sc1000™ Digital Controller

Process Instrumentation

Modular System

Now with
Modbus TCP/IP
digital
communication!

Profibus DP or Modbus RTU

Internal sc1000 Network

The Hach sc1000 Multi-parameter Universal Controller is a fully modular system consisting of a Display Module and one or more Probe Modules.

Display Module

The sc1000 Display Module is a full-featured controller with a large color touch-screen display. The intuitive, easy to use interface can be used for any number of parameters. One Display Module controls either a single Probe Module or a number of Probe Modules connected by a digital network. The Display Module is fully portable and can be disconnected and moved anywhere within the network.

Probe Module

Each sc1000 Probe Module provides power to the system and can accept up to 8 digital sensors. Probe Modules can be networked together to accommodate many more sensors attached to the same network.

Plug-and-Play Operation

There's no complicated wiring or set up procedures with the sc1000 controller. Just plug the sensor into a Probe Module and it's ready for use without special ordering or software configuration.

Mix and Match Digital Sensors/Analyzers

The sensors and analyzers that can be plugged into the Probe Module can be any from Hach's line of digital sensors: dissolved oxygen, pH, ORP, conductivity, turbidity, suspended solids, nitrate, etc.—and analyzers: ammonium, phosphate, etc. Use them in any combination.*

Flexible Communication Options

Communication and relay options for the sc1000 controller can be configured to suit any situation. Standard configurations for a single Probe Module include:

- Up to 4 potential free relay contacts for alarm and control functions
- Up to 12 analog outputs for measured values
- Up to 12 digital or analog inputs from instruments (i.e., flow or pressure measurements)
- Digital communication card to integrate with an external network (MODBUS® and PROFIBUS DPV1 are currently available)

Modbus TCP/IP, Build-in webserver and VPN capabilities are available on the Display Module. Either wired via Ethernet LAN port or wireless via GPRS.

Additional relays and analog inputs and outputs can be added by networking a second Probe Module or optional DIN-rail communication modules.

*Per sc1000 probe Module: 2 to 8 Sensors or up to 2 Analyzers—maximum of 8 digital sensor/analyzer combinations.

The sc1000 digital controller is compatible with digital sensors/analyzers for measurement of the following parameters:

- | | | |
|--------------------|--------------------------------|--------------------|
| • Ammonium | • Luminescent Dissolved Oxygen | • Phosphate |
| • Chlorine, Free | • Nitrate | • Sludge Level |
| • Chlorine Dioxide | • Ozone | • Suspended Solids |
| • Conductivity | • pH/ORP | • Turbidity |
| • Dissolved Oxygen | | • UV Absorbance |

Trending

The sc1000 Display Module allows the user not only to list a measurement value but also to show a trendline of the measurement by day or week. Additionally, the Display Module has an interactive chart page for analyzing any number of trendlines.

Mathematics

The sc1000 is capable of advanced mathematical calculations. The result of these calculations can be used as a virtual sensor on the mA output board and carries the full set of capabilities that any other sensor can have, including being used as an input in another equation.

Process Control

The sc1000 provides a high level of control via programmable relays and outputs. Specific features include PID, PWM, and others. Combining the mathematical capabilities with the network and control features, the sc1000 becomes an extremely powerful tool to run portions or even entire processes of a plant.

Expandable and Upgradeable

The sc1000 controller can adapt to your needs. Change probes without changing the controller. Probe Modules can be added or removed depending on operational needs. Fully upgradeable software ensures that this system will not be obsolete.

BUS/Ethernet/Remote Connection

There are a number of ways to access the information from an sc1000 Network. The standard 0/4-20 mA and BUS networks are available through the sc1000 Probe Module. The sc1000 Display Module has a dedicated Ethernet LAN port for remote access or access via PC, laptop or smart phone, using any kind of internet browser. Wireless GSM GPRS communication capability is optional.

Wireless GSM GPRS Telecommunications

Remote GSM GPRS Telecommunications are available where GSM is available. Both the Ethernet and GSM GPRS connections allow access to the readings, most of the menus, data logs, and event logs. Additionally, the Display Module with GSM can send out an e-mail or SMS text message for any Errors, Warning, or Events. Call 866-450-4248 and speak with Technical Support to determine if GSM is available at your location.

Remote Access Partnership

By adding a Remote Access Partnership to your order, Hach can provide continuous Remote Monitoring of your sc1000 network and can provide technical support by communicating directly with your instrumentation.

sc100™ Digital Controller

Plug and play up to 2 Hach digital sensors

For more information, call to request Literature #2463, or visit www.hach.com

One Controller for One or Two Sensors

The Hach sc100 Controller receives data from up to two sensors. Use any of Hach's line of digital sensors for a wide variety of parameters.

One Controller for One or Two Parameters

Not only can the sc100 controller be used for up to two sensors, but the sensors need not be the same. Mix and match any combination of parameters.

Plug-and-Play Operation

There's no complicated wiring or set up procedures with the sc100 controller. Just plug the sensor in and it's ready for use without special ordering or software configuration.

Flexible Communication Options

Communications using RS-485/MODBUS®, RS-232/MODBUS®, or PROFIBUS DP protocols are available. (Contact your Hach representative for other communication protocols.)

Simple, Reliable Data Collection

A built-in data logger collects measurements at user selectable intervals, as well as calibration and verification points, alarm history, and instrument setup changes for up to 6 months. With a two-year warranty, the Hach sc100 Controller is built to last.

The sc100 is certified compliant for Class I, Division 2 hazardous locations. Note that compliance is only maintained with the appropriate compliant sensors.

The sc100 digital controller is compatible with digital sensors/analyzers for measurement of the following parameters:

- | | | | |
|--------------------|--------------------------------|----------------|--------------------|
| • Ammonium | • Dissolved Oxygen | • Ozone | • Suspended Solids |
| • Chlorine, Free | • Luminescent Dissolved Oxygen | • pH/ORP | • Turbidity |
| • Chlorine Dioxide | • Nitrate | • Phosphate | • UV Absorbance |
| • Conductivity | | • Sludge Level | |

The sc100 controller has a big and bright display and clearly arranged pushbuttons for simple operation.

sc100 with Aluminum Sun Shield, Prod. No. 1000G3088-001

sc100™ Digital Controller

Process Instrumentation

When combined with the Hach sc100™ and sc1000™ digital controllers, the Hach family of digital sensors/analyzers gives you reliable and accurate measurement for a wide variety of parameters.

NEW!

Benchtop Stand for sc100 and Model 53 Controllers

Calibrate and test process instruments in the lab using an sc100 or model 53 controller utilizing our new Benchtop Stand. This Benchtop Stand offers convenient access to the controller's wiring, plugs, keypad and display.

Prod. No.	Description
6894000	Benchtop Stand

Specifications*

Ambient Conditions

Operation

With less than 7 W sensor load:
-20 to 60°C (-4 to 140°F); 0 to 95% relative humidity, non-condensing

With up to 25 W sensor load:
-20 to 40°C (-4 to 104°F); 0 to 95% relative humidity, non-condensing

Storage

-20 to 70°C (-4 to 158°F); 0 to 95% relative humidity, non-condensing

Power Requirements

AC Powered sc100 model:
100-230 Vac $\pm 10\%$, 50/60 Hz;
Power 15 W with 7 W sensor/network card load, 37 W with 25 W sensor/network card load

24 Vdc Powered sc100 model:
24 Vdc-15%, +20%; Power 16 W with 7 W sensor/network card load, 34 W with 25 W sensor/network card load

Display

Graphic dot matrix LCD, 128 x 64 pixels with LED backlighting

Relays

Three SPDT, user-configurable contacts rated 100 to 230 Vac, 5 Amp resistive maximum

Outputs

Two analog 0/4-20 mA, maximum impedance 500 Ohms

Control

PID, PWM, High/low phasing, setpoint, deadband, overfeed timer, off delay, and on delay

Alarms

Low alarm point, low alarm point deadband, high alarm point, high alarm point deadband, off delay, and on delay

Communications (Standard)

Datalog access and software upgrade access via standard RS-232 service port and wireless infrared port

Communications (Optional)

RS-232 (MODBUS): Configure and retrieve measured data for one analyzer using IBM-compatible PC
RS-485 (MODBUS) or PROFIBUS DPV1: Advanced communications/networking with PLC or SCADA system directly from analyzer.

Memory Backup

All user settings are retained indefinitely in memory (non-volatile) (EEPROM)

Mounting Configurations

Surface, panel, and pipe (horizontal and vertical)

Enclosure

NEMA 4X/IP66; metal enclosure with corrosion-resistant finish

Dimensions

1/2 DIN; 144 x 144 x 150 mm (5.7 x 5.7 x 5.9 in.)

Weight

1.6 kg (3.5 lbs.)

Certifications

ETL listed (cETLus marked) to Canadian and US General Safety and Hazardous (Class I Div. 2) Locations

*Subject to change without notice.

si792 2-wire Transmitter

pH/ORP, Contacting Conductivity, and Inductive Conductivity —available for hazardous (EX) applications.

The Hach si792 2-wire electrochemistry transmitters are full-featured, intuitive to operate, and work with Hach's world-class pH and Conductivity sensors.* Rugged construction is designed for Class I, Division 2 (CI, D2) respectively Class I, Division 1 (CI, D1) hazardous locations. Digital communication capabilities are available.

The Right Sensors

The Hach si792 2-wire Transmitters are designed to operate with Hach's world-class electrochemistry sensors.*

- Differential pH and ORP (pHD and LCP sensors)
- Contacting conductivity (3400 series)
- Inductive (Electrodeless) conductivity (3700 series)

Beyond the Hach sensors other sensors can be connected to the si792 as well. For a complete list of approved sensor/transmitter combinations, please contact Hach.

Multiple Communications Protocols

The si792 transmitter is available with digital communication functionality to easily connect to a communication network of choice including HART®, PROFIBUS PA, or Foundation® Fieldbus.

Area Rated to Suit Your Needs

The si792 transmitters are available as Class I, Division 2 (CI, D2) with HART communications only or Class I, Division 1 (CI, D1) with HART, PROFIBUS PA, or Foundation Fieldbus. FM, CSA, and ATEX certified.

Easy-to-use Intuitive Interface

A logical menu structure, combined with icon based messages allows for intuitive operation. The large, clear liquid crystal display shows the measurement value, process temperature, and sensor and transmitter status. A transmitter or sensor error is indicated by a bright red LED and a message is displayed.

Sensor Diagnostics

The Hach si792 2-wire Transmitter performs self-diagnostics and sensor monitoring. Predictive diagnostics indicate end of sensor life. Reactive diagnostics alert operators to sensor failure such as glass breakage or coating, clogged junction, polarization of contacting conductivity electrodes, or integrity of inductive conductivity coils.

Sensor Diagnostics Icons as Shown on Display Screen

The si792 transmitter has all the features required to operate in the most demanding applications.

*Hach Digital Sensors are not compatible with the si792 transmitter series.

si792 2-wire Transmitter

Password-Protected Access

Separate passwords can be set for:

- Sensor calibration
- Transmitter configuration
- Administrator functions

Simple Installation

The transmitter's electronics are attached to a hinged door and are protected against aggressive environments. All terminals are easy to access and clearly described to ensure comfortable and error-free wiring.

The empty rear enclosure can be pre-mounted, and the hinged front door with the electronics can be easily attached afterwards. Plug-in terminals make wiring easy. Versatile mounting options include panel- pipe- or wallmount.

Easy-access, clearly-described terminals ensure comfortable and error-free wiring.

Model 53 Controller

pH/ORP, Conductivity, Dissolved Oxygen, Flow, Turbidity

- 1/2 inch Graphic Dot Matrix Backlit LCD With Multiple Language Capabilities
- Menu-Guided Operation
- Simple Interactive Diagnostics
- Password-Protected Access
- Universal Mounted, Epoxy Coated Aluminum 1/2 DIN, NEMA 4X Enclosure
- (2) 0/4-20 mA Outputs and (4) Relays

The Model 53 Controllers are best suited for applications requiring environmental ratings, high level of control, and multiple 0/4-20 mA and relay outputs. The Model 53 features a easy to follow clear text driven menu and is equipped with four electromechanical relays; SPDT (Form C) contacts; UL rated 5A 115/230 Vac, 5A @ 30 Vdc resistive. The controllers are housed in a 1/2 DIN, NEMA 4X enclosure and include hardware for panel, surface or pipe mounting.

Prod. No.	Description
P53A4A1N	pH/ORP analyzer
C53A4A1N	Contacting conductivity/ resistivity analyzer
E53A4A1N	Electrodeless conductivity analyzer (also measures % concentration or TDS)
D53A4A2N	Dissolved Oxygen analyzer for use with Hach/GLI membrane D.O. sensors. Two inputs (no sensor quick-disconnect receptacles)
F53A4A1N	Flow monitor/ totalizer (with four sensor inputs, four relays, and two pulsed outputs)

1000G3088-001	Aluminum sun shield for 53 controller includes hardware
LZX961.54	Polycarbonate Sun Shield for 53 controller, includes hardware

Popular models shown. For other model configurations, call 800-227-4224 or visit www.hach.com.

Specifications*

Ambient Conditions

Operational: -4 to 140°F (-20 to 60°C);
0 to 95% relative humidity, non-condensing
Storage: -22 to 158°F (-30 to 70°C);
0 to 95% relative humidity, non-condensing

Power Requirements

90-130 Vac, 50/60 Hz. (10 VA max.)
or 180-260 Vac, 50/60 Hz. (10 VA max)

Display

Graphic dot matrix LCD, 128 x 64 pixels with LED backlighting; 1/2 inch (13 mm) main character height; 1/8 inch (3 mm) auxiliary information character height; menu screens contain up to six text lines

Outputs

Two isolated 0/4 – 20 mA outputs; each with 0.004 mA (12 bit) resolution and drive capability of 600Ω load

Control

High/low phasing, setpoint, deadband, overfeed timer, off/on delay

Alarms

Low/high alarm point and low/high alarm point deadband, off/on delay

Communication (Optional)

HART Protocol: Configure and measure data for multiple analyzers using HART enabled data system or hardware

Memory Backup (non-volatile)

All user settings are retained indefinitely in memory (EEPROM)

Mounting Configurations

Surface, panel, and pipe (horizontal and vertical)

Enclosure

NEMA 4X/IP66; metal enclosure with corrosion-resistant finish

Dimensions

1/2 DIN; 144 x 144 x 150 mm (5.7 x 5.7 x 5.9 in.)

Weight

1.6 kg (3.5 lbs.)

Certifications

ETL listed (cETLus marked) to Canadian and US General Safety and Hazardous (Class I Div. 2) Locations

Measurement

pH/ORP, P53

-2.0 to 14.0 pH/(-2100 to +2100 mV)

Contacting Conductivity, C53

μS/cm: 0-2.000 or 0-20.0, 0-200.0 or 0-2000;

mS/cm: 0-2.000, 0-20.00, 0-200.0

Resistivity: 0-19.99 MΩ·cm or 0-999.9 KΩ·cm

TDS: 0-9999 ppm or 0-9999 ppb

Inductive Conductivity, E53

μS/cm: 0-200.0 or 0-2000; mS/cm: 0-2.000,

0-20.00, or 0-2000; S/cm: 0-2.000

% Concentration: 0-99.99% or 0-200.0%

TDS: 0-9999 ppm

Dissolved Oxygen, D53

0-99.99 ppm, 0-99.99 mg/L

or 0-999.9% saturation

Paddle Wheel Flow, F53

Flow rate: 0-9999, 0-999.9 or 0-99.99 with selectable

flow rate units and multiplier

Volume: 0-999,999,999 with selectable volume units

Ultrasonic Flow, U53

Flow rate: 0-9999, 0-999.9 or 0-99.99 with selectable

flow rate units and multiplier

Volume: 0-9,999,999 with selectable volume units

Depth: 0-1200.0 inches, 0-100.0 feet, 0-30,000

mm, or 0-30.00 meters

Turbidity, T53

0.000-1.000, 0.00-10.00, and 0.0-100.0 NTU with

auto ranging

Accuracy (Controller)

P53, C53, F53: 0.1% of span

D53: ±0.1% of span

E53, U53: 0.5% of span

T53: ±2% of reading, all ranges

Stability

P53, C53 0.05% of span per 24 hours.,

non-cumulative

E53 0.2% of span per 24 hours., non-cumulative

Repeatability

P53, C53, E53, T53, U53: 0.1% of span or better

D53, F53: ±0.05% of span

Temperature Drift

P53, C53 Zero & Span: < 0.03% of span per °C

E53: Zero & Span: 0.02% of span per °C

T53: Zero & Span: 0.01% of span per °C

D53, F53: Zero & Span: ±0.02% of span per °C

pH/ORP, Conductivity, Dissolved Oxygen, Flow

- Backlit LCD with multiple language capabilities
- Menu-guided operation
- Simple interactive diagnostics
- Password-protected access
- Panel mounted, polycarbonate 1/4 DIN enclosure (NEMA 4X when panel mounted)
- (2) 0/4-20 mA outputs and (2) relays

The Model 33 Controllers are best suited for panel mounted installations where high level control, 0/4-20 mA outputs, and relay output options are desired. The Model 33 is a 1/4 DIN design to allow for minimum space utilization on panels. All controllers are equipped with two electromechanical relays; SPDT (Form C) contacts; UL rated 5A 115/230 Vac, 5A @ 30 Vdc resistive.

Prod. No.	Description
P33A1NN	pH/ORP analyzer
C33A1NN	Contacting conductivity/ resistivity analyzer
E33A1NN	Electrodeless conductivity analyzer (also measures % concentration or TDS)
D33A1NN	Dissolved Oxygen analyzer for use with Hach/GLI membrane D.O. sensors
F33A1NN	Flow monitor/ totalizer (with four sensor inputs, two relays, and two pulsed outputs)

Popular models shown. For other model configurations, call 800-227-4224 or visit www.hach.com.

Specifications*

Ambient Conditions

Operational: -4 to 140°F (-20 to 60°C); 0 to 95% relative humidity, non-condensing
Storage: -22 to 158°F (-30 to + 70° C); 0 to 95% relative humidity, non-condensing

Power Requirements

90-130 Vac, 50/60 Hz. (10 VA max.)
or 190-260 Vac, 50/60 Hz. (10 VA max)

Display

Two-line by 16 character backlit LCD

Outputs

Two isolated 0/4 – 20 mA outputs; each with 0.004 mA (12 bit) resolution and drive capability of 600Ω load

Control

High/low phasing, setpoint, deadband, overfeed timer, off/on delay

Alarms

Low/high alarm point and low/high alarm point deadband, off/on delay

Communication (Optional)

HART Protocol: Configure and measure data for multiple analyzers using HART enabled data system or hardware

Memory Backup (non-volatile)

All user settings are retained indefinitely in memory (EEPROM)

Mounting configurations

Panel mounting

Enclosure

Polycarbonate enclosure with IP65 front panel; general purpose; two brackets for panel mounting

Dimensions

1/4 DIN; 94 x 94 x 142 mm (3.7 x 3.7 x 5.6 in.)

Weight

0.8 kg (1.7 lbs.)

Certifications

cETL (pending)

Measurement

pH/ (ORP), P33
-2.0 to 14.0 pH/(-2100 to +2100 mV)

Contacting Conductivity, C33

Pro-Series 2-Wire Transmitter

pH/ORP, Conductivity, Dissolved Oxygen, Flow

- LCD with multiple language capabilities
- Menu-guided operation
- Sensor and transmitter status check
- Password-protected access
- Universal mounted, 1/4 DIN, NEMA 4X enclosure
- Versatile 2-, 3-, or 4-wire hookup
- (1) 0/4-20 mA output

The Pro-Series Transmitters are best suited in applications where a minimal interface, only one 0/4-20 mA output, and no control functions are desired. The Pro-Series Transmitters are Class I Division 2 certified dependent on the selected probes. The Pro-Series Transmitter is a 1/4 DIN design to allow for numerous mounting options, including integral probe mounting.

Prod. No.	Description
PRO-P3A1N	pH/ORP analyzer
PRO-C3A1N	Contacting conductivity/resistivity analyzer
PRO-E3A1N	Electrodeless conductivity analyzer (also measures % concentration or TDS)
PRO-D3A1N	Dissolved Oxygen analyzer for use with Hach/GLI membrane D.O. sensors
PRO-F3A1N	Flow monitor/ totalizer

Popular models shown. For other model configurations, call 800-227-4224 or visit www.hach.com.

Specifications*

Ambient Conditions

Operational: -4 to 140°F (-20 to 60°C);
0 to 95% relative humidity, non-condensing
Storage: -22 to 158°F (-30 to 70°C);
0 to 95% relative humidity, non-condensing

Power Requirements

Two-wire hook-up: 16-30 Vdc
Three-wire hook-up: 14-30 Vdc
(16 Vdc minimum with RS-485 serial communication)
Four-wire hook-up: 12-30 Vdc
(16 Vdc minimum with RS-485 serial communication)

Display

Two-line by 16 character backlit LCD

Outputs

Isolated 4 – 20 mA output with 0.004 mA
(12 bit) resolution

Memory Backup (non-volatile)

All user settings are retained indefinitely in memory
without battery backup

Mounting Configurations

Wall, pipe, panel, or integral mounted sensor

Enclosure

Polycarbonate, NEMA 4X general purpose

Dimensions

With Back Cover:
3.75 in. W x 3.75 in. H x 2.32 in. D
(95 mm W x 95 mm H x 60 mm D)
Without Back Cover for Panel Mount:
3.75 in. W x 3.75 in. H x 0.75 in. D
(95 mm W x 95 mm H x 19 mm D)

Weight

10 oz. (280 g) approximately

Certifications

CE, Class I Div II Class A, B, C, D
Hazardous locations
