## KIMTECH PURE\* A5 Sterile Cleanroom Apparel

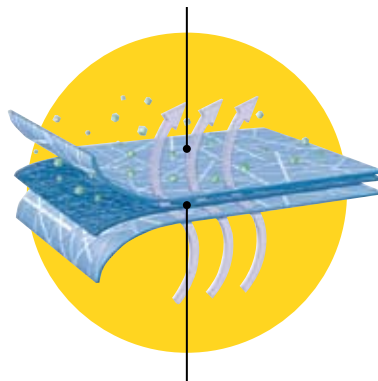

### CLEAN-DON\* Technology Lives Up To Its Name:

KIMTECH PURE\* Apparel with CLEAN-DON\* Technology is actually a number of new technologies and benefits that facilitate sterile gowning.

### Going green?

Garment Recovery Systems provide a convenient pickup/recycle solution for your used KIMTECH\* Garments.

**KIMTECH PURE\* Apparel SMS Fabric**  
 Outer Layers – Cloth-like, yet tough and abrasion-resistant spunbond polypropylene

**Middle Layers** – Intricate web of microfibers that filter out many water-based liquids and dry particulates

**Patent-Pending Highly Visible Blue Line** along the inside of the garment signals the proper place to grasp while gowning, helping workers avoid touching the outside of the garment.

**Patent-Pending Snap Technology** features built-in snaps that gather up legs and arms to lower the risk of touching the floor, then automatically release as garment is put on.

**Cloth-Like Comfort** is delivered by the SMS (Spunbond Meltblown Spunbond) material that goes into the KIMTECH PURE\* A5 Coverall.

**Innovative Inside-Out Fold** pattern presents the inside of the garment as the package is opened, reducing the risk of touching and contaminating the outside of the apparel.

## Protective Gloves

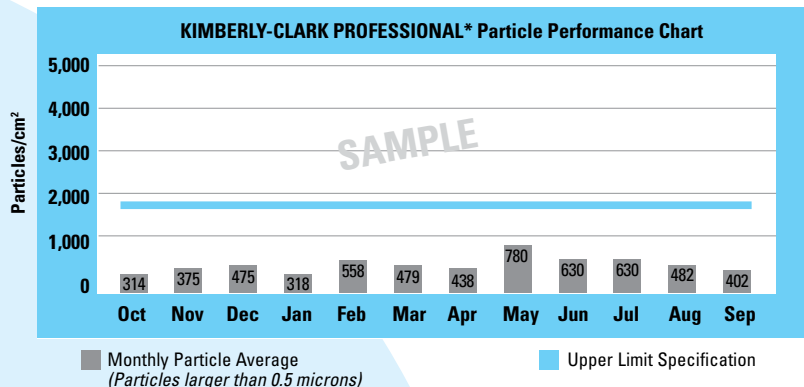

### Gloves that protect you and your work

Since scientific work is performed by hand, the right glove is often the most critical element in worker and process protection.

Whether you need hand protection for a delicate lab procedure or for an ISO Class 3 cleanroom, our outstanding glove line provides the consistent level of quality you demand.

### The Importance of Trend & Technical Data<sup>††</sup>

- Demonstrate consistent product quality over time
- Trend data indicating particle counts and extractable levels are available for KIMTECH PURE<sup>\*</sup> G3 (nonsterile) Latex and Nitrile Gloves

Example based on historical Critical Nitrile Data

### KIMTECH PURE<sup>\*</sup> Glove Product Advantages

**AQL**

#### Acceptable Quality Level (AQL)

- Refers to the probability of having defective gloves within a lot
- The lower the AQL number, the lower the probability of defective gloves
- KIMTECH PURE<sup>\*</sup> Gloves exceed ASTM standards for freedom from pinholes and critical defects (ASTM = AQL 2.5; KIMTECH PURE<sup>\*</sup> Gloves = AQL 1.5).
- A low AQL for pinholes is important – the lower the number of pinholes, the greater the level of barrier protection
