Volta II Flush Mounting Enclosures

The new generation

When building or renovating residential buildings, compact solutions are often required for electrical and multimedia installations. The volta small distribution board is especially suitable thanks to its easy assembly in walls as well as its manifold versions with 30% larger wiring space by lateral wiring trunking and larger upper and lower connection areas. The PE/N terminals in the quick-connect version permit easy and safe connection of conductors. Brass terminals are also available.

The advantages for you:

- Protection against power theft - the screws on the device protection cover can be sealed.
- High degree of safety - the door lock can be retrofitted without requiring any additional conversions.
- Installation even in thin walls - the raising frame enables the standard frame to be converted into a flat version with an installation depth of 72mm.
- Now with 30% more wiring space - additional side areas for cable management as well as larger upper and lower connection areas.

Technical data:

- Available from 12 to 48 modules.
- Protected to IP30.
- Base made from high-quality plastic (polystyrene), door and masking frame made of sheet steel.
- Pure white (RAL 9010).

Quick tips

1

30% More Space

Larger upper and lower connection areas offering more space for terminals and wiring.

5

Simple Flush Fixing

By pressing in the screw in the cavity wall anchor, the levers swivel out and click into place.

2

Cable Management

Separate side areas with cable clamps for cable management.

6

Removable Sides

The sides are removed before cables are entered. Pre-punched segments on the side facilitate knockouts.

3

Circuit Plans

Retaining clamps in the door for circuit tables and plans.

7

Quick Cover Connection

New quick connection for the cover - simply turn to secure or release.

4

Miniature Spirit Level

An miniature spirit level is integrated into the wall as an installation aid.

8

Flat Version

Any standard version with 90mm installation depth can be converted into a "flat version" with 72mm installation depth using the raising frame.

This range is ideally suited for the installation of individual modular devices. (RCCBs, MCBs, RCBO's, Switch Disconnectors etc).

The range is available without door, with plain door or with glazed door.

Where larger cables need to be accommodated for switch disconnectors etc extra cabling space is provided in the extended height versions.

All boxes from 2-5 modules are fitted with an earth bar as standard and for those with doors the catch can be replaced with the optional key locking facility.

These enclosures feature:

- Ample wiring space
- Full complement of earth and neutral bars fitted as standard
- Significant knockout provision
- Plain or glazed doors
- Optional key lock

For dimensions see page 2.18.
