## General Information to all Distributors

### Pricing

Prices are as indicated in this catalog and are subject to change without notice. All prices are F.O.B. our plant, Brookfield, WI or Mooresville, NC.

### Terms

Terms of payments are net 30 days from date of invoice with approved credit. Any orders from any company with open invoices over 45 days old will be placed on hold until past due invoices are paid. All order and terms are subject to approval of EGA Products, Inc. A charge of 1% per month will be applied to all invoices past due. This will be calculated from the 31<sup>st</sup> day.

### Routing of Shipments

Unless your order specifies a preferred routing, shipment will be made the best way (rail, commercial truck or UPS) with freight charges collect. Freight classification for each product is shown in this catalog.

### Field Incurred Charges

Company policy is to provide customer satisfaction; however, we will recognize no costs incurred in the field unless authorized by us in advance and in writing.

### Damaged Goods

- Before accepting goods from a transportation company, be sure each itemized article is received as per original bill of lading and our invoice. If there is any shortage or damage, have the agent of the carrier, or his representative, state in writing on the freight bill(s) exactly what the shortage or damage is before accepting the goods.
- If discovery of loss or concealed damage is made after you have received the goods, notify the agent of the carrier within 48 hours in the case of apparent damage or loss, or within 15 days in case of concealed damage.

### Cancellation Policy

- We will cancel any order within 2 days of the order without cancellation charge; beyond that, cancellation charges will be required to cover the cost incurred.
- Cancellations cannot be accepted after material has been cut to size or started in the manufacturing process.

### Return Policy

- The following complete, as new, products are returnable if authorized in writing by EGA, subject to inspection at the factory to determine that the product is resalable as new.
- A restocking charge of 20% will be made and return freight will not be paid by EGA. Original freight bill from EGA to customer will not be EGA's responsibility.
- Materials which can be made resalable as new by simple additions or repainting will be salvaged at returner's expense.

### Returnable Items

- |   |   |
|---|---|
| • Carts (Casters subject to inspection for wear).                           | • Office Ladders without modifications.                                     |
| • Partition Panels-Standard Only.   | • Post Protectors.  |
| -SG1000 Standard wall panels.   | • Cylinder Cabinets   |
| -SG100 Vari-panels.   | • Custom Work Platforms (3'x3' only).                                       |
| -Line Posts.  | • Boxed KD products are subject to an additional 15% in restocking charges. |
| -Corner Hardware.   |   |
| • Steel Roll EZY Ladders B or G tread without accessories or modifications. |   |

### Discount Policy

EGA's discount schedule is applicable only in conjunction with the EGA terms just described, unless specifically written by EGA Products. Discount will be applied to distributors that

- (1) have and meet sales volume commitments and
- (2) actively market and sell EGA Products as their primary or exclusive supplier.

Minimum Billing is \$25.00.

*Dimensions and specifications contained within this catalog are subject to change without notice. Weights are approximate and may not be final shipping weight. EGA will not pay freight based on actual weight differences from application.*

## EGA Products

### Designed with access in mind.

With more than 360 standard models to choose from, EGA offers 10 full ladder lines to meet your retail, warehousing and manufacturing application needs. Whether it's a dock ladder or an industrial truck ladder, every product in the EGA line is designed for optimum performance and safety at an affordable price. Whatever the application, our experts can provide the right ladder solution.

All EGA products - ladders, storage racks, carts, dollies and partitions - are made entirely in the U.S. to ensure you receive the highest quality product for years of dependable service.

### STANDARD FEATURES

- Choose from steel, aluminum, or stainless construction.
- Select from Grip Strut®, EZY tread, or Anti-Slip vinyl treads for step and platform surfaces.
- Select from a variety of step widths to fit your application.
- Steel reinforced rubber feet, foot/bumper pads and super durable casters utilized.
- Floor locking systems designed and tailored for each specific style.
- Models that ship knocked-down, factory-erect (set-up), or fold-away.
- All ladders meet or exceed OSHA/ANSI standards with Cal-OSHA ladders available.
- Ability to add double or triple top steps, and fold down tray to most models.

### EZY TREAD®

- Choose for standard duty or cleaner areas.
- Perforated tread design formed from a solid steel sheet.
- Eliminates sagging problems and front edge wear which are common with most expanded metal treads
- Available in steel models only.
- Self cleaning, sure footed, and economical.

### GRIP STRUT®

- A must when oily or wet surfaces can be underfoot.
- A serrated tooth surface formed from a solid steel sheet.
- Acclaimed by all ladder manufacturers.
- Steel or aluminum construction.
- Aggressive, strong, sure footed and self cleaning.

### RUBBER SURFACE TREADS

- Best choice if a solid tread surface is desired.
- Soft, resilient surface that will last.
- Slip-resistant textured surface for sure footing.

### FLOOR LOCKING SYSTEMS

- Spring-loaded casters retract automatically under individual's weight. Durable steel reinforced rubber tips grip floor and secure ladder when in use. Steel inserts in tips provide strength and lengthen rubber tip life (A & B).
- EZY-Lock actually is a carriage providing mobility in transport, stability when in use. Minimum of moving parts assures long service life. Four casters located on the corners of the carriage/ladder provide mobile stability to the ladder. The first ladder step disengages carriage which puts ladder firmly on floor before being used. Step on one of two convenient foot pedals and the ladder is again mobile. No other ladder has a system with these safety orientated features (C & D).

D

# How to Select the Right Ladder for You (We Have 100's!)

1. Select platform height based on operations to be performed. Maximum convenient working height is generally 5' 0" above top platform.
2. Select as wide a ladder as space permits. Take into account whether people must pass ladder in aisle and where ladder must rest when not in use.
3. Consider limitations on ladder dimensions imposed by doorways, overhead obstructions, corners that ladder must turn, etc.
4. Consider some of our special "optional" features to insure the complete effectiveness of your EGA ladder.
5. For unusual conditions not illustrated in this brochure, we can provide custom engineering.

## EXAMPLE:

**WORKING HEIGHT = 160"**

— **MINUS 60" (5' 0")**

== **EQUALS PLATFORM HEIGHT = 100"**

**SINCE 10" = 1 TREAD HEIGHT**

**NUMBER OF STEPS = 10**

## How to Order

1. Select the model that best fits your application and performance requirements (see Select the Right Ladder above).
2. Review accessories and options to complete the effectiveness of your EGA Ladder. Include items on order.
3. When available, specify KD (knocked-down) if desired. Models ordered without KD option will be supplied as all-welded SU set-up.

## Usage Tips for Ladders

1. Proper selection
2. Inspect before each use.
3. Follow USE suggestions.
4. If assembly required, follow instructions.
5. Follow maintenance guidelines.

## EGA Available Colors

# Industrial Rolling Ladders

## Square Tube

These ladders roll with ease, yet lock securely in place while in use. They are ideal for a wide variety of warehouse, stockroom, maintenance and shop floor applications. Rugged square tube construction is 40% stronger than round tubing and welded sub assemblies for extra strength. 450lb capacity. Rigid 1" square tubing. 2 – 4 Steps have spring-loaded 3" casters which provide mobility while rubber-tipped legs add traction while in use. 5 – 16 Steps have an Ezy-Lock that features 4" casters which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 16", 24", & 30" wide steps. Steps are 7" deep with a deeper 14" top step. Perforated or Grip Strut tread for slip-resistant footing. Meets OSHA standards.

# 360 Degree Rotating Rolling Ladders

## Square Tube

EGA 360 degree rotating rolling ladders are the perfect solution for tight warehouse aisles. These ladders can spind on their own axis while still being able to track in a straight line. Unique 4 wheel, double Ezy-lock design. 2-1/2" pads on each ladder leg for secure feel in the climbing position. Rugged 1" square tube construction with comfortable 1" round tube hand rails. Available in 60 degree incline angle for a more compact foot print or ezy-angle 50 degree incline. Meets OSHA standards. Weight capacity is 450 lbs.

## Multi-directional Rolling Ladders Square Tube

EGA multi-directional rolling ladders have four swivel casters which allows precision steering - enabling easier positioning of ladder in tight areas. Double Ezy-Lock mechanism easily lifts ladder to the rolling position. Stepping on the bottom step secures ladder to floor with large 2-1/2" diameter pads on each leg. 50 degree incline safety angle on stair makes ascending/descending more comfortable and with less effort. Tough 1" square tube construction with ergonomic round tube handrails. Weight capacity is 450lbs. Meets OSHA standards

## □ EZY Climb

Unlike other steeper industrial warehouse ladders, the safety angle is designed with a more gradual incline for the feel and comfort of a stairway. Incorporating a deeper run, it allows workers to easily carry stock items while ascending/descending more quickly. 450 lbs capacity. Rigid 1" square tubing. 2 - 4 steps: Spring loaded 3" casters provide mobility while rubber tipped legs adds traction while in use. 5 - 10 steps: Ezy-Locks features 4" casters, which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 16", 24" & 30" wide steps available. Steps are 7" deep with a deeper 14" top step. Perforated or Grip Strut Tread for slip-resistant footing. Meets OSHA standards.

# ○ Industrial Rolling Ladders

## Round Tube

Industrial-grade ROLL-EZY ladders are constructed of durable, welded steel and are suited to a wide variety of stockroom, warehouse, maintenance and shop floor applications. These ladders are available standard with your choice of EZY tread. Grip Strut® or Anti-Slip Vinyl surface tread. Ideal for general industrial use, stock picking, and maintenance needs.

## FEATURES

1. 450 lbs. (1 person) capacity.
2. Rigid 1" diameter steel tubular frame designed for strength and security
3. Standard widths available for most models are 16", 24" and 30".
4. Steps are 7" deep with the top step 9½" deep.
5. 3" spring-loaded casters provide portability while rubber tips hold ladder in place during use (1-7 steps standard).
6. EZY-Lock provides mobility and holds ladder in place during use (8-16 steps standard). Also standard on 6020H, 7020H plus 6 and 7 steps with deep top step.
7. KD models incorporate a steel sleeve and pin joint connection secured by a set screw with nyloc patch which provide four-fold safety.

# Industrial Truck Ladder

Finally, a ladder that provides secure, safer access to semi-trailers when docking bays are full or unavailable. Ideal for retail and stand alone facilities, this ladder offers the “trailer jumpers” a safer alternative. The Industrial Truck Ladder has a 55-degree angle and provides a deeper run which allows workers to ascend/descend more quickly. Rugged, 10-inch semi-pneumatic wheels enable easy transport over rough surfaces - just lift the front bumpers and go.

## Features

- 450 lbs. (1 person) capacity.
- Rigid 1" diameter all welded steel tubular frame.
- 10" rear wheels roll easily over the toughest surfaces (e.g., bar grating).
- 2 1/2 " heavy duty rubber bumpers/pads on front legs holds ladder secure during use.
- Steps are 36" W x 7" D.
- Top step is 36" W x 19" D.
- Top step height of 47 1/2" allows access to standard semi-trailers.
- Grip Strut® tread provides sure footing and self cleaning on steps.
- Safety chain at both the top and bottom of ladder for added safety.

## Plus

- Ladder can be moved in no time with a simple lift and go.
- All-welded construction for the toughest industrial use.
- Meets OSHA standards.
- Gray enamel finish standard.

## □ Stockpicking Ladders

This versatile ladder can be used as a combination ladder as well as a carrying cart/stock-picker. It allows multiple items to be pulled from stock at the same time, reducing your response times. 450lb capacity. Rigid 1" square tubing. Ezy-Lock features 4" casters which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 24" wide steps. Steps are 7" deep with a deeper 21" top step. Perforated or Grip Strut tread for slip-resistant footing. Shelves are 23" x 25". Meets OSHA standards.

## □ Mechanics / Maintenance Ladders

Ideal for a variety of applications around the production or shop floor. A 21" deep top platform with a detachable chain at rear allows full access to work areas. Plus convenient handles at ladder front allow instant mobility. Perfect for the worker on the go. Rigid 1" square tubing. 4" casters provide mobility and rubber-tipped legs add traction while in use. 24" wide steps. Steps are 7" deep with a deeper 21" step at top. Perforated or Grip Strut tread for slip-resistant footing. Meets OSHA standards. 450lb weight capacity.

## Fixed Dock Ladders

Built with tough, all-weld construction for years of service, Walk-Thru and Side Step ladders provide easier access to docks, platforms and mezzanines. The Walk-Thru model features a handrail extending 42" above the top rung to help guide you safely up and down. The Side Step has 4 ladder rungs at the top for easy movement up and down. Both ladders rest 6" away from mounting surface for foot clearance when climbing. 300lb capacity. Rigid 1" diameter tubing for handrails. 19" wide steps. One-diamond Grip Strut tread for slip-resistant footing. Meets OSHA standards.

## Fixed Vertical & Cage Ladders

Designed specifically for roof and platform access, Fixed Cage Ladders meet all known building codes. A sure way to make your facility safer. These ladders feature a Walk-Thru handrail extending 42" above the top rung to help guide you safely up and down. Cage begins 8' from ground extending to ladder top. Cage flared at bottom for easy access. 300lb capacity. 18" wide steps. Sturdy, 1" diameter wall rungs ensure long life and durability. Meets OSHA standards

## □ Industrial Stairways

Create strong, reliable access to mezzanines and elevated platforms with our Industrial Stairways. Fully assembled, all-welded construction offers more rigidity than bolt-together designs and eliminates the headaches of do-it-yourself assembly. Safely carries a 500lb moving load. Units have 10" channel stringer for strength and rigidity. 1-1/2" square tubing handrails. Stair treads are a generous 36" wide. Meets OSHA standards.

## ○ Custom Work Platforms

Our custom platforms allow you to choose the style, step type, height and configuration to perfectly fit your application. Select a single platform, or choose an extension unit which allows you to add 3' to the width of select platform styles. This unit can be at the same height, or function as a step-down area below existing platforms. Multiple options enable you to build a large surface area that surrounds machinery or spans the entire shop, factory or warehouse floor. 500lb capacity. Rigid 1-1/4" diameter tubing. 36" wide steps. Steps are 7" deep with a deeper 36" platform at top. Grip Strut tread for slip-resistant footing. Meets OSHA standards.

## Die Shelves for Pallet Rack Beams

Designed for standard 1-5/8" step beams, EGA's Die Shelves provide a solid sheet steel deck for increased utility of existing pallet rack locations and durability. The die shelves are available with a low to high capacity of 2,000 to 6,000 pounds. Options include waterfall edges, back stop with lip up corners, colors (standard is grey enamel finish), and custom designs available.

# Partitions

Use EGA's mesh partitions to build enclosures without sacrificing visibility or rerouting existing air ducts, piping and lighting systems. Expanded metal mesh allows pass-through holes without unraveling. Plus, smooth expanded metal mesh won't catch clothing or cause scratches. Choose from a variety of panel, door and hardware configurations to meet your needs.

## Standard Panels

Standard panel widths are 1 - 5 feet in three standard heights of 7, 8 and 10 feet. For maximum security at an affordable price, use panels 5 feet wide and 7 feet high. The large panels cost less per linear foot than any other known system and provide almost unlimited configurations for safety, security, convenience and privacy. Best of all, your crew can put them up quickly, with or without power tools.

## Two types of doors

Single sliding door available in standard 3', 4', 5', and 6' widths for partitions 7', 8', and 10' high. Service window available. Single swinging door available in standard 3' and 4' widths for partitions 7', 8', and 10' high. Service window available.

## Two Locking Systems

For hinged or slide gate doors. Standard is pick-proof, fully reversible multi-lock with high impact die cast aluminum case, brass cylinder, tongues and recessed knurled finger operating knob. Five pin, 1" standard cylinder secured by nut inside lock. Keys can be; door unique, keyed alike, or master keyed. Rugged padlock-type has welded hasp. Security opening accommodates various types of locks.

Industry's best shipping protection Palletized, banded, shipping unit eliminates handling damage and lost parts.

## Features

- Constructed of 13-gauge expanded metal in 1 1/2" diamonds.
- Least expensive system to erect because unique fasteners permit use of power tools.
- Lower cost because corner posts are unnecessary.
- Lowest freight costs due to extremely light weight despite unusual strength.
- Palletized shipping minimizes freight damage and eliminates missing parts.

- Fully reversible: both sides of mesh are finished thanks to special perimeter design.
- No burrs: surface is brushed and blasted.
- No unraveling when pass-through cuts are made.
- EZY and true vertical alignment with adjustable floor sockets.
- Solid panel or wainscot, top or bottom, integral with panel not merely "tacked on".

## Plus

- Wide range of sizes and configurations.
- Doors have mortise-type cylinder locks operated by key or optional padlock hasp.
- Changeable configurations by rearranging, adding or removing units.
- Special colors available.
- Doors keyed individually, alike or master keyed.
- Super-durable, gray enamel finish is standard.

## Accessories

1. Ceiling for all enclosures provides maximum security.
2. Extension panels to increase enclosure height up to 20'. Each panel spans two bottom panels.
3. Sliding door, described at left.
4. Hinged door, described at left.
5. Slide-up service windows. Standard 3' 10" x 18" opening with optional 12' steel shelf.
6. Wainscotting. 18 gauge sheet steel, half or full panels.
7. Cutouts will not unravel thanks to our specially fabricated expanded metal.
8. Vari-panel is the most economical solution to incremental widths or non-square dimensions.

## How to Order

EGA standard size wall panels in widths of 1 ft., 2 ft., 3 ft., 4 ft., and 5 ft., greatly reduce the need for special width panels. However, if required, EGA can produce special sizes for an additional charge.

1. Make a rough floor plan of the area to be enclosed.  
Note overall inside dimensions on the drawing.
2. Select type of partition (SG-1000, SG-2000, SG-3000).
3. Select height of partition (7'0", 8'0", and 10'0" standard).
4. Indicate on drawing the location and size of all doors and service windows:  
a) show direction doors swing or slide.  
b) show key side.  
c) indicate whether locks are to be keyed alike, different, master keyed or padlock attachment.
5. Location of reinforcing posts (every 20' recommended for 7' and 8' high panels; every 10' for 10' high panels).
6. Color of paint if other than standard gray enamel.

Whenever possible, furnish drawings or simple sketches such as the one shown here.

STANDARD WALL PANEL	Width	7 Ft. Height			8 Ft. Height			10 Ft. Height		
		EGA #	Price	Wt. Lb.	EGA #	Price	Wt. Lb.	EGA #	Price	Wt. Lb.

## Wall panels

Identical both sides. Price includes all necessary hardware and extra-high adjustable cast aluminum floor sockets. Floor anchors supplied by installer.

## Solid panels

18 gauge metal replaces mesh. Specify solid panels when ordering wall panels or doors.

## Vari-panel

This adjustable panel is use when an enclosure can't be completed with a standard panel. Simply slide to appropriate width and bolt together. Kit includes... (A) top and bottom perimeter bars, (B) two 7" wide panels, (C) panels are 7', 8', or 10' high, (D) bolts and washers, (E) sheet metal screws.

## Doors

Includes all necessary hardware, floorplate, and mortised tumbler lock with 2 keys. Door opening 2 1/2" less than nominal door width. Standard opening height is 6' 6" for 7' high doors and 7'3" for 8' and 10' high doors.

## Hinged Door

Standard door opens out of room and has 3 butt hinges on left side when looking at door from outside. Specify different arrangements if required...provided at no additional charge.

## Sliding Door (standard)

Standard door is outside room and slides to the right when looking at the door from outside. Specify different arrangements if required... provided at no additional charge. Includes separate mounted floor door guide and door frame protector.

## Sliding Door (full height opening)

Clear open height is 6" less than overall height.

## STRUCTURAL REQUIREMENTS

## Line Post (standard)

Required for every 20' run of 7' and 8' high partition without corners or doors. Required for every 10' run of 10' high partition without corners or doors.

## Line Post (extra heavy)

Use for extra rigidity on walls or in heavy traffic areas.

## Adjustable Corner Post

Required for corners other than 90 degree.

## Corner Hardware

CH required for each 90 degree corner in system.

TH required for joining wall panels in a "T" configuration.

## Ceiling or Wall Extension Panels

Provides maximum security. Odd size panel, use larger size + \$12.

### ORDER INSTRUCTIONS:

Use Model# CE HW

Key: H is height; W is width.

Panels can be oriented either way.

Example: CE 105 is 10' high x 5' wide.

Panel weight is 1.3 lbs. per sq. ft.

Ceiling Truss – Use when ceiling span exceeds 10 ft.

## Accessories

**\*PADLOCK LUGS** – Deduct \$19 instead of mortised tumbler lock on all doors. Specify when ordering.

**\*KEYED ALIKE (multiple doors)** – No charge.

**\*MASTER KEYED (multiple doors)** – Add \$48 for each locking system.

**SERVICE WINDOW UNIT** – 32" opening in 3' and wider wall panels or doors. Add \$244 to wall panel or door price.

**SHELF** – 8" wide shelf centered on window. Add \$33 to service window.

# Post Protectors

Post protectors help prevent serious personal injury and damage to rack posts, shelving corners, partitions, overhead door track bases and more. Inexpensive and easy to install, post protectors are one of the least expensive ways of reducing costs related to damaged racks.

## Features

- Protects materials as well as shelves and racks.
- Sizes available for both 3" and 4" diameter columns.
- Several heights to accommodate various shelf, rack and column designs.
- Fabricated from rugged 1/4" steel plate for durability.

## Plus

- Low cost way to reduce expensive damage.
- Quick, simple installation.
- The original and still the best design.
- Finished in EGA safety yellow.
- Ships UPS. Shipped from factory stock approximately 5 working days. Choose from a variety of sizes developed to accommodate virtually every shelf and rack column.

## Easy to install

- Simply position Post Protectors around rack posts, shelving corners, partitioning or track base. Drill proper size holes in floor. Anchor with 1/2" fasteners (not provided)

## Proof Positive

This EGA Post Protector (Fig 1.) withstood three rammings from an overloaded, 2,500-pound lift truck in a large Midwest manufacturing facility.

A 12-inch post protector was secured by a 3/8" x 3" Rawl plugs for the test. The rack and its contents were undisturbed.

POST PROTECTORS

# Cylinder Cabinets

Store common fuel and welding gas cylinders indoors or outdoors in cabinets that meet OSHA standards. Cabinets provide organized storage, secure from unauthorized use or tampering.

## Features

- Cabinets are constructed of 13 gauge expanded metal in 1 1/2" diamonds.
- Shipped KNOCKED DOWN in a protective box.
- EZY-ERECT hardware speeds erection, reducing manpower requirements.
- HCC models for horizontal storage of 4 to 16 tanks weighing up to 43 Lbs. each.
- VCC models for upright storage of cylinders. One or two labeled compartments store empty and/or full cylinders.

## Plus

- Frame provides super strength, yet is lightweight.
- Quick, visual inventory control.
- Painted safety yellow (Indoor paint standard).
- Identification sign and NO SMOKING decals provided per regulations.

## Options

- Pre-assembled or fully welded units.
- Custom Cabinets? Send us your RFQ.

# Portable Stacking Racks

Portable Stacking Racks are known for their versatility - ours are no exception. Whether it's storage, handling, or transporting, EGA Portable Stacking Racks perform where and when they are needed. Racks not in use can be broken down for convenient, compact storage freeing up floor space normally occupied by bulky, permanent rack systems. Materials can now move through your entire production process...all on the same rack.

Stacking racks give you the best of both worlds: weight load capacities rivaling wood pallets...combined with the positive stacking and product protection only plug/post joint racks can deliver. EGA has designed portable stacking racks for a variety of applications including: textiles, wire coils, automotive parts, tires, and more. Available in open frame, wood, steel, welded wire mesh or perforated steel decks.

### Features

- Stackable.
- Welded tubular and structural steel construction provides reliable load carrying strength.
- Standard duty 2,000 lbs. or heavy duty 4,000 lbs. capacity.
- Standard target is 4" square tube and mounted on removable stacking posts.
- Standard end or side frames is a steel framework of horizontal and vertical angles welded between pairs of posts.
- Standard post is 1.5" square tube on 2000 lbs. capacity units and 2.17" square tube on 4000 lbs. units.
- Standard plug is base mounted.
- Designed for fork lift handling with Two-Way, Four-Way, or Full Four-Way accessibility.
- Select from a broad range of deck surfaces (open frame, wood, steel, welded wire mesh, or perforated sheet steel).
- Standard sizes change in 6" increments (custom made to any size).
- Store heavy or irregular shaped pieces that can not be stacked on top of each other.
- Virtually unlimited configurations possible due to a wide range of bases, sides, and ends.
- Custom engineering available for over-the-road shipping, product protection, etc.

### Plus

- Store compactly when not in use.
- Free up valuable floor space.
- Return more empties in less space.
- Flexible plant layout possible because these racks are portable.
- Change size, shape and location of storage areas as space or work load dictates.
- Use for intra-plant as well as interplant materials movement.
- Coil racks, fixed posts, interstacking with existing units, and nestable racks.

### Options

- Floor skid runners for unit conveyability.
- Fork stirrups or pockets to prevent shifting of racks on fork tines.
- Custom design? Send your RFQ.

# Custom Engineered Returnable Racks

## Caring about workers and the environment.

When this tier 1 supplier needed a transport rack for their rear-suspension assemblies, they were precise. The racks needed to be both returnable and ergonomically designed to minimize worker fatigue. Working with the supplier, EGA designed and built custom stackable racks that allow random loading at the supplier and permit easy random unloading at the automotive assembly line. And because all painted surfaces are protected by the racks during transit, hard-to-dispose-of-packaging waste was eliminated.

## Why Custom Engineered Returnable Racks?

Manufacturers have had to settle for something less than the best way to store and transport their products. They've had to use packaging, pallets and racks that left their products every which way AND loose. The results have been needless waste of space, product, labor and material dollars.

EGA provides you with the better way. Our Custom Engineered Returnable Racks incorporate the features and characteristics of your products and processes into rack design that saves you space, product, labor and money.

Using EGA's Custom Engineered Returnable Racks, you change the size, shape and location of staging and inventory areas. And by leaving material on Returnable Racks, you easily move work-in-process around the plant, or between plants, to better meet scheduling or seasonal needs. Then by using a design feature that allows you to fold them when not in use, you compactly store or return empty Returnable Racks to free up floor or trailer space.

Don't settle for anything less than the best way to store and transport your product. Get the material handling solution that truly meets your needs, again and again. EGA Custom Engineered Returnable Racks.

## Benefits of Returnable Rack

**Send your custom specifications and we will return a quote within 2-3 business days.**

# Bulk Containers

## Visualtainers

No more looking up at racks and guessing at what's inside. Visualtainers™ let you actually see your materials inventory. Critical to today's JIT production processes, Visualtainers help you keep a high volume of parts close to the production line - accessible and easy to transport. These versatile units can be stacked six high at a rated capacity of 2,000 lbs. or 4,000 lbs. Available in both standard and custom designs to meet your special applications.

## Solid-Sided

Solid-Sided dunnage containers are designed to store small items or granular materials and are available in corrugated or flat steel sides in gauges seven through 16. Standard sizes are offered in height increments of two inches; floor clearance ranges from four to 12 inches. Top flanges can be turned in or out depending on the application.

Send your custom specifications and We will return standard quotes within one business day. More complex or higher quantity quotes may take 2-3 business days.

# Trucks/Dollies/Carts

EGA Steel Trucks, Dollies and Carts are ideal for use in stock rooms, shipping and receiving, production and warehouse operations. Standard and special features on every truck and cart make these a smart choice for any application.

## Features

- 1,000, 2,500, and 3,200 lbs. capacities.
- All-welded construction for long service life.
- 14 gauge deck and shelving standard.
- Two rigid and two swivel casters standard in 5", 6" and 8" sizes.

## Plus

- Sturdy steel decking.
- Rigid frame.
- Rugged, easy rolling casters.
- Sizes and types for every use.
- Easily replaceable ball bearing casters.
- Gray enamel finish.

## Options

- Four swivel casters.
- 2" lips up or down on shelves.
- Colors.
- Handles 1 or both ends.
- Custom design - Send your RFQ.

### Swing Gates

Swing gates are an easy, inexpensive solution to enclosing handrail openings. Available in two sizes which are adjustable to fit almost any opening. Gate opens a full 90 degrees. Hardware for multiple mounting options included with each gate. All models are self actuated with a heavy duty stainless steel spring. Available in yellow powder coat, hot dipped galvanized or stainless steel.

**Pg. 8**

### ☐ 360 Degree Rotating Rolling Ladders Square Tube

EGA 360 degree rotating rolling ladders are the perfect solution for tight warehouse aisles. These ladders can spind on their own axis while still being able to track in a straight line. Unique 4 wheel, double Ezy-lock design. 2-1/2" pads on each ladder leg for secure feel in the climbing position. Rugged 1" square tube construction with comfortable 1" round tube hand rails. Available in 60 degree incline angle for a more compact foot print or ezy-angle 50 degree incline. Meets OSHA standards. Weight capacity is 450 lbs.

**Pg. 9**

### ☐ Multi-directional Rolling Ladders Square Tube

EGA multi-directional rolling ladders have four swivel casters which allows precision steering - enabling easier positioning of ladder in tight areas. Double Ezy-Lock mechanism easily lifts ladder to the rolling position. Stepping on the bottom step secures ladder to floor with large 2-1/2" diameter pads on each leg. 50 degree incline safety angle on stair makes ascending/ descending more comfortable and with less effort. Tough 1" square tube construction with ergonomic round tube handrails. Weight capacity is 450lbs. Meets OSHA standards
