

**GE Fastrac Program Service
Switchboards**

GE Fastrac Program includes the full range of Switchboards in a variety of ratings and configurations.
Product is available from six regional manufacturing locations!
Lead times of 2 weeks to 4 weeks available!
Contact your local GE sales office for more details.

New from GE!

—New Record Plus Breakers available in Switchboards!
—30 Cycle 65kAIC ratings available - contact your local GE sales office for details!

For more information on these products, order publications from Sections 22 and 23.

Group Mounted Switchboards

Merchandised and Metering

Jiffy II-Spectra®

EUSERC West Coast Utility Applications

The GE Jiffy II® Service Entrance Switchboard is designed especially to address the requirements of your small project needs. The compact unit combines the electrical distribution panel, the main service disconnect and the utility metering compartment into one space-saving unit, delivering maximum installation opportunities.

The switchboard is floor mounted and rated up to a maximum 1000A, 100kAIC @ 480V. At 25" deep, the electrical distribution board easily fits into the tightest areas. A full line of field installable digital solid state electronic trip molded-case breakers is also available. With a combination of superior features and options, the GE Jiffy II® not only meets your space saving needs, but also offers total flexibility in design to meet the requirements of the project.

Primary Features

- Switchboard Styled NEMA Type 1 Indoor or NEMA 3R Enclosure
- 1000A – Heat Rated Bus Max. 100kAIC @ 480V Max.
- Ground Fault Protection Optional
- Left or Right Hand Pull Sections
- Top or Bottom Feed
- UL, EUSERC Approved
- 14X, 18X, 23X of Device Space for Feeder Breakers, Bolt-on Construction
- Seismic IBC Zone 4, CBC Zone 4, UBC Zone 4
- Heat Rated Aluminum or Heat Rated Copper Bus
- Accepts Aluminum or Copper Incoming Cable
- 35"W Bolt-on (45"W Plug-in) x 90"H x 25"D (Main Only)
- 35"W x 90"H x 25"D (Bussed Pull Section)
- Add 11" Depth for NEMA 3R

Switchboards

Group Mounted Switchboards

Jiffy III Switchboards

Section 10

Product Introduction

The GE Jiffy III Utility Service Entrance Switchboard is designed especially to address the Canadian market. The compact unit combines the electrical distribution panel, the main service disconnect and the utility metering compartment into one space-saving unit, delivering maximum installation opportunities.

The switchboard is floor mounted and rated up to a maximum 1200A, 42 kAIC @600V. At 15" (381 mm) deep, the electrical distribution board easily fits into the tightest areas where space is typically limited. The Jiffy III is UL and cUL¹ approved and meets the seismic requirements of IBC Zone 4 and CBC Zone 4.

Designed and approved specifically for the Canadian Utility Market², the Jiffy III is available with mains rated at 800A, 1000A and 1200A; 80% and 100% rated (with the exception of 1200A, which is 80% rated only); and with or without Ground Fault protection. A full line of field installable Digital Solid State Electronic Trip Molded-Case Breakers is also available. With a combination of superior features and options, the GE Jiffy III Utility Service Entrance Switchboard not only meets your space-saving needs, but also offers total flexibility in design to meet the requirements of the project.

Features

- Switchboard Styled, Type 1 Indoor Enclosure with Driphood (NEMA 1)
- 1200A-Heat Rated Bus max., 65kAIC @ 600V max.
- 80% and 100% Rated Main (1200A rated at 80% only)
- Ground Fault Protection optional
- Left or Right Hand Pull Sections—dependent on region
- Top or Bottom Feed Main—dependent on region
- UL, cUL approved
- 23X of Device Space for Feeder Breakers, Bolt-on Construction
- Seismic IBC Zone 4, CBC Zone 4, UBC Zone 4
- Heat Rated Aluminum Bus Bar standard with Copper Main Device Straps
- Accepts Aluminum or Copper Incoming Cable
- 40" W (1016 mm) x 90" H (2286 mm) x 15" D (381 mm) (Main Only)
- 25" W (635 mm) x 90" H (2286 mm) x 15" D (381 mm) (Bussed Pull Section)
- 15" W (381 mm) x 90" H (2286 mm) x 15" D (381 mm) (Blank Pull Section)
- Branch Feed-MCCB 15-1200A

¹cUL certified to meet CSA 22.2 No. 31.

²Non-BC Hydro Utilities. Contact your local GE Sales Engineer for your utility requirements.

²Shunt Trip or UV cannot be installed in same breakers.

Switchboards

Group Mounted Switchboards

Commercial Metering Switchboard

EUSERC West Coast Utility Applications

NON-EUSERC Utility Applications

Lever Bypass

GE Commercial Metering Switchboards are designed specifically to serve the EUSERC market in the western United States. In addition, they serve the NON-EUSERC markets with a Lever By-Pass arrangement. They are UL listed and labeled and offer a wide range of installation and performance features that simplify any project.

Metering sections are assembled with two sockets pre-wired on the line and load sides. All sockets are 200A continuous duty. A full selection of tenant mains are available including circuit breakers, fusible switches and T-Fuse pullouts.

Standards

Switchboard

- UL 891
- NEMA PB-2

Meter Sockets

- UL 414
- ANSI C12.7

Circuit Breakers

- UL 489

Fused Switches

- UL 98

Other Key Features

- 4000 main service, 480V maximum
- Aluminum or copper bus
- 65,000A symmetrical bracing; standard 100K available
- 200A continuous duty sockets
- Hot and cold sequencing is available
- Type 3R construction available

Available Sections

- Underground Pull Sections
- Underground Pull Section with Main Switch
- Underground Pull Section with Main Breaker
- Overhead Sections with Main Switch or Breaker
- CT Meter Sections with Main Switch
- CT Meter Sections with Main Switch and Distribution
- CT Meter Sections with Main Breaker
- CT Main Sections with Main Breaker and Distribution
- CT Meter Sections with Main Lugs
- Auxiliary Sections (Wireways, Corner Sections)
- Multi Meter Sections with Fusible Pullout Mains
- Multi Meter Sections with Circuit Breaker Mains
- Distribution Sections

For application and size information, refer to publication DEA-340, internet address www.geelectrical.com, or contact your local Sales Office. For pricing support contact your local GE Consumer and Industrial Sales Office.

Publications and Reference: See Section 22 for a complete list of additional product-related publications

Switchboards

Group Mounted Switchboards

Commercial Metering Switchboard

EUSERC West Coast Utility Applications

NON-EUSERC Utility Applications

Lever Bypass

Section Types

- UL Listed, EUSERC, XCEL ENERGY Approved
- 208Y/120V or 480Y/277V; 100 kAIC
- 600, 800, 1000, 1200, 2000, 3000, 4000A

- NEMA 1 or 3R enclosure
- Bottom feed
- Cu or Al bus

Underground Pull Sections

- 25" minimum depth
- 100 kAIC
- Bottom feed
- Cu or Al bus
- NEMA 1 or 3R

Underground Pull Sections with Single Main Breaker

- 400A-2000A
- G, K and PBII circuit breakers
- HPC and THFP fused switches
- 25" minimum depth
- Device padlocking
- SE barriers
- Equipment ground fault protection on 1200A-2000A (optional on 400A-1000A)
- Front access

Large Tenant Mains

- Hot Sequence Metering
- SG, SK, PBII, THFP, HPC
- 25" minimum depth
- Minimum widths:
 - 400A and 600A G Frame, 800A K Frame: 35"
 - 1000A and 1200A K Frame: 40"
 - 1600 and 2000A PBII: 40"
 - 400A and 600A THFP, 800A HPC: 35"
 - 1000A and 1200A HPC: 40"
- Bottom or top exit
- Device padlocking
- Equipment ground fault protection on 1200A and 2000A (optional on lower amperages)
- Mounting provisions for CTs
- Isolating barriers
- Hinged sealable cover
- Transformer rated meter socket
- Front access
- Middle or bottom mounted neutral
- Lever bypass meter sockets available

Distribution Panel

- Interior 2000A, Cu bus, 100 kAIC
- 13, 18, 23X distribution space
- Bolt-on and Plug-in
- 3Ph 4W
- Spectra® main breaker or main lug only interior
- CT compartment up to 2000A
- Front neutral access

Tenant Metering

- Cold and hot sequences
- Tenant mains SF, T-fuse pullout and FD1 with J fuse constructions:
 - a) SF (100A, 200A)
 - b) T-fuse pull out (100A, 200A)
 - c) FD1 (100A, 200A) with J fuse
- 3 Ph 4 W Service
- 3 Pole, 2 Pole disconnects
- 600A-4000A horizontal bus
- 3-pack 20" width, 6-pack 35" width
- 25" minimum depth for top or bottom exit—to 60"
- Provisions for field installable socket and breaker additions
- Front access
- 100% rated neutral; standard ground rating
- Middle or bottom mounted neutral
- Ringless style meter sockets
- Lever bypass meter sockets available
- Service entrance barriers
- 4000A maximum horizontal bus
- 100 kAIC
- Top and bottom feed exit
- Test bypass block meter socket available
- Ringless cover - NO hinge (ST only)
- 5, 7, 13 jaw sockets
- Locking jaws
- Flash shields
- Line lugs at top, load at bottom
- Small tenant meters: 3- or 6-pack
- Main disconnects lockable in OFF position

Switchboards

Spectra® Series Switchboards

Spectra® Integrated Switchboard Solutions

Section 10

Product Introduction

Spectra® Integrated Switchboard solutions save time, money and space, yet sacrifice nothing in terms of safety, performance or flexibility. You get flexibility in design and consistency in execution. Units expand or contract to accommodate your specific needs. And not only do they reflect GE's rigorous Six Sigma quality standards, they are also built and tested in accordance with NEMA PB-2, UL 891 and the NEC. All sections and devices are UL listed and UL labeled.

Features

Spectra® Integrated Switchboard solutions are custom designed and built to your specifications. You choose all the elements you need. Featured elements include:

- Power distribution
- Energy management systems
- Building automation systems
- Automatic transfer switches
- Surge suppression
- Dry type transformers
- Lighting controls

Benefits

- Save Space**—Conventional electrical installations waste space. Lighting and power panels take up long stretches of wall. Transformers eat up floor space. Lighting controls and building automation have to go somewhere. Spectra® Integrated Switchboard solutions integrate all these elements into a fraction of the area.
- Reduce Total Installed Costs**—The Spectra® Integrated Switchboard solution packs virtually all your power requirements into one single integrated distribution and control system—a compact, plug-and-play line-up. This reduces installation costs while turning otherwise non-productive mechanical space into revenue-generating sales or storage space.
- Cut Installation Time**—Construction schedules have never been tighter. When you're ready to install electrical equipment, you want it done now, so that you can move on to the next step. Spectra® Integrated Switchboard solutions arrive with everything you need, and when you need it, fully pre-wired to your specifications. All you have to do is set it in place, run the incoming power and wire out the branches. Installation takes less than half the time.

Typical Installation Steps for Spectra® Integrated Switchboard Solution

1. Bring conduits through floor
2. Receive single switchboard unit
3. Set switchboard in place (whether the room is complete or not)
4. Run conduits and wire branches

For pricing support contact your local GE Consumer and Industrial Sales Office.

Lighting Panels

A-Series Panel type AQ, AL, AE, AD

Section 10

A-Series Panel Type AQ, AL, AE, AD

A-Series Panel Height	Switchboard Cover Height
19	32
25	32
31	36
37	40
43	48
49	60
58	64
70	76

To determine A-Series Panel height (AQ, AL and AE only), refer to EQIP Sizing 2001.

A-Series Panel Specifications

Amperage	400 Amp maximum, MCB or MLO.
Voltage	600 Vac maximum
Int. Rating	65 kA max., fully or series rating.
Circuits	42 circuits maximum in each panel.
Section Depth	15" to 30"
Section Width	20" to 40"

Maximum panels heights in stack are 36"H and 48"H.

If 400 A panel serves as an incoming component then a 4" cover is necessary between the panel and either top (for top feed) or bottom (bottom feed)

If 600 A panel serves as an incoming component, then an 8" cover is necessary between the panel and either top (for top feed) or bottom (bottom feed)

The A-Series panels above 125A must be type M (equipment panel)

Single A-Series Panel

A-Series Panel Selection Guide

Amps. Max.	Service Information	Switchboard Location	Section Width Min.
AQ panel			
125 A	240 Vac max.	Top, Bottom	20W
225 A	1 Ph, 3W.	Top, Bottom	20W
400 A	3 Ph, 3W.	Top, Bottom	20W
AL panel			
125 A	240 Vac max.	Top, Bottom	20W
225 A	1 Ph, 3W.	Top, Bottom	20W
400 A	3 Ph, 3W.	Top, Bottom	20W
AE Panel			
125 A	480Y/227 Vac	Top, Bottom	20W
225 A	3 Ph, 4W.	Top, Bottom	20W
400 A	125/250 Vdc	Top, Bottom	20W
AD Panel¹			
125 A	120/208 Vac, 3 Ph, 4W.	Full Height	25W
225 A	480 Vac, 3 Ph, 3W.	Full Height	25W
400 A	480Y/277 Vac, 3 Ph, 4W.	Full Height	25W

Spectra® Series Switchboards

Spectra® Integrated Switchboard Solutions

Stacking Lighting Panels with Transformer

Section 10

Product Description

Panel type	AQ, AL, AE
Panel height	37"H with MCB
Transformer type	High-Efficiency, 3 Phase, 15 - 150 kVA
Section size	In individual mounting, section depth and width depend on the transformer. In double mounting, minimum section width is 40W. Section depth depends on the transformer.

Transformers can be placed at the bottom of the section only.
Contact local GE Sales Engineer for Dual Mounted panels with different voltages.

Lighting Contactors and Relays

Section 10

The minimum section depth required to mount a 463, 260L, or 360ML2 is 15"D.
All other contactors require 20"D section.
Total Box size includes the size of the contactor and necessary wire bending space required. Contactors are placed at the bottom of the section.

Publications and Reference: See Section 22 for a complete list of additional product-related publications

The following utilities have approved the type of metering compartment shown. Compartments are available with the following features:

- CT busbars mounted on high impact glass fiber polyester insulation and arranged in an edgewise plane.
- Door with concealed hinges, 3-point catch and lock, handle seal over CT compartment: barriers rear and bottom (top).
Note: The bottom barrier is furnished at top if main device is over CT compartment.
- 9" or 11" centerline standard. For other centerlines refer to factory.
- CT bus bars drilled for transformers with NEMA terminations.
- #10-32 and 1/4-20 screws for potential taps.
- Removable links provided if part of utility requirements.
- Type 1 — Compartments have 9" centerlines
- Type 2 — Compartments meet EUSERC standards
- Type 3 — Compartments have 11" centerlines, potential transformer space and mounting bracket if required.
- Cold sequence metering has CT compartment on load side of main device. Hot sequence CT Compartment is on line side.

Group-Mounted Main and Feeders Front-Accessible

- 1200A Mains maximum
- 1200A Feeders maximum
- Rear alignment standard
- Minimum depth 25"
- Main lugs to 2000A
- May be mounted against wall.

Main and Feeder Devices Group-Mounted

- Molded case circuit breakers
- Fusible switches type ADS available in (Spectra® only)
- Spectra® RMS¹ Molded case circuit breakers
- Spectra® RMS¹
- Molded case circuit breakers with MicroVersaTrip® Plus or MicroVersaTrip® PM trip units
- Current-limiting circuit breakers
- Integral ground fault
- Integral protective relay functions
- Energy Management Connectivity

Individually-Mounted Main, Group-Mounted Feeders Front-Accessible

- 5000A Mains maximum
- 6000A main lug
- 1200A feeders maximum
- Rear alignment standard
- Utility CT Compartments
- Depths:
 - Mains 25"-60"
 - Feeders 25" minimum

Mains Individually-Mounted

- Power Break® and Power Break® II Insulated case circuit breakers 800-4000A with MicroVersaTrip® Plus or MicroVersaTrip® PM trip units
- High pressure contact switches 800-4000A
- WavePro low voltage power circuit breakers
- Integral ground fault
- Integral protective relay functions
- Energy Management Connectivity

Feeder Devices, Group-Mounted

- Molded case circuit breakers
- Fusible switches type ADS
- Spectra® RMS¹ Molded case circuit breakers
- Spectra® RMS¹ Molded case circuit breakers with MicroVersaTrip® Plus or MicroVersaTrip® PM trip units
- Current-limiting circuit breakers
- Integral ground fault
- Integral protective relay functions
- Integral POWER LEADER® network communications

¹Available as 100% equipment rated for group mounted construction.

Class 1

Description	Available Devices		
	Function	Type	Rating (Amps)
Group mounted—mains and feeders	Main	MCCB	1200
Rear alignment standard		QMR	1200
Front accessible	Feeders	MCCB	1200
Max. 1200-amp mains—1200-amp feeders		QMR	1200

Spectra® Class 2

Description	Available Devices		
	Function	Type	Rating (Amps)
Individually mounted mains	Main	MCCB	1200
Group mounted feeders		QMR	1200
Rear alignment standard		HPC	4000
Main section side or rear accessible standard		PB/PB II	4000
Feeder sections-front access		WavePro	5000
Max. 4000-amp mains—1200-amp feeders	Feeders	BPS	4000/5000 ¹
Utility metering compartment		MCCB	1200
		QMR	1200

¹ Not UL labeled.

Standards

GE switchboards are manufactured to meet specific quality standards using standardized components. They meet the following standard:

(a) Underwriters Laboratories No. UL891.

Note: GE switchboards are constructed to this standard as to enclosure, busing, wiring and clearances. Only switchboards or switchboard sections containing all UL Listed devices can be UL labeled.

(b) NEMA Standard PB2-latest issue.

(c) CSA (Spectra® Class 1 only)

Short-circuit Rating

The standard main or vertical bus in each switchboard is aluminum (copper optional) braced for an integrated equipment rating of 65,000 rms symmetrical amperes. When required, bus bars can be furnished braced for higher short-circuit currents (at additional price).

Ground Bus

Ground bus is furnished as standard.

Space and Busing for Future

When space only is required for future addition of any specified feeder device in a GE switchboard, corresponding vertical bus and blank filler plate will be furnished. (Device mounting hardware may be included.)

Blank Space Only

When blank space is specified for any class of GE switchboard, corresponding vertical bus, device mounting, and connecting straps will not be furnished.

For pricing and application assistance, contact your local GE Sales Office

¹ SPECTRA® RMS breakers with MicroVersaTrip® PM trip units are available with protective relay functions (voltage unbalance, current unbalance, undervoltage, overvoltage and power reversal) and POWER LEADER® network communications.

² 1200A must have fully rated bus. Copper lugs must be used on line or load side of breaker.

Bolted Pressure Switches

800	600	10000	10000	6500
1600	1000	12500	10000	6500
2000	1200	12500	10000	6500
2500	1600	20000	15000	10000

⁴ No additional thermal derating is required for above-maximum rating plug ratings for frame sizes noted. Note: 400-Hz interrupting ratings are based on engineering judgement, taking into consideration the operating characteristics of insulated case circuit breakers and the worldwide lack of test facilities to verify performance. Power+™ trip units and the energy management functions in MicroVersaTrip PM™ trip units are suitable for 50/60 Hz applications only.

Switchboards

Spectra® Series Switchboards

Section 10

Switchboard Sizing Considerations

Listed below are rules and arrangements that must be considered when sizing and dimensioning Spectra® switchboards.

Switchboard depth is the most variable of section dimensions as depth varies depending upon type and size of feed required; type, size, feed and combination of devices required; and the circuitry involved.

Fig. 1

The dimensions shown in this publication are based on the following considerations:

- Typical circuit and device arrangements as shown in Figure.
- Lug or busway feed not exceeding the ampacity of the largest rated devices. For oversize lugs, a lug section may be required. See table 1 on page 10-35.
- When two or more devices are involved in the same section, the section width and depth is to be determined by the largest of the devices.
- Where bottom feed is involved, use reverse mounted or reverse fed devices, if possible. If not, a pull section may be required to prevent looping of bus bars, and to facilitate barrier replacement. See Figure 1 on page 10-35.
- Where main lugs are involved spaces must be allowed for bending cable. Allow space at top (or bottom) of section per table 2 on page 10-35.
- In combining lug space and devices there will be cases where it will not be possible to fit more than one device per section. When such space becomes critical refer to factory for alternate arrangements.
- For connection to substation transformers see page 10-39 for further sizing requirements.
- Use of busway may dictate section dimensions. For busway locations and dimensions see page 10-40.
- Dimensions for front accessible sections may be reduced if rear access is available.

6'-7" Handle Rule

The National Electrical Code (Article 380-8) requires that switches or circuit breakers shall be installed so that the center of the grip of the operating handle of the switch or circuit breaker when in its highest position is not more than 6'-6" above the floor or working platform.

Feeder Section
Fig. 2

Wiring Bending Space

The National Electrical Code latest issue (Tables 373-6 (a and b) specify minimum wire bending space. A 14" unit height allowance as shown in Figure 3 will meet NEC requirements and provide wire bending space for front and rear accessibility. The 14" allowance for wire bending space may be utilized for metering (page 10-37), but not for devices. If there is rear access than it may be possible to reduce or eliminate the 14" allowance. Refer to factory.

Fig. 3

Wiring Terminals (Lugs)

Pressure type lugs suitable for 250-600 kcmil aluminum or copper wire, are provided for short circuit ratings to 100,000A. Above 100,000A compression type lugs are provided.

When oversize lugs are required, a lug section with minimum width shown in Table 1 on page 10-35 may be furnished.

Switchboards

Spectra® Series Switchboards

Section 10

Bussed Pull Sections

Section has cross bus that connects to adjacent main section bus. Section width and number of lugs are shown in table below.

Table 1 Pull Section Dimensions

Amperes	Number of Lugs per Ø and N ¹	Section Width Minimum	Section Depth Minimum
800	3	25	25
1000	4		
1200	4		
1600	5	30	25
2000	6		
2500	8		
3000	9	35	30
4000	12		

¹ 50% Neutral will have one-half the lugs shown, 250-600 kcmil. Al or Cu wire.

Pull Sections

Pull section are available in widths and depths from fifteen inches (15") to sixty inches (60") in five inch (5") increments. Twenty inch (20") width is standard. Depth is same as main section. The pull section provides space for pulling and installing cables. It is also used with bottom feed where reverse feed or reverse mounted devices cannot be used. A barrier is provided for service entrance to meet NEC requirements. Busing and lugs are not provided.

Instruments and Meters¹

Listed below are the instrument and metering combinations with the compartment door configurations. Hinged door is standard on all meter doors.

Ammeter and Selector Switch²

EPM/PQM Meters²

Ammeter, Voltmeter and Selector Switches²

POWER LEADER® Monitor³

Ammeter, Voltmeter, with Selector Switches and Watt Hour Meter²

Ground Break® Monitor Panel⁴

EPM Multi-function meter²

¹For layouts/options other than those shown, contact factory.

²Compartment door is 12 inches high and requires 25 inch minimum width.

³Compartment door is 21 inches high and requires 25 inch minimum width.

Repeater (if required) will be mounted in the same compartment. No additional space required.

⁴Compartment door is 8 inches high and requires 25 inch minimum width.

Standard Utility Compartments

NOTE: Dimensions shown are minimum widths and depths of switchboard sections containing CT compartments only. If there are other devices located in the section, actual width will be based on the largest device required. And, the entire switchboard lineup depth will be based on the largest device depth required.

Fig. 1

CT Compartment Dimensions (Inches)

C/T Center Line	Max. Ampere Ratings	Minimum Section Width (Inches)	Minimum Section Depth (Inches)
9"	600	35	30
	800	35	30
	3000	35	30
	4000	40	35
11"	600	35	30
	800	40	30
	3000	40	30
	4000	40	35

Low Voltage Transition Sections

Transition sections are required for connection of low-voltage Spectra® Series switchboards to all liquid-filled transformers, and not required for GE or SEPS open dry-type transformers 750 to 2000 kVA. They are also required for connection of switchboards to motor control centers. Transformer and transition sections are always aligned on center of depth of both sections.

Transition section depth is determined by device and circuitry of service entrance section. Transformer depth can be either deeper, the same, or shallower than the transition section depth.

Note that the minimum allowable switchboard depth is 40".

For the 1500 and 2000 kVA, 95 BIL transformers, a 100-inch high transition section is required. The switchboard remains 90" high.

Transition sections are 15" wide except for 2000-3000 kVA which require 20" wide transition section.

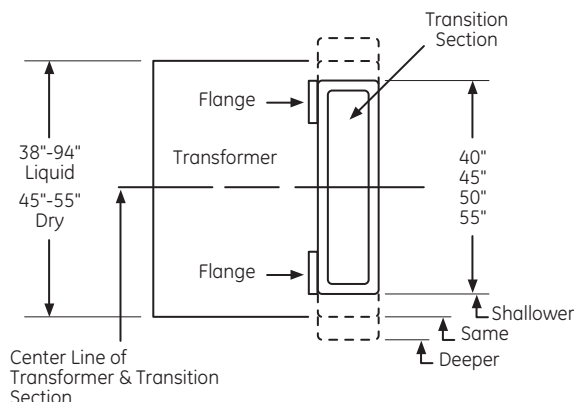

Fig. 1

Fig. 2

Dual Voltage Switchboards

Dry Type Transformer Sections—480 Volt Primary

kVA	Self-Cooled	
	Width	Depth
30	30"	35"
45	30"	35"
75	35"	35"
112.5	40"	35"
150	45"	40"

Core & coil type QLC transformers provided in switchboard enclosures are set up for cable connection to primary and secondary. Fig. 3 applies.

750 and 1000KVA transformers are provided in NEMA 1 transformer enclosures. Primary and secondary flanges to switchboard sections do not require transition sections.

Fig. 3

Switchboards

Spectra® Series Switchboards

Spectra® Series Conduit Entrance Space

Section 10

Group-Mounted Distribution Sections

To find "A" dimension subtract 5" from width of switchboard section. To find "B" dimension subtract 9" from depth of switchboard section.

Incoming Line Sections

To find "A" dimension subtract 5" from width of switchboard section. See table for "B" dimension. "B" dimension is conduit entrance space available with neutral bus and device at extreme top or bottom.

¹ Refer to factory for conduit area when channel-sills are used.

² Subtract 5" from "B" dimension for electrically-operated devices.

³ Bussed cable pull section required.

NEMA 3R Outdoor Enclosure Non Walk-In

Fig. 1 Non-walk-in

NEMA 3R outdoor enclosures consist of standard indoor cubicles and components enclosed with a front frame and roof assembly to provide a weather resistant structure. Any number of sections may be bolted together. However, all sections must be of the same depth.

Standard outdoor construction consists of:

- 90" high sections
- Filtered front roof vents
- Flat, front area floor
- Single doors 15"-40" width; double doors 40"-90" width
- Wind stop on each door
- 3-point catch with provision for padlock
- Front to rear full depth lifting beams

Options available are:

- 1 5/8" high floor sills with rodent guards
- Fluorescent light with receptacle

Fig. 1

Spectra® Distribution Bolt-on Switchboards

Distribution Bolt-on switchboard sections may be furnished in 20-inch depths when the following conditions are met:

1. Incoming feed enters switchboard section at opposite end from load cables—1200A max and no metering or ground fault.
2. Device "X" Height for incoming sections and feeder sections should be limited to 33X to provide adequate front access for line and load cable terminations.
3. Branch devices are limited to circuit breakers shown on pages 10-47 and 10-48.

Spectra® Series Switchboards

Automatic Throwover Equipment

Section 10

GE Zenith ZTS series automatic transfer switches are for use with electrically operated circuit breakers. They include the standard ZTS switch, the ZTSD delayed transition switch, ZTSCT closed transition switch and ZBTS Bypass/Isolation. ZTS are electrically operated, mechanically-held by a simple, over center mechanism. The components of the ATS are accessible for inspection and maintenance without removal of the switch or the power conductors.

Mechanical indicator and contact chamber cover are designed for inspection, safety and position designation. Logic devices including microprocessor control auxiliary time delays and special accessory equipment are assembled on the door for ease of maintenance and separation from the power section. The various functions of the switch are listed in the Standard Features table.

S = STANDARD

¹Please indicate choice when ordering—7 days provided unless otherwise specified.

Publications and Reference: See Section 22 for a complete list of additional product-related publications

These pricing pages are coded to indicate which shipment cycle the product feature qualifies for. The cycle category can be matched with quoted cycles from Equipment Plant Customer Service updates. The shipment cycle codes for group mounted switchboards are:

Code	Shipment Cycle	Explanation
S	Short	Limited product scope, very quick shipment
M	Mid	Larger product scope than short cycle
N	Normal	Standard delivery covering 80% of all product options
N+	Normal +	Special order items requiring additional lead time

The codes have two uses:
The **shortest shipment cycle possible** for a given proposition is the longest code associated with any of the options quoted, i.e., if everything falls under the “S” code except for one item which is “N”, then the proposition should be quoted as a Normal Cycle delivery.

To **quote correct shipment cycle time**, match the longest shipment code to the current lead times published by Equipment Plant Customer Service.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

¹Not available in Bolt-on design.

²Space unit includes vertical bus and filler plate only. MicroVersaTrip® circuit breaker spaces are 4 pole (includes 1X for side control wiring space.)

³Use only on 3-ph, 4-wire 208Y/120 volts systems.

⁴Use only on 3-ph, 4-wire systems, 480Y/277 volts maximum.

⁵Spectra® Series only.

⁶MicroVersaTrip® Plus circuit breaker. See pricing table on page 10-67 for options and page 10-71 for accessories. Breakers with MicroVersaTrip® Plus trip units with optional control power require a power supply. Refer to Table for pricing. **Add \$1000** list for 1-Distribution Cable Junction Box and

1-Distribution Cable Harness for each breaker with this option.

⁷SG6 and SG4 can be twin mounted in section rated for 2000A or less.

⁸2-pole device is rated 480 Vac max.

¹MicroVersaTrip® PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space for each breaker. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. See pricing page 10-67 for options and page 10-71 for accessories.

²Space unit includes vertical bus and filler plate only. MicroVersaTrip® PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space). See pricing page 10-67 for options and page 10-71 for accessories.

¹Unit space price includes vertical bus and filler space only.

²Maximum IC rating cannot exceed 100kA regardless of circuit breaker or voltage.

³100% rated for section ratings up to 2000A max. 80% rated for 2500-4000A.

⁴MicroVersaTrip® Plus circuit breaker. Add \$1000.00 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker.

⁵MicroVersaTrip® PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space for each breaker. See pricing page 10-67 for options and page 10-71 for accessories. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. See 10-70.

⁶MicroVersaTrip® PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space).

⁷1220A must have fully rated bus. Copper lugs must be used on line or load side of breaker.

¹ Unit space price includes vertical bus and filler plate only.

² List price is per pair of circuits of the same number of poles. When circuits of a double branch unit are of different amp ratings, such as a 100-amp—60 amp or 100 amp—30 amp, price and layout as a 100 amp—100 amp unit. Also, when a two-pole circuit is desired, opposite a three-pole circuit, price as a three-pole double-branch unit.

³ Arranged for Class L current limiting fuses only.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

¹Not available in Bolt-on design.

²Space unit includes vertical bus and filler plate only. MicroVersaTrip® circuit breaker spaces are 4 pole (includes 1X for side control wiring space.)

³Use only on 3-ph, 4-wire 208Y/120 volts systems.

⁴Use only on 3-ph, 4-wire systems, 480Y/277 volts maximum.

⁵Spectra® Series only.

⁶MicroVersaTrip® Plus circuit breaker. See pricing table on page 10-67 for options and page 10-71 for accessories. Breakers with MicroVersaTrip® Plus trip units with optional control power require a power supply. Refer to Table for pricing. **Add \$1000** list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker with this option.

⁷SG6 and SG4 can be twin mounted in section rated for 2000A or less.

⁸2-pole device is rated 480 Vac max.

¹Unit space price includes vertical bus and filler space only.

²Maximum IC rating cannot exceed 100kA regardless of circuit breaker or voltage.

³100% rated for section ratings up to 2000A max. 80% rated for 2500-4000A.

⁴MicroVersaTrip® Plus circuit breaker. Add \$1000.00 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker.

⁵MicroVersaTrip® PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space for each breaker. See pricing page 10-67 for options and page 10-71 for accessories. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. See page 10-70.

⁶MicroVersaTrip® PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space).

⁷1220A must have fully rated bus. Copper lugs must be used on line or load side of breaker.

MicroVersaTrip® Plus¹ Trip Unit Functions with Ammeter For SG and SK Spectra® RMS Molded-Case Circuit Breakers
