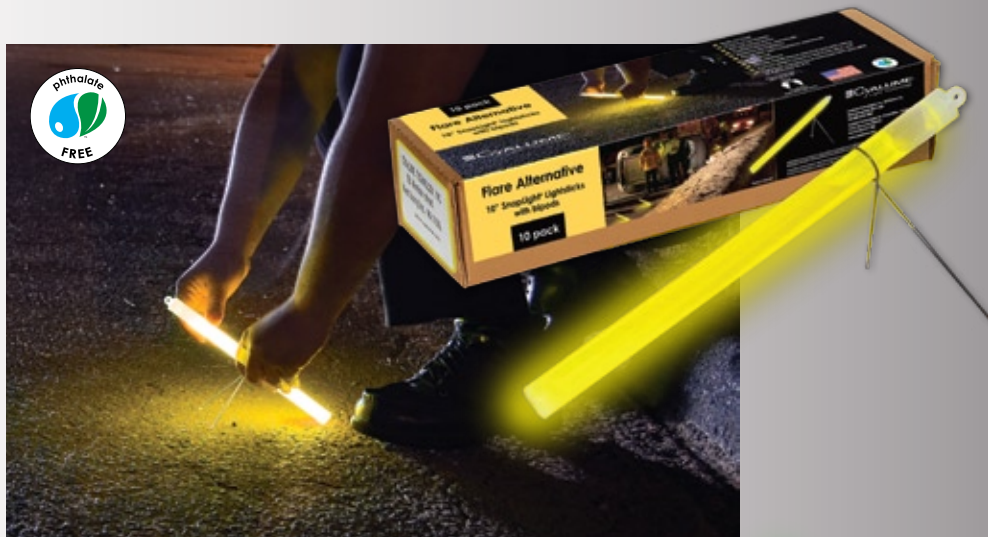

30 MINUTE	PART#	CASE
ORANGE ULTRA-HI	9-27035	4/ 12PK

## 10" Flare Alternative

With no batteries required, the 10" SnapLight offers 360° of illumination. Fits securely in a metal bipod stand to prevent rolling and is visible up to 1 mile. SnapLights are maintenance free, non-toxic, non-flammable, and waterproof. No Permit required for storage. One stick lasts 4x longer than a traditional flare. Available in a variety of colors; providing 2 hours of illumination.

## 12" SnapLight® LightStick

When additional light is needed, increase safety with a 12" SnapLight. Widely used by Law Enforcement the 12" SnapLight provides 3x the light of a 6" lightstick. Mining and Utility companies highly recommend the 12" SnapLight for evaluation of potentially hazardous situations as they generate no heat or flames. Ideally used for area lighting, signaling, and evacuations when directing individuals to safety. Individually wrapped in foil with a hole punched at the top for easy hanging. Available in green; providing 12 hours of illumination.

### When Faced with Danger...

Search and Rescue ChemLight® phthalate-free products provide easy, dependable solutions to help save lives at sea or on land. Cyalume's lightsticks are perfect for aviation, marine, camping and survival applications for water and wilderness rescue.

Every minute that passes after an incident occurs lessens the chance of survival. Cyalume's Search and Rescue products provide up to 8 hours of light, visible up to 1 nautical mile and 3 miles from the air. All PML® survival light sources are Coast Guard approved.

# SETTING THE STANDARD IN SAVING LIVES

## PML®

### Personnel Marker Light

The Coast Guard Approved superior clip-on signaling device for rescue-at-sea

## Personnel Marker Light (PML®)

Coast Guard approved, the PML is the superior clip-on identifying signal for rescue-at-sea or evacuation operations. PMLs easily attach to PFD's and immersion suits for quick identification. Designed to be lightweight, waterproof, and buoyant, the PML is the ideal emergency locator. Squeeze-handle provides immediate activation. When the protective sleeve is removed, 360° of reliable light is visible up to 1 nautical mile and up to 3 miles by air. Recommended for off-shore and workboat personnel. Available in green; providing 8 hours of illumination.

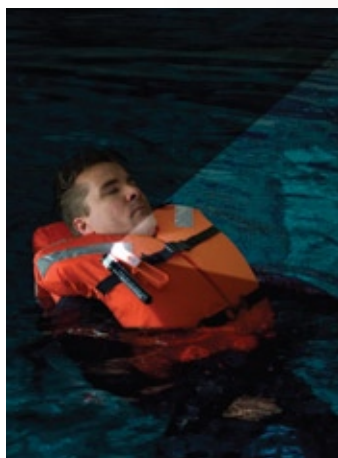

8 HOUR	PART#	NSN	CASE
GREEN	9-80770PF	6260-01-086-8077	50

## SOLAS PML®

The dual function, SOLAS PML is designed with a chemical and electronic light source for additional protection. The SOLAS PML securely attaches to a PFD. The electronic portion of the SOLAS PML is water activated and automatically starts flashing with a white high intensity battery operated beacon. The beacon can be manually turned on or off and will not dim. The ChemLight is manually activated by squeezing the handle. When the protective sleeve is removed, 360° of reliable light is visible up to 1 nautical mile and up to 3 miles by air. Available in green; providing 8 hours of illumination.

8 HOUR	PART#	CASE
GREEN	9-00350PF	40

An end-user statement must be signed with each order verifying customer's eligibility. Cyalume Technologies reserves the right to cancel ANY order for IR products at our discretion.*

Dual PML®

The Dual PML has two ChemLights that operate in warm (above 50°) or cold water (below 50°). Designed to be lightweight, waterproof, and buoyant, the PML is the perfect emergency locator for rescue-at-sea. The Dual PML easily attaches to PFD's and immersion suits. When the protective sleeve is removed, 360° of reliable light is visible up to 1 nautical mile and up to 3 miles by air. Available in green; providing 8 hours of illumination.

8 HOUR	PART#	CASE
GREEN	9-27060PF	50

SOS®

Ideally used as a signaling device, the SOS is perfect for rescue and outdoor safety operations. The lightweight SOS has a protective plastic outer casing that remains attached by a 30" lanyard and acts as a handle. When the user spins the device, it forms a distinctive 4ft circle pattern visible up to 3 miles from the air and 1 mile on land. The SOS can be placed in an emergency kit or vehicle. Available in green; providing 8 hours of illumination. A high intensity, 5 minute SOS is available in orange. Also available in Infrared.

## Mark Your Way to Safety...

Chemical light markers can be used any time, any place, any where. Available in a variety of colors, Cyalume's Emergency Markers can aid in identification,

evacuations, triage, and creating safe points. Cyalume's Emergency Markers are available in visible and non-visible colors.

### LightShape® Circle Markers

The self-adhesive 3" LightShape Circle Markers can be used for medical triage, evacuation procedures, room clearing, trail marking, and many other applications. Activation is easy. Just press, snap, and shake and within a short time the color will cover the diameter. Peel the paper backing and adhere to any surface. LightShape Circle Markers are available in a variety of colors; providing 4 hours of illumination.

Cyalume® Accessories make using lightsticks even more practical in all situations requiring light. All of Cyalume's Accessories aid in the use of 6", 10", 12", or 15" SnapLight and ChemLight lightsticks.

## Cone Adaptor

Cone Adaptors can be used by themselves or placed on top of a safety cone for improved visibility. They are stackable and easily stored. Recommended for use at DUI checkpoints, nighttime construction areas, barricades, accident scenes, utility work sites, and more.

ACCESSORY	PART#	CASE
CONE ADAPTOR	9-27103	25

## Magnetic Base

Magnetic Bases can be attached to any steel or magnetic surface. The Magnetic Base allows the lightstick to be held in an upright position for maximum visibility. Twist a lightstick into the base holder and attach to vehicles, light posts, or any other steel surface.

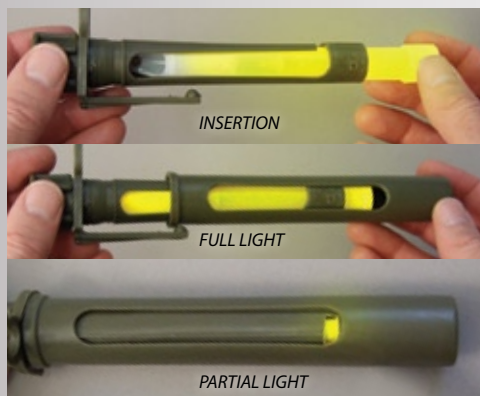

ACCESSORY	PART#	NSN	CASE
MAGNETIC BASE	9-33460	6260-01-255-3346	25

## Directional Handle

The self-threading Directional Handle comes with an attached lanyard which can be placed around the wrist to prevent it from being dropped. Lightweight and durable, the handle is recommended for police officers, road construction crews, valet parking attendants, or anyone who requires a highly visible light for signaling or directing traffic.

ACCESSORY	PART#	NSN	CASE
HANDLE	9-33450	6260-01-255-3345	25

## 6" Combat Light Shield Device

Designed with a rotating window, users can now control the amount of light emitted with the Combat Light Shield Device. This lightstick holder is made of durable plastic and can be clipped to personal clothing, webbing, or equipment. Ideal for use in tactical situations. Fits 6" ChemLight and SnapLight lightsticks. Lightsticks not included.

SHIELD	9-06370	6260-01-196-0637	Each

## Reflects White, Glows Bright...

Patented Cyflect® is the only product where 100% of the surface area is both prismatic retro-reflective and photo-luminescent. All Cyflect products are non-toxic, non-hazardous, and waterproof. The material is visible

through fog and smoke and, unlike glass-bead material, will reflect equally wet or dry and from oblique angles. Cyflect products reflect white and glow yellow-green. Custom colors, patterns, designs, and insignia are available.

### CYFLECT® PT Belts

Cyflect PT Belts are made from Cyflect material. Belts are adjustable and can be worn as a belt, over the shoulder "Sam Browne-Style", or over the rucksack. Includes a hook and loop field where one can affix the ACU embroidered rank and unit insignia. Glow can be recharged by a headlight or any other available light source. PT Belts exceed the visibility regulation for on-post/on-base runners, cyclist, and motorcycle riders. Ideal for physical training and tactical road marches.

### CYFLECT® Infrared Reflective US Flags and Squares

IR Flags and Squares reflect only infrared light for identification of friend or foe (IFF) during nighttime operations. Without a night vision device, flags appear tan or green with a matte black background with no sunlight glare. The squares are solvent-resistant, enabling uniform manufacturers to apply insecticide without marring the surface. Flags and some squares have hook backs to fasten to loop fields on the uniform. The ¾" squares are sewn on the uniform sleeves and helmet covers.

**Signs** - Enable safer evacuations in the dark with light switch covers, arrows, fire extinguishers, and exit signs.

**Tape** - Reflective and self-luminous tape is ideal for use on signs, displays, buildings, steps, stairs, and doorways. Available as a sew-on or adhesive in a variety of sizes.

## When the Power Goes Out...

During a power failure, every second counts. It is critical to have reliable, accessible, easy to use chemical lightsticks to immediately illuminate an area to protect and identify emergency personnel and victims. Batteries can fail and just like a flashlight, battery and generator operated emergency lighting systems cannot always be

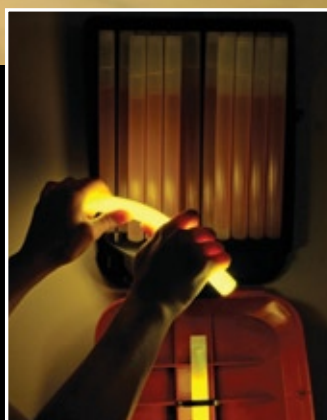

relied upon. Developed to reduce risk, Cyalume's Emergency Lighting Systems are the dependable evacuation solution for safety-orientated companies. Whenever and wherever emergency lights are required, Cyalume's Emergency Lighting Systems will provide dependable chemical light solutions.

# LightStation®

## Emergency Chemiluminescent Light System

Don't Be Caught  
in the Dark®

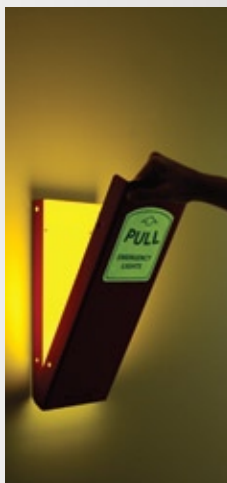

## LightStation®

With an easy to locate photoluminescent label on the front cover, the LightStation provides comfort and assurance that a safe dependable light will be available when the power goes out. Each model can be mounted to a wall near exits, fire extinguishers, or in any area that has little or no emergency lighting. All LightStation models are filled with 4 hour, yellow 10" SnapLight lightsticks; visible up to 1 mile in fog or smoke. See product description for details. Sealed with replaceable Tamper Evident Pins to provide a visual alert if tampered or used.

## LightStation® Models 4 and 10

Designed with a fire resistant case. When the front cover is pulled open, all SnapLights activate to provide instant illumination, flooding an area with portable light for evacuees. With a slim design, LightStation Models 4 and 10 are recommended for small spaces; an office, stairwell, elevator, restroom, kitchen, or hallway. Available in red.

## LightStation® Model 20

Designed with a heavy-duty molded plastic case. When the front cover is pulled open, one SnapLight activates, leaving 19 SnapLights for individuals to carry and use as light sources while evacuating. Ideally used in large common areas; hotels, hospitals, airports, bus stations, schools, manufacturing facilities, or auditoriums. Available in red.

LIGHTSTATION-FILLED	PART#	DURATION	COLOR	CASE
Model 4 w/ (8) SnapLights	9-00383	4 HR	YELLOW	Each
Model 10 w/ (20) SnapLights	9-00385	4 HR	YELLOW	Each

LIGHTSTATION-EMPTY	PART#	CASE
Model 4	9-00373	6
Model 10	9-00375	4
Model 20	9-00364	4

## S.E.E.® System

Take necessary measures of precaution to complement your current emergency back up system. When the power fails, S.E.E. Systems are more dependable than flashlights, safer than candles or flares. Install the S.E.E. System with photoluminescent label along a designated evacuation route to provide a safe, clearly-lighted path throughout a building. When the front cover is pulled open, two 6" ChemLight lightsticks activate, providing instant light to prevent slips, trips, and falls. Recommended for use in critical areas near; fire extinguishers, exits, stairwells, hallways, and offices. Available in beige. Includes 2-hour yellow high-intensity ChemLights.

S.E.E. SYSTEM	PART#	NSN#	CASE
S.E.E. w/(22) ChemLights**	9-08500PF	6260-01-396-2503	10 PK
S.E.E. ChemLight Refill ***	9-08505PF	6260-01-396-4014	10 PK

\*\*Includes Mounting Hardware. Sold as 10 pack system. Not packaged for individual sale.

\*\*\*Includes (5) Expiration Date Labels & (5) Tamper Pins.

## Cyalume's PHTHALATE-FREE LightSticks

Phthalates are industrial chemicals found in everyday products and widely used by other lightstick manufacturers. Several phthalates have been banned from use due to health concerns, as they have been found to disrupt the endocrine system, damage human reproductive systems and even cause cancer.

At Cyalume Technologies, we have a strong commitment towards sustainable development by producing greener and safer products. All of **Cyalume's products are 100% phthalate-free** with patented formulations.

## SnapLight® Private Brand Customization

Cyalume Technologies offers SnapLight lightsticks in a variety of sizes, time durations and colors for private branding. We can work with you to custom design the foil wrap that best suits your needs. Minimum quantities apply.

Contact the Marketing Department at [info@cyalume.com](mailto:info@cyalume.com) or call **888-858-7881** for more information.
