FLUID
POWER

The goal of Lenz is to help our Distributors, OEM's and customers succeed by providing the best hydraulic engineered products. Building upon this determination, we've enhanced the Lenz catalogs and our website to feature even more detailed information for ease of specifying and ordering. We at Lenz feel our new catalog and website are easier to navigate, read and understand our products.

We will continue to add new innovative hydraulic products to our product line.

We hope you'll agree we have succeeded in these pursuits.

Lenz

Hydraulics with a Global Reputation

Canister Filter

Return Line Applications

CP-250/380, CPA-380

Specifications

- Working pressure 200 PSI (14 Bar)
- Operating Temperatures -25° F to +212° F (-32° C to +100° C)
- Flows to 7 GPM (26 LPM) Return
- Flows to 2 GPM (7 LPM) Suction
- Die Cast Aluminum casting
- Buna Seals
- For use with petroleum based fluids
- Maximum pressure differential 80 PSI (5 Bar)
- By pass in filter elements
- .90 lbs shipping weight

Options

- NPT or SAE ports
- Indicator ports
- 10, 25, 40 micron elements
- 0, 18, 25 PSI Bypass options

Model "LIT" Series LIT-500, 750, 1000, 1250

Specifications

- Working pressure 100 PSI (7 Bar)
- Operating Temperatures -22° F to +212° F (-32° C to +100° C)
- Flows to 100 GPM (230 LPM) Return
- 1/2", 3/4", 1", 1 1/4", Ports Aluminum casting
- Buna Seals
- For use with petroleum based, high water water glycols and water/oil emulsions fluids
- Nylon bowl
- 3-10 (lbs), 1.4-4.5 (kgs) shipping weight
- 25 P.S.I bypass option for return

Options

- NPT or SAE Ports
- 10, 25 micron cellulose, synthetic elements
- Water absorbing elements (*Series 1250 only*)
- Visual indicators
- 140 Micron Wire Mesh elements (*Series 1250 only*)
- Dual ports available on 1250 Series

Return Line Only

LIT-500/750/1000

LIT-1250

The mounting flange has 6 holes, allowing choice of mounting configurations:
Four mounting holes on 6.25" bolt circle (American Standard)
Three mounting holes on 6.88" bolt circle (European Standard)
(LIT-1250 / DUAL-LIT-1250)

Sump Strainers

N49 / 49 Series

- Plated Steel Hex or Nylon Hex Pipe Nut Coupling:**
In a full range of NPT sizes, 3/4" thru 3". Welded on.
- Plated Steel End Cap or Nylon:**
Epoxy-bonded for one-piece construction.
- Steel Back-Up Cylinder:**
Provides rigidity, permits easy cleaning and better flow.
- Pleated, Reusable Stainless Wire Cloth:**
Keeps its shape and allows better flow. For use with hydraulic fluids, oils, coolants, cutting oils and lubricants. Excellent for mobile equipment. Easily cleaned. Choice of 30, 60, 100 or 200 mesh. See table.
- Plated Steel Cap End:**
Epoxy-bonded for one-piece construction.
- Trouble-Free Positive Protection:**
All metal, nickel plated construction. No organic elements to deteriorate. These smooth, one-piece, epoxy-bonded units are carefully and compactly constructed with quality materials throughout. They assure trouble-free, positive protection for the entire system. Excellent for mobile equipment.

Easily Installed and Cleaned:
Easily removed and cleaned with gasoline and similar solvents.

OPTIONAL:
Nylon hex pipe nut coupling, one piece.

OPTIONAL
Built-in relief valve to prevent pump starvation / Part No. R3 & R5

3 & 5 PSI relief valve is optional extra.

To specify add to Model No.

Example: 49-50-R3-100

"LW-BA" WELD ADAPTERS

FEMALE S.A.E. "O-RING" WELD ADAPTER

LENZ "LW-BA" WELD ADAPTERS are designed and machined with a pilot to accurately position the adapter to the hole opening for welding flush to the outside of the tank. The Weld Adapter is a female S.A.E. O-ring connector for Lenz S.A.E. male straight thread fittings or any other Lenz hydraulic component with a male S.A.E. straight thread, making for a leak-free installation.

Tank Mounted Strainers

LTF Series

Designed for ease of servicing.

Access to tank interior is not necessary

Specifications

- Flows up to 49 GPM
- Cast iron bushing
- Perforated steel support tubes
- 100 mesh stainless steel pleated elements

Options

- No by-pass or 5 PSI by-pass
 - 30, 60, 200 mesh available upon to request
- To specify by-pass option add R5

“AN-WB” WELD BUSHINGS

FEMALE S.A.E. “O-RING” TO FEMALE N.P.T.

LENZ “AN-WB” Weld Bushings are designed and machined with a recessed pilot to accurately position the adapter to the hole opening for welding flush during welding phase to the outside of the tank (the female S.A.E. “O-Ring” connection on top or side of tank, and the female N.P.T. connection on the inside of the tank) to save time and labor when installing components or accessories, (examples: S.A.E. hydraulic fittings to suction strainers or a return line diffuser) for a leak-free installation.

LDFD SERIES DIFFUSERS

Designed for ease of servicing.

Specifications:

- Plated steel end caps
- Zinc plated steel body
- Operating temperature range -13° F to 212° F (-25° C to 100° C)
- Up to 3" NPT port threads
- Flows to 250 GPM (945LPM)
- Epoxy adhesives
- Maximum working pressure 300 PSI (20 Bar)
- Pressure drop at rated flows .5 PSI (.035 Bar)

Operation

The LDFD series diffuser consists of two concentric steel tubes each with rows of discharge holes positioned over 120 degrees of their circumference arranged on opposite sides. The inner tube has fewer holes than the outer; to allow for oil velocity to be reduced in two stages as it passes from the inner tube to the outer tube and eventually into the reservoir. The LDFD series diffusers should be installed with the discharge area on the outside tube facing the tank wall or bottom.

Benefits

Designed to effectively reduce fluid aeration, foaming, turbulence, and noise caused by return lines. Pump life is also extended by reducing cavitation to the pump inlet.

Disc Sump Strainer Standard Types

Stacking Disc Sump Strainers

Model L-G

Lenz Model L-G Strainers are all-metal disc type, for all petroleum base and fire resistant hydraulic oils and other liquids such as water and fuels. They are designed to work efficiently installed in either a vertical or horizontal position.

Lenz Disc Type Strainers can be cleaned more completely than any other design because when the assembly is dismantled, every square inch of flat screen area can be scrubbed clean and inspected.

Because of the Lenz "Stacking" Disc design, it is possible to provide assemblies with filtering area ranging from 8 to more than 700 square inches by utilizing the four disc sizes shown in the table below (Dimension A)

These units may be ordered with 100, 60, or 30 mesh wire screen. (See Pg. 14)
100 mesh stainless Cloth supplied unless otherwise specified.

Standard Assemblies Available For Sump Application

100 Mesh Stainless Cloth Is Supplied Unless Otherwise Specified

MODEL NUMBER	GPM	PIPE SIZE NPT	DIMENSIONS		DISCS	FILTER AREA (SQ. IN.)
			A	B

100-D-6	1"	3 5/8"	6	48"
100-D-7	1"	4"	7	56"

Low in price, these compact strainers are designed for low oil levels and small tanks found in scissor lifts, lift trucks, and other applications where efficiency counts most. They are perfect for shallow tanks work well in fluid levels as low as 3/4".

• Available on special order: 6" dia. discs which have 21.1 sq. in. screen area per disc. 3/4" or 1" NPT pipe size.

NOTE: * 8.0 sq. in. per 3 3/4"

See Pg. 13 (Bottom) for view of screen

Disc Sump Strainers/Magnetic Types

Magnetic Disc Sump Strainers

Model ML-G

Lenz Model ML-G Strainers add magnetic separation to the efficient straining action of the stacking disc design. Powerful Alnico magnets attract iron particles to the disc covers and away from the stainless screen. Oil passing through the center of the magnets gets a secondary cleaning action. The magnets are an integral part of the assembly, not just an add-on feature. Meets J.I.C. specifications calling for magnetism in hydraulic systems. Die cast aluminum pipe adapters effectively isolate Lenz Magnetic Disc Sump Strainers from steel intake piping. When the unit is disassembled, the iron particles simply drop off the disc covers. These units may be ordered with 100, 60, or 30 mesh wire screen. (See Pg.14 for mesh sizes)

MAGNETIC LOW DISC STRAINERS

Model MD

Lenz Model M D Strainers combine magnetic separation and low profile disc construction. A cylindrical magnet mounted between discs makes a concentrated magnetic field through which all oil passes.

• Available on special order: 6" dia. discs which have 21.1 sq. in. screen area per disc.
3/4" or 1" NPT pipe size.

FILTERS – ACTUAL SIZE MESH

LENZ Cleanable Wire Cloth Filters are equipped with Stainless Steel Wire Cloth Elements. The filtering insert elements are available from a coarse 30 mesh up to a fine 200 mesh. To better illustrate mesh sizes, we have shown below the actual size mesh of the 100, 80, 50, 40, and 30 mesh stainless steel wire screen. In addition 10 and 30 micron pleated, paper elements are available.

We stock the 200, 100, 60, and 30 Stainless Steel Wire Mesh Screen. (100 Mesh—Standard)

100 MESH

Wire diameter .0045

Width of opening .0055 = 141 Microns

50 MESH

Wire diameter .0080

Width of opening .0120 = 308 Microns

80 MESH

Wire diameter .0055

Width of opening .0070 = 180 Microns

40 MESH

Wire diameter .0100

Width of opening .0150 = 385 Microns

60 MESH

Wire diameter .0065

Width of opening .0102 = 262 Microns

30 MESH

Wire diameter .0120

Width of opening .0213 = 546 Microns

150 MESH

Wire diameter .0026

Width of opening .0041

Microns = 105

200 MESH

Wire diameter .0021

Width of opening .0029

Microns = 74

Filler Breather Caps

Extra LARGE-Bayonet Style Filler Strainer Breather

Model 57-XL

- Gives 5 Times Greater Filter Air flow Than Standard Units
- 200 GPM or 26.7 CFM
- Keeps Reservoir Fluids Clean, Protects and Prolongs Hydraulic System Life!
- Each unit packaged in kit with instructions and template for drilling mounting holes.
- Strainer lengths, screen mesh and materials can be varied to meet special needs.

Nickel-Chrome Plated Cap - Large capacity, Twist-To-Lock, removable cap breathes and filters the air. Air vents are concealed permitting outdoor installation. Fluted finger insertions for easy gripping. 40 Micron (.0016") air filtering is standard (Part No. 40 XL CAP) with Superfine 10 Micron optional (Part No. 10 XL CAP).

Optional Black powder coated cap available.

Zinc Plated Safety Chain On Every Unit - Prevents loss of cap.
J.I.C. approved (Comes as part of Cap).

Nickel Plated Close Neck Filter Flange, Bayonet type. Has six 7/32" holes positioned on a 2 7/8" bolt circle on a 3 1/4" dia. flange (Part No. 5).

Two Heavy Duty Oil Resistant Fiber Gaskets - Provide positive sealing between flanges. Have six matching holes (Part No. 8).

Stainless Strainer - 30 Mesh Stainless Screen Basket. 3" deep, 1 15/16" in diameter. Large area provides for rapid filling.

Screen mounting flange is stainless - with six matching holes (Part No. 7).

*Optional screens: 6" length, 100 mesh or 30 mesh. 8" length, 30 mesh

Six 10-24 Swagelorm self-tapping screws (Part No. 9) - prevent metal particles from getting into reservoir during installation by swaging the threads instead of cutting them.

Optional 10-32 swagelorm screws. See options page 6 for details.

Optional Nylon Strainer prevents punch out.

P-10	10 PSI Relief Valve

Pressurized Filler Breather Cap

57XL-10P-5 / 57XL-40P-5

This device is similar to a conventional breather, but it incorporates a relief valve set at 5 PSI and a vacuum breaker. When the fluid level first falls, air enters the reservoir through the vacuum breaker and filter. When the level rises, air is compressed rather than being expelled. Thereafter, changing fluid levels are accommodated by the changing size of the air bubble in the reservoir, instead of by breathing to atmosphere.

Pressurized breathers can reduce breathing by as much as 90% increasing the life of the breather filter by a factor of 10. They are recommended for systems that are expected to operate in extremely dusty environments and mobile applications to prevent spillage.

Dimensions: Same as 57XL series.

Optional: 10 PSI Relief Valve Setting.

Side Mount Filler Cap Assemblies

Filler Strainer Breather

Model SM

Filters, Breathes and Strains - Makes hydraulic fuel tank customizing easier. Designed for use on tanks that require filling from the end or side. Choice of standard or weather-proof cap (same as Model FCS) at no extra charge. The Super 3" cap used on Model 57-XL is available as an extra-cost option on these units. Fully assembled and ready to mount. Includes instructions and template.

May also be welded directly to side of reservoir.

Lenz Quality Standards - Newly designed, heavy-duty, one-piece housing is of zinc-plated steel. Six bolts with nuts and seals and mounting gasket are included. All other components and specifications are identical to those for Lenz Standard FCS Model or 57XL (Page 4). Nickel-chrome or black powder coated oxide finish optional at additional cost. Separate housings, unplated, are also available.

**New Heavy Gauge
Steel Housing**

Fuel & Hydraulic Filler Necks & Caps

Lenz Fuel/Hydraulic Filler Caps & Necks are fabricated of heavy gauge steel with an optional stainless steel screen. Fuel Caps are available in standard or lockable, non-vented or vented – the vented Fuel Caps having a built-in diaphragm to reduce spillage in case of rollover.

Hydraulic Fill Necks

HYD Series-Hydraulic Applications

- 16 gauge (.060) steel
- Tube extension .12 wall thickness, 2.21 diameter
- Standard 3", 6" & 8" length tube extension
- Tube extension not plated
- Safety chain standard

Diesel Fill Necks

HDF Series-Diesel Fuel Applications

- 16 gauge (.060) steel
- Tube extension .12 wall thickness, 2.56 diameter
- Standard 3", 6" & 8" length tube extension
- Tube extension not plated
- Safety chain standard

Options

- Stainless steel, aluminum available
- Angle tube cutoffs
- Lockable tab available
- Stainless steel screen std 4.5" 100 mesh
- Overflow tube available
- Threaded & flanged connection available

Note*
Tube extensions
chrome plated only
for photo.

Filler Breather Tank-Top Mount

Model ABS-40/ABS-30

PART	DESCRIPTION	GPM	CFM
ABS-40	40 Micron - Polymide 66-Nylon	79	10
ABS-30	40 Micron - Polymide 66-Nylon	26	4

Filler Breather for tank-top installation with breather and strainer basket.

Filler Breather Cap has internal thread, and screws onto the main body, located in the tank.

This filler breather assembly contains a 40 Micron breather cap, a snap locking ring on main body, a threaded locking ring with "O" ring seal, and strainer basket.

Main body is placed in a pre-drilled hole 2.16" (55 mm) minimum, 2.18" (55.3) maximum in the top of reservoir (tank). The wall thickness must not exceed .3149" (8 mm) and not less than .0781" (2 mm). The threaded locking ring with "O" ring, secures and seals the main body to the tank.

Safety chain is standard, which connects the cap to the body, preventing loss of cap when removed.

With this filler breather assembly, drilling, tapping and aligning of mounting holes is not needed, reducing labor costs.

Weld Neck Risers

Model LWR

The "LWR" series Weld Neck Risers are designed to raise filler breather assemblies up to 1" above the surface of the tank top. This low cost riser eliminates costly repairs brought on by contamination and water being swept into the reservoir.

LWR-1-SS	Stainless	1 ¹ / ₁₆ "

LGB Air Breathers

Threaded / Bayonet Flange

Model LGB

- White metal filter canister
- Zinc plated steel adapter
- Air flow to 200 CFM (1125 GPM)
- Compatible with most fluids
- Temperature to 250° F (121° C)
- 1/2", 3/4" & 1" NPT Threads
(Optional threads available; Consult Factory)

Options:

- 10 micron glass media
- 10 or 30 cellulose media

*Comes with flange, gasket, screen & mounting screws

Breather Filter-Threaded Metal Assemblies

Breather Filter

Model BF

These units act as ventilators to provide a free flow of clean, fresh air into hydraulic fluid, fuel, oil, chemical and coolant tanks or reservoirs. They compensate for changes in fluid level, temperature and altitude . . . provide positive protection for airborne contamination for tanks, pumps, valves, cylinders and other components. Large oil resistant filter elements filter dirt and dust particles as small as 10 Microns (40 micron standard). Cover removes for easy cleaning.

BF-4 & BF-6 Zinc plated. BF-8, BF-12 Nickel plated & BF-16 Nickel-chrome.

Pressurized Breather Filter

BF-12P-5

This device is similar to a conventional breather, but it incorporates a relief valve set at 5 PSI and a vacuum breaker. When the fluid level first falls, air enters the reservoir through the vacuum breaker and filter. When the level rises, air is compressed rather than being expelled. Thereafter, changing fluid levels are accommodated by the changing size of the air bubble in the reservoir, instead of by breathing to atmosphere.

Pressurized breathers can reduce breathing by as much as 90% to 95%, increasing the life of the breather filter by a factor of 10. They are recommended for systems that are expected to operate in extremely dusty environments and mobile applications.

10 Micron

Please supply drawing specifying lengths shown. Dipstick may be marked "FULL" and "ADD". Optional wording available.

NY

Nylon Filler Breathers

Specifications

- 1/4" to 1 1/4" NPT Threaded Filter Filler Breathers
- Thermoplastic Polyamide 66 Material
- Maximum Operating Temperature 250°F (100°C)
- Compatible with Petroleum Based Fluids, Gasoline, Fuel, and variety of Solvents
- Not compatible with Alcohol
- 10 or 40 micron polyurethane elements
- Buna Seals
- Anti splash option available
- NPT Threads
- Maximum Pressure 47 PSI (3 Bar)
- Optional steel plated dipstick available up to 7.9 inches (200 mm) and can be marked with min & max notches upon request.
- Measure from end to thread.

Desiccant Breathers

Model DB

- Construction: ABS plastic & impact-modified acrylic
- Removes corrosive water vapor
- Operating temp. range: -20° F to +200° F (-28° C to +93° C)
- Four standard sizes (3" to 10")
- Bi-directional air flow
- Silica gel turns from gold to green when maximum absorption is reached
- Dual filter system with anti-static guard
- Airflow: Standard 260 GPM
- 2 micron filtration
- Solid contaminant filtration surface area 20.6 in² (133 cm²)
- Silica gel absorbs up to 40% of its weight in water
- Resistant to alkalis, hydrocarbons, non-oxidizing acids, salt water, and synthetic oils
- Option: Activated charcoal media (consult factory)

Lenz has introduced a new series of tank covers, "TC Series". The tank covers include seven models, ranging from a 6" to an 18" diameter. The TC Series tank covers are designed for ease of servicing hydraulic reservoirs through sidewall or through tank top.

Features Include:

- Buna lip seal supplied
- Nylon crush washer supplied
- Zinc plated
- Heavy duty steel construction
- Durable no-leak gasket
- Quick easy access for cleaning and inspection
- For standard and fireproof hydraulic fluids
- Low cost
- Stocked for quick delivery

Options:

- 6", 12", 14", 18" Diameters
- Drain available – Add "D" to Model Number
- Stainless Steel – Add "SS" to Model Number
- TC-BA – Tank cover Baffle Adapter
- TC Bolt – 5/8"-11 Bolt (TC-BX"L") Specify length.

Drawing of TC-6

Drawing of TC-12

TC-BA Baffle Adapter is not included as part of the model numbers below. Order separately.

Magnetic Drain Plug

MDP Magnetic Drain Plug

Models MDP Series

Lenz Magnet Plugs are similar to standard pipe or straight thread drain plugs with one important difference, a permanent magnet is fastened to the plug body. This magnet attracts and holds abrasive, ferrous metal particles preventing their circulation through the lubrication or hydraulic system.

These abrasive, ferrous metal particles appear in lubricating or hydraulic systems as a result of the following conditions:

- The constant flaking effect of normal wear of moving parts
- Particles not removed by flushing operations after boring or machining.
- Chipping due to sub-surface casting flaws.
- Minute component breakdown caused by stress usage.

Usually a combination of factors accounts for the presence of these particles that cause excessive wear to vital components unless they are removed. By holding these particles, Lenz Magnetic Drain Plugs prevent excessive wear to the system's components.

Reservoir Flanges

Suction and Return Line

Models SF & RF

Lenz Reservoir Flanges

Afford a leakproof seal for pipes or tubes passing through the reservoir top . . . keep fluid in, dirt out. No welding, no unions, and saves on piping assembly time. Both types come completely packaged with the parts as shown and with templates . . . ready for quick, easy installation. Meet ASA standards. They serve as economical inspection ports.

Suction Flanges

No. SF & SFO are designed for the suction pipe line of the reservoir. The parts are installed on the top of the tank as shown in the diagram, Figure 1. The larger models, SFO-24 to SFO-48, permit the use of filters larger than 4 1/2" in diameter*. All sizes allow the easy removal of suction strainers from ASA standard reservoirs.

Return Line Flanges

No. RF

Return Flanges are designed to accommodate the return pipe to the tank. The parts, as shown, are quickly and easily installed on the tank as shown in the diagram Figure 2. Range of model sizes and internal washer sizes are shown in table below in RF Models.

Model 550/T-550

3 Sizes (3 1/4", 5" & 7" center to center)

Models 550 - 3 1/4", 5" & 7" body frames are of heavy aluminum alloy with flat black finish. Jam nuts and flat washers are steel; hollow mounting bolts are carbon steel, zinc plated and furnished for 1/4" thick reservoir walls. Special longer hollow bolts can be furnished on request for 7/8" & 1 1/2" thick walls. (12mm & 3/8"-24 bolts available) Stainless steel bolts available upon request.

Standard 550 and T-550 models have 70 durometer buna - N, O-Ring Seals, silicone gaskets, tempered glass window and brushed aluminum backgrounds. They are for use with petroleum products, oil-water emulsions, and glycol-water solutions where temperatures do not exceed 200°F. Where the fluids used in the sight gauge is not known, we can furnish Viton O-rings (at additional cost).

T-550PE-5 Example:

Fluid Level Sight Windows

LSW

Lenz Fluid Level Sight Windows are designed for quick visual inspection and can be used to show presence of oil in gear cases, bearing housings, or can be used to indicate liquid level in reservoirs. These observation windows allow to check mechanism functions in sealed chambers as well as in hydraulic lines to monitor fluid flow and condition.

Reflectors (optional) show the fluid level and conditions clearly from a distance or when dimly lit. Float Ball (optional) show the movement of oil. Stainless (optional)

Lenz Fluid Level Sight Glass Windows are offered in the following sizes:
3/8" through 2" N.P.T. and 3/4"-16 through 1 7/8"-12 S.A.E. Rated at 250° F

"LW-BA" WELD ADAPTERS

FEMALE S.A.E. "O-RING" WELD Adapter

LENZ "LW-BA" WELD ADAPTERS are designed and machined with a pilot to accurately position the adapter to the hole opening for welding flush to the outside of the tank. The Weld Adapter is a female S.A.E. O-ring connector for Lenz S.A.E. male straight thread fittings or any other Lenz hydraulic component with a male S.A.E. straight thread, making for a leak-free installation.

Magnetic Tank Cleaners

Multi Magnet Standard or Heavy Duty

Lenz magnetic tank cleaners pick up material that ordinary filters miss and thus maintain cleaner oil. The cleaner the oil; the less problems and expense incurred.

Exceptionally efficient, each unit is composed of a large ceramic magnet and two circular pole pieces.

Multi-magnet tank cleaners come in two models; standard and heavy-duty. Heavy-duty is recommended when support rods are long, power units are large or shipping abuse is anticipated. Although the magnetic unit is the same, heavy-duty is manufactured with a $\frac{5}{8}$ " solid steel support rod while the standard tank cleaner contains a $\frac{1}{8}$ " pipe size support rod.

To clean, simply use ordinary air hose using compressed air.

Order pipe plugs separately. Pipe plugs are optional and are furnished in $2\frac{1}{2}$ " size. The minimum opening that will accommodate the unit is 2" pipe size or a hole approximately $2\frac{1}{4}$ " in diameter. If desired, it can be installed in the cover of any opening larger than this.

Optional: Plug Part No. 40P (For Standard Rod)
HD40P (For Heavy Duty Rod)

Note**Special Rod Lengths Available

Demonstration of The Tank Cleaner's Magnetic Power

Slim Line Magnet Tank Cleaners

In-Line Magnets Standard or Heavy-Duty

The primary difference between slim line and regular tank cleaners is in the smaller diameter of the slim line. Capable of being inserted into a hole tapped for a 3/4" plug, the cleaner is especially useful in small reservoirs, gear boxes and other applications where space is at a premium.

Since there is a ratio between length and diameter of a magnet for greatest power, each unit is designed to give maximum magnetic power possible in a small space.

Slim Line Tank Cleaners are available in two models; standard and heavy-duty. Although the magnetic unit is the same, heavy-duty is manufactured with a 5/8" solid steel support rod while the standard contains a 1/8" pipe size support rod.

To clean, simply remove from reservoir and wipe with a clean cloth every 3 to 6 months.

Order pipe plugs separately. Pipe plugs for installing in the top of the reservoir are optional and are furnished in 3/4" and 1 1/4". If space is available, it is recommended that the 1 1/4" plug be used for ease of removal.

3/4" Plug Part No.

12P (For Standard Rod)

HD 12P (For Heavy Duty Rod)

1 1/4" Plug Part No.

20P (For Standard Rod)

HD 20P (For Heavy Duty Rod)

Note**Special Rod Lengths Available

High Pressure Ball Valves

LHBV SERIES

- Carbon Steel Body Zinc Plated (1/4"-1 1/4" Port Sizes)
- Forged Body (1 1/2", 2 Port sizes)
- Full Port Sizes
- Hard Chrome Plated Steel Ball
- Delrin +MoS2 Ball Seals
- Viton O Ring
- NPT, SAE
- Operating Pressures to 7250 PSI (500 Bar) see chart
- Operating Temperature -20° F to 212° F (-12° C to 100° C)

Options

- Lock Kits
- Stainless Steel
- Temperature Range -60° F to 400° F
(-50 C to 200 C depending upon seal material)

Built For SUPERIOR Performance

BAC

AFC

SS

Lenz offers you a pressure gauge that gives extra long life and superior performance under the most difficult job conditions.

The Lenz Series Glycerin-Filled Gauges offer you the finest choice in gauges where severe pulsation, vibration and corrosive atmosphere are factors. The glycerin serves to permanently lubricate and prevent corroding of the movement, effectively dampens pulsation and vibration to the degree that there is no pointer flutter or oscillation. Completely sealed . . . steam, gas or any fluids are kept out, there is never any condensation and clear visibility of the dial is always assured.

These gauges will last years and years longer than ordinary gauges and provide accurate and positive reading at all times.

The built-in dampening mechanism requires no adjustment after installation . . . there is nothing better.

While principally offered to the hydraulics field, these gauges have many other applications in refineries, petrochemicals, and in many manufacturing industries.

Rugged, accurate and dependable, these Lenz pressure gauges promise the reliable, long-term service and performance required by today's diversified needs.

Outstanding Features of LENZ Pressure Gauges

- Glycerin or Silicone should not be used in applications involving oxidizing media such as oxygen, chlorine, nitric acid, hydrogen peroxide and others, because of the danger of a spontaneous chemical reaction.

DIAL FACE

White coated aluminum face with black coated aluminum pointer.

UNBREAKABLE LENS

Completely sealed unbreakable plexiglass lens gives long life under the most rugged conditions.

BOURDON TUBE

Copper alloy up to 800 PSI safety coiled copper alloy for 800 PSI and higher.

BOURDON TUBE 4" GAUGE

Copper alloy up to 1500 PSI safety coiled alloy steel, 1500 PSI and higher.

SERVICE

In case blow-out plug operation is necessary, the gauge can be serviced in the field for refilling glycerin.

SUPERIOR BRASS MOVEMENT

Precision machined and highly finished bearing surfaces are practically frictionless providing dependable accuracy. The movement of all internal parts is permanently sealed and dampened by the glycerin fluid. The effects of pulsation and vibration are virtually eliminated. No pointer flutter.

SAFETY BLOW-OUT PLUG

A rubber disc relief valve, located on top of the gauge, vents case pressure build-up at 5 PSI. Acts as a filler cap.

RESTRICTOR

Assists in dampening, acts much like a pressure snubber.

INDIVIDUALLY PACKED

Boxed in rugged corrugated mailer type boxes for protection during shipping or on the shelf.

HOW TO SELECT THE PROPER GAUGE-

The proper gauge for your application should read at least 60% above the maximum pressure of the system so that the maximum reading would be approximately in the middle of the dial.
To order a gauge: (1) Select the type of gauge; (2) Choose the dial size; (3) Determine the pressure range from appropriate table; (4) Give correct model number from same tables; (5) Add suffix "FF" for Brass Front Flange, "FFC" for Chrome Front Flange and "UC" for U-Clamp to Model Number.

FRONT FLANGES

Flanges ordered with gauge are installed at factory. May be purchased separately and added at a later date.

Dimensions: For 2 1/2" Gauge Flange - (3) 9/64" Holes On 2 15/16" Bolt Circle, 3 5/16" O.D.

Dimensions: For 4" Gauge Flange - (3) 3/16" Holes On 4 9/16" Bolt Circle, 5 3/16" O.D.

BAC-25 Brass Case

Dial Size: 2 1/2" Glycerin Filled

Pressure Ranges: 30" HG to 15,000 PSI/Bar (Dual Scale)

Accuracy: Within 1.5% of Maximum Graduation

Case: Forged Brass With Polished Brass ABS

Bourdon Tube: Copper Alloy-Up to 800 PSI

Safety Coiled Copper Alloy for 800 P.S.I. and Higher

Movement: Brass With Highly Finished Bearing Surfaces

Connection: 1/4" Male NPT Brass Bottom or Rear Center Connection

(Optional Threads See Page 19c)

Safety Blow-Out Plug Included.

Restrictors Standard to Restrict Pulsations.

BAC-25 MOUNTING OPTIONS, ADD SUFFIX:

"FF" for Brass Front Flange - Example: BAC-5M-25RC-FF

"FFC" for Chrome Front Flange - Example: BAC-160-25RC-FFC

"UC" for U-Clamp - Example: BAC-3M-25RC-UC

"BAC-25"

BAC-25 Series Brass Case, glycerin filled are designed for rugged application due to the bourdon tube being brazed to the one-piece brass case/ socket. LENZ Brass pressure gauges are known for their reliability in the field where vibrations and pulsation can occur.

AFC-25 Stainless Steel Case

Dial Size: 2 1/2" Glycerin Filled

Pressure Ranges: 30" HG to 15,000 PSI/Bar (Dual Scale)

Accuracy: Within 2.0% of Maximum Graduation

Case: 304SS Stainless Steel

Bourdon Tube: Phosphor Bronze

Movement: Brass with Highly Finished Bearing Surfaces

Connection: 1/4" Male NPT Brass Bottom or Rear Center Connection

(Optional Threads See Page 19c)

Safety Blow-Out Plug Included/Restrictors Standard

AFC-25RC (REAR CENTER) MOUNTING OPTIONS, ADD SUFFIX:

"FF" for Polished Stainless Steel Front Flange - Example: AFC-5M-25RC-FF

"U-Clamp" Models, Model Number Changes to "AUB" - See Chart Below

"AFC-25"

Lenz's AFC-25 Series Pressure Gauges feature a stainless steel case, brass stem, glycerin filled which are ideal for severe pulsation, vibration and where corrosive atmospheres are a factor. These Lenz pressure gauges are perfect for the original equipment manufacturers (O.E.M.) and other hydraulic and pneumatic equipment due to being cost effective.

AFC-20 Series Stainless Steel Pressure Gauges

Lenz introduces a new 2" dial glycerin filled pressure gauge with features that include stainless steel case and brass stem which is suitable for hydraulic equipment including pumps & compressors where high vibration exist. The glycerin fill acts as a lubricant, prevents corrosion of the movement, dampens pulsation and vibration to eliminate pointer flutter or oscillation.

BAC-4 Brass Case

Dial Size: 4" Glycerin Filled

Pressure Ranges: 30" HG to 15,000 PSI/Bar (Dual Scale)

Accuracy: Within 1.5% of Maximum Graduation

Case: Forged Brass Chrome Plated

Bourdon Tube: Copper Alloy - Up to 1500 PSI

Safety Coiled Alloy Steel for 1500 PSI and Higher

Movement: Brass With Highly Finished Bearing Surfaces

Connection: 1/2" Male NPT Brass Bottom or rear lower connection
(Optional 1/4" Available)

(Optional Threads See Page 19c)

Safety Blow-Out Plug Included.

Restrictors Standard to Restrict Pulsations.

BAC-4/ BAC-4-RL MOUNTING OPTIONS, ADD SUFFIX:

"FF" for Chrome Front Flange - Example: BAC-5M-4RL-FF

"UC" for U-Clamp - Example: BAC-3M-4RL-UC

"RF" for Chrome Rear Flange - Example: BAC-1500-4RF

"BAC-4"

BAC-4 Series Brass Case Pressure Gauges

LENZ all brass cases are designed for the most rugged applications due to the bourdon tube being brazed to the one-piece brass case/socket and are known for their reliability in the field where vibration and pulsation can occur.

"UC" for U-Clamp - Example: AFC-3M-4RL-UC

"RF" for Polished Stainless Steel Rear Flange

"AFC-4"

AFC Series 4" Pressure Gauges

LENZ gauges have a 4" stainless steel case, are glycerin filled, with brass connection and are best suited for pumps, compressors, and hydraulic equipment where high vibration exists. The stainless steel case offers protection from corrosive environments as are found, for example, at chemical plants and petrochemical plants. The glycerin fill acts as a permanent lubricant, prevents corrosion of the movement, dampens pulsation and vibration to eliminate pointer flutter or oscillation.

Bimetal Thermometer

Model No. BMT

Case & Stem: 304 Stainless Steel

Window: Instrument Glass (Acrylic Optional)

Connections are all 1/2" NPT

External Zero Adjustment

Dial Sizes Available: 3" or 5"

Optional: Temperature Ratings up to 750° Fahrenheit

Optional: Silicone Liquid Filling. Standard Stem Lengths up to 24" and custom lengths up to 72".

Stem lengths are measured from the underneath side of the hex.

Lenz will build to your specifications!

Lenz's Bimetal Thermometers were developed to fill a need for a thermometer performing accurately under rough and difficult applications. This is accomplished by utilizing the Law of Coefficient of Expansion differential of two unlike materials; hence the name "Bimetal Thermometer." The expansion differential of the two unlike metals, connected with a mechanical linkage which Lenz coats with a viscous silicone to minimize pointer oscillation, shows the temperature on the hermetically sealed dial. The Lenz BMT series thermometer probe extends well into the fluid to provide a more accurate reading of fluid temperatures than surface thermometers and are unaffected by ambient temperature.

Transducers

Model No. LZT

Specifications

- Protected against reverse polarity, short circuit, and overvoltage
- 1/4 NPT or 7/16-20 UNF connections
- Stainless steel case (316) and (316L) wetted parts
- 24 pressure ranges available (0-8000 PSI)
- Accuracy .5% (B.F.S.L.) of span
- Repeatability .05% of span
- Hysteresis .1% of span
- Supply voltage 10-30vdc (14-30 for 0-10v output signal)
- Operating temperature 32-180 F (0-80 C)
- Response less than MS between 10-90% full scale
- Weight 0.2 lbs. (0.1 kg)

Options

- Output signal
- 4-20 mA 2 wire system
- 0-5 V 3-wire system
- 0-10 V 3-wire system

How it works

LENZ Pressure Transducers are now available using a flexible modular assembly system. All components from the process connection, pressure range, electrical connection and cable length are modular. You can now select the range or connection that meets your needs.

Your selection will generate the LENZ type code. Order this model code and we will build your pressure transducers.

Ordering Code

Gauge Isolator Valve

Model No. GV-4

**Single Station
Specifications**

- Push knob to read
- Can be locked in actuated position
- Panel or in-line mounting
- Made of press forged steel
- 5800 PSI working pressure
- Maximum panel thickness 5/16"
- 1/4" NPT ports
- Viton seals

- Compatible with petroleum based fluids and other fluids compatible with Viton seals
- Operating temperature -30°F to +240°F (-22°C to +115°C)

Ports: 1/4" NPT

Working Pressure: 5800 PSI

Gauge isolators prevent damaging pressure surges from reaching the gauge except when a reading is required. They help to extend gauge life and maintain accuracy.

Gauge Isolator Valve

Model # GV-4R

The LENZ Gauge Isolator Valve is a simple effective throttling and shut-off device to isolate and protect hydraulic pressure gauges. It will quickly and positively shut off the gauge from the line pressure or, when partially opened, reduce or eliminate gauge pointer pulsations. The leakproof needle stem is internally retained.

Features:

- Steel Construction
- 5000 PSI Maximum System Pressure
- Viton Seals-Compatible With Most Fluids
- Finger Tip Adjustment and Locknut

Siphons

LENZ Siphons should be used to protect pressure instruments in live steam service or other hot vapor applications.

The vapor condenses inside the coil of the siphon which prevents the high temperature vapors from reaching the sensing element of the pressure instrument.

MODEL NUMBER	DESCRIPTION

4-PC-SS	1/4" x 1/4"-MALE (STAINLESS)
8-PC	1/2" x 1/2"-MALE (STEEL)
8-PC-SS	1/2" x 1/2"-MALE (STAINLESS)

Chemical Seals

Chemical seals also referred to as diaphragm seals, are used to isolate pressure gauges from clogging and /or corrosive media. The upper seal is also filled with silicone fluid. Any pressure applied by the process medium to the seal diaphragm is hydraulically transmitted to the pressure element of the gauge, thus generating a pressure reading on the pressure gauge. Factory Installed. Must be ordered with gauges.

Lenz Heavy Duty Seals

MODEL NUMBER	DESCRIPTION
HDS-4x4	1/4" x 1/4" FEMALE (STEEL)
HDS-4x4-SS	1/4" x 1/4" FEMALE (STAINLESS)
HDS-8x8	1/2" x 1/2" FEMALE (STEEL)
HDS-8x8-SS	1/2" x 1/2" FEMALE (STAINLESS)

Lenz Mini-Seal

MODEL NUMBER	DESCRIPTION
MS-4x4-SS	1/4" x 1/4" FEMALE (STAINLESS)
MS-4x8-SS	1/4" x 1/2" FEMALE (STAINLESS)
MS-8x8-SS	1/2" x 1/2" FEMALE (STAINLESS)

Optional Threads

Lenz Pressure gauges can be ordered with special thread connections. (50 Piece Minimum)

- 1) **S.A.E. Thread:** (7/16"-20 w/ "O"-Ring, washer & locknut)
Example: SAE-AFC-3M-25
- 2) **J.I.C. Thread:** (7/16"-20 Male 37° Flare)
Example: JIC-AFC-3M-25RC
- 3) **B.S.P. Thread:** (1/4"R-19, 1/4BSP-19, G-1/4")
Example: BSP-AFC-3M-25

Maximum Indicating Dial

Lenz's maximum indicating dial follows the regular (black) pointer on increasing pressure and remains at the highest point until it is reset by a knob at the front of the window, Silicone filled. Excellent for determining pressure surges or spikes in system.

Example: BAC-5M-25-MID

Available only on BAC & LZ Series
(Installed at Factory)

Adapters

MODEL NUMBER	DESCRIPTION
4-PC	1/4" NPT FEMALE x 1/4" NPT FEMALE PIPE COUPLER
3255-4-4	1/4" NPT FEMALE x 7/16"-20 MALE JIC 37° FLARE
4-4 APC	1/4" NPT FEMALE x 7/16"-20 S.A.E. MALE WITH O-RING
4-4 BSP	1/4" NPT FEMALE x 1/4"-19 BSP THREADS

New Vent Plug for Low Pressure Gauges

LENZ introduces a new "Open/Close" Vent plug for low pressure applications less than 100 PSI.

In order for the pressure gauge to have accurate readings, vent needs to be in open position.

After shipment, pointer may not rest at zero due to internal case pressure buildup caused by temperature variations. Accuracy may be significantly reduced. To restore gauge to operating condition, move lever of vent plug to "Open" position.

If gauge is not mounted upright, move lever to closed position after venting. Repeat procedure at regular intervals to maintain pressure gauge accuracy.
