ENGINEERED FOR STRENGTH MODULAR DRAWER CABINETS

PROVIDING STORAGE SOLUTIONS SINCE 1901.

A Message from Lyon Workspace Products

About Lyon Workspace Products

Lyon Workspace Products, headquartered in Aurora, IL, is an innovator, manufacturer and marketer of storage systems and workspace products. Since 1901, Lyon has pioneered technologies and system solutions in the product categories of lockers, shelving, storage-racking and modular drawer cabinets. Today, Lyon continues its commitment to helping distributors and end-users store and organize their products while maximizing workspace.

High Density Storage Solution

Lyon Workspace Products offers a complete line of modular drawer storage cabinets and accessories that provide the maximum use of cubic space for the highest level of product storage density. Lyon modular drawer cabinets are the best solution for the secure, organized storage and retrieval of small to mid-sized products.

Drawers can be subdivided into an infinite range of custom compartments to better organize your products. Lyon drawers are ergonomically designed to bring these individual compartments to full view at the best possible human reach points. This results in improved worker efficiency and increased productivity while often doubling storage capacity within the same amount of floor space.

Installations ranging from a single-freestanding cabinet to multiple-stacked groups of cabinets provide flexible solutions to meet every storage requirement while maximizing your storage space. Lyon modular drawer cabinets have been designed for applications in many fields like:

- Manufacturing
- Government
- Utilities
- Transportation
- Healthcare
- Education and more...

Customizing the Right Storage Solution

Contact us with your special requirements; Lyon's engineering and manufacturing departments will develop a unique modular drawer cabinet to fit your special application.

Quick-Ship Program

Lyon has developed a unique manufacturing process that provides quick delivery of all products shown in this catalog, usually within 10 working days.

Why choose Lyon Modular Drawer Cabinets...

...to provide you with the highest density storage solution for small to mid-sized products, while reducing your storage footprint by as much as 50%.

Performance

The Lyon drawer suspension features the highest quality ball bearing rollers resulting in the "smoothest" operating drawers in the industry, empty and fully loaded.

Accessibility

Full extension drawers provide 100% visibility to the stored product. Lyon drawers are ergonomically engineered to provide the best possible human reach points.

Efficiency

Drawer interiors can be sub-divided into compartments for the storage of parts without cartons. Neat and organized storage improves inventory control.

Security

Choose from many different types of latching systems to provide for the safe secure storage of valuable products.

Modularity

Flexible design based on a "Building-Block" approach. From pre-engineered to custom-built products, Lyon offers an innovative array of easy order options to adapt to your future growth.

NOTE: With a fully loaded (400 lbs.) drawer capacity, Lyon averaged 8,000 cycles compared to 4,000 competitive cycles before drawer push-pull forces exceeded 50 lbs.

Organized Storage

Designed for Efficiency, Engineered for Strength!

2 Different Locking Systems

Single Drawer Access **250 Cabinet Series**

Automatically locks unopened drawers when one drawer is pulled out, preventing accidental tipping.

The only "True-Interlock" in the industry.

Multiple Drawer Access **251 Cabinet Series**

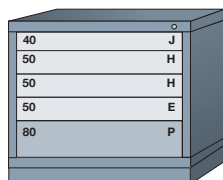

Provides access to multiple drawers, and is an economical alternative, but requires proper anchoring to prevent accidental tipping.

Both styles include a keyed lock with 2 keys, pre-punched anchoring holes, and fastener kit. Cabinets can be anchored to each other, to a wall, or to the floor.

Custom Design Ordering Guide/Housing Selection

Step 1

Select Housing (see below)

Example = **No. 490** (Standard-Counter)

Step 2

Select Drawers (see page 29)

Example = See cabinet illustration example
(Total of drawer numbers = cabinet number)

Step 3

Select Locking System (see page 30)

Example = **No. 250** (Single Drawer Access)

Step 4

Select Colors (see page 30)

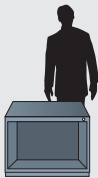

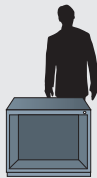

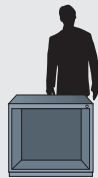

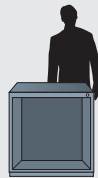

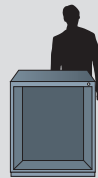

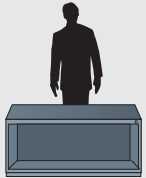

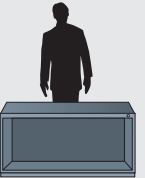

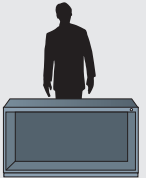

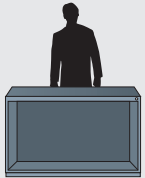

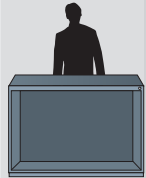

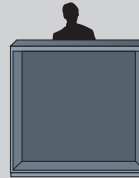

Step 5

Select Layout Kit Configuration (Optional, see page 30)

Example = See cabinet illustration example

Step 1 - Housing Selection

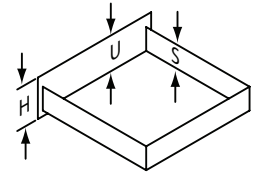

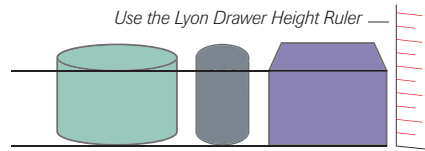

Determine which cabinet meets your workspace requirements in terms of utilization and ultimate location as suggested below. All housings are 28-1/4" deep.

	Tops add utility for use as desks, worktables or work benches				Highly visible work surface	For maximum cube utilization
	Desk (26-7/8" High)	Table (30-1/8" High)	Bench (33-1/4" High)	Mid-Range (37-3/16" High)	Counter (44-1/4" High)	Eye-Level (59-1/4" High)

Standard (30" Wide)	 270	 310	 350	 400	 490	 680
Medium (36-3/8" Wide)	 270M	 310M	 350M	 400M	 490M	 680M
Extra (44-3/8" Wide)	 270X	 310X	 350X	 400X	 490X	 680X
Double (59-5/8" Wide)	 270XL	 310XL	 350XL	 400XL	 490XL	 680XL

Drawer Selection

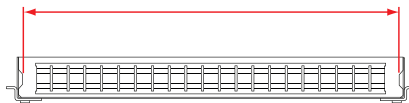

Step 2 - Drawer Selection

Determine which drawers are needed by measuring the height of the products being stored. Then choose drawers with "Usable Heights" **slightly larger** based on the housing width chosen in step 1. The total of the drawer numbers must add up to the housing number. (see example below).

Example of Drawer Selection

When selecting drawer configurations you must add the drawer numbers to equal the last 3 digits of the Housing.

490 Housing

- (2) 40 Drawers = 80
- (1) 50 Drawers = 50
- (1) 60 Drawers = 60
- (1) 80 Drawers = 80
- (1) 100 Drawers = 100
- (1) 120 Drawers = 120

Total = 490

Locking, Color and Layout Selection

Step 3 - Locking Selection

Determine which locking system meets your requirements. Then add the three (3) digit prefix (**250** or **251**) to the housing and drawer catalog numbers chosen in steps 1 & 2.

Single Drawer Access 250 Cabinet Series

Automatically locks unopened drawers when one drawer is pulled out, preventing accidental tipping.
The only "True-Interlock" in the industry.

Multiple Drawer Access 251 Cabinet Series

Provides access to multiple drawers, and is an economical alternative, but requires proper anchoring to prevent accidental tipping.

Both styles include a keyed lock with 2 keys, pre-punched anchoring holes, and fastener kit. Cabinets can be anchored to each other, to a wall, or to the floor.

Step 4 - Color Selection

Determine your color, then add the two (2) letter ■ digits (seen to the right) as a **prefix** to the catalog numbers chosen.

DD
Dove
Gray

PP
Putty

BB
Wedgewood
Blue

HH
Roaring
Red

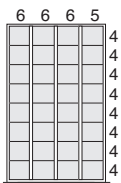

JJ
Forest
Green

KK
Vulcan
Black

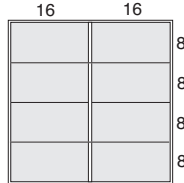

AA
Ash

Step 5 - Layout Selection (optional)

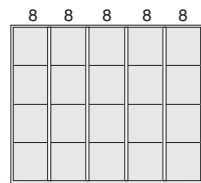

Determine your drawer layout kits based on the drawer width as shown in the illustrations below. Add a dash, followed by the letter(s) of the layout kit as a suffix to the drawer catalog number. (i.e. **DD25040-E**, see the example below). This option will provide factory installed layout kits.

Mobile Workstations

Mobile Workstations

Side-by-side cabinets provide a workshop on wheels.

- All units are 28-1/4"d
- Cabinets supported by a reinforced bottom pan for rigidity

- All keylocks within a workstation are coded the same unless otherwise requested
- Includes tubular handle w/rubber end caps
- Includes (2) fixed and (2) swivel w/brake, 6" dia. x 2"w casters (2,800 lb. capacity)

- Polyolefin caster tread does not mar floors
- Cabinet ships pre-assembled. Field assembly required for casters and handle

Step 1 - Housing Selection

Choose housing based on height, width, and locking system.

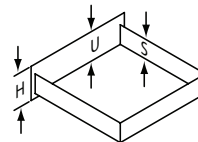

Cat. No.	Height	Width	Lock
250350W1000	39-3/4" (Bench)	45-5/8"	Single Drawer Access
250350W2000		60"

251400W1000	43-3/4" (Mid-Range)	45-5/8"	Multiple* Drawer Access
251400W2000		60"	

**It is recommended that the drawer latch-in/latch-out or the housing external lock bar be utilized to minimize the potential for tipping during transit.*

Step 2 - Drawer and/or Swing Doors

Choose two (2) sets of either drawers, swing doors, or combinations to add-up to the catalog number based on the housing chosen in step 1.
