# OPEN SYSTEMS.

## ADVANTAGES OF THE METRO OPEN CASE CART SYSTEM.

Open Case Carts are typically used in facilities that have a dedicated process utilizing clean and dirty travel routes to and from the operating room; or the operating rooms are designed around a central sterile core. The open carts provide some distinct advantages over enclosed carts—lighter weight, open space to see through while in transit, easier to clean and they are more compact. The shelves are easily adjusted on 1" increments.

Metro Open Case Carts are available in corrosion-proof durable Super Erecta Shelf® stainless steel models. They offer easy adjustability of intermediate shelves, quick access to contents and easy mobility. Choose from accessories such as ledges and dividers to customize to your exact needs. Cart washable. Contact your Metro representative for information on Metro's line of open case carts.

Stainless Steel Casters are specially designed to provide easy maneuverability even through frequent cart washings. Features long wearing, shock absorbing polyurethane tread.

# OPEN OPPORTUNITIES.

**CASE-OH24**– High profile units provide more capacity per square foot when space is at a minimum.

**CASE-OL36**– Low profile units with swaged posts can double as a back table.

**CASE-OL36H**– Low profile units with one-piece handle posts are easily maneuvered and ideal for the service core.

One-Piece handle is ergonomically designed to provide control on low profile carts.

Stainless steel ledges and dividers help contain and organize products on the shelf.

Open case carts are configured from the vast array of sizes available in Metro's Super Erecta® and Super Adjustable2™ Super Erecta® wire shelf lines. Choose from 18", 21" and 24" (457mm, 533mm, 610mm) depths and 24", 30", 36", 42", 48" and 60" (610mm, 762mm, 914mm, 1067mm, 1219mm, 1524mm) lengths.

# CLOSED SYSTEMS.

**CASE-H24**– High profile cart saves floor space and minimizes bending. Medium capacity, small footprint.

**CASE-H36**– Cart for large or multiple cases, commonly used for orthopedics. High Capacity, moderate footprint.

**CASE-L36**– Cart for the majority of applications. Medium capacity with functional work surface.

**CASE-L24**– Cart is space efficient and can be used for minor surgery, labor and deliver and outpatient procedures. Low capacity with functional work surface.

**CASE-L48**– Cart for large cases commonly used for orthopedics. High capacity with functional work surface.

Convenient door catch holds doors securely open during the procedure as well as through the cart wash cycle.

Ergonomic designed, full length handles (on both sides of the low profile carts) allow for convenience in pushing or pulling from either end and provide better cart control.

Double Panel Door for optimum strength. Recessed latch eliminates a catch point. Two door models have a center flange to stop splashes from entering cart.

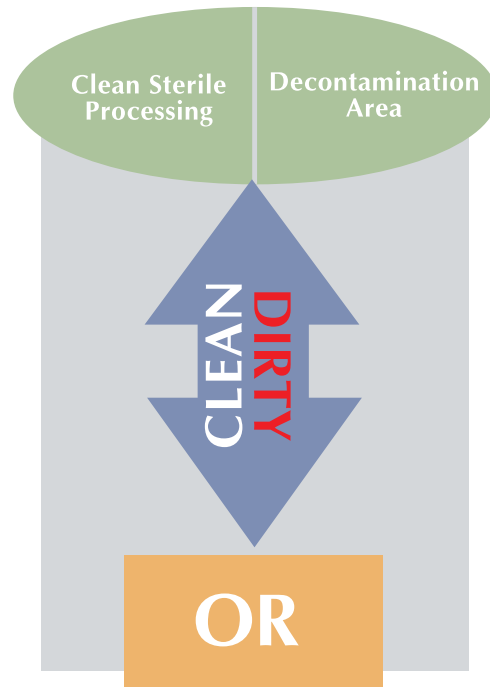

Optional wire roller shelf, pulls out halfway, easily and quietly, even at the bottom level where accessibility is vital. Also available in solid or wire without roller.

# UNDER CONTROL.

## ADVANTAGES OF THE METRO CLOSED CASE CART SYSTEM.

Enclosed case carts are required when transport between sterile instrument and supply storage and the surgical area is accomplished via a common or non-dedicated corridor. The enclosure is intended to protect sterile instruments and supplies from the environment on the way to the operating room and protect the environment from the soiled instruments on the return trip.

Metro enclosed carts are engineered to provide solutions for easy transport and access of surgical supplies. Metro's line of high- and low-profile closed case carts provide the most combined storage capacities in their five sizes than any other cart provider in the marketplace. Ergonomically designed handles, space efficient footprint and your choice of stainless steel or polymer casters provide you with superior maneuverability. Access to contents is made even easier, with roller shelves that extend quietly, and with low effort, even at the lowest levels. All closed case cart shelves are adjustable at 2" increments along the inside height of the cart.

### Custom Capabilities

- Extended tops for use as a back table
- Tote boxes
- Carts modified for elevator coupler systems
- Custom sizes or design
- Over-the-road models
- Security Seal lock on doors
- Various caster options

Stainless Steel Casters are specially designed to provide easy maneuverability even through frequent cart washings. Features long wearing, shock absorbing polyurethane tread.

Polymer Casters are an economical, maintenance-free option and are cart-washable, while providing the same weight load capacity and long wearing tread as stainless steel casters.
