Why should I use Visual Indicators and Pilot Devices?

Visual indication is a key element in the design and implementation of machine safeguarding solutions. Color choice and arrangement is described in various North American standards including ANSI, CSA and OSHA 1910. Visual indication also fulfills the requirements of the third level of the "Hierarchy of Safeguarding Controls".

Most Effective  Least Effective	1 Elimination or Substitution	<ul style="list-style-type: none"> • Eliminate human interaction in the process • Eliminate pinch points (increase clearance) • Automated material handling
	2 Engineering Controls <i>(Safeguarding Technology)</i>	<ul style="list-style-type: none"> • Mechanical hard stops • Presence sensing devices • Two-hand controls • Barriers • Interlocks
	3 Awareness Means	<ul style="list-style-type: none"> • Lights, beacons and strobes • Computer warnings • Restricted space painted on floor • Signs • Beepers • Horns • Labels
	4 Training and Procedures <i>(Administrative Controls)</i>	<ul style="list-style-type: none"> • Safe job procedures • Safety equipment inspections • Training • Lockout
	5 Personal Protective Equipment	<ul style="list-style-type: none"> • Safety glasses • Face shields • Ear plugs • Gloves

Illuminate Modular Visual Stack Light Indicators

Ultra bright LEDs and an accurate illumination system for each unit guarantees high visibility. By means of a simple manual operation, the bayonet fixing system makes it possible to combine up to seven signal units and simultaneously connect them electrically.

Illuminate 70mm stack lights are available in red, yellow, green, blue and white with either LED or incandescent AC or DC elements.

Applications

Visual indication to show different conditions for machine safe guarding solutions.

Features

- Simple manual bayonet system makes it possible to connect up to seven signal units both electrically and mechanically with one easy action
- Ultra bright LEDs or incandescent AC or DC elements
- Low current consumption
- Long duration
- High protection class (IP64) — if correctly assembled with cap and gasket — according to EN 60068-2-6
- Can be used as a single multicolor lamp or as an alternative to the traditional three color units with no changes in the electric installation required
- Resistant to vibrations

Regulations and Standards

Illuminate is designed and approved in accordance with appropriate standards. Examples of such are: EN 60947.5.1, EN 60073, EN 60529, EN 60068-2-6, EN 457, EN 981 and IEC 536.

Approvals

Illuminate Technical Data

Manufacturer..... JOKAB SAFETY
Ordering Data/Article Numbers..... see page 14:7

Color..... black
Fittings..... black
Light Units..... red, yellow, green, blue, white

Material

Visual Module, Cable Unit,
 Cap and Base..... polycarbonate
 Tube..... anodized aluminum or polycarbonate

Operating Temperature..... -20°C to +50°C
 (12 V 40°C)

Voltage..... 250 V max

Resistance to Vibrations..... 2 g min (10 - 150 Hz)
 (according to EN 60068-2-6)

Bulb..... bayonet connection type BA 15d - 5W max

Number of Combinable Units..... each cable unit can be combined
 with up to seven modular units
 (for all indicators)

Connections..... screw clamps with binding post
 (max gauge 1.5mm²)

Connection ID Code

C..... common to all signal units
 Numbers 1 to 7..... each single module from
 the base to the top

Compliance

Low Voltage..... EEC regulation 2006/95
 Electromagnetic Compatibility..... EEC regulation 89/336

Protection Class..... IP 64
 (according to EN 60529 if correctly
 assembled with cap and gasket)

LED and Filament Replacement Bulbs

LED Bulb BA 15d

Ordering Data
Article Numbers..... see page 14:8

Current Consumption

24VDC..... 50mA
 115VAC..... 18mA

Colors..... red, yellow, green, blue, white

Duration..... over 25,000 rated
 working hours

Maintenance

or Service Costs..... none

Resistance to

Impact/Vibrations..... excellent

Filament Bulb BA 15d

Ordering Data
Article Numbers..... see page 14:8

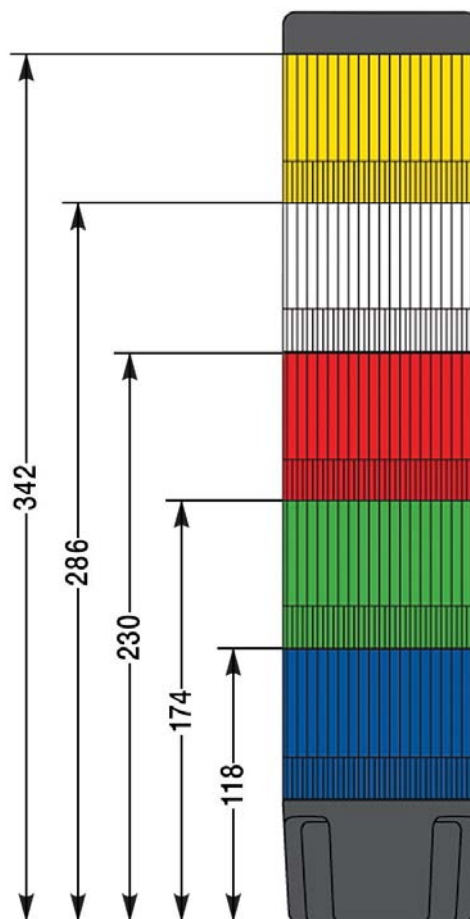

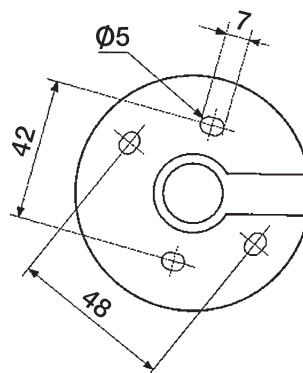

Current Consumption

24V..... 5W
 130VAC..... 5W

Duration..... over 2,000 rated
 working hours

Resistance to

Impact/Vibrations..... excellent

Simple manual bayonet system makes
 it possible to connect up to seven signal
 units both electrically and mechanically
 with one easy action.

Illuminate Steady Light Unit

Ordering Data
Article Numbers.....see page 14:7
Illumination..... LED or filament bulb
Bulb Type.....BA 15d - max 5 W
(with bayonet connection)
Current Consumption
With LED Bulbs..... 24 V < 50 mA
 115 V < 18 mA
 240 V < 17 mA
With 5 W Filament Bulbs..... 24 V < 210 mA
 115 V 43 mA
 240 V 22 mA
Voltage.....12 V to 240 V DC/AC
Color..... red, yellow, green, blue, white
(blue shown at right)

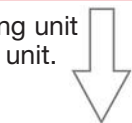

Illuminate Wiring Unit

Ordering Data
Article Numbers.....see page 14:8
Connections.....screw clamps with binding post
Max Gauge.....1.5mm²
Connection ID Code
C.....common to all signal units
Numbers 1 to 7.....each single module from
the base to the top

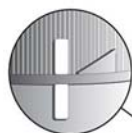

Illuminate Modular Assembly

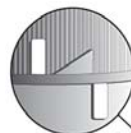

Place signalling unit onto terminal unit.

Align reference marks.

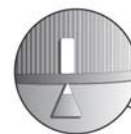

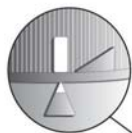

Then twist clockwise until they click locked.

Follow the same steps as above to add more signalling units.

On the last unit mount the cap.

To fix the extension tube, insert it into the relevant hole and tighten the screw on the side.

To make the connections, reach the terminal board by prying the black disc.

Connect to terminals.

Colored units are numbered from base to top.

Place the terminal board back into position by aligning the reference marks and pressing inward.

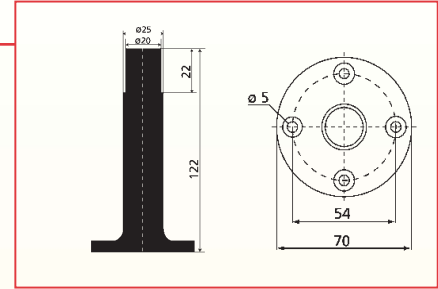

Illuminate Mounting Fittings

Designation..... Mounting Base with Integrated Tube

Ordering Data

Article Numbers..... see page 14:8

Material..... black polycarbonate

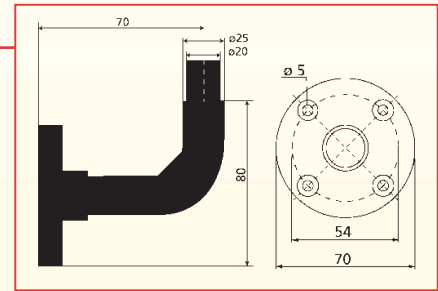

Designation..... Mounting Base with 90° Tube

Ordering Data

Article Numbers..... see page 14:8

Material..... black polycarbonate

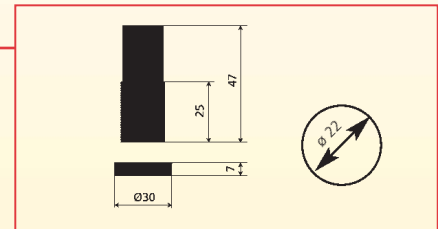

Designation..... Panel Mount Adapter

Ordering Data

Article Numbers..... see page 14:8

Material..... black polycarbonate

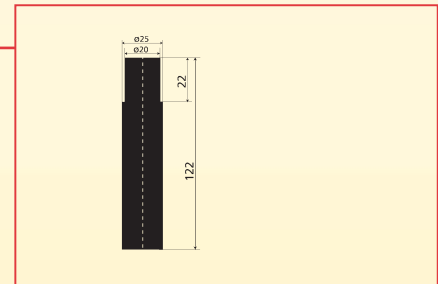

Designation..... Extension Tube

Ordering Data

Article Numbers..... see page 14:8

Material..... black polycarbonate

Component List - Illuminate

Designation	Article Number	Description
Steady Light Unit - Red	50-019-02	70mm permanent IP64 polycarbonate bayonet style stack light, w/o bulb.
Steady Light Unit - Yellow	50-019-03	70mm permanent IP64 polycarbonate bayonet style stack light, w/o bulb.
Steady Light Unit - Green	50-019-04	70mm permanent IP64 polycarbonate bayonet style stack light, w/o bulb.
Steady Light Unit - Blue	50-019-05	70mm permanent IP64 polycarbonate bayonet style stack light, w/o bulb.
Steady Light Unit - White	50-019-06	70mm permanent IP64 polycarbonate bayonet style stack light, w/o bulb.

Component List - Illuminate

Designation	Article Number	Description
LED Bulb - Red	50-019-07	24VDC BA15d for 70mm stack light. Over 25,000 rated working hours, 50mA current consumption.
LED Bulb - Yellow	50-019-08	24VDC BA15d for 70mm stack light. Over 25,000 rated working hours, 50mA current consumption.
LED Bulb - Green	50-019-09	24VDC BA15d for 70mm stack light. Over 25,000 rated working hours, 50mA current consumption.
LED Bulb - Blue	50-019-10	24VDC BA15d for 70mm stack light. Over 25,000 rated working hours, 50mA current consumption.
LED Bulb - White	50-019-11	24VDC BA15d for 70mm stack light. Over 25,000 rated working hours, 50mA current consumption.
LED Bulb - Red	50-019-12	115VAC BA15d for 70mm stack light. Over 25,000 rated working hours, 18mA current consumption.
LED Bulb - Yellow	50-019-13	115VAC BA15d for 70mm stack light. Over 25,000 rated working hours, 18mA current consumption.
LED Bulb - Green	50-019-14	115VAC BA15d for 70mm stack light. Over 25,000 rated working hours, 18mA current consumption.
LED Bulb - Blue	50-019-15	115VAC BA15d for 70mm stack light. Over 25,000 rated working hours, 18mA current consumption.
LED Bulb - White	50-019-16	115VAC BA15d for 70mm stack light. Over 25,000 rated working hours, 18mA current consumption.
Filament Bulb	50-019-17	24V/5W BA15d for 70mm stack light. 2,000 rated working hours.
Filament Bulb	50-019-18	130VAC/5W BA15d for 70mm stack light. 2,000 rated working hours.
Wiring Terminal with Top Cover Seal	50-019-19	Base unit for 70mm stack light, with Top Cover Seal 7 screw clamp terminals with binding post for power and 1 for common. IP64, black.
Mounting Base with Integrated Tube	50-019-20	Mount with 100mm pole for 70mm stack light. Black polycarbonate, 4 fixing screw holes.
Mounting Base with 90° Tube	50-019-21	Mount with 90 degree pole for 70mm stack light. Black polycarbonate, 4 fixing screw holes.
Panel Mount Adapter	50-019-22	Panel mount pole for 70mm stack light. Black polycarbonate for 22mm holes.
Extension Tube	50-019-65	100mm extension tube for 70mm stack light. Black polycarbonate.
