

OTHER AVAILABLE PRODUCTS & ACCESSORIES

TACHOMETERS & ENCODERS

Available from our stock from manufacturers such as Hubner, General Electric, Encoder Products, Dynapar, Northstar, Avtron, Radio Energie, Baldor.

CRANE DUTY BLOWERS

Available with DC Motors where AC Power is not available.

ENCODER & TACHOMETER/ENCODER PACKAGES

The combination of both a DC Tach and an Encoder with one mounting arrangement.

TACHOMETER & ENCODER MOUNTING KITS

for all makes of DC Motors including Marathon Blue & Black Max Vector duty motors.

BLOWER WHEELS

Replacement blower wheels for all of our cooling blowers.

COUPLINGS

Standard and special bore sizes including metric for Tachometers & Encoders.

COOLING BLOWER FAILURE SWITCHES

to sense static pressure and assure Blower is on.

MOUNTING PLATES & BLANK COVER PLATES

to mount Cooling Blower directly to frame of DC Motor.

TRANSITION ADAPTER BASES

to adapt oversize Cooling Blowers on smaller frame DC Motors.

BELLY BANDS

for mounting Cooling Blowers on round 180AT Frame GE Motors.
Easy mounting, no machining.

TACH/ENCODER STUBS

for threading into the back of AC & DC Motors.

- DC OR AC MOTOR BLOWERS
- PY TACHOMETER MOUNTING KITS
- ENCODER MOUNTING KITS
- HEAVY DUTY DANCER HOUSINGS
- FILTERS - STANDARD AND SPECIAL
- SPECIAL BLOWERS AND ACCESSORIES

HEAVY DUTY
COOLING BLOWERS

Now you can increase the life of your DC or AC electrical motors by using our heavy duty Cooling Blowers. These economical units will save you down time and increase motor efficiency.

- Heavy Aluminum Housing
- AC Motors, Totally Enclosed Fan Cooled or Totally Enclosed Non Ventilated as standard
- Continuous Duty Rating
- Heavy duty steel impellers
- Wire Mesh Filters
- Sparkproof construction
- Adaptor Plates to adapt blowers to any motor, machine, or cabinet

PRE-FILTER
WRAPS

- 5/8" thick polyester media provides high arrestance, extending life of your filter.
- Fibers are blended together to form a dense media that allows depth loading of particles yet low resistance to air flow.
- Pressure sensitive dry tackifier is applied to the air-leaving side to hold dirt particles on the fibers.
- Available from stock for filter sizes 3 through 11.
- Custom sizes manufactured to your specifications.
- Easily installed. Simply wrap the media around your filter and secure in place using the velcro tabs.
- Environmentally friendly. Media is made from 100% post consumer recycled polyester fibers.
- Low cost, efficient investment will save you hundreds of dollars in filter replacements.

ENCODER / TACHOMETER
MOUNTING KITS

- Encoder Mounting Kits for Series 25,H25, H26, H42 and 625/525 Encoders (Specify make and frame of motor).
- Specialty Flange Adapter Plates to mount Encoders to PY Style Kits. (Specify make and series of Encoder).
- Tachometer Mounting Kits for PY, BC42 & BC46 Series Tachs.
- PY to BC42/46 Series Tachometer Mounting Flanges.
- BC 42/46 to PY Series Tachometer Mounting Flanges.
- Blue Max and Black Max Encoder and Tachometer mounting kits.

PY TACHOMETER
MOUNTING KITS

Includes Main Housing, Finger Protection Cover, Anti-Backlash Coupling, Stub Shaft, all Mounting Hardware for Flange and Tachometer.

HEAVY DUTY DANCER
POTENTIOMETER

The Dancer Duty Potentiometer Series HDD is designed for use in harsh environments for a multitude of industrial applications.

A 360° Potentiometer with a rotational life of 2,000,000 cycles is mounted inside a heavy cast protective housing with external mounting feet and is directly connected to the dancer shaft which extends through the enclosure by use of a double set of bearings. This mounting configuration is designed to eliminate lost motion and excessive loading to the Potentiometer shaft.

The dancer shaft itself is 1/2" diameter by 2 1/2" long to carry dancer arms and timing or roller chain sprockets for rotational position. Wiring connections are made easy by a pre-wired strip within the enclosure.

Potentiometer values of 1K, 2K, 5K, and 10K are standard but special resistance values are available.
