High Thread Spark Plug Type

Features

Unique **High Thread** design has the **Threads** above the **Motor Seat** resulting in a compressive seal when installed. Ideal for high compression and high performance engines. Conventional spark plug has thread below the motor seat.

Advantage

Allows the placement of the spark plug into a smaller 10mm diameter design envelope while maintaining electrical, mechanical, and durability characteristics associated with a 14mm conventional spark plug design.

First Letter	P	Diameter of Ground Shield	10.0mm
Second Letter	Z	Firing Location	25.5mm
Additional Letter	T	Plug Family	High Thread
First Number	2	Heat Range	0 - Cold; 5 - Hot
Suffix Letter/s	F FE FP	Platinum Enhancements (Pt)	F — F - Fine Wire Center Wire FE — F - Fine Wire Center Wire, E - Large Pt Pad Strap FP — F - Fine Wire Center Wire, P - Small Pt Pad Strap

Product Information

Motorcraft® Spark Plug Transition

Half Thread to Full Thread

The AGSF can replace AWSF, but the AWSF cannot replace the AGSF. The difference is in the thread length rather than the overall plug length. Some engines have the AWSF thread design machined into the head assembly, intended for ease of assembly in the plants. The full thread design, AGSF, meshes with the half thread holes in the head in exactly the same location with the additional threads located above the mesh engagement.

“HALF THREAD” AWSF-type

“FULL THREAD” AGSF-type

Note that there is a clearance above the thread-to-head interface

Motorcraft® Spark Plugs

New Nickel-Plated Shell Coating

Designed, engineered and recommended by Ford Motor Company.

Resists Corrosion

- Better than any other coating, impervious to salt damage
- Permits service intervals often greater than 150,000 miles

OE Replacement Plugs

- Majority of current model year OE replacement plugs are nickel plated
- Available in service for most prior model years of our long-life plugs

Motorcraft® Part Numbers for New Nickel-Plated Plugs

Motorcraft P/N	Replacing Part Information
AGSF12FM1F4	Does not replace another P/N

Motorcraft® Spark Plugs . . .

offered in a broad range of options for domestic and imported cars and for all size trucks. Motorcraft® also supplies plugs for all popular marine, farm, industrial, and small engine applications.

1 NON-EXTENDED TIP

- For most older cars and some new truck applications.
- Available for many applications in suppressor, or non-resistor (standard) types.

2 EXTENDED TIP

- Insulator tip and electrodes extend into combustion chamber to provide good combustion initiation and reduced fouling at low speeds.
- The extended tip is cooled by incoming fuel-air mixture. (Example: AWSF42C)
- Extended tip plugs cannot be used in all engines – consult application section of this catalog.
- Supplied in suppressor, or non-resistor (standard) types.

3 EXTRA EXTENDED TIP

- Insulator and electrode extends further into the combustion chamber for optimum spark gap position. (Example: AGSP33C)
- Shares the same fouling resistance and self-cleaning features as the extended tip.
- Extra extended tip plug cannot be used in all engines – consult application section of this catalog.

SPARK PLUGS CONTINUED

4 SPECIAL EXTENDED TIP

- Share the same design benefits for self-cleaning as an extended tip plug, plus the electrodes project further into the combustion chamber for the optimum position of the spark gap.
- The shell may have a long pilot beyond the tip of the threads, i.e., AGSF34C, BSF44C, or the electrodes may just project farther than a regular extended tip, i.e., AGS44.
- Special extended tip plug cannot be used in all engines – consult application section of this catalog.

5 NON-EXTENDED AND EXTENDED GAP RACING GROUP

- Special cold heat ranges with selected gap configurations and electrode alloys to meet requirements of all types of racing engines.
- Provides optimum combustion initiation under all racing conditions with all types of fuel.
- Consult Racing Heat Range Chart.

6 DIESEL ENGINE GLOW PLUG

- Diesel engine glow plugs are designed to heat air in the engine pre-combustion chamber to assist cold engine starting and fuel vaporization.
- Identified by a prefix letter coding of ZD.

Platinum Spark Plugs

The same well engineered and tested plugs that have 100,000 mile replacement intervals on many new Ford vehicles are now available as service replacements for earlier vehicles. Because of platinum's high melting point, it provides superior resistance to erosion. Less erosion means 60,000 to 100,000 mile intervals between spark plug changes while still maintaining optimal engine performance. Platinum plugs are designated by the letter "P", "E", "F", "FE", "FM", "FP", or "WM" in the part number suffix.

(P, E or W) Single Platinum Spark Plugs

Single platinum (P) tip plugs are designed and recommended for use in conventional distributor-equipped ignition systems. Typically 60,000 mile service interval. Single platinum (E) tip plugs are designed for coil-on-plug ignition systems, but with the use of enhanced platinum, can result in longer service intervals of up to 100,000 miles.

(F, FE & FM) Finewire Platinum Spark Plugs

The Finewire platinum was designed to improve electrode wear beyond the capability of the E & P levels of platinum enhancement. The quantity of platinum is 2 or 3 times greater than the P or E models and its thin, cylindrical shape serves to reduce required firing voltage. This results in diminished erosion of the platinum and robustness against fouling.

FM & FM1 include nickel plated shell.

TYPICAL FINEWIRE PLATINUM PLUG (F, FE & FM)

Original Equipment Copper Core Plugs	Can Use Platinum Tip Electrode For Extended Mileage Change Interval

Product Information

Motorcraft® Spark Plug Model Identification

The alpha-numeric system for coding Motorcraft® spark plugs provides positive identification of key product characteristics. Letters and numbers describe size and function of each type of spark plug.

Example #1

First Letter	Second Letter	Third Letter(s)	First Number	Second Number	Suffix Letter(s)	Suffix Letter/Number
Thread Diameter	Reach	Plug Characteristic	Heat Range	Tip Configuration	Plug Characteristics	Packaging Configuration
A	G	SP	3	2	FSM	F4

Example #2

First Letter	Second Letter	Third Letter(s)	First Number	Second Number	Suffix Letter(s)	Suffix Number	Suffix Letter/Number
Thread Diameter	Reach	Plug Characteristic	Heat Range	Tip Configuration	Plug Characteristics	Gap Size	Packaging Configuration
A		SF	5	2	C	-7	F6

First Letter	A =	14mm	3/8" Gasket Seat	A7C, AS4C	The First Letter in the part number designates the "Thread Diameter." It can also designate the "Thread Reach" when NOT followed by the second letter E, G, L V, W, Y Z See Special Example (Shown on P-9)
	A =	14mm	.460" Conical Seat	ASF22C, ASF52C	
	B =	18mm	1/2" Gasket Seat	BTS8	
	B =	18mm	.468 Conical Seat	BSF44P, BSF82C	
	F =	1/2" Pipe Thread		F11	
	T =	7/8" - 18	5/8"	TT10	
	PZT =	—	High Thread	PZT2FE	

Second Letter	E =	.472 Gasket Seat	AES4C, AE22C	The Second Letter in the part number designates the "Thread Reach" only when the second letter is E, G, L, V, W, Y, Z
	G =	.750" Gasket Seat	AG24C, AGS42C	
	G =	.708" Conical Seat	AGSF22C, AGSF43C	
	L =	7/16" Gasket Seat	AL7C, AL82	
	T =	Transport (Hard Surface)	TT10	
	W =	.708" (.288 Short Travel)	AWSF44C	
	Y =	.968" (.360 Short Travel)	AYFS22FM, BYSF3-4 (18mm thread)	
	Z =	25mm (.984) Partial Thread	AZFS22FE	

Third Letter(s)	A =	Extra Wide Ground Electrode	AWSFA32C	The Third Letter(s) can be used in combinations and they indicate specific spark plug characteristics and/or spark plug types. (Examples: SF, SP, PR, SFA, etc.)
	F =	Conical Seat	ASF42C, A7C	
	P =	5/8" Hex	AGSP32C, AGSP52C	
	S =	Suppressor (Carbon)	ASF44P	

First Number	02 – 09	Extremely Cold	AYFS092CFEC	The First Number shows the spark plug heat ranges from zero up. Double digit numbers 10 and 11 are exceptions to the general rule and designate very hot spark plugs.
	1 – 3	Cold	AGSF12FM, AGSF32C	
	4 – 7	Medium	ASF42C, A7C	
	8 – 10	Hot	BSF82C, BTS10	

Second Number	No #	Non-Extended (Standard) Tip	ASF4C, BSF6	The Second Number indicates the spark plug tip configuration, EXCEPT in the case of a double digit heat range number. (Examples: 09, 10, 11)
	2	Extended (Power) Tip	AZFS22C, AGSP32C	
	3	Extra Extended Tip	AGSP33C, AGSF43C	
	4	Special Extended (Long Pilot) Tip	AGSP54C, BGSF44P	

Product Information

Example #1 and Example #2 Continued

Suffix Letter(s)	C	Copper Core Electrode	AGSF24C	The Suffix Letter(s) can be used in combinations and they indicate specific spark plug characteristics. (Examples: C1, FE, FEM, WM, YPC, etc.)
	1	Special Ground Electrode	AGSF12FM1	
	E	Enhanced Platinum Electrode	AGSF32FEC	
	F	Finewire Platinum Center Electrode	AGSF32FM	
	S	Special Resistor	AGSF22FSM	
	M	Nickel Plated Shell	AYFSF22FM	
	P	Standard Platinum Electrode	ASF42P	
	W	Platinum Iridium Center Electrode	AGSF22WM	
	Y	Small (less than .7mm dia.) Finewire Center Electrode with Platinum Copper Core Ground Electrode	AGSF22YPC	

Suffix Number	-4	.040" or .044" gap	BYSF3-4	The Suffix Number indicates the factory set spark plug gap.
	-6	.060" gap	AGSF22C-6	
	-7	.070" gap	ASF52C-7	

Suffix Letter/Number	None	10 Pack Carton		
	F4 =	Flat Pack Display carton with 4 Spark Plugs		
	F6 =	Flat Pack Display carton with 6 Spark Plugs		

Special Example

First Letter	Second Letter	Third Letter(s)	First Number	Second Number	Suffix Letter(s)	Suffix Letter/Number
Thread Diameter	Reach	Plug Characteristic	Heat Range	Tip Configuration	Plug Characteristics	Packaging Configuration
P	Z	T	2		F	F4

First Letter	P =	10mm	Ground Shield Diameter	Identifies the size of the ground shield that protrudes through the cylinder head and into the combustion chamber.
--------------	-----	------	------------------------	--

Second Letter	Z =	25.5mm	Firing Location	Identifies the firing location in relationship to the seating surface of the cylinder head.
---------------	-----	--------	-----------------	---

Third Letter(s)	T =	High Thread	Plug Family
-----------------	-----	-------------	-------------

First Number	1	Cold	The First Number identifies the spark plug heat range from one up.
	3	Medium	
	5	Hot	

Second Number	No Number	Non-Extended Standard) Tip	The Second Number indicates the spark plug tip configuration.
---------------	-----------	----------------------------	--

Suffix Letter(s)	F =	Finewire Platinum Center Electrode	The Suffix Letter(s) can be used in combinations and they indicate specific spark plug characteristics. (Examples: FP, FE, etc.)
	E =	Enhanced Platinum Electrode	
	P =	Standard Platinum Electrode	

Suffix Letter/Number	F4 =	Flat Pack Display carton with 4 Spark Plugs
	F6 =	Flat Pack Display carton with 6 Spark Plugs

Product Information

Torque Information

Use shown values only when threads on spark plugs are clean, dry and smooth, the plug has been finger tightened and a new folded gasket used (except in the case of tapered seats). The use of thread lubricants is not recommended but if lubricant is used, torque values should be reduced to avoid possibility of over torquing.

*** For 14mm and 18mm tapered seat** – if no torque wrench available – tighten 1/16 turn (snug) after finger tight.

Heat Ranges and Sizes

Each type of plug must be built in a number of specific heat ranges in order to meet the demands of different engines and varying types of operation.

Heat range refers mainly to firing tip temperature and is controlled by the length of the insulator tip. With a long tip, heat must travel farther before reaching the shell, from which it can be transferred to the cooling system. The heat transfer takes longer, causing the plug to run hot. With a short tip, the distance is shorter, so the heat is transferred faster and the plug runs cooler.

Dimensional relationships are extremely important. They have been clearly standardized by SAE. The thread diameter, of course, must match the threads in the engines. The "reach" dimension is of critical importance, since it determines the position of the electrodes within the combustion chamber. Improper reach plugs can result in severe engine damage (the piston could hit the plug) or poor performance (gap not positioned properly, affecting the fuel ignition).

Note: Consult Spark Plug Heat Range charts as a further double check for correct reach and heat range interpretation of two-digit and three-digit spark plug numbers.

PLUG THREAD	POUND FEET	NEWTON-METER
CAST IRON HEADS		
10mm Gasket Seat	7-11	10-15

Important

Canadian regulations require that vehicles and other devices (other than aircraft) equipped with internal combustion engines using spark ignition systems and manufactured or imported into Canada on or after September 1, 1976 be operated in conformance with restrictions on radio frequency interference. Use of non-resistor on non-inductive type spark plugs may cause such vehicles or devices to be out of compliance with these regulations.

LOOKING FOR CLUES?

When investigating your customers' spark plugs, take a close look at the evidence. A worn or fouled spark plug may be an indication of another engine concern. For example, oily deposits on a plug may mean that the piston rings, cylinder walls or valve guides are excessively worn. Use this handy chart as your spark plug diagnostic guide. Your customers will appreciate your findings.

And, when you do need to replace spark plugs, install Motorcraft® Spark Plugs. The only spark plugs designed, engineered and approved by Ford as original equipment on all Ford and Lincoln-Mercury vehicles. That means the latest technology and the highest performance standards available. And, reliability that can only come from Ford.

CONDITION (Photo Depiction)	DESCRIPTION	PROBABLE CAUSE
1. Worn	Rounded electrodes, slight deposits	Served useful life.
2. Fuel Ash	Red-orange deposit	Fuel additives in mixture.
3. Carbon Fouled	Dry sooty deposit	Over-rich mixture, too many cold starts before engine reaches operating temperatures.
4. Fuel Fouled	Wet carbon deposit	Over-rich mixture, restricted air cleaner.
5. Oil Fouled	Oily deposit	Piston rings, cylinder walls or valve guides excessively worn.
6. Oil Ash	Grey brown deposit	Fuel or oil additives entering combustion chamber.
7. Pre-Ignition Melting	Melted electrodes, blistered insulator	Low-engine coolant, too hot a plug, glowing combustion chamber deposits, electrical cross fire, loose installation.
8. Prolonged Pre-Ignition	Melted Insulator	Same as above, over longer time period.
9. Detonation	Broken insulator tip	Over-advanced timing, low octane fuel, lean mixture.
10. Mechanical Damage	Bent ground electrode and/or broken insulator tip and bent center electrode.	Small foreign object in combustion chamber.

Engine Identification

Domestic Passenger Car and Light Truck Engine Identification

Whenever a VIN character follows an engine, e.g. 2.3L (A), Motorcraft® recommends using the VIN to correctly identify the engine and corresponding Motorcraft spark plug application.

Note: Information for engine identification refers only to the engine originally installed.

Wire Splice Tool Kit

Part Number 164-R5903

Integrated Wire Splice Tool Kit for the maintenance and repair of electrical wiring harnesses.

Designed, engineered and recommended by Ford Motor Company

Wire Splice Tool Kit

Rotunda Part #: 164-R5903

Ford has identified through testing and engineering analysis the optimal repair procedure for solderless wire splicing.

In support of this new wire repair procedure, Ford is pleased to release to the field the new integrated Wire Splice Tool Kit. This unique kit was designed by Ford Engineering to provide all dealers access to all the approved application tools and components required to complete a repair that meets Ford Motor Company engineering specifications.

- 164-R5901 Ratchet Action Crimp Tool (3 crimp cavities)
- 164-R5902 Shielded Flameless Heat Gun with deflector, stand and spare orifice
- Assortment of 20 pcs. of 22-18, 20 pcs. of 16-14 and 15 pcs. of 12-10 AWG butt splices (55 pcs. in total)
- Adhesive-lined Heat Shrinkable Tubing - 2" cut pieces (55 pcs.)
- 1 each of WT-56814, WT-56815 and WT-56816 Motorcraft® Wire Splice/Shrink Tubing Package
- Metal carrying box with metal latch and a foam insert to protect and secure application tools
- Rotunda / Motorcraft® graphic labels
- Inside matrix label with illustration and replenishment part numbers
- Crimp/Heat Shrink Wire Splice Procedure Instruction Sheet
- Crimp Tool and Heat Gun Instruction Sheets
- Plastic storage containers for butt splices (3) and heat shrink tubing

Motorcraft® Wire Splice/Shrink Tubing Packages

■ The new Motorcraft® wire splice/heat shrink packages are to be purchased as replenishment parts for the new ROTUNDA Wire Splice Tool Kit. They contain 5 uninsulated butt splices, 5 pieces of dual wall adhesive-lined heat shrink tubing and the new instruction sheet detailing the approved wire splice procedure as defined by Ford Motor Company.

■ The package will construct five complete splice repairs and are available in three wire ranges:

Motorcraft® Part #: Wire Range

WT-56814 22-18 AWG

WT-56815 16-14 AWG

WT-56816 12-10 AWG

Expanded wire gauge applications for these splices can be found in TSB 03-11-6

■ Ford Engineering has determined that the combination of the crimped uninsulated butt splice insulated with a 2" piece of adhesive-lined heat shrink tubing has proven superior in terms of strength, durability, and corrosion resistance. When heated, the tubing shrinks and the adhesive lining melts and flows to form a rugged, environmentally sealed barrier against corrosion, and eliminating the potential deterioration and integrity of the vehicles electrical wiring harness.

■ As separate components, these butt connectors and heat shrinkable tubings are known for their superior quality and performance. Combined, you can not achieve better results, and this is precisely why Ford Motor Company has chosen this combination for repairing wiring harnesses.

■ Recommended Application Tools:

164-R5901 Ford Approved Crimp Tool

164-R5902 Shielded Flameless Heat Gun

Refer to Technical Service Bulletin Number 03-11-6

Actual inside diameter before shrinking
.225"
Insulate with ES-1

Motorcraft® Part #:
WT-56816

Replenishment package contains:
5 splices / 5 heat shrinkable tubing

Actual inside diameter
12-10 AWG

Actual inside diameter before shrinking
.225"
Insulate with ES-1

Motorcraft® is a registered trademark of Ford Motor Company.

Chemicals and Lubricants

Recommended Chemicals and Lubricants

The following pages contain Motorcraft® Chemicals and Lubricants that are related to servicing the vehicle systems within this Catalog for the user's convenience.

Motorcraft® Chemicals & Lubricants have been specifically engineered to fulfill your automotive needs; they are custom designed to complement the style, function, and appearance of your vehicle. Each product is made from high quality materials that meet or exceed Ford Motor Company's rigid specifications. For best results, only use Ford Motor Company approved products.

Dealers and Ford Authorized Distributors Please Note:

The use of Ford or Motorcraft® brand parts or products is mandatory on all repair claims paid by Ford Motor Company unless otherwise specified in Emissions, Safety Recalls, Owner Notification Programs, TSB's or other Ford Motor Company publications. The cost of non-Ford/Motorcraft® products used for a warranty or ESP/ESC, or AWA repair without justifying their use, (i.e., emergency repair or National Out-of-Stock) is not reimbursable and is subject to chargeback.

Further information on these Chemicals & Lubricants, including the related Material Safety Data Sheets, can be found on the <http://www.qcdealer.com> website by clicking on "Parts" section and then "Chemicals and Lubricants". The website is searchable by part number, MSDS number, or a direct on-line link to products organized by class. The site also contains regulatory information pertaining to health, safety, and the environment.

For Ford Authorized Distributors, the <http://web.mcdistributor.ford.com/> website is another resource for Chemical & Lubricant product info as well as unique distributor benefits such as the Truckload Ordering Program.

Chemicals and Lubricants

Power Flush Injector Fluid

Features

- For use with injector cleaning equipment
- Fast action – cleans dirty injectors in minutes
- Reduces deposit-related engine knock
- **Do not add to fuel tank**

Specifications

Part Number	PM-5
Size	8 fl. oz.
Internal Reference Number	158039
Unit Pack	12 (Case qty.)

Silicone Brake Caliper Grease and Dielectric Compound

Features

Brake Applications

- Lubricates disc brake caliper slide pins
- High resistance to water and heat
- Compatible with EPDM rubber

Ignition System Application

- Provides high-voltage seal to secondary ignition wires
- Suppresses voltage leaks by coating inner distributor cap surface

Specifications

Part Number	XG-3-A
Specifications Number	ESE-M1C171-A
Size	3 oz.
Internal Reference Number	014471
Unit Pack	12 (case qty.)

Chemicals and Lubricants

High Temperature Nickel Anti-Seize Lubricant

Features

- Provides high temperature lubrication – up to 2552°F 1400°C.
- Prevents seizing and galling of metal parts.
- Guards against rust and corrosion caused by chemicals and weathering.
- For use when replacing oxygen sensors

Specifications

Part Number	XL-2
Specifications Number	ESE-M12A4-A
Size	8 oz.
Internal Reference Number	029083
Unit Pack	1

Cataloging & Product Line Inquiry/Comment Form

If you would like to state any concerns or make recommendations about the following:

- Product application omissions
- Cataloging part number recommendations
- Application recommendations

Please fill out the attached Cataloging & Product Line Inquiry/Comment Form.

Send completed form to:

Motorcraft® Publications
Mail Drop MD-31, Room 1119D
29500 Plymouth Road
Livonia, MI 48150

Your comments can also be sent directly to Motorcraft® Publications via FAX No. (734) 523-6159.
