FISKARS®

A QUALITY STORY FROM 1649

In 1649 Peter Thorwöste was granted permission to manufacture cast iron and forged products in a small Finnish village called Fiskars. His company soon became famous for high quality steel and steel products.

In 1967 Fiskars launched its iconic orange-handled scissors, pioneering a revolutionary manufacturing process, ergonomic handles and innovative blades that offered precision, comfort and durability far superior to its peers. Nowadays a must-have in households worldwide, the orange scissors are symbolic to Fiskars commitment to exclusive quality and innovative design.

Today one of the Western world's oldest companies, Fiskars has grown into a multinational Corporation, present in more than 40 countries on four continents. The company's roots and soul can still be found in Fiskars village, where, some 10 kilometers away, garden tools are manufactured according to its strict historic quality standards.

Fiskars ergonomic, lightweight, yet powerful garden tools are designed to reduce strain and fatigue, and to ensure its green fingered users the ultimate gardening experience in today's hectic lifestyle: less effort required means more time to enjoy!

This has resulted in a steady increase in market shares and positioned Fiskars as a top-selling brand with a global presence; number one in hand operated garden tools in North America, Australia and much of Europe.

PRUNERS

INNOVATION

ERGONOMICS

DESIGN

The PowerStep™ technology allows gardeners to cut branches in 1, 2 or 3 steps

Softouch handle for better grip

PTFE coated upper blade

PRUNERS

Fiskars Pruners are ergonomically designed for comfort and ease of use, and recognised as best in category by many gardeners and industry experts for value and performance. Their ergonomic handles are made of extra durable fibreglass reinforced polyamide and the stainless steel blades are secured by an easily accessible locking mechanism when the pruner is not in use.

The range includes Fiskars unique PowerGear™ pruners with a gear mechanism and the award winning PowerStep™ pruners which allow gardeners to cut branches in 1, 2 or 3 steps. The tool autonomously selects the gradual option, to reduce the force needed per stroke. The revolutionary new mechanism makes the workload easier on young and senior gardeners alike, eliminating strain and pain to increase the overall pleasure of gardening. SingleStep™ Pruners are the newest addition to the Fiskars high quality pruner's family.

LOPPERS

UNIQUE
POWER
MECHANISMS

The PowerStep™ technology allows gardeners to cut branches in one or multiple steps

SoftGrip™ handle for better hold

Anvil cutting action for dry and hard wood

LOPPERS

Fiskars loppers are suitable for any kind of cutting in the garden, with cutting capacity up to ø 50 mm. The unique PowerGear™ mechanism increases cutting power and distributes it evenly throughout the cutting action. The PowerStep™ technology allows gardeners to cut branches in one or multiple steps. It makes the workload easier on young and senior gardeners alike, eliminating strain and pain to increase the overall pleasure of gardening.

Fiskars loppers are made of fibreglass reinforced polyamide, which makes them lightweight and strong. The cutting blades are PTFE- coated for less friction. The loppers are available in three different models: anvil and bypass with hook or scissor head. Fiskars anvil loppers are designed for cutting dry and hard wood. Fiskars bypass lopper with hook head is suitable for heavy cutting of fresh wood. Fiskars bypass loppers with scissor head are designed for precision cutting, allowing cutting with the tips of the blades.

UNIVERSAL CUTTERS

MULTI-USE TOOL

Ergonomically designed
SoftGrip™ pull handle

Cutting head can
be rotated by up to
230° to obtain exact
desired position

Vertical cutting reach
of up to 3,5m for high
hedges and bushes:
prevent having to use
a ladder or to bend
in non-ergonomic
positions

UNIVERSAL CUTTERS

Fiskars Universal Telescopic Garden Cutter is a multi-use tool with excellent accessibility to tree crowns and dense bushes. Trim overhead without a ladder or at ground level without bending or kneeling. Activate the great cutting power with a mere slide of the orange handle or when used at maximum height, pull the orange end knob.

ADVICE: When you buy a hedge shears, a simpler and quicker way to evaluate the best tool is the "Pencil test". Match the efficiency of different hedge shears using the blade tips for cutting a pencil and the result will be that not so many shears pass the test. Fiskars hedge shears extend their cutting performance to the blade tips, reducing energy and reducing effort when working in your garden.

WEED PULLER

WITH EJECTION SYSTEM FOR A
CLEAN AND EFFICIENT RESULT

Deep-reaching stainless steel claws

WEED PULLER

The Fiskars Weed Puller is a great invention for removing weeds, such as dandelions, from the garden. The tool is easy and comfortable to use: no digging or bending down is required and no chemicals are needed. The Weed Puller's deep-reaching stainless steel claws grab the weed's root from multiple directions to pull it out of the ground. The ejection system allows a clean and efficient result.

Multi action 139910

Weed pullers can easily be cleaned under running water.

REEL MOWER

ADVANCED DESIGN

REVOLUTIONARY PERFORMANCE

The Momentum™ Reel Mower is easy to push, has a great cutting power and perfect cut range

MOMENTUM™ REEL MOWER

Reel mowers are a smart choice. They are good for your lawn, good for your health, good for the environment, and good for your budget.

Fiskars new Momentum™, the world's most advanced reel mower, provides solutions to the problems inherent in traditional reel mowers. The Fiskars Momentum™ mower combines patent pending technology with superior ergonomics to deliver a reel mower with best in class cutting performance for a superior mowing experience. Compared with traditional reel mowers, the Momentum™ mower is easier to push, has more cutting power, StaySharp™ blades, a greater cut range, closer side edging, superior ergonomics and is easier to adjust. In fact, the Momentum™ mower beats all other reel mowers in every one of these important areas.

Product Name	Old Product Code	New Product Code
Momentum™ Reel Mower	NEW	113880

- < Exclusive StaySharp™ cutting system cuts grass without the blades touching to help reduce push force by 30% in long grass and provide long lasting performance without annual sharpening
- < Patent pending InertiaDrive™ technology delivers twice the cutting power to blast through twigs, weeds and tough spots that would jam other reel mowers
- < Patent pending VersaCut™ design provides best in class cutting capabilities – with cut height settings from 2,5cm - 10cm and the closest side edging of any reel mower
- < Best in class convenience features include an ergonomic, height adjustable handle with a padded grip, a quick and easy one-touch cut height adjustment system, and a forward throw grass discharge chute for mess-free operation

AXES & FORESTRY TOOLS

NEXT GENERATION AXES

Secure connection between the head and handle ensures that the axe head will stay in place

Ultra light FiberComp™ shaft to ensure durability

SoftGrip™ handle for a firm hold

Head and handle are perfectly balanced for maximum safety

AXES & FORESTRY TOOLS

Fiskars next generation axes are built upon 20 years of experience, enhanced process and strict attention to detail. We have enhanced the blade geometry and ensured the perfect balance between head and shaft for the most safe, efficient and comfortable use. All axes are easily identifiable by the product name now printed on the handle. The ultralight and durable FiberComp™ handle minimises fatigue and makes the axe virtually unbreakable. The optimized anti-shock surface structure offers a comfortable, firm grip with just the right feel. The hooked end of the handle prevents the axe from slipping: it allows the hand to slide down easily when it should, but ensures it stops at the end. The new blade geometry and rounder edges ensure easy removal from the log when splitting wood. While the cutting bevel angle for chopping axes has been kept at 30, the bevel angle for splitting is 35 on the cutting convex cutting angle. The convex shape strengthens the edge to make it less sensitive to fracture. All axes come with a brand new sheath for easy handling and protection of the blade.

UNIVERSAL CHOPPING AXES

FOR ALL WOODCRAFT, CARPENTRY, PRUNING, CUTTING AND LOGGING

TIP: Fiskars Axe and Knife Sharpener

Axe sharpening is easily done with Fiskars patented, user-friendly sharpener for axes, brush hooks and knives. Place the sharpener on a flat surface, put the blade in the groove and move it back and forth a few times while pressing down gently. **N.B.** Regular use of the sharpener keeps the axes sharp and safe!

SAWS

EXTRA SHARPNESS

OPTIMAL SAWING EFFICIENCY

SAWS

Fiskars saws come in a variety of styles and sizes, and are primarily used to prune branches of over 5cm in diameter. The blade of hardened steel ensures longer life and extra sharpness and the double pointed razor-sharp teeth cut on both push and pull strokes for optimal sawing efficiency.

QUIKFIT™

CONNECT WITH SIMPLICITY

QUIKFIT™

Renowned for innovative functionality, Fiskars is dedicated to produce garden tools that set new standards for the industry. Strong, lightweight, high performance tools make garden work more productive, which allows for more creativity and time to enjoy. Fiskars new QuikFit™ provides a full range of opportunities with one single shaft, as each head completes the perfect tool for every specialised task.

reddot design award
winner 2010

TIP: Fiskars QuikFit™ Locking system - winner of the Red Dot Award: Product Design 2010. The QuikFit™ mechanism ensures effortless change of heads for rakes, cultivators, hoes, weeders, saws etc. The heads attach to the shaft and the device is immediately ready for your use.

HEADS - CULTIVATORS

Product Name	Old Product Code	New Product Code	
3 Prong Cultivator	NEW	136511	
 	<ul style="list-style-type: none">< For cultivating, scarifying, aerating and breaking-up soil. Suitable for seedbed preparation and maintenance< Blade of hardened steel

ERGONOMIC

OUTSTANDING COMFORT

ERGONOMIC

This ergonomically designed range of spades and forks guarantees a good working posture. The long handle and the optimal lifting angle minimises strain on back and shoulders and the bent grip gives the hand a natural working posture.

ERGOPLUS™ RANGE

Product Name	Old Product Code	New Product Code	
Garden Spade (Straight)	NEW	131401	
  	<ul style="list-style-type: none">< Straight cutting edge for slicing and cutting grass tufts and moving and mixing soil< Lifting angle 26°		

Product Name	Old Product Code	New Product Code	
Garden Fork	NEW	133401	
  	<ul style="list-style-type: none">< For breaking down soil after digging or for moving crops and plants and material that is too bulky for a spade (e.g a pile of leaves)		

ERGOCOMFORT

Product Name	Old Product Code	New Product Code
ErgoComfort Spade pointed	NEW	131142
	<ul style="list-style-type: none">< For digging and removing roots and grass clods< Sharpened edge for easy cutting of roots< Stepping surface for additional leverage	

Product Name	Old Product Code	New Product Code
ErgoComfort Garden Digging Fork	NEW	133422
	<ul style="list-style-type: none">< Firm prongs for loosening had and stony soil< Suitable for moving garden waste and clippings	

GARDEN LIGHT

LIGHTWEIGHT

ERGONOMIC DESIGN

GARDEN LIGHT

Fiskars Garden Light family includes tools, which reduce the back strain and make the garden work lighter. Garden Light tools have lightweight, plastic coated aluminium shafts and ergonomic handles or drop shaped soft grips for optimal grip. Blades, spikes or rake heads are made of durable materials: steel or special durable plastic. Paying strict attention to detail, Fiskars launches an improvement of the Garden Light range, adding a polyester tag to the handle for hanging. The new loop helps keep good order in the garden shed.

GARDEN LIGHT

Fiskars QUALITY

“Fiskars Quality since 1649”

According to the strict Finnish standards for design, Fiskars has a history of using only exclusive quality, durable materials for the finest end result. Before entering the market, each product stands subject to extensive operational tests, where blade sharpeners and maintenance kits ensure the best performance and preservation of frequently used tools. With peace of mind, Fiskars guarantees the quality of all of its products.

A lifelong commitment to quality

Quality has always been one of Fiskars' core values, to which the company stands firm on having a holistic approach throughout its entities and throughout the product's lifecycle. Delivering a quality end product is merely the basis that extends into top service levels for customers and consumers alike.

Anytime.....anywhere

When properly used and maintained, Fiskars garden tools shall remain free of defects in material and workmanship. Any exception to the rule will simply be repaired, replaced or substituted by a product of equal value. Replacement tools or spare parts are offered when returning the tool to the retailer, or contacting the local customer service department.

EaseCut™

EaseCut™

Indicates how many times the cutting power is multiplied by.

USAGE AREA

Bypass blade

Best for making clean cuts to fresh, living growth.

Anvil blade

Best for cutting dry, hard growth even in rough places.

Snip blade

Best for cutting thin steel plates, plastic, tube, rope and hose etc. (Not recommended for cutting branches)

Hook Head

Optimal blade geometry for heavy cutting of fresh wood.

Scissor head

Optimal blade geometry for precision cutting of fresh wood.

Splitting axe

The splitting axe has a unique wedge-shaped blade that easily slices into the wood, for easier, faster splitting.

Chopping axe

The chopping axe has a thin, wide edge that ensures a clean, easy cut through fresh, resinous wood.

Brush hook

The brush hook has a unique blade design with optimal thickness for trimming underbrush and even small trees.

Fine tooththing

Best for ensuring a clean cut of dry wood strips and boards.

Efficient tooththing

Best for highly efficient sawing of fresh wood.

PRODUCT MATERIAL

FiberComp™

Indicate that the component has strong/durable and lightweight properties due to its reinforced fibreglass construction.

PBT

The component has lightweight, flexible and hardwearing properties due to its polymer construction.

Genuine leather

The component is made of tough genuine leather.

CrMov

The blade is highly durable and stays sharp due to its special CrMov steel construction.

Aluminium

The component has lightweight, strong properties due to its hardened aluminium construction.

Stainless steel tube

The component is mechanically strong and corrosion resistant due to its stainless steel construction.

Boron steel

The component sharp and corrosion resistant due to its stainless steel construction.

Steel gear mechanism

The mechanically strong and effective steel mechanism enhances the cutting power.

PTFE coating

Corrosion resistant, non-stick blade coating reduces friction to make cutting easier.

PRODUCT FEATURES

Cutting capacity

Shows the maximum cutting diameter.

Spare parts

Indicates that replaceable spare parts are available for this product.

Plus parts

Indicates that the features of this product can be expanded with additional parts.

Anti shock

The anti-shock system improves comfort by absorbing the vibrations transferred from the handles.

SoftGrip™

The product has a comfortable SoftGrip™ handle which enhances its ergonomic design.

Fingerloop handle

Loop handle design prevents slipping and protects fingers.

Power tip

The cutting power is distributed evenly all the way to the tip of the blade.

Micro tip

The product is equipped with thin and sharp blades for precision cutting.

Saw teeth

The geometry of the saw teeth means that they cut on both push and pullstrokes.

Telescopic

Indicates that the length of the product can be adjusted seamlessly, for improved working position or better reach.

Female

Optimal design for female use.

Male

Optimal design for male use.

Ambidextrous

Indicates that the product is intended for both right- and lefthanded use.

Right handed product

Indicates that the product geometry is intended for right handed use.

Hand size

Indicates what hand size is most suitable for using this product. The product is suitable for small hands.

Weather proof

The product withstands all types of weather.

Vegetables

For cutting and picking vegetables.

Flowers

Indicates what hand size is most suitable for using this product. The product is suitable for small hands.

Grass

For cutting grass.

Hedges and bushes

For straight cutting of hedges and bushes.

Pot plants

For precision cutting of pot plants.

Bonsai plants

For cutting bonsai plants.

Herbs

For precision cutting of delicate herbs.

Fish

For gutting fish.

Grafting

For cutting of small side shoots, laterals and pruning of weak growth.

Carving

For peeling bark for grafting.

Grafting

For various grafting tasks.

Sharpening wooden canes

For sharpening of wooden canes to support small bushes and plants.

Building site

For effortless cutting of rockwool and fibers.

Whittling

For whittling wood.

EDUCATION

CHOPPING VS. SPLITTING

Chopping axe – The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axe – The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

ANVIL VS. BYPASS

Bypass: Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade bypasses counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

Anvil: Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

WHICH TOOL FOR WHICH TASK

Picking the right tool for the job means less work for you and ensures that your plants heal faster.

Pruners work well for the smaller cutting jobs

Pruners work well for the smaller cutting jobs

Universal Cutters are ideal for those hard-to-reach tree limbs

Loppers are the best choice for larger stems

Saws are primarily used to prune branches of over Ø 50 mm

Axes are for chopping thicker branches or splitting wood logs

Made in Finland

Founded in the small village of Fiskars, Finland 1649, the company has grown into a large multinational corporation, celebrated for a history of products accommodating the strict Finnish standards for quality and design. Following its tradition to drive innovation of tools that reduce the effort, fatigue and strains so often associated with gardening, Fiskars ergonomic, high performance cutting and landscaping tools are designed to do the hard work, so you don't have to!
