

Perfect in any setting.™

GRAND RAPIDS

CHAIR COMPANY

Accommodating furniture. Accommodating people.

The right choice for your project.

What makes Grand Rapids Chair Company the right choice? We offer more seating and table selections for a wider spectrum of environments. We set the standards for quality and craftsmanship. Our peerless customization capabilities allow you to achieve one-of-a-kind signature looks. And we always deliver what we promise – quickly, affordably and hassle-free.

Education. From elementary schools to colleges, from cafeterias to classrooms and dorm rooms, Grand Rapids Chair fills a need for durable-yet-distinctive seating and tables.

Food Service. We're one of the leading providers of tables and chairs for the restaurant industry, serving both independent and chain operations across every dining segment.

You provide the setting ... we'll provide the furniture.

HOSPITALITY • HEALTH CARE • OFFICE

Table of Contents

Hospitality. From hotels, casinos and nightclubs to cruise ships, arenas and theme parks, wherever guest service is paramount – lobbies, private rooms, banquet halls, auditoriums and more – you'll find comfortable, image-enhancing Grand Rapids Chair products.

Health Care. In waiting rooms and doctor's offices, where the public gathers and where professionals consult, our tables and chairs balance exceptional beauty with high performance.

Office. You'll find our products in the boardroom and the breakroom, and everywhere in between, supporting all the different ways people work.

Imagine the possibilities.

Seating

The best seats in the house.

Wood

Our wood chair frames are made of premium European Beech. We employ a blend of cutting-edge technology and time-honored woodworking methods, including mortise-and-tenon construction, to maximize both beauty and durability.

Steel

High-quality plating-grade steel makes these chairs significantly stronger than the industry standard. We hand-tailor, cope and braze all joints to bolster strength even further and create a smooth, seamless finish that prevents rust.

Our seating selections run the gamut:

6

Chair

Chair with Arms

Barstool

Swivel Barstool

Counter Seat Mounted

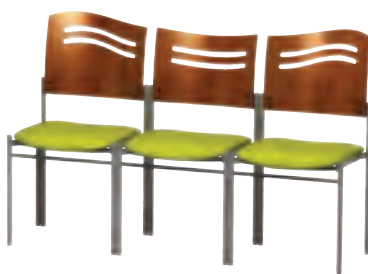

Aluminum

Our aluminum chairs are engineered to be incredibly strong yet surprisingly lightweight. We utilize precision CNC machinery and meticulous weld placements to produce more graceful contours and seamless joints than the competition.

Stacking/Nesting

Ganging

More Seating, Made Better

Nobody offers a broader selection of chairs and barstools than we do, or delivers as many finish and upholstery options. Nobody builds them better, either. While our competition imports more and more finished product from overseas, we continue to make seating and tables right here in our own Grand Rapids, Michigan factory, using the best mix of domestic and imported parts.

This enables us to control the production process and ensure quality craftsmanship. It drastically cuts down on lead times. And it gives you the flexibility to customize products in almost unlimited ways.

Relying on one source to supply seating and tables throughout your organization saves you time and money – especially when the source is as reliable as Grand Rapids Chair Company.

Made Green

Local manufacturing is an essential element of our commitment to sustainability, which also includes using recycled steel, wood from renewable forests, a water-based wood finishing system and a baked-on powder-coating process. Visit our website to learn more and download our environmental brochure.

ANSI/BIFMA

All our seating and table products meet or exceed ANSI/BIFMA strength standards.

Look for these icons to determine which seating lines offer these special attributes.

Create a signature look.

Because we manufacture our chairs ourselves, we can produce almost anything your imagination conjures up. Our **Design-It-Yourself** program lets you pick from 35 back designs or create your own.

While we're known for fine wood and metalwork, our upholstery expertise is second to none. Any wood chair can be upholstered virtually any way you want through our **Variations™** program.

Optional **casters** ensure both mobility and stability.

Most steel chairs can be made into a bolt-down or core-drilled **counter seat** (18", 25" or 30" high).

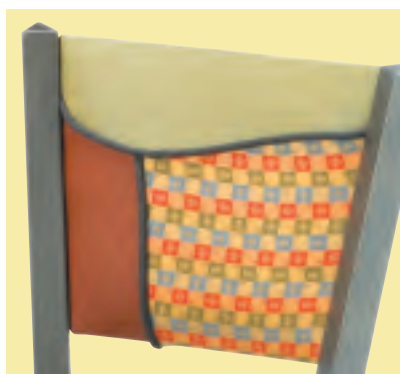

Add an optional **handhold** to ease movement of chairs.

We offer nearly 60 standard wood, premium wood and metal finishes, including the **distressed finish** shown here. We can also custom-match just about any other color of your choice.

Any upholstered back or seat can be dressed up with a classic **nailhead treatment** – or a not-so-classic treatment, if you prefer. Nailheads are available in multiple finishes.

Specify **custom fabric and welting** combinations for a one-of-a-kind look.

Laser cutting allows the most intricate **cutout designs** in wood and steel chair backs.

Laser engraving personalizes wood and steel chair backs with logos and other graphics.

Variations™ Custom Upholstery

Our Variations™ program allows you to specify virtually any kind of upholstery treatment you want: Use multiple fabrics on a single chair. Wrap the seat to create an ultra-luxe look. Upholster the inside and/or outside back. Add nailhead accents. The possibilities are endless – but here are just a few idea-starters:

Wood Seating Advantages

Beechy Keen. Superb strength, exceptional grain consistency and superior color clarity make beech wood the best choice for commercial seating. While European Beech is our standard offering, we work with other species upon request – like the customer who wanted his chairs built with the oak trees cleared from his property.

Quality, Quick. Mortise-and-tenon construction maximizes joint strength, but it also takes more time – which is why many manufacturers don't bother with it. We continue to utilize it and other classic woodworking techniques to deliver a better-quality product. Yet we still manage to deliver shorter lead times than the “short-cut” competition.

Detail Differences. We glue, screw and “blind-bolt” back legs together using hardened nuts and bolts, then camouflage the connection with a matching grain plug. Corner blocks are glued and lag screw-bolted at a mitred angle for exceptional strength and durability. Stretchers are toenail-screwed to eliminate the need for unsightly metal brackets. All products meet or exceed ANSI/BIFMA standards.

Finishing Touches. Whatever the species used, we sand and stain every square inch of wood ourselves – by hand. We then enhance the grain with expertly applied water-based finishes that ensure long-lasting beauty.

Tush Cush. We hand-sew and hand-fit fabrics over HR (High Resilience) foam – the Cadillac of cushioning. The result is superior comfort, appearance and durability – making us the choice of many of the world's largest restaurant chains and most exclusive boutique hotels.

Green Seats. Our state-of-the-art wood-based finishing system reduces VOC emissions. Our upholstered seat boards are made with low-formaldehyde particleboard, minimizing VOCs. And we further enhance indoor air quality by offering PVC-free and recycled textiles.

Wood Seating

Wood Melissa W501

This is the one that started it all – the original, staggeringly popular Wood Melissa that inspired the stylistic evolutions on pages 15-21.

Steel Seating Advantages

Seats of Power. Our steel chairs and barstools exceed ANSI/BIFMA standards. They're stronger than others on the market because we use a thicker gauge, plating-grade steel. We hand-tailor, cope and braze all joints to add even more strength. This also creates a smooth finish and prevents rust.

Color Your World. We offer nearly 30 standard finishes for our steel chairs, and we can custom-match virtually any color. We apply paint colors via an automotive-grade powder-coat system that assures equal coverage of every facet of even our most complex shapes and designs. The environmentally friendly epoxy/polyester finish is baked in to create a beautiful, durable, color-rich surface.

Earth Friendly. All our steel seating is made with a minimum of 30% recycled content, and we recycle 100% of our internally generated steel scrap. In addition, our baked-on powder-coat finish eliminates VOCs.

Let it Glide. Our exclusive design. These glides blend pure Nylon 66 with a super-dense additive for unsurpassed wear resistance. They're standard on all our steel chairs.

Switch Seats. In addition to the standard upholstery offerings, steel seats may be specified with webbed seat construction to further enhance comfort and durability. Or choose a wood seat made of 1" solid saddled beech ply. All our steel chairs can also be ordered as counter seats.

Aluminum Seating Advantages

Aluminum Experts. Working with aluminum is every bit as challenging as fine woodworking. That's why so few manufacturers do it really well. Our expertise is evident in the graceful contours of our chairs and the near-invisible welds at joints. Go ahead and compare these features to the competition.

Finished to Perfection. Aluminum chairs are available in a classic brushed aluminum finish or a powder-coated paint. We offer nearly 30 standard powder-coat colors and we can custom-match virtually any other color.

Gliding Along. Our premium metal glides, standard on all aluminum chairs, help reduce noise on all surfaces.

Eco Wise. We paint our aluminum chairs with a baked-on powder-coat process that eliminates VOCs. We also recycle 100% of the aluminum scrap we generate.

Mix and Match. A brushed aluminum frame with wood seat. A powder-coated frame and seat in any color of the rainbow. Distressed wood seats with colored frames, upholstered seats with aluminum frames, aluminum seats with colored frames ... you can mix and match the options to suit any décor.

Your anything-but-usual table.

We use BIFMA strength-approved, industrial-grade, low-formaldehyde particleboard for the cores in all our **laminate and veneer table tops**.

Strong, affordable, sustainably harvested maple is our standard for **solid wood tops**, but we can source and work with other species as requested.

An “under-top” **purse shelf** option on pub-height tables accommodates purses, coats, cameras and more.

An optional **foot ring** on pub-height tables gives guests a place to rest their weary feet.

Our **table-flip** mechanism saves space and eases storage when tables are not in use.

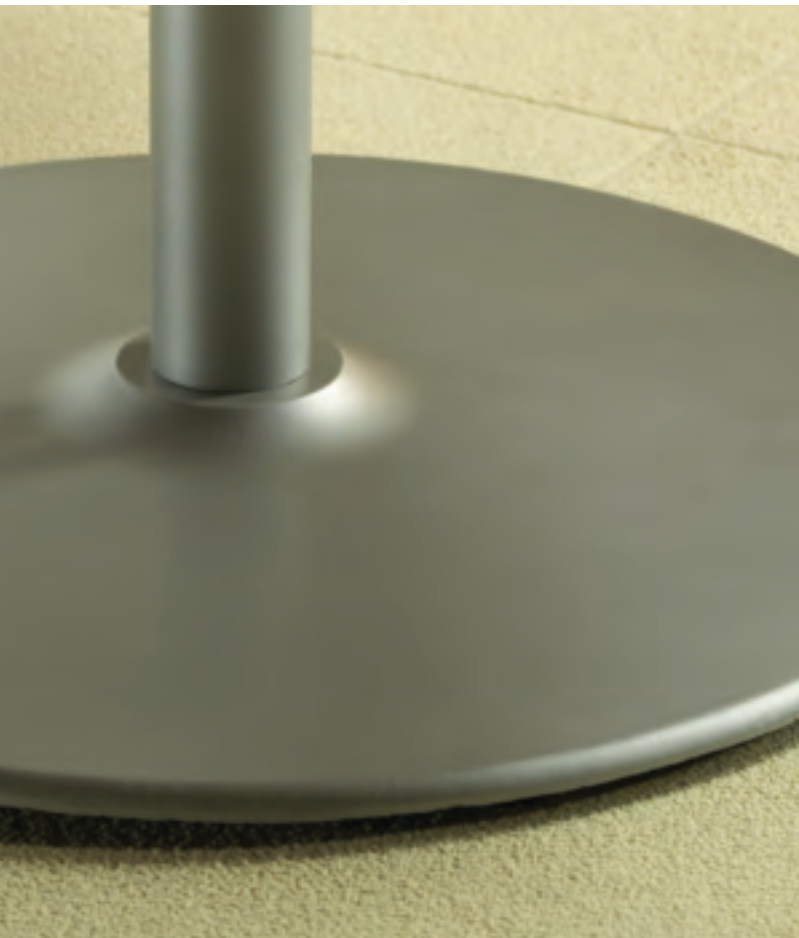

Table **bases** are made of a high-strength, structural steel – 30% stronger than the average steel – or heavy-duty cast iron. **Columns** are heavy-wall tubes made of 14-gauge steel.

A variety of **edge profiles and materials** are available – including rapidly renewable bamboo and an earth-friendly, exceptionally durable urethane edge made with vegetable oil.

Our patented **table-fold** mechanism on T-Base tables is the strongest on the market.

Square-to-round, square-to-bowed and **square-to-rectangle** tables enhance your flexibility.

Rambo

Virtually indestructible ... just like the movie hero. The laser-cut bases are easily adaptable to any size, shape and color.
