

TECHNICAL CASES

www.gtline.com

GT Line was established in Bologna in 1970 and specialized from the beginning in the production of technical cases.

In a few years since its foundation, GT Line has become the leader in this field as well as the company offering the widest choice of products in the whole Europe.

Over 40 years of experience and the UNI EN ISO 9001:2008 certified production process are the best guarantees of the quality of professional tool cases, waterproof cases and computer cases that are designed and built in our factories with advanced technologies and selected materials.

GT Line is a world-leader in the field of technical and professional cases because of its entrepreneurial spirit, technological research, precision manufacturing, quality control and the continuous upgrading of its resources.

GT Line has a firm hold on the European market thanks to its network of distributors and agents that operates in the hardware, tool, electrical and thermo-hydraulic fields.

Moreover, GT Line operates worldwide thanks to a well-consolidated network of partner distributors.

Technical, industrial and professional tool cases, manufactured with different materials.

Virtually indestructible, durable, protective waterproof cases for extreme applications.

Tool bags, tool backpacks, accessories, tool jackets ideal for PROS and DIYers.

Computers, photo, multimedia and portable electronics carrying cases and bags.

COMP ANY

To cope with an ever increasingly competitive market, GT Line also continuously expands its knowledge and technical skills, by looking for new materials to improve the basic requirements of technical cases (robustness, lightweight, and practicalness) like aluminium, ABS, polyethylene, polypropylene, carbon fibre, etc. GT Line does not neglect the importance of aesthetic, cares of details and always offers new solutions to distinguish its cases also for the elegance of the Made in Italy design.

GT Line owes its success to the continuous investments in research, product development and innovation in general. In the GT Line's management vision, these are the only viable chances of competing on the global market.

In line with that, constant effort is dedicated to the development of new materials as well as the evolution of production procedures, to make our cases always up to the expectations of the most demanding maintenance professionals.

Tool trolley made entirely of HDPE polyethylene, a real shield against accidental shocks. Special extra thick aluminium trim for tight closure. High capacity case ideal for air travelling engineers that carry both tools, spare parts and components.

The new TSA locks allow the case to be checked at the airport by security officers.

General features:

- 2 metal lid safety support stays
- telescopic handle and large wheels provided with ball bearings
- ergonomic handle, rubber coated grip

- Single steel hinge, riveted in several points to assure high resistance in case of frequent openings.

- Large base area for tools, power tools, accessories and spare parts.

NEW

- New TSA approved lock

- Stackability.

TURTLE 350 PEL

- 2 pallets with elastics, one with elastics on one side and the other with elastics on both sides and a large pocket with closing flap
- 1 document wallet
- 3 small component boxes
- 2 handles
- 2 TSA locks with keys
- large base area

- FLEXI POUCHES PLUS™ - Patented Tool Fixing System (for more details see page 45)

TURTLE 350 PTS

- 2 pallets with FLEXI POUCHES PLUS™, one with pouches on one side and the other with pouches on both sides
- large pocket with closing flap
- 1 document wallet
- 3 small component boxes
- 2 handles
- 2 TSA locks with keys
- large base area

- PSS™ - Patented Professional Storage System (for more details see page 45)

TURTLE 350 PSS

- 2 pallets with PSS™ system, one with PSS™ on one side and one with PSS™ on both sides
- 1 document wallet
- 3 small component boxes
- 2 handles
- 2 TSA locks with keys
- large base area

The double wall construction technique and the body in shock-proof high density polyethylene, with great resistance to high and low temperatures and to most of the corrosive chemical substances, grant to this case the highest level of reliability on the market. Air transportation handling resistant.

General features:

- blow moulded polyethylene shell with incorporated feet
- 2 locks with keys
- 2 metal lid safety support stays
- wheels and telescopic handle
- Bottom area with adjustable dividers
- ergonomic handle, rubber coated grip

- Double wall construction technique.

- Stackability.

- Large wheels provided with ball bearings.

- Bottom area with adjustable dividers.

NEW MEGA WHEELS PEL

Modern and exceptionally strong, this case is studied to resist even in the most extreme use conditions.

The double wall construction and the body in shock-proof high density Polyethylene, with great resistance to high and low temperatures and to most of the corrosive chemical substances, grant to this product the highest levels of reliability on the market.

General features:

- Blow moulded Polyethylene shells with incorporated feet
- 2 metal lid support stays with safety spring pawl and doublefixing point
- 2 locks with keys
- Steel hinge riveted in various points
- ergonomic handle, rubber coated grip

- Bottom with adjustable dividers

- Double wall construction technique

- Steel hinge riveted in various points for maximum resistance even in case of intensive use.

- GT's exclusive double blocking elastic System (for more details see page 45)

BOMBER 170 PEL

- document wallet
- 2 tool pallets with elastic bands
- bottom with adjustable dividers
- 2 small component boxes

Technologically advanced, injection moulded, high thickness Polypropylene tool case. This material makes the case extremely resistant against chemical corrosion, shock, high and low temperature.

The injection technique ensures constant material thickness, even in the corners. Large and thick aluminium trim, makes the case ideal for daily, heavy duty use.

The case can accommodate up to 3 tool pallets.

General features:

- 2 metal lid safety support stays
- 2 metal locks with keys
- 3 metal hinges for maximum strength
- ergonomic handle, rubber coated grip
- address label

- Bottom area has removable dividers fixed directly on the shell body with no need of additional tray.

- Address label

Watertight to 10 m. depth and perfectly sealed thanks to the exclusive neoprene "O" ring and to the purge valve, these cases grant an absolute protection to your tools. Made of unbreakable lightweight resin, they are provided with strong locks and a useful and ergonomic handle. They are ideal for use in the most harsh environment, such as industrial, aeronautical, military and nautical fields.

General features:

- waterproof and airtight
- interstackable
- corrosionproof, sandproof and dustproof
- shockproof and crushproof
- temperature rating -33°C/+90°C
- ergonomic handle, rubber coated grip
- jam free latches with user-friendly opening mechanism
- corrosion proof metal hinges with lid stay features

Injection moulded, high thickness Polypropylene tool case on wheels. This material is extremely resistant against chemical corrosion, shock, high and low temperature. When travelling, the case is in horizontal position. This model has a compact size but high load capacity and light weight.

General features:

- high thickness aluminium telescopic handle
- wheels on ball bearings
- soft grip handle
- 2 side locks
- 1 central key lock
- document area
- metal lid support stay
- 2 small component boxes

- Central lock with key

BOXER WH PEL

BOXER

Manufactured in anthracite grey high impact plastic, using the injection molding technique, it is provided with corner reinforcements. The bottom dividers have been designed to remain steady even in case of accidental overturning of the case. This system gives the flexibility of an adjustable interior as well as the steadiness of fixed compartments.

General features:

- two metal locks with key
- central combination lock with 3 digits
- soft rubber grip handle
- hinges with 90° opening block system
- "Click & Go" system to easily fix the tool pallets
- bottom tray with high stability divider modules
- document wallet

This model is made of vacuum formed, high thickness ABS. The new design of the shell and the interiors characterizes by a modern and functional look, representing the constant research of the best quality/price ratio.

General features:

- 2 metal locks with keys
- 2 metal lid safety support stays
- 3 metal hinges
- bottom area with removable dividers
- soft grip handle
- document area

INNOVA 195 PEL

- 1 lid tool pallet with elastics on both sides
- 1 bottom tool pallet with elastics on one side

- bottom area with removable dividers

INNOVA 195 PTS

- 1 lid tool pallet with FLEXI POUCHES PLUS™ on both sides
- 1 bottom tool pallet with FLEXI POUCHES PLUS™ on one side

INNOVA 195 PTS	440	340	190	80	110	4,0

Lightweight robust cases, made in vacuum formed ABS, using the most advanced technological solutions and standardized automated production processes. A system of adjustable dividers is directly fitted into the ribbed bottom tray, forming a more spacious and perfectly organized compartment. Without the addition of a separate internal bottom, the new case is much lighter and just as resistant and compact.

In the Revo Wheels 200 PTS model the broader space between wheels gives high stability.

General features:

- central combination lock with 3 digits
- 2 side locks

REVO PTS

- 2 pallets with FLEXI POUCHES PLUS™

- bottom tray with removable dividers (only for Revo PTS and Revo Wheels 200 PTS)

REVO WHEELS 200 PTS

- 2 pallets with FLEXI POUCHES PLUS™
- wheels with ball bearings
- telescopic handle

Lightweight, vacuum formed ABS case, similar to REVO PTS and REVO WHEELS 200 PTS models with a more compact size.

- FLEXI POUCHES PLUS™
- Patented Tool Fixing System (for more details see page 45)

REVO SLIM PTS

- 2 pallets with FLEXI POUCHES PLUS™
- bottom compartment for tools, accessories and spare parts

MASTERPACK: REVO PTS REVO WHEELS REVO SLIM

Revo PTS and Revo Wheels 200 PTS are sold in masterpacks of 6 pieces.

Revo Slim is sold in masterpacks of 8 pieces.

The packaging has both functions of container and display.

Closed dimensions: 50x80x70 cm.

Open dimensions: 50x142x70 cm.

MUB Multi Utility Box - is a lightweight high capacity injection moulded polypropylene box for tough, heavy duty use. Ideal for use where high loading capacity is needed like construction sites, maintenance, transport, outdoor, nautical equipment.

General features:

- Water resistant construction
- Shock resistant and corrosion proof
- Moulded integral lifting points on both ends
- Full length steel hinge pin to lid
- Positive grab over latching catches
- Lid reinforcements
- Trolley case integral wheels and hinge out pull handle
- Large robust fold flat carry handle
- Slide out clear ID-Nameplate holder
- Use in high/low temp environments
- Padlocking provision
- Stacking location points

- Self oiling free running wheels

- Stacking location points

UNIVERSAL TROLLEY

Folding, lightweight and resistant universal trolley. It is provided with elastics and plastic hooks to easily fix any kind of case or bag.

- Telescopic handle with two locking positions
- Large wheels allowing easy transport.

Dimensions:

Closed 490x270x110 mm.

Open 1200x270x420 mm.

Weight: 1,78 Kg. - Up to: 30 Kg. load

The elegance and harmony of its rounded shapes, the body in anodized Aluminium, the combination lock, the attention to the details together with the restyling of the product, make the De Luxe range the Top Line of GT's technical cases proposal.

General features:

- cold moulded body realized from a 15/10 mm. thick aluminium sheet
- aluminium profile for a more reliable closing
- 2 chromed steel locks
- combination lock with 3 digits
- 3 metal hinges
- 4 metal feet
- chromed ABS handle with soft grip
- vacuum formed tray with 3 compartments
- metal lid support stays with safety spring pawl

R7/TOP

- 2 tool pallets with elastic bands
- double document wallet
- 2 small component boxes

- vacuum formed tray with 3 compartments, one of which suitable for a drill.

The traditional ultra resistant tool cases ALC/170 and ALC/120 are now even more reliable thanks to the construction technique based on an unique aluminium cold bent body 15/10 mm. thick.

The reinforcements in chromed iron, the corrosion resistant aluminium "L" section extrusions and the rivets positioned ad hoc in the points of major stress create an unique and excellent product.

General features:

- chromed ABS handle with soft rubber grip
- aluminium profile for a more reliable closing
- 2 metal chromed locks
- Vacuum formed tray with 3 compartments
- 3 metal chromed high thickness hinges
- shoulder belt

ALC/120

- document wallet
- 1 tool pallet with elastic bands
- 1 small component box
- 1 metal lid support stay with safety spring pawl

• New chrome plated steel hinges for great resistance.

• Vacuum formed tray with 3 compartments, one of which suitable for a power tool.

The new patented COMPOSIT cases are realized with a revolutionary compound construction technique of aluminium and a special rubber resin derived from the automotive field. The products of this range are characterized by a great resistance and lightweight.

General features:

- 2 hinges with 90° opening block system and incorporated feet
- "Click & Go" system to easily fix the tool pallets
- 4 rubber feet for maximum stability on horizontal surfaces
- 2 chromed iron locks
- ergonomic handle, rubber coated gripber coated grip

• Patented dividers and junction fixing clips system. It remains steady, creating a structure similar to a bottom tray with fixed compartments.

• CLICK & GO™ - Patented fixing system permits to insert or substitute the tool pallets easily and quickly.

• GT's exclusive double blocking elastic System (for more details see page 45)

COMPOSIT 190 PEL

COMPOSIT190 PSS	446	340	190	75	115	5,5

Robustness and lightweight are the features condensed into this new cases, together with a particular care for recent safety standard requirements. They are water resistant and manufactured in wear resistant nylon and anti-tug fabric. They are ideal for use in low temperature environments, and perfect for heavy-duty use. The rigid injection moulded bottom compartment with adjustable dividers has been designed to remain steady even in the event of lateral collisions and accidental overturning of the bag.

General features:

- zip with padlockable metal clip
- shoulder belt
- rubber corner reinforcements

PEL TOOL PALLETS SYSTEM

Tool pallet with adjustable loop elastic band, according to the size of the tools.

Elastic band with reinforced stitching fixed loops in different sizes for any kind of hand tool storage.

Elastic band is fixed with an exclusive patented double-blocking GT system, which ensures a long lasting service. The loops are fixed in different sizes for any kind of hand tool storage.

PTS TOOL PALLETS SYSTEM

Traditional hard-wearing synthetic leather, reinforced stitching, pouches in different sizes for various tools storage.

FLEXI POUCHES™: original patented tool fixing system by means of special pouches made of extremely resistant elastic material and with reinforced stitching. It easily fits to the different shapes of tools. The right position of the tools contained is always ensured, even in case of overturning of the case.

FLEXI POUCHES PLUS™: original patented tool fixing system by means of special pouches made of extremely resistant elastic material and with reinforced stitching. It easily fits to the different shapes of tools. The right position of the tools contained is always ensured, even in case of overturning of the case. The special transparent resistant plastic bottom part ensures a better visibility of the tools.

PSS TOOL PALLETS SYSTEM

<<PSS™ Professional Storage System: the tools are stored and held in place thanks to the pressure of four rubber blades. The design is lightweight, made using an injection moulded technique (aluminum for PRO BAGS BCP 01-02-03 PSS range only) that makes both the storage housing and the blades highly elastic and resistant to rough, heavy duty use with no memory effect. Ideal for hand tools of all sizes, is a great advantage of facilitating fast tool change during service or for any heavy duty application.
