

iomega® Product Guide

An Industry Leader, A Global Brand

Iomega Corporation is a worldwide leader in innovative storage and network security solutions for small businesses and consumers.

Iomega has sold more than 400 million digital storage drives and disks since its inception in 1980. Today, Iomega's product portfolio includes industry leading network attached storage products, a wide range of desktop and portable hard drives, multimedia devices, and removable storage products such as the award winning REV® Backup Drive with Removable Disks.

lomega® and EMC®— A Partnership with Synergistic Ideals

In 2008 lomega became a wholly-owned subsidiary of EMC® Corporation.

EMC is the world's leading developer and provider of information infrastructure technology and solutions that enable organizations of all sizes to transform the way they compete and create value from their information. EMC is represented in over 50 countries with the world's largest sales and service force focused on information infrastructure. As an EMC company, lomega is now better poised to deliver award winning industry leading technology and solutions to home users and small businesses. You will find several lomega products which now include technology from the EMC family to bring lomega customers unique and powerful solutions to enhance their digital lives!

ABOUT
LOMEGA

Iomega Smart Storage Solutions

lomega offers affordable and easy-to-use storage products for individuals and small businesses

omega's award-winning storage products include a broad range of desktop and portable hard drives that include the sleek Prestige™ drive and the popular eGo™ drive available in great colors and styles for both PC and Mac® users.

Mac enthusiasts will find Iomega's series of UltraMax hard drives tailored in form and function to coordinate with their latest Mac hardware. The Iomega UltraMax Pro hard drive offers feature-rich solutions with multiple interface options, hot-swap hard drives, and RAID.

Iomega also offers leading network storage solutions which provide up to 8TB of storage space for your home or small office network and for workstation backups/restores, file sharing, email storage and disaster recovery. The Home Media Network Hard Drive and the StorCenter ix2-200 add security and ease-of-use for the home and home office with enhanced features like media sharing and print serving capabilities. The StorCenter Pro NAS series of desktop and rack-mount servers are powerful and cost-effective solutions for the small business environment.

In addition, Iomega offers a suite of multimedia products to let you store, view and enjoy your media collections. With the feature-rich ScreenPlay™ TV Link Director you can link up the USB storage you already own to your TV. The ScreenPlay Director HD Media Player provides network storage plus high definition content viewing on your TV or entertainment system for a high quality home theatre experience. For those homes or businesses that need removable disk storage devices, Iomega offers the REV® drive with removable 120GB or 70GB hard disks.

To protect your investment, most Iomega storage products now include a 3 year limited warranty when you register your product.

About NAS Desktop Servers

Protect, Manage and Share your Critical Data

iomega's StorCenter product line provides a simple solution to protect, manage and share your critical information, designed specifically for small to medium-sized businesses, remote offices or workgroup environments. Built on EMC's world-class enterprise storage functionality, StorCenter Network Storage devices offer advanced storage, security and content sharing that is easy to use and affordable.

Easy to use and manage – setup in just four mouse clicks

Robust data management and protection – powered by enterprise-class EMC LifeLine software

Remote access – from anywhere in the world

Reliable – advanced RAID and UPS support

Professional – iSCSI target, ADS support, SNMP monitoring

Feature-rich – offers user replaceable hard disk drives, print sharing, and USB-attached HDD expansion

Cross-platform functionality – supports PC, Mac and Linux clients and is VMware certified

Advanced features – such as user/group setup, IP security camera and Bluetooth upload capabilities

About Portable Hard Drives

The Iomega Drop Guard™ Xtreme Feature Raises the Bar on Drop Protection

When you purchase an Iomega eGo™ Portable Hard Drive that includes the Iomega Power Grip band, the Drop Guard Xtreme feature protects your drive from drops up to 2 meters. This higher level of drop protection is over twice the industry average and means your drive is ultra-rugged. This Drop Guard Xtreme feature is available on eGo Encrypt and eGo BlackBelt Portable Hard Drives only.

With the ultra-rugged Iomega eGo BlackBelt Portable Hard Drive you will have lots of room for all your photos, music and videos. Available in stylish black with the Iomega Power Grip band and 500GB capacity.

Take your most sensitive data anywhere safely with the Iomega eGo Encrypt Portable Hard Drive USB. Perfect for business professionals who need ultra-secure, high capacity storage for their files and want the benefits of hardware (AES 128-bit) versus software encryption for better performance and security.

About Removable Storage

Rethink Backup: Faster, Easier, More Reliable

Fast - Back up and restore up to 8 times faster than tape *, retrieve files in seconds with drag-and-drop (compared to linear access with tape drives)

Easy - Plug and play ; no cleaning or maintenance required

Reliable - 2 generations of products based on proven hard disk technology ; sensitive electronics are only located in the drive to avoid damage with transport

Removable and portable - Small form- factor cartridges of 120GB or 70GB can be easily transported and stored off-site for additional protection

Expandable - Add capacity when you need it using the super-durable and scratch-proof disks

Secure - Password protected media ; immediate disaster recovery in event of system failure

* Based on DAT-72 tape comparison.

About REV Server Solutions

High Performance Storage System

Iomega REV[®] Server Backup Kit with a REV drive, disks and CA[®] BrightStor[®] ARCserve[®] Backup and Disaster Recovery software includes everything needed to create an automatic backup schedule to keep critical data safe. REV is more reliable, easier to use, 8 times faster, plus up to half the price of entry-level tape solutions*. REV is a scalable, high-performance, storage system with removable disks that allow users to easily add storage as needed or transport files off-site.

* Based on REV[®] 70GB to DAT72 tape comparison

About Software Offered on Iomega Products

McAfee®

Iomega includes award-winning backup and anti-virus software on many of our storage solutions

For our customers, this means you have all the tools at hand to secure your data either with local or online backup or to protect your computer from viruses and spyware. See product information for specific software included. Software is available via easy download and may include:

McAfee® VirusScan Plus software

Iomega offers a free six month subscription of the powerful McAfee VirusScan Plus software to protect your PC with anti-virus, anti-spyware, 2-way firewall, and web security protection (PC only).

Iomega® QuikProtect software

Extremely easy-to-use, file-level backup protects your data with drag and drop simplicity. An intuitive wizard makes first time protection setup a breeze. Save your data to external hard drives or networked drives on a schedule or after every time a file changes (PC/Mac).

EMC® Retrospect® Express Backup software

Retrospect Express HD protects the contents of your PC by regularly making a backup copy and storing the backup on a second hard drive.

MozyHome™ Online Backup service

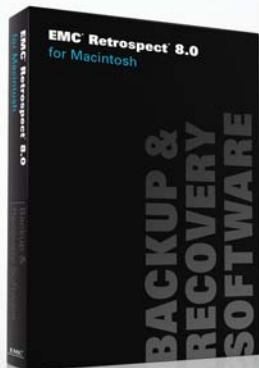

MozyHome Online Backup (2GB Free) offers a simple, secure, online backup service to store your critical data offsite, protecting you against theft or destruction of your computer. You can backup automatically or on a schedule. 128-bit SSL encryption keeps your data transfers secure.

When you purchase Iomega USB Portable and Desktop Hard Drives, you receive the Iomega Protection Suite, a comprehensive offering which includes all of the software solutions listed above giving you the most options to best protect your data and computer.

About EMC® Retrospect® Software

As a key member of the EMC family, Retrospect offers award winning software to secure and protect your data

Iomega offers EMC Retrospect HD, Retrospect Express for Windows® and Mac® with most products. Upgrades to more robust Retrospect products are also available. EMC Retrospect backup and recovery software works with Iomega storage products to protect individuals and businesses alike from data loss due to user error, computer failure, theft — even site-wide disaster. Award-winning Retrospect safeguards millions of computers worldwide and consistently earns broad industry acclaim for its patented technology that makes backups easy and automatic, and restores completely reliable. Combining your local Retrospect backup with Mozy Online Backup offers the added security of offsite backup so that in the event of catastrophe, your data is still retrievable. Early this year, EMC introduced an all-new version of Retrospect for Mac 8.0, complete with a contemporary Mac OS X user interface, a powerful new architecture, and a host of new and improved features that include:

All-new, customizable user interface

The all-new Retrospect 8 user interface is laid out similarly to iTunes and Apple's Server Admin tool, making it immediately familiar and easy to navigate.

Powerful new engine

Retrospect 8 performs up to eight simultaneous backup, restore, and copy operations.

Backup-to-disk features

Includes support for local and network hard disks, combining multiple volumes into a single destination, adjustable storage usage limitations, and disk grooming to remove out-of-date backup data and free up space.

True disk-based backup staging

Archive critical point-in-time backups to portable media or tape at your convenience

Simultaneous streaming of data

Retrospect 8 streams data to multiple disk or tape storage systems at the same time.

Improved tape library management

Barcode tracking and automatic tape drive cleaning make tape library management easy.

Powerful reporting, including sources not backed up in n days

Available/used media set capacity, performance data, and much more, keeps you informed and in control.

Better email notification

Notifies you of completed operations, media requests, and warnings.

Backup Data Encryption

Government certified AES-256 encryption of backup data offers added security.

Advanced network client support

Supports multiple network interfaces and reduces overall energy consumption with wake-on-LAN feature that wakes sleeping computers for backup.

Backs up Windows Server 2003/2008 and Windows XP/Vista clients

Includes those running within VMware Fusion and Parallels, with system state preservation and backup of open files.
