## PARTITIONING SYSTEMS

**S**ince 1962, Folding Guard has provided customers with innovative safety, security and storage products and personalized expert service.

Because our vertically integrated manufacturing processes provide seamless production from raw material to finished products, we can offer the highest quality, utmost reliability and value.

Folding Guard also has more than 700 dealers providing national and international sales, installation service and project coordination.

See our complete line of expertly engineered products at [www.foldingguard.com](http://www.foldingguard.com) or call us directly toll-free at 1-800-622-2214 and find out how Folding Guard can help make your business more safe and secure.

### Saf-T-Fence® Partitions

Simply your best low-cost alternative to building walls. It's a modular system, versatile enough to expand easily, or be taken down and quickly reinstalled elsewhere. And where others take weeks to deliver, Saf-T-Fence arrives in a few days, with extra strength plus increased security.

**Heavy-Duty Construction** – Panels are built on a 1-1/2" x 1-1/2" x 14-gauge steel frame. Wire mesh is securely welded at each intersection, creating

rectangular openings. Both panels and doors are 10-gauge welded wire mesh with 1-1/4" x 2-1/2" grid openings.

**Maintenance-free** – Long-lasting, black powder coating finish.

**Modular** – Can be expanded, relocated and installed in any space. Up to 10 feet in height, with pre-fabricated panels and three post heights.

**Also available:** Numerous options in doors, locks and colors. Angle panel kit. Custom configurations.

### Saf-T-Fence Options

Doors are available in six styles: Hinge; double wide Hinge Pair (both available with electric strike and hydraulic closers); Slide; Slide Pair (both available with magnetic locks);

Clear Access Slide; and Clear Access Slide Pair. All doors include built-in cylinder locks with thumb-turn and pull handles. All-steel frames.

Also available: push bars and paddles for emergency exits, keypad, card reader, lever handle, padlock hasp, and three keying options.

# PARTITIONING SYSTEMS

## Qwik-Fence® Partitions

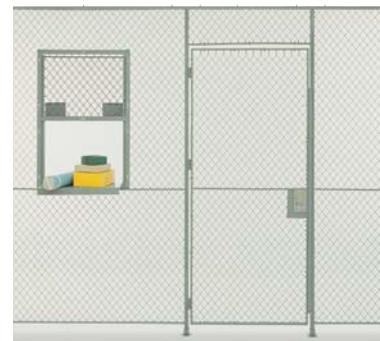

Durable, attractive and easily installed in any space, Qwik-Fence is also our most economical partitioning system. Installs in 25% less time than conventional partitioning systems.

**Quality Construction** – Our patented process secures thick 8-gauge galvanized steel wire in a rectangular pattern that is securely welded at each intersection. The process creates more than 500 welds in a nominal 48" by 96" panel. Posts and doors are all-steel and galvanized.

**Maintenance-Free** – Galvanized finish is rust- and corrosion-resistant.

**Modular** – Component system makes planning and installing easy in any space. Qwik-Fence can be trimmed in the field to accommodate changes or space irregularities. Easily relocated. Stackable up to 25 feet in height.

**Also available:** Numerous door and lock options, extra-high partitions, ceiling panels, support brackets, stiffening bar, colors, custom sizes and configurations.

## Wov-N-Wire™ Partitions

Wov-N-Wire partitions are the traditional enclosure system specified by architects and contractors. The tough steel wire is woven to create a durable, high-quality partitioning system.

**Quality Construction** – 10-gauge steel wire, woven into an extremely strong 1-1/2" diamond mesh. Frames, posts and components are all steel.

**Economical** – We welcome cost and quality comparisons with other woven wire systems.

**Modular** – Component system makes it easy to design a partition of any size. Components bolt together quickly.

**Maintenance-Free** – Long-lasting, machine gray powder coating finish.

**Also available:** Numerous door and lock options, extra-high partitions, ceiling panels, support brackets, stiffening bar, colors, custom sizes and configurations available.

## Qwik-Fence and Wov-N-Wire Options

Doors are pre-hung and available in hinged, sliding and dutch styles, in a variety of sizes. Frames are all-steel and designed to withstand years of heavy traffic.

All doors include a built-in cylinder lock or padlock hasp. The lock is keyed different (KD). Options: keyed alike cylinders (KA), double cylinders (DC),

ADA-compliant locks, push button locks, and electric strike/card reader style locks. Also available: crash/panic bars, spring hinges and automatic closers.

## Saf-T-Fence® Machine Perimeter Guarding

Guarding your automated machinery – and protecting the people who operate it – is as important as building or using the machinery itself. Because ours is a modular machine perimeter guarding system, it's easier than ever to specify, order and install, with exact fit and easy assembly. It protects both your equipment and personnel, and ships in days where others take weeks.

**Construction Details** – Yellow powder coated posts, and black powder coated steel framed panels and doors with ample options for each. Three post heights; over 30 pre-fabricated wire mesh panels.

Doors available in six styles: Hinge; Hinge Pair (double wide); Slide; Slide Pair; Clear Access Slide; and Clear Access Slide Pair. Doors include a pull handle and door catch.

**Also Available:** Interlock and padlock hasp. Polycarbonate panels. Custom configurations. Plus 180° angle panel and removable panel kits.

**Safety Regulation Compliant** – Mesh openings, heights, clearances and tolerances can all help you meet OSHA, ANSI, NAAMS, EN953 and Canadian CSA safety regulations.

### From Obsolete to Innovative: How Folding Guard Revitalized an Outdated Safety System

Folding Guard was contacted by one of North America's most respected manufacturers of automotive, packaging, aerospace and industrial products.

To make their facility more efficient and regulation compliant, its machine perimeter guarding systems required significant upgrades.

Folding Guard toured the facility and assessed the hazards and deficiencies. Detailed recommendations were then presented, and layouts of the proposed solutions were produced. Finally, customized machine perimeter guarding was engineered that fulfilled the unique requirements of this critical site.

Because of the state-of-the-art machine perimeter guarding designed by Folding Guard, the facility is now more efficient and compliant with safety regulations.

## STORAGE SYSTEMS

### Stor-More® Bulk Storage Lockers

All-steel Stor-More Bulk Storage Lockers provide sturdy, secure storage for apartment tenants and businesses. Heavy duty construction ensures years of maintenance-free performance. Stor-More lockers won't sag, lean or buckle. Modular design makes Stor-More lockers easy to plan, install and relocate.

**High Quality Material** – Choose from two heavy duty grades: Industrial or Commercial welded wire and expanded metal in either galvanized or machine grey powder coating finish. Colors available.

Bulk Storage Lockers are available in two durable grades: welded wire (left); and expanded metal (right).

**Single, Double or Triple Tier** – Lockers are available in single, double and triple tier configurations, and can be combined. Begin with a Starter Unit and complete a row with Add-On units.

**Safe and Secure Doors** – All doors feature secure locking mechanisms. Other anti-theft features available such as top, bottom and backs.

**Easy to Install** – Component panels are pre-punched and slotted for easy assembly and relocation with standard hand tools. Units bolt to wall or floor.

### Stor-More® Visibility Lockers

Our sturdy Stor-More Visibility Lockers provide secure but visible storage for equipment, tools and other valuable items.

**Solid Construction** – Sides and door are made of tough 8-gauge galvanized welded wire, with 1-1/2" x 3" spacing. Roof, back and bottom panels made from 22-gauge galvanized sheet metal. Colors available. Ships fully assembled.

**Secure** – Full-height door features a padlock hasp.

**Available in five sizes, (WxDxH):**

- 18" x 18" x 72" with 5 shelves
- 18" x 36" x 72" with 5 shelves
- 24" x 36" x 72" with 5 shelves
- 30" x 30" x 80" with 3 shelves
- 36" x 36" x 80" with 3 shelves

## STORAGE SYSTEMS

### TA-50 Military Lockers

Built for the specific neat, organized needs of armed-forces personnel, are available in both welded wire and expanded metal versions. Their open mesh design enables both quick visual inspection and ventilation.

**Construction Details** – The locker's roof, as well as its top and bottom shelves, are sheet metal; the top shelf has a steel hanger rod, and both shelves are flanged for increased stability. There are three chrome hooks, a durable baked-on powder coating finish, and all components are welded and pre-punched for easy assembly.

**Secure Doors** – Each version offers a high-security, 3-point locking system. The latching rod engages top and bottom edges of the door frame, while a center latch engages the door jamb, thus the doors latch on three sides. Door handle has built-in padlock hasp.

Both styles are stand-alone units.

### Saf-T-Stor® Cabinets

Extra tough Saf-T-Stor cabinets provide an efficient storage solution for gas tanks while protecting them from damage and theft. Variety of Saf-T-Stor models provide horizontal, vertical or a combination of storage configurations. Saf-T-Stor cabinets exceed OSHA 1910.110 and NFP 58-79 requirements.

**Heavy Duty** – Extra thick 8-gauge galvanized wire welded at each intersection. Roof is sturdy galvanized steel. Frames are 1-1/2" square angle galvanized steel. Padlock hasp is standard. Colors available.

**Resists Corrosion and Rust** – All material is galvanized steel to stand up to harsh environments.

**Easy Assembly** – Components are slotted for assembly with hand tools.

### FINISH OPTIONS

Folding Guard products can be ordered with a durable baked on powder coating finish in several standard colors. We can also match specific custom colors. Ask your sales representative for details.

# STORAGE SYSTEMS

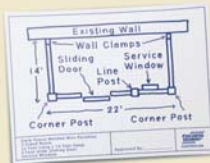

## Loss Prevention Security Cabinets

Whether you store your small-to-medium sized products on the sales floor, the back room, or in the receiving area, these stand-alone cabinets will keep them safe.

**Options:** Shelf available in 4-gauge galvanized welded wire mesh, or 20-gauge galvanized steel panel. Cabinets come in widths of 48" (single door) or 96" (double door), plus many depths and heights. The 96" model will fit into a standard 96" wide pallet rack.

## Stor-More® Dispatcher Lockers

These lockers feature individually locked compartments, making them especially ideal if service employees need to pick up daily work orders and equipment. Three storage compartments, with three separate doors with padlock hasps. And there's an optional rear door for loading material from behind.

## FREE DESIGN SERVICE

No project is too large – or too small – for Folding Guard. We've created efficient partitioning and storage systems in all kinds of environments, for thousands of satisfied customers. All you have to do is tell us about your application, send a sketch or blueprint, and we'll develop the optimal system for you too. If you're an architect, contractor, builder or integrator, we can work with drawings in PDF or SolidWorks format. For any questions, or to get started, call us toll-free at 800-622-2214.

## Loss Prevention Pallet Rack Security System

The Loss Prevention Pallet Rack system is designed to secure an existing pallet rack or bulk rack. One or more pallet levels can be secured with others left open. The all-steel enclosure system surrounds the rack and prevents unauthorized access to merchandise or material.

**All-Steel Construction** – Made from sturdy 8-gauge galvanized welded wire mesh panels on a 2" x 2" frame made of 14-gauge galvanized steel. Hinged doors include a built-in cylinder lock. Colors available.

**Standard Sizes** – Available in sizes to fit all standard pallet and industrial racks.

**Secure But Open** – Open mesh design allows for a quick visual inspection and will not deter sprinkler systems.

**Sliding Doors** – Industrial grade, bi-parting sliding doors meet in the middle at a padlock hasp.

**Easy Assembly** – Pre-punched rack components are easily assembled.
