

KINETROL

Rotary Actuators

■ Single moving part

Simplest and most reliable mechanism for quarter-turn rotary actuation.

■ Close couple control modules

Fail-safe spring returns, limit switches, positioners and solenoid valves all close couple to the actuators.

■ No cranks or gearing

No power loss or backlash - allows accurate positioning.

■ Durable corrosion resistant finish

■ Long maintenance-free life

Up to 4 million operations guaranteed.

■ Compact - space saving - efficient

Best torque/size package available, fast operating speeds, best air consumption, proven design.

■ Millions of units

put into trouble free service all over the world.

■ Choice of male or female output drive square - easy to interface to application

■ Unique serial number for identification and traceability

Applications

Operation or positioning of ball, butterfly and plug valves, ventilation dampers and automatic doors. Uses also include movement and positioning of components during manufacture - in fact anything that needs to be turned through 90° or less, automatically or by remote control.

Certificate No. FM22163

Kinetrol's rigorous quality program is approved to ISO 9001 ensuring that each unit is manufactured to the highest standards.

For ordering codes see page 57
For catalogue index see page 58

The policy of KINETROL is one of continuous improvement. We reserve the right to alter the product as described and illustrated without notice.

Kinetrol modular concept easily provides the control assembly needed

1. Visual Indicator

Gives visual indication of valve position as standard except models 0M0, 01, 16, 18, 20 and 30.

2. Clear Cone Monitor

Gives 360° and overhead position indication. Available on actuator models 03, 05, 07, 08, 09, 10, 12, 14, limit switch boxes, AP positioners, EL positioners, P3 positioners and EHD models (details page 18).

3. I/P Controller

4-20mA electrical signal controls main air supply to pneumatic positioner as alternative to air signal control (details page 17).

4. AP Positioner

3-15psi (0.2-1 bar) air signal controls main air supply to turn, stop or hold the actuator vane in proportional response to that air signal. Limit switch and angle retransmit options available (details pages 15/16).

5. EL Electropneumatic Positioner

A single unit gives smooth accurate control in response to a 4-20mA signal. Limit switch and angle retransmit options in same housing (details pages 13/14).

6. P3 On/Off Positioner

Modulation and/or two endstop positions and a mid-range setpoint anywhere within the 90° span. Easy setpoint adjustment and integral position feedback options (details page 19/20).

7. Explosion Proof P3 On/Off Positioner

Provides the same basic options as the P3 Positioner but in a flame proof enclosure with ATEX approval (details page 21).

8. Universal Limit Switch Box

Weather tight unit with up to 4 switches for remote position indication or control use. Optional switches for flame proof/explosion proof needs and high visibility Clear Cone monitor (details pages 7/8).

9. Explosion Proof Limit Switch Box

Provides the same basic options as the Universal Limit Switch Box but in flame proof enclosure with ATEX, FM and IEC approvals (details page 9/10).

10. Solenoid

Optional integral pneumatic solenoid valve for actuators. Various electrical, environmental and explosion proof requirements covered (details page 18).

11. Actuator

15 sizes covering torque range 0.5 Nm (5 lbf in) to 19140 Nm (168,000 lbf in). Operating air pressure range 1.4 bar (20 psi) to 7 bar (100 psi). Adjustable stops standard. Restricted travel stops and DIN/ISO versions available (details pages 27 to 41).

12. 180° Converter

Compact units give constant torque output through up to 200° travel (details pages 23/24).

13. Fail-Safe Spring Return Units

Clock type spring return gives reliable fail-safe operation with high torque output throughout spring stroke, yet has easy adjustment to suit application (details pages 3-5).

14. Spring To Centre

Patented spring unit to provide accurate adjustable port travel position on loss of air/signal (details page 22).

15. ISO Adaptor

The patented ISO adaptor provides easy conversion from a Kinetrol male drive to an ISO flange interface for ultimate mounting flexibility (details page 6).

16. Gearbox

Geared manual override on all models from 05 to 16 inclusive (details page 44).

17. Mounting Bracket

A comprehensive range of brackets provides for most ball, plug and butterfly valves (details page 43).

Kinetrol Actuators, Springs and Accessories are approved up to ATEX Category 1.

Spring housing cut away

The diagram shows the torque requirement of a typical ball valve under normal conditions. The typical torque output characteristics of Kinetrol and Rack and Pinion actuators, both sized to overcome the valve's breakout torque, are also illustrated. The diagram demonstrates that the Kinetrol actuator will exceed the torque requirement of the valve throughout the entire stroke whilst the rack and pinion unit will fail to reseal the valve.

The higher torque losses associated with the rack and pinion actuators (torque loss can be as high as 70%) dictate the selection of larger units to ensure complete reseating.

- **Lowest Torque Loss**
Typically 20% through 90° yields extra torque through spring stroke - enables the selection of smaller actuators (see diagram)
- **Reliable low stress range clock type spring**
- **Separate housing for modular assembly easily retrofitted**
- **Sealed, non-breathing housing**
Protects spring in corrosive environments
- **Adjustable pretension for 'balanced' air and spring stroke torques**
Various combinations available for balanced / optimised torques at various air pressures
- **Keeper plates available to ensure safe handling of pretensioned springs**
- **Available with ISO/DIN female drive and mounting for models 03-20**
- **Springs guaranteed against failure for lifetime of actuator**
- **ATEX Category 1 approved for many models**
Category 2 for other models

APPROVED

Direction of Spring Action

Spring units are available for either clockwise or counter clockwise spring action. Spring units are mounted as standard between the actuator and what it drives. With spring units alone, direction is determined by looking at the unit from the end which interfaces with the actuator.

Suffix - 020 = clockwise
Suffix - 030 = counter clockwise

The direction of actuator/spring assemblies are determined by looking at whole assembly from the non-output end.

Asymmetrical Torque Applications

If high torque is required in one direction and lower torque in the other direction this can be set up easily by changing spring pretension to be higher or lower as required. Air stroke torque will always be double-acting torque (at air pressures available) less spring pretension torque.

Low Air Pressure Applications

If air pressure available for actuator operation is less than 50psi (3.5 bar) 'balanced' torque output on air and spring strokes is still possible by using a spring return unit from a smaller actuator size. Listed below are factory assembled options of this kind.

Replace the '*' used in ordering codes below with a '2' (clockwise) or '3' (counter clockwise) depending on direction of spring action required.

See pages 55 & 56 for full torque details and pages 49 & 50 for dimensions of all models, except where models marked with "+", are only available with spring above actuator (see TD121).

Ordering Code	Description
03-1*0-5600	03 actuator with one 02 spring unit +
07-1*0-4000	07 actuator with one 05 spring unit +
08-1*0-4100	08 actuator with one 07 spring unit +
09-1*0-4200	09 actuator with one 07 spring unit +
10-1*0-5800	10 actuator with one 09 spring unit +
12-1*0-4300	12 actuator with one 09 spring unit +
12-1*0-4400	12 actuator with two 09 spring units +
14-1*0-4900	14 actuator with two 12 spring units
14-1*0-5000	14 actuator with one 12 spring unit
16-1*0-6000	16 actuator with one 14 spring unit and one 12 spring unit +
16-1*0-6100	16 actuator with one 14 spring unit
18-1*0-7000	18 actuator with one 16 spring unit
20-1*0-7200	20 actuator with two 16 spring units
20-1*0-7300	20 actuator with three 16 spring units
30-1*0-7600	30 actuator with three 16 spring units
30-1*0-7700	30 actuator with four 16 spring units
30-1*0-7800	30 actuator with five 16 spring units

Pretension Setting

Factory assembled actuator/spring return assemblies have the spring pretension set for 'balanced' torque output when the actuator is operated by air at 80psi (5.5bar).

Factory assemblies can be preset for different air pressures below 80psi (5.5 bar) on request.

Spring return units supplied separate from actuators are also pretensioned for 80psi (5.5 bar) air operation unless otherwise stated.

Keeper Plates

These are provided on all pretensioned spring return units supplied separate from actuators. They are also available as spare parts. Refer to TD121 for part numbers.

A keeper plate must always be used to restrain spring tension whenever a spring unit case is removed from the actuator.

Materials Specifications

Spring Casing	Models 01-07 pressure die-cast in ZL 16 zinc alloy. Models 08, 09, 10, 12, 14, 16, 18, 20 & 30 aluminium alloy.
Finish	Epoxy stove enamel.
Spring	Clock type spring steel.
Square	Steel, zinc plated.
Mount Holes (output end)	Same as matching actuator (except model 01), low pressure combinations & ISO drive versions. See page 49/50 & TD121.

- Simple, elegant direct-mount interface for most valves
- Multiple ISO mounting flange hole drillings for each model
- Large ISO/DIN compatible 'star' drive for most models
- Valve leak tell-tale/relief slots in mounting face
- Female serrated insert drive options available for maximum direct mount flexibility on some models
- Keeper plates available to ensure safe handling
- Same reliable, long-life, fully sealed spring unit as on male-drive units
- Allows accessories to be direct mounted to top of actuator (e.g positioner)

Torques are identical to standard and low pressure spring torques given on pages 55 & 56.

Directions of spring action are as described on page 4. Female drive spring units are always designed to be mounted between the actuator and the application. Consequently, a female spring designated 'clockwise' as a separate module will, when mounted below an actuator, result in a 'clockwise' assembly. Female drive springs are not designed to interface directly with modular switch boxes, positioners etc.

ISO/DIN 'Star' Drives

Female bi-square (star) drive spring fail-safe units are available for models 03 to 20.

Star drive units are specified by adding a 'F' to the DIN/ISO code:

e.g. for a standard model 07 actuator with a female star drive, a regular 074-120 code becomes 073F120.

See page 50 for full dimensions.

Serrated Drives

Female serrated drive spring fail-safe units are available for models 05, 07, 08, 09 & 10 to give maximum mounting flexibility. Features include:

- Can accommodate large diameter valve stems
- Deep hole in shaft for long valve stems
- Precision stainless steel inserts
- Common internal drive shapes available
- Same spring can be used with different valve type/sizes
- 48 teeth allow many different orientations

Serrated drive units are (excluding couplings) specified by adding an 'S' to the ISO/DIN code:

e.g. for a standard model 07 actuator with a serrated female drive, a regular 074-120 code becomes 073S120.

See TD141 for full dimensions of the serrated drive springs and associated couplings.

A range of blank and internally profiled serrated stainless steel couplings are available (see TD141 for codes).

Coding of Alternative Flange Drillings

Some female spring fail-safe star and serrated drive models are available with alternative ISO mounting hole patterns (see page 50 and TD141). The digits '8' and '9' are used to designate clockwise and anti-clockwise versions respectively:

e.g. clockwise code 053F180 specifies the F04 flange alternative of the 053F120 which specifies the clockwise F03/05/07 version.

Ultimate Mounting Flexibility

- Low cost direct mount flange and coupling for mounting to valves with ISO 5211 drive interfaces, available for actuator models 02, 03, 05, 07, 08 and 09
- Mounting directly to standard Kinetrol double acting actuator thereby reducing stocking requirements
- Multiple mounting hole sets in one part
- **International patents.** The novel design allows metric mounting screws to face in either direction. Valve flanges with tapped holes can easily be interfaced for the first time. Nut recesses in flange make for easy installation
- **Robust epoxy coated zinc alloy adaptor with no threads for maximum corrosion resistance**
- **Female drive bi-square (star) coupling is retained by adaptor and made from zinc plated steel** (other materials available on request)
- **Serrated drive versions also available.**

** Default 03 version

Offers a wide range of signalling options in a zinc alloy fully enclosed corrosion resistant case available for direct mounting onto Kinetrol rotary actuators, or discrete mounting via an industry standard VDI/VDE interface onto any make of rotary actuator. Easy to wire and set up with real industrial quality robustness. Internally fitted options include AS Interface digital communication and a 4-20mA 2-wire modulating angle retransmit circuit.

The range of switch and terminal arrangements includes 2 or 4 switches, extra connections allowing single point termination of wiring for limit switches and solenoid valves, ATEX approved Eexed (Category 2) explosion proof and Eexia intrinsically safe packages (Category 1). Integral sealed Clear Cone Monitor and red/green LED indicator options also give excellent external visual indication of position.

See KF487 for full details.

Specification

Casing

- All units sealed to IP65/NEMA 4X IP67 options available.
- Robust corrosion resistant epoxy painted diecast zinc alloy box
- Easy and accurate setting of switch position
- Available for direct mounting to Kinetrol models 03 to 14, for minimum height
- Quick access - No special tools required
- Discrete VDI/VDE (NAMUR) interface option for use with industry standard actuators
- Two or four cable entries as standard to allow back wiring of solenoid valves
- Many switch options available for general and hazardous areas
- AS Interface bus circuit option inside box reads up to 4 switch inputs, drives up to 2 solenoids powered by bus only (see pages 11 & 12)
- Optional Clear Cone monitor available
- Integral LED indicator lamps and angle retransmit circuit options are available
- Compact SPST version of type 004 available for model 02 actuator

LOAD RATINGS FOR STANDARD MICROSWITCHES (type 004)

Voltage	Resistive Load
125 V AC	15A
250 V AC	15A
up to 12 V DC	15A
up to 24 V DC	10A
up to 48 V DC	3A
up to 250 V DC	0.25A

MULTIPLICATION FACTORS FOR NON-RESISTIVE LOADS

Steady state tungsten lamp load - x 0.1
Steady state inductive load - x 0.2
Peak inductive load - x 1.0

Switch Type 001

2 intrinsically safe 2 wire inductive proximity sensors for hazardous areas (ATEX CAT 1), -20° to 80°C, normally closed.
Ambient temperature range -20°C to +80°C

Switch Type 002

2 pneumatic switches with G1/8 THREADS (ATEX CAT 2).
Ambient temperature range -20°C to +80°C

Switch Type 003

Certificated unit to EEx ed II T6 for hazardous areas to Zone 1 (ATEX CAT 2) 2 x 3 wire switches for SPDT.
Ambient temperature range -20°C to +70°C

Switch Type 004

With 2 x 3 wire microswitches for SPDT.
Ambient temperature range -40°C to +80°C

Switch Type 005

2 x 2 wire proximity sensors 20-260 volts AC, normally open.
Ambient temperature range -25°C to +70°C

Switch Type 006

2 x 2 wire proximity sensors 5-60 volts DC, normally open, with LED switch status indicators.
Ambient temperature range -20°C to +80°C

Switch Type 007

With 4 microswitches wired for DPDT.
Ambient temperature range -40°C to +80°C

Switch Type 008

With 2 intrinsically safe 2 wire slotted proximity sensors, normally open.
Ambient temperature range -20°C to +80°C

Switch Type 009

2 x 3 wire gold plated contacts intrinsically safe microswitches for SPDT (ATEX CAT 1).
Ambient temperature range -20°C to +80°C

Switch Type 00E

2 x 2 wire proximity sensors 20-140 volts AC / 10-140 volts DC.
Ambient temperature range -25°C to +80°C

Switch Type 00N

2 x 3 wire proximity sensors 10-30 volts DC, normally open.
Ambient temperature range -20°C to +70°C

Option B - E

AS interface options are available with both the two and four entry Kinetrol Universal limit switch boxes. Options B to E allow for different extended addressing options. For more information on the Kinetrol AS interface card see page 11 & 12.

Option P

Two or four way Universal limit switch box fitted with potentiometer (20K ohms conductive plastic type).

Option R

Two or four entry Universal limit switch fitted with angle retransmit, loop powered two wire circuit passes 4-20mA current, proportional to 0-90° position of actuator.

Option U

Two or four entry Universal limit switch box without AS interface card, Angle Retransmit or Potentiometer.

EXAMPLES:
054 - 001U001000 = 05 ULS BOX WITH 2 X V3 I-SAFE PROXIMITY SENSORS, 2 TRANSIT PLUGS & 2 X 3 WAY TERMINALS. ATEX APPROVED
054 - 001R011000 = 05 ULS BOX WITH 2 X V3 I-SAFE PROXIMITY SENSORS, 2 TRANSIT PLUGS & 2 X 3 WAY TERMINALS. AR CW NOT APPROVED
074 - 004R022000 = 07 ULS BOX WITH 2 X V3 SPDT SWITCHES + 1 TRANSIT & 1 BLANKING PLUG & ANGLE RETRANSMIT ACW NOT APPROVED
074 - 004U001200 = 07 ULS BOX WITH 2 X V3 SPDT SWITCHES + 2 TRANSIT PLUGS + LED'S RED / GREEN 12 / 24 V dc NOT APPROVED
074 - 009C001000 = 07 ULS BOX WITH 2 X V3 I-SAFE MECH.SWITCHES G / PLATED, ASI WITH EXTENDED ADDRESSING OUTPUTS DISABLED + 2 TRANSIT PLUGS NOT APPROVED
094 - 124B00A00M = 09 SPRING RETURN ACTUATOR & ULS BOX WITH 2 X V3 SPDT SWITCHES + STANDARD ASI & ASI TERMINALS + M12 PLUG + TRANSIT PLUG + CLEAR CONE MONITOR NOT APPROVED
074 - 009B001300 = 07 ULS BOX WITH 2 X V3 I-SAFE MECH.SWITCHES G / PLATED, STANDARD ASI + 2 TRANSIT PLUGS & ASI TERMINALS + 2 LED'S RED & GREEN NOT APPROVED

Further switch options are available upon request -contact Kinetrol for details

For more information see KF-487

The Explosion Proof Limit Switch Box offers a wide range of signalling options in a compact corrosion resistant aluminium alloy housing available for close - mounting onto Kinetrol actuators or discrete mounting via a Kinetrol 05 square or industry standard VDI/VDE interface onto any make of rotary actuator. Easy to wire and set up with true industrial robustness.

Internally fitted options include AS interface digital communication and a 4-20mA, 2-wire, modulating angle retransmit circuit. The range of switches and terminal arrangements includes 2 or 4 switches and extra connections - allowing single point termination of wiring for limit switches and solenoid valves. This product is available to mount on Kinetrol models 03 - 30.

- Wide range of worldwide explosion proof approvals including IECEX, ATEX & FM (for USA & Canada) - all in one device
- All units protected to IP66 / NEMA 4X / TYPE 4X
- Attractive, functional and part-spherical profile. Robust corrosion resistant, anodised & epoxy painted diecast aluminium alloy housing
- Close - mount to Kinetrol actuator models 03 - 14 for low profile
- Discrete Kinetrol 05 square drive insert for use with Kinetrol actuator models 16 - 30
- Discrete NAMUR drive for use with VDI/VDE 3845 drive actuators
- 2 or 4 cable entries available to allow back wiring of solenoid valves
- Up to 4 switches available for SPDT, DPDT or multiple circuit operation
- Easy and accurate setting of switching position
- Optional antistatic Clear Cone Monitor available
- Integral angle retransmit circuit options are available
- Integral AS interface bus circuit option reads up to 4 switch inputs and drives up to 2 bus powered solenoids
- -40° C to +80° C ambient operating temperatures (dependent on switch options)
- 3-stop positioner options available (refer to page 21 for details)

Switching Operation Conditions

Switch Code	Voltage AC DC	Current	Temperature Range
1/A	— 8	6mA	-20°C to +80°C
4/7	250 48	2.4A AC/1.8A DC	-40°C to +80°C
5/B	250 300	100mA	-25°C to +70°C
6/C	— 60	100mA	-20°C to +80°C
9/D	— 30	100mA	-40°C to +80°C
E/F	140 140	200mA	-20°C to +80°C

AS Interface Bus

The AS interface card allows easy digital serial communication for your sensors and actuators, allowing your actuators to be controlled and monitored when they are in the field, via a single 2 wire cable.

Actuator Sensor interface devices are used to make up control systems based on a two-wire communication cable known as a bus, and can be controlled or monitored by means of a digital signal sent via the bus to and from a "master" device (which can be a computer or a PLC).

The slave devices will always function in response to commands sent by the master device, either to actuate or to return a message reporting the value of a sensed variable, or both. The AS Interface specification allows 31 or fewer slave devices to be powered by a DC voltage fed into the same two wire cable used as the communication bus, with allowed power consumption adequate to drive the slave plus a standard pneumatic solenoid valve.

An AS Interface bus can be used as the final field link in a more complex hierarchy of devices making up a large plant-wide control system. Actuators and sensors must often be installed in unprotected environments where conditions can be demanding; the AS Interface bus can be used as the link between these field devices and the "indoor" equipment making up the upper part of the control system.

The AS Interface bus is designed for on/off control and monitoring and is a good choice when a simple, economical, reliable and robust solution is required for controlling and monitoring a series of actuators and sensors in a process control or machine application.

The Kinetrol AS Interface Card

The Kinetrol Actuator Sensor Interface card is fitted inside the Kinetrol Universal Limit Switch box, thus combining the industrial quality robustness of the box with the advantages of digital serial communication.

The AS interface bus cable can be routed in through the conduit entries and connected at internal terminal blocks or alternatively an M12 connector plug facing outwards from the conduit entry can be supplied to allow quick connection from M12 sockets or with clip on adaptations for ribbon type yellow AS interface cables.

AS Interface Card Features

- **AS interface 2.1 compatibility**
- **Up to 31 units with solenoid valve on-off control, powered and controlled via one two core cable**
- **Up to 62 units** (using extended addressing)
- **All metal robust industrial-quality limit switch box, direct mounted on a Kinetrol actuator**
- **2 on/off outputs per unit**
- **4 on/off inputs per unit**
- **Reads mechanical switches or inductive sensors**
- **Retrofittable to standard Kinetrol Universal Limit Switch Box**
- **Can also be supplied in an explosion proof housing and with European, North American and World approvals**
- **LED external indicator option**
- **Up to 31 24V 2.5W solenoid valves can be connected to bus with no separate power supply**
- **M12 connector plug option available for instant bus connection**
- **Cable clamping connector block for yellow ribbon-type AS interface cable available with M12 socket to fit onto plug option**
- **Output short circuit protection built in**

AS Interface 2.1 Specification

- Master - Slave protocol
- Up to 31 Slaves per master
- Each slave has its own unique address (set by user)
- All slaves can be scanned every 5 milliseconds
- Baud Rate - 197 Kbits/second
- Slaves may be added anywhere in the bus
- Slaves may be parallel connected on the bus, using star or spur configurations
- Up to 124 inputs per bus
- Up to 124 outputs per bus, 62 using the Kinetrol device
- 26.5 to 31.5 Vdc, 8 A max power supply
- 100 m (325ft) maximum cable length (repeaters may extend network distance)
- Untwisted, unshielded, 2-wire (1.5mm²) cable can be used

AS Interface Extended Addressing

Kinetrol's AS Interface circuit is a slave device to allow 32 devices (usually 31 slaves plus an AS Interface master device) to be powered and controlled via a 2-wire bus cable, with full capability to energise one solenoid on every unit all at the same time. This is the standard (Option code B).

The AS Interface 2.1 specification also allows for an extended address option, whereby 62 addresses can be connected and powered via one bus cable. The specified limits on device capacitance however, mean that if the full extended-address compliment of slaves all had standard solenoid valves connected, the bus limit would be exceeded.

Kinetrol offer these options to allow use of extended addressing:

1. (Option Code C)

AS Interface circuit with extended addressing enabled and outputs disabled, to read limit switch sensors only. If a solenoid is connected it will not function.

2. (Option Code D)

AS Interface circuit with extended addressing and outputs enabled (one solenoid per interface card), plus added isolating relay option fitted to outputs, to allow up to 31 solenoids to be energised simultaneously even from the bus, though up to 60 slave units may be connected to the bus. This requires the user's control system to include a pre-programmed limit on the maximum number of solenoids to be energised. If the system instructs too many units to switch on solenoids, they will obey, and the bus capacitance limit will be exceeded – thus this option must be at the user's risk with regard to this issue.

3. (Option Code E)

AS Interface circuit with extended addressing and outputs enabled (one solenoid per interface card), plus added relay options fitted to outputs to allow solenoid valves to be powered by a supply separate from the AS Interface bus. This option requires a separate 24V DC power supply to each actuator, and allows up to 60 slave units to energise their solenoids simultaneously.

To order the Kinetrol AS Interface card refer to codes for Universal Limit Switch Box or Explosion Proof Limit Switch Box on pages 8 and 10.

For more information
see KF-496

Operation

The EL positioner uses a unique low power proportional servo valve to control the position of a quarter-turn actuator.

The microprocessor in the loop-powered 4-20mA position circuit reads the signal via one channel of a 12-bit A-D converter, reads the position voltage from the feedback potentiometer via the second channel of the A-D converter, and compares the two. If it detects a position which is different from that required by the signal, it changes the output to the servo valve in order to drive the actuator in the direction required to reach the correct position. As the actuator moves, the feedback potentiometer voltage changes and the microprocessor continually calculates the adjustments required for the servo valve in order to guide the actuator accurately into position. The microprocessor is programmed with a sophisticated but compact algorithm which allows this critical dynamic valve adjustment to be made correctly, which in turn gives optimal results with any actuator/load combination - slow or fast, low or high friction, low or high inertia. All can be optimised by tuning the PGAIN and DAMP push buttons via the positioner circuit push buttons.

The EL positioner controls airflow to an actuator and moves it to a position determined by a 4-20mA signal. It's features are:

- **Fast, smooth, and precise control from a digital circuit and proportional servo valve**
- **Simple time saving field set up**
Quick calibration via push buttons and LED feedback and easy reversal of rotation sense (clockwise/counter clockwise) without special tools or parts change.
- **Universal application**
The unit can be mounted in any orientation on to any quarter turn or linear application by connection via a NAMUR or Kinetrol square interface.
- **Loop powered**
No separate power needed, just 4-20mA signal plus air supply.
- **Integral options - easily retrofitted modules include:**
 - two wire 4-20mA isolated angle retransmit
 - mechanical or inductive position indicator switches (general or hazardous areas)
 - Clear Cone high visibility indicator
 - Threaded conduit entries or DIN plugs for external connection.
- **Intrinsically safe approved options**
- **Weatherproof, compact and robust metal housing**
- **Zero backlash coupling with easily adjustable switch strikers**
- **Vibration and shock resistant to 4G**
- **Built in gauge ports/external connections**

Simplified Functional Diagram of EL Positioner

Application

This EL positioner can be directly mounted on standard Kinetrol models 05, 07, 08, 09, 10, 12 and 14 actuators, both double acting and spring return, giving an assembly with no external plumbing, wiring or mechanical connections and the best backlash free control. Mount kits are available for models 16, 18, 20 and 30 actuators.

Alternatively, discrete versions mount on any actuator via VDI/VDE 3845 NAMUR drive, or Kinetrol male square, with mounting bracket. Special adaptations for linear cylinders are also available - consult Kinetrol for details.

The EL Positioner ATEX approval includes the fitting of a special version of the popular Clear Cone high visibility monitor.

For more information see KF-372

Operation

The AP Positioner is designed to drive a rotary or linear actuator to a position set by a 3-15 psi (0.2 to 1.0 bar) signal and hold it there until the signal changes. When a signal pressure is applied to the diaphragm it moves the force balance lever clockwise against the tension of the feedback spring. This moves the spool valve, supplying air pressure to one side of the actuator while exhausting trapped air from the other side. The feedback shaft follows the movement of the actuator and turns the cam counter clockwise, pushing the cam follower and increasing the tension on the feedback spring until it balances the forces on the diaphragm and moves the spool valve to its hold position.

The input signal and desired position is determined by the cam profile. A cam giving 0-90° output movement linearly proportional to a 3-15 psi (0.2-1.0 bar) signal is standard, and almost any desired characteristic can be supplied to order; if it cannot be found in the list of existing options contact Kinetrol.

Schematic Functional Diagram

The AP positioner moves an actuator to a position set by a 3-15psi control signal and holds it there. Its features are:

- **Fast, smooth, accurate response**
- **Simple, all-mechanical function for unbeatable reliability**
- **Three flow options to optimise control on all actuator sizes**
- **Universal application**
The unit can be mounted in any orientation on to any quarter-turn or linear application
- **Easy set up**
Quick calibration and reversal of rotational sense (clockwise and anti-clockwise) without special tools or parts change
- **ATEX CAT 1 approved versions available**
- **Easily retrofitted integral module options include:**
 - Two wire 4-20mA angle retransmit (inside the same case)
 - Mechanical or inductive limit switches (general or hazardous areas)
 - 4-20mA I/P convertors (general or hazardous areas)
 - Clear Cone visual position indicator (general or hazardous areas)
 - DIN plug option for retransmit connection
 - Low (-40°C) and high (100°C) temperature versions available
 - Fail hold options available
 - Choice of mount options - see opposite
- **Weatherproof, compact and robust metal housing**
- **Vibration and shock resistant to 4G**
- **Built in ports for signal air supply and gauge connections**

The AP positioner can be directly mounted on standard Kinetrol models 05, 07, 08, 09, 10, 12 and 14 actuators, both double acting and spring return, giving an assembly with no external plumbing, wiring or mechanical connections and the best in direct backlash free control. Mount kits are available for models 16, 18, 20 and 30.

Alternatively, discrete versions mount on any actuator using VDI/VDE 3845 NAMUR drive, or Kinetrol male square with mounting brackets. Neat adaptations for linear cylinders are also available - consult Kinetrol for details.

Specification

Air supply	instrument quality (dry, clean, oil free) 3.5 to 7 bar, (50 psi to 100 psi) standard. Consult Kinetrol for low pressure application

* 'A' Valve is supplied with all sizes up to and inc' 09
* 'M' Valve is supplied with 10-14
* 'H' Valve is supplied with sizes 16-30

* Not available with ATEX approval
UNLESS SPECIFICALLY REQUESTED OTHERWISE
Recommended spring unit for model 14 actuator is 4900 type. This should be coded 12□49AP or 13□49AP instead of the usual 12□AP or 13□AP. The same applies to other specially coded spring assemblies.

For more information see KF-391

The optional Kinetrol I/P Controller is mounted in place of the standard diaphragm housing on the side of the positioner case. The positioner can still be mounted in any attitude and gives an angular output position which is proportional to the input current control signal between 4-20mA.

The 4-20mA signal is converted to an air pressure by a coil and magnet and flapper valve arrangement. This air pressure controls the positioner in the normal way.

Zero and range adjustment is done within the positioner in the same way as with a standard pneumatic positioner. No adjustment is necessary within the I/P Controller. The cover is removed only to connect the two wires - this is not necessary with the DIN plug option.

I/P Controller - Hazardous Area

Kinetrol offers various optional I/P converters which are explosion proof or intrinsically safe certified for use in ATEX Zones 1 & 2 or NEC and CSA CLASS I DIVISION 1. They are mounted directly onto Kinetrol AP positioners with integral air supply.

Certificated as follows

ATEX (Cat 2)	Explosion proof EExd IIC T4/T5/T6 Intrinsically safe EEx ia IIC T4/T5/T6
NEC & CSA	FM explosion proof CL I/DIV1/GRP B C D FM Intrinsically safe CL I/DIV1/GRP A B C D E F G CSA explosion proof CL I/ DIV1/GRP B C G

Specification - Safe Area

Electrical Control Signal	4-20mA
Coil Impedance	20 ohms typical
Cable Entry	16mm conduit or gland (mini DIN plug, IP 65 with Pg9 cable gland, 6-8mm dia optional)
Air Supply	80 psi/5.5 bar nominal
Air Entry	G ¹ / ₈ (fitted with 6mm pipe dia. push in connector)
Weight	1.2Kg
Dimensions	see page 52
Linearity	1.5%*
Hysteresis	less than 1%*
Sensitivity/Deadband	less than 1%*
Supply Pressure Influence	0.2% per psi between 80 and 60 psi
Quiescent Air Consumption	3.5 l/min free air max
Working Temperature Range	-20°C to 80°C
Instrument quality dry clean air obligatory (Class 6.4.4 ISO8573.2001)	

* These refer to the combination of Kinetrol actuator with I/P controller - not just the positioner performance

Specification - Hazardous Area

Electrical control Signal	4-20mA
Input Resistance	260 ohms at 20°C
Cable entry	EExd - M20 x 1.5 conduit entry FM/CSA - 1/2 NPT conduit entry
Air Supply	80 psi/5.5 bar nominal
Air Entry	EExd (AP & MP) G ¹ / ₄ (1/4 NPT) (HP) G ³ / ₈ (3/8 NPT)
Supply Pressure Regulation	20-150 psi/1.4 to 10 bar
Working Temperature	-40°C to 85°C
Instrument quality dry clean air obligatory (Class 3.4.4 ISO 8573.1)	

Clear Cone Monitor

The optional Clear Cone provides all round high visibility position monitoring on all limit switch boxes and positioner models. A red/green colour coded monitor is sealed inside a robust, clear polycarbonate cover. Positioner models are marked with black printed legible angle scales.

The monitor is also available directly mounted onto actuator models 03, 05, 07, 08, 09 and 10, all EHD units and 12 & 14 using an adaptor plate.

For highly corrosive environments special cover materials are available - contact Kinetrol for details.

Conductive ATEX approved versions (to category 1) are also available - contact Kinetrol for details.

For dimensions see pages 51, 52, 53 & 54.

Solenoid Valves

As an option KINETROL actuator sizes 03 to 14 can be supplied with integral solenoid valves with NAMUR interface. Air is ported through the actuator body via an adaptor so no external tubing is necessary.

Standard optional solenoid valves can be converted to 5 or 3 port versions by changing valve body plate supplied with the valve.

Specification

Coil voltages	AC: 50/60Hz 110v AC, 240v AC and 24v DC For other voltages contact Kinetrol
Electrical connection	DIN 43650 plug with Pg9 cable gland (6-8mm dia) as standard
Manual Override	Extra to order
Exhaust silencers / flow regulators	Extra to order
Hazardous areas	Certified solenoids are available as extras to order
Environmental Protection	To IP65 as standard
Minimum air supply	2 bar

Single solenoid, 3 or 5 port, interchangeable for double acting or spring return, NAMUR interface. Most brands of NAMUR interface solenoid valve can be supplied to special order.

The P3 On/Off positioner consists of an electronic positioning circuit mounted in a robust all-metal enclosure, which controls a ¼-turn rotary pneumatic actuator via standard on-off solenoid valves direct-mounted on the actuator's own interface.

The P3 circuit is designed so that its assembly can be mounted inside a standard Kinetrol limit switch box (either ULS-type, or explosion proof XLS-type), using only two screws. The P3 assembly is complete with feedback potentiometer and anti-backlash gear drive, which engages with gear teeth on the limit switch coupling to read the actuator's position. The limit switch coupling complete with gear teeth needs to replace the standard coupling if a standard box is being retrofitted with a P3.

The positioner circuit is powered by the mid-point input voltage. It functions by comparing the actual mid-point position (read by the feedback potentiometer) with the set position (set via an on-board preset, or a remote preset, or a remote 4-20mA signal). The positioner circuit uses its solid-state switched outputs to power solenoid valves which drive the actuator towards the position where the set position corresponds with the actual position. When it gets there, the solenoids are switched to hold that position.

The positioner circuit incorporates a unique power supply allowing it to be powered by any of 24vDC, 48vDC, 115vAC or 230vAC, 50/60 Hz, without the need for any change. The supply maintains full isolation of the low voltage control circuit from the power input line (up to 5Kv). Switching of the solenoid valve outputs is achieved through opto-isolated solid state switches which operate at all the above voltages – only the solenoid coils themselves need to be adapted specifically to the supply voltage. The use of solid state switching avoids any limitations on relay contact life.

Double acting models are available as fail-free (standard), fail-down (moves clockwise or counter clockwise on loss of electrical power if air supply is still present) and fail-hold (holds position on loss of electrical and / or air supply) variants. Spring return models move in the direction of the spring on loss of electrical or air supply.

An optional angle retransmit (AR) circuit can be retrofitted by plugging it into the top of the positioner circuit and fixing with three screws. The AR circuit is a 2-wire loop-powered 4-20mA device, which reads the position of the positioner's feedback pot. It is fully functional whether or not the positioner circuit is powered, and the feedback signal is electronically isolated (ie. floating) relative to the low voltage positioner circuit (which in turn is electrically isolated from the power supply and solenoid connections).

Extra solid-state switches have been incorporated on the positioner board to allow supply to both solenoid valves via a single cable for movement to the upscale position when the positioner is in spring-return or fail-down mode, while still allowing the positioner to control the two valves independently for the mid position. If the mid-position input is energised, then these extra switches isolate the solenoids from the upscale/downscale inputs.

The three power input lines (for up, mid, down positions) are independently fused using plug-in miniature fuses on the positioner circuit board.

External connections are made via a multi-option connector board, which allows simultaneous connection of up to four changeover limit switches, three control supply inputs plus neutral/negative, and a single low-voltage signal. This connector board, like the positioner circuit assembly, mounts in either the standard ULS or XLS box using two screws.

If an angle retransmit circuit is fitted using the low voltage signal terminal, optional 4-20mA inputs or external setpoint pot wires can be connected either directly to the terminal block on the positioner circuit or, if only three or less limit switches are in use, relayed through an unused limit switch terminal on the connector board.

The limit switch box is fitted with a ground terminal which must be connected to a suitable external ground.

Industrial solenoid valves which permit the use of standard quality air supplies (instrument quality air is not necessary), are direct-mounted on adaptor blocks on the side of the actuator, and electrically connected via steel-armoured flying leads with DIN sockets on the solenoid end. At the positioner end, they connect to two 2-way terminal blocks on the circuit board. A range of solenoid valve options are available, determined by the function required, the supply voltage, and whether or not the unit requires hazardous area certification. Customer selection is via the order code.

- Robust modulating actuator control - tolerant of standard quality air supplies (instrument quality air is not necessary) via industrial solenoid valves.
- Three position rotary control using only three electrical inputs plus air supply, for filling applications etc.
- Two endstop positions + adjustable mid position anywhere in angular range of actuator (90 or 180°).
- Control circuit mounts inside standard all metal industrial quality Kinetrol ULS or XLS limit switch boxes – available fully assembled, or (on non-explosion proof models only) for user retrofit to existing boxes.
- Direct mounting onto full range of Kinetrol ¼ turn actuators. Namur mounting options available.
- Uses direct-mounting standard solenoid valves outside box to position actuator.
- Easy adjustment of mid position set point by switch–selectable choice of methods: on-board pot, remote pot or 4-20mA input signal.
- Explosion proof options available (approved to IECEx, ATEX) by use of XLS housing plus standard explosion proof solenoid valves (see page 21).
- All new positioner circuit – runs on any of 24vDC, 48vDC, 115vAC or 230vAC power without any change required.
 - Solid-state universal-voltage solenoid switching -no mechanical contacts.
 - Three separate on-board mains fuses for three inputs.
 - Switchable selection of mid-point setting method (on-board preset, remote preset, remote 4-20mA signal).
 - Switchable selection of double acting or spring return operating mode.
 - Power input isolated from signal inputs and outputs for all voltage options.
 - Moulded reinforced plastic internal circuit cover for insulated safety.
 - Positioner has user-adjustable zero, span, deadband and damping parameters via preset pots for easy optimisation of positioning performance.
 - Damping parameter gives velocity-proportional setpoint advance to allow better stabilisation of fast-moving or high-inertia loads while maintaining resolution and repeatability.
- Retrofittable isolated loop-powered 4-20mA angle-retransmit circuit available – just plugs in inside same enclosure – with its own user-adjustable zero and span presets.

Specification

Compatible Actuator Sizes	Models 05 to 14
Supply Voltages	230 V ac $\pm$ 10%, 50 or 60 Hz 115 V ac $\pm$ 10%, 50 or 60 Hz 24 V dc $\pm$ 10% 48 V dc $\pm$ 10%
Power Consumption	Positioner 1.5W max. Solenoids 5 VA max. per solenoid.
Operating Temperature Range	(limited by solenoid valve specifications). 0 to +55°C (32 to 130°F). (note- some explosion proof options have different temperature ranges - contact Kinetrol for details).
Selectable External Inputs	4-20mA - impedance 250 ohm. Potentiometer - minimum resistance 10K ohm.
Positioner Performance	linearity - better than 1% of range deadband - 0.1 to 3% of range repeatability - better than 1% of range (subject to optimisation of speed, deadband and damping).
Optional 2-wire Angle Transducer	- Supply voltage - 8.5 to 27v DC. - Output - 4-20mA. linearly proportionate to angular position, electrically isolated from all other inputs and outputs. - Functions with or without positioner circuit energisation.
Dimensions	See page 53

Actuator size 05
must be fitted with
flow regulators

The explosion proof P3 on/off positioner offers a robust three position rotary control device with a fast, smooth, accurate response in a compact corrosion resistant aluminium housing.

The unit is available ATEX approved to Category 2 and offers four voltages, many switch options and angle position feedback. Available for close mounting on Kinetrol actuators or discrete mounting via a Kinetrol 05 square or NAMUR drive.

Specification

EUROPE/GLOBAL - ATEX/IECEx APPROVAL
Protection Exd Group IIC Category 2
Gas & Dust T5, IP66

Voltages 240 V AC, 115 V AC
48 V DC, 24 V DC

Working Temperature Range -20°C to +60°C

Power Consumption Positioner 1.5 W max.
Solenoids 5 VA max. per solenoid.

Selected External Inputs 4-20mA - impedance
250 ohm.
Potentiometer - minimum
Resistance 10K ohm.

Casing Precision diecast LM24 alloy,
anodised & epoxy stove enamel.

Coupling

Zinc plated steel or stainless steel option.

Positioner Performance

Linearity - better than 1% of range
Deadband - 0.1 to 3% of range (subject to optimisation of speed, deadband and damping).

Optional 2-wire Angle Transducer

- Supply voltage - 8.5 to 27v DC.
- Output - 4-20mA. linearly proportionate to angular position, electrically isolated from all other inputs and outputs.
- Functions with or without positioner circuit energisation.

Dimensions

See page 54

Ordering Codes

Actuator size 05 must be fitted with flow regulators

A patented part-turn rotary actuator that is driven to an end stop, in either direction, from an initial centre position and is spring returned to an accurate and positive mid point when the air supply is removed. The mid-position can be set mechanically anywhere in the actuator's travel range.

The spring to centre assemblies consist of one double acting actuator fitted with two or more opposing clock type springs contained within a single housing. Controlled with a dual coil, 5/3 solenoid valve (or two 3/2 single coil valves) which, when totally de-energised, allow the springs to precisely centre the actuator against physical stops. When either coil is energised the actuator will travel towards one of its end stops. As the vane moves towards an end stop the air stroke torque reduces as the spring torque increases and vice versa. When the coil is de-energised the vane will spring return to its original centre position. The usual 'centre' position will be in the middle of the actuator's 0 - 90 degree travel, but this can easily be adjusted to any mid-stroke location. A vernier scale on the adjustable plate (see attached picture) permits precise mid-position setting to within 1 degree.

(Actuator should be mounted to application to enable adjustable centre position and stationary end points)

- Reliable low stress clock type springs.
- Sealed, non-breathing housing protects spring in corrosive environments.
- Available in models 05 to 18.
- Stroke up to 100° (with 200° option)
- Mid position can be set mechanically anywhere in the actuator's travel range using 'vernier' type scale.
- Self contained spring assembly which can be easily removed without a keeper plate.
- Can be used in aggressive or hazardous environments without the need for complex or sensitive instruments.
- Can be fitted with high temperature seal option for up to 100°C

Actuator Model	Torque - Nm Based on 5.5 bar			Torque - lbf ins Based on 80 psi

* Start torque when angle adjusted to mid position
Note: can be ordered without actuator eg. 050-0205

For dimensions see page 54

- **Simple compact unit**
No external moving parts
- **Unique linkage design**
converts to 180° travel
- **Constant gear-up ratio through travel range**
Hence constant output torque
- **Rolling contact linkage mechanism**
Ensures low wear, long life, low friction
- **Linkage sealed for life**
Protected from the environment, long maintenance free life
- **Compatible with all Kinetrol modules**
Direct mounted spring returns, limit switch boxes, positioners etc.
- **Adjustable endstops**
Giving up to 200° of travel

Operation

Kinetrol's 180° actuator is produced by adding a 2:1 step-up linkage onto the output shaft of well proven 90° vane actuators.

Factory fitted, direct mount linkage units are available to suit model 02, 03, 05, 07, 09, 12, 14 and 16 actuators, giving a neat single unit with no mount kits or brackets. The linkage's unique geometry gives constant 2:1 step-up so that the output torque remains constant throughout the actuator's travel.

The all-steel mechanism of the linkage employs rolling contacts to minimise frictional losses and wear, and to maximise life. The linkage is lubricated for life, and encased in a robust fully sealed die cast alloy casing. Exterior surfaces are protected by a corrosion resistant epoxy stove enamel finish. Standard adjustable endstops on the 90 degree actuator can be used to set the angle of travel. The other end of the 90 degree actuator allows the full range of Kinetrol modular accessories to be fitted directly.

120 degree actuators are also available for the above model range - contact Kinetrol for details.

Ordering Codes

To order a 180° actuator, add a '1' to the end of the code for the 90° actuator on which it is based. Example:

To order an 074 cw spring return actuator plus 180° linkage, use code: 074-1201.

If you want to operate a valve manually, but maintain the advantage of the fail-safe spring's certainty of position when unattended, use this device.

- Manual unit cannot be left in the wrong position
- Reliable torque delivery for valve reseal
- Fire fail-safe option
For fail-safe spring operation of valves in the event of a fire.

- ISO5211 female drive & ATEX Category 2 approved options available for models 02, 03, 05 and 07
- Clockwise or counter clockwise 90° spring action
- Spring housing sealed to IP65 to protect from internal corrosion
- Bi-square (star) and serrated female drive options available

Application

Manual fail-safe spring units are available in Kinetrol sizes 02, 03, 05 and 07 with factory adjusted torques from 1.4Nm to 45.5Nm.

Models 05, 09 and 12 fire fail-safe units (maximum torque to 260Nm/2300 lbf ins) are available - contact Kinetrol for details.

Specification

Spring Case	Die cast zinc alloy with epoxy paint finish
Shaft	Stainless steel or carbon steel zinc plated
Lever	Stainless steel (03 & 05) Aluminium (02)

Optional fusible link	Soldered type (or equivalent) 2 options	
Yield temperature °C	72	93
Max normal ambient temperature °C	42	63

ISO/Female Drive Versions

The 03, 05 and 07 models are available with female drives for direct mount. The model 03 has F03/05 or F04 mounting flanges, the model 05 has F03/05/07 or F04 flanges and the model 07 has a F05/07 flange.

To order female drive versions, replace the '0-' in the product code with '3F'. For example a model 05 ISO female drive manual fail-safe cw handle with F03/05/07 flanges is coded: 053F020-1006. The F04 flange version is coded 053F020-1006/F4.

Female drive versions with the same flange dimensions are available with ANSI threads eg 057F020-1006/F4.

Serrated female drive options can also be supplied for models 05 and 07. To order these replace the 'F' in the product code with an 'S'.

Female 02 versions are available by use of an ISO adaptor. Refer to page 6 for details.

Ordering Codes

To order a manual fail-safe spring unit, quote model number, direction of spring (as per technical data on page 4) followed by product code.

Type Codes: 1006 - spring unit
1201 - single spring fire fail-safe unit (72°C link)
1204 - single spring fire fail-safe unit (93°C link)

When ordering fire fail-safe units, please state maximum torque required (at or below maximum shown in table).

Example: for an 05 model, ISO threads, spring clockwise, 15Nm maximum torque, the code would be:
054-020-1201 -15Nm

ATEX category 2 versions can be ordered by replacing "0" in code 1006 with "1" (i.e 1016)

Kinetrol Interfacing Options

Kinetrol is continually responding to the evolving requirements of the industry for interfacing arrangements that satisfy user needs and conform to industry standards and we offer a range of designs that enable our equipment to be effectively and economically mounted.

Kinetrol can supply direct mounting limit switch boxes, positioners and other control modules that eliminate the costs associated with interfacing hardware and provide compact assemblies. Recent actuator topworks changes have enhanced the interchangeability of the control modules.

Various female drive spring fail-safe and hand spring unit options are available to facilitate direct mounting to valves with topworks details that conform to the ISO 5211 standard.

The innovative, patented, ISO adaptor is available for Kinetrol actuator models 02-09 and provides a versatile and robust mounting option. The adaptor is suitable for use with a wide range of ISO topworks valves (see page 6).

Our larger actuator models 16 and above are manufactured with a drive slot and insert option, designed to interface with ancillary drives that comply with the VDI/VDE 3485 norm.

For compact and space-saving solenoid valve mounting, Kinetrol offers a NAMUR interface adaptor for models 03 to 14 which allows the air supply to be ported directly to the actuator body, thereby eliminating the need for any external piping.

Kinetrol's Valve Automation Services

Kinetrol can assemble automated on/off and modulating valve packages using its robust part-turn actuators and extensive range of modular control units. We can select/supply ball, butterfly and plug valves from across the industry or mount actuators to free-issued valves.

Kinetrol has over 50 years experience in valve automation and is renowned for its build quality. Thousands of mount kit designs are readily available and new arrangements can be designed to meet specific customer needs. Customised packages are regularly engineered to suit difficult applications and meet the most demanding specifications. We can provide assemblies which are fully compliant with ATEX, NEC or IEC requirements.

Kinetrol's broad engineering capabilities, combined with its rigorous quality assurance and testing procedures ensure that customers receive effective solutions that are built and documented to the highest standards.

For more information regarding our valve automation services please contact Kinetrol.

Kinetrol declutchable geared overrides are available for models 05, 07, 08, 09, 10, 12, 14 and 16, rated for the same torques as the actuators and fitted between the actuator and the load. The standard unit is supplied with the right hand handwheel option (see drawing below), whereby when the handwheel is moved in a clockwise direction the actuator moves in a counter clockwise direction. A left hand handwheel option is also available.

Purpose designed, factory built and tested drives for air/gas flow control dampers on burner, heater, boiler and turbine systems in power plants, refineries and a wide range of industrial applications.

Combining the proven performance of Kinetrol's vane type actuator with an equally rugged integral manual override/mounting frame, the G3 drive is compact with unbeatable control, accuracy and cycle life.

† Listed weights exclude actuator

- Integral manual override
- Suitable for new installations or replacement of existing electric or pneumatic drives
- Available with same mounting foot print to replace existing floor mount drives
- Can result in lower energy costs resulting from accurate flow control
- Reduced operating costs due to long maintenance-free life (2 million operation warranty)
- Compact space saving design
- Quick and easy installation and set up
- Robust construction with durable epoxy finish
- Manual override usable with actuator removed

Options

- Double acting and spring fail-safe (open or closed)
- Modulating (3-15 psi and 4-20mA signal)
- Fail to low signal
- Lock in last position
- Limit switch remote position indication
- 4-20mA angle retransmission
- High visibility position indication
- Different sided/diameter handwheels and extensions
- Infinitely adjustable output levers to suit existing or new requirements

Actuator General Specification

Casing: Models 0M0, 01, 02, 03, 05 & 07 Pressure die cast ZL16 zinc alloy.
Models 08, 09, 10, 12, 14, 16, 18, 20 & 30 Aluminium LM24 or LM25.

Vane & output shaft: Models 0M0, 01, 02, 03 and 05 stainless steel. Models 07 to 30 SG iron, zinc plated.

Shaft bushes: PTFE coated bronze.

Seals: Moulded polyurethane. High and low temperature seals also available contact Kinetrol.

Seal expanders: Stainless spring steel.

Couplings: Weldable mild steel, zinc plated.

Working temperature range: -20°C (-5°F) to 80°C (175°F).

High temperature option up to 100°C (212°F) using temperature seals and higher temperatures with special equipment - contact Kinetrol for details.

Low temperature option down to -40°C (-40°F) include option "L" at end of actuator coding.

Maximum recommended working pressure: 100 psi (7 bar)

Maximum overload pressure: 150 psi (10 bar)

Spring Fail-Safe Electric Actuators

Kinetrol's double acting and spring return electrohydraulic actuators are designed for use in locations without a compressed air supply. A hydraulic pump delivers pressurised oil to a Kinetrol quarter-turn actuator, providing a double acting torque output up to 1220 Nm/10800 lbf in.

In the case of single acting units, a Kinetrol spring return and fail-open solenoid valve produce a positive fail-safe action.

A 100% rated pump motor and pressure release valve provide stall protection. This, together with the units capacity for up to 3000 starts per hour, make it ideal for both high cycle double acting or modulating applications.

Various AC and DC voltage builds are available and options include auxiliary limit switches and/or a 4-20 mA transducer for position feedback.

See leaflet KF-503 for further information.

Rotary Dampers

Kinetrol's range of fluid dashpots are used to steady drives, decelerate motion and damp vibration. Standard designs include fixed and adjustable rate devices for limited angle or continuous rotation damping in one or both directions of travel.

Applications for these robust, industrial dampers include the precise control of:

- tension on wire/paper/film/textile handling equipment
- the rate of descent of curtains, shutters etc.
- oscillations of pendulums, gimbals etc.
- jerk on camera & simulator systems
- vibration on transfer machinery.

See catalogue KF-72 for more information. If required, Kinetrol can engineer special designs to meet customers specifications.

Kinetrol Actuators and Add-On Control Units

EXAMPLES

- | | |
|-----------------|--|
| A. 054-100 | Double acting actuator (ISO threads) no optional supplementary items |
| B. 054-120M | A + spring return (fail-safe cw) + Clear Cone monitor |
| C. 057-100 | Double acting actuator (ANSI threads) |
| D. 144-130-4900 | 144 actuator (ISO threads) + spring return fail-safe ccw (2 x 124 springs) |
| E. 053F100 | Double acting actuator with ISO adaptor |
