REFRIGERATION PRODUCTS

TECHNICAL CATALOG

A BRAND OF MUELLER INDUSTRIES

Mission

We are a quality manufacturer and supplier of refrigerant valves, components, and value-added assemblies to the HVAC and refrigeration market.

We will be a global supplier of diversified valves, components, and value-added assemblies achieving growth and top performance through:

Excellent customer service.

Creative and innovative advancements, and

Maximizing our core manufacturing capabilities.

“RELENTLESS PURSUIT OF EXCELLENCE”

Sales/Customer Service

Mueller Streamline Co.

CYCLEMASTER® Ball Valves

Standard

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- Full port construction to match line size ID
- Internally equalized ball design
- Rupture-proof encapsulated stem
- MCM™ Seal Technology
- UL/cUL Listed, CE Certified

References

- * Reduced Port
- ** Where Applicable
- *** Consult Factory
- ‡ Standard product offering includes drilled/ tapped feature
- Prefix AP Drilled/ tapped

CYCLEMASTER® Ball Valves

Actuated Standard

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Power Supply: 24 VAC
- Ambient Temperature: -22°F to 130°F, -30°C to 54°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- Full shutoff capability
- Gradual open/close stops line hammer
- Remote operating capability
- Removable actuator for quick change replacement
- Manual override and valve positioning
- Electronic overload protection
- UL/cUL Listed, CE Certified

Motor Specifications

Motor Series	Torque (in-lb)	Power Consumption	Running Time (seconds)
1	44	2.5	90
2	132	3.0	125
3	310	7	125
4 **	620	16	125

References

- * Reduced Port
- ** Consists of two stacked motors operating in tandem
- Prefix AWS Actuator includes auxiliary switch
- Warning Heater assembly required for low temperature applications
- Warning Motors not for use in wet or applications where moisture will condense on motor

Multi Split Ball Valves

The Multi Split ball valve series provide a variety of configurations to allow total flexibility for Variable Refrigerant Zoning Systems. Sizes ranging from 1/4" through 5/8" connections in both flare and solder configurations are fully ported to ensure no pressure drop during system operation, while providing complete isolation of individual branches and circuits when closed.

All models have been designed to minimize space constraints, and include a standard Schrader valve while incorporating standard safety and convenience features such as rupture proof stems and a quick turn cap. Optional insulation kits custom made for each individual body style are also available.

Multi Split Ball Valves

Flare x ODS

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils, including R410a
- Full port construction to match line size ID
- Internally equalized ball design
- Rupture-proof encapsulated stem
- MCM™ Seal Technology
- UL/cUL Listed, CE Certified

Specialty WOG Ball Valves

Oil Drain

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Brass and stainless steel construction
- Compatible with most fluids
- Quarter turn operation for positive shutoff
- Designed for maximum flow and minimum pressure drop

Component Parts

Retrofit Cap

Features:

- Designed to replace existing caps on installed valves for the full range of CYCLEMASTER® Ball Valve sizes 1/4" to 3 1/8"
- Large nut secures cap assembly to valve neck allowing center post to easily turn for on/off operation and clear visual identification
- Uses dual o-ring stem seals and base seal to assure positive isolation

References

- * For use with 3-Way Ball Valve manufactured prior to Nov. 2006
- ** For use with 1 1/8 Straight valves manufactured after Jun 2010

Check Valves

Flare to Flare

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Pressure to open: < 1 psi
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- Teflon seat for positive isolation and pulsation dampening
- Enhanced internal design for maximum flow and minimum pressure drop

Check Valves

Magnetic

Features:

- Maximum working pressure (PS): Charted below
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- Built-in 30 mesh stainless steel screen
- Internal components installed with DuraForm Technology
- Mechanically formed solder cup stops for easy installation
- Flexible for installation in vertical or horizontal position
- Hermetically formed solid copper body assures zero leak potential

Check Valves

Four-Bolt

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested
- Design features easy removal and reassembly of internal components
- Forged brass body exceeds the most stringent quality standards in the industry
- Horizontal or vertical installation (not to be installed with bonnet facing down)
- "Y" type design provides minimal pressure drop and increased flow capacity
- Non-asbestos gasket material ensures seal integrity, while a heat-stabilized Teflon seat provides seal across wide temperature ranges

References

- * Includes standard 2 lb spring
- ** Replacement kit includes seat holder subassembly, cover gasket and 2 lb spring

Brass Compressor Valves

Double Port, Solder

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested
- Asbestos-free valve packing
- Valve openings designed for maximum flow and minimum pressure drop

References

- * Valve kit includes valve, gasket and bolts
- ** Replacement kit contains components to pack stem (pack gland, packing and pack washer)
- *** Cap and cap gasket kit
- **** Seal cap and o-ring kit
- ***** O-ring included

Cast Iron Compressor Valves

Four-Bolt Flange Union, Solder

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested
- Asbestos-free valve packing
- Valve openings designed for maximum flow and minimum pressure drop

References

- * Valve kit includes valve, gasket and bolts
- ** Replacement kit contains components to pack stem (pack gland, packing and pack washer)
- *** Seal cap and o-ring kit

Cast Iron Compressor Valves

Screw Compressor

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested
- Asbestos-free valve packing
- Valve openings designed for maximum flow and minimum pressure drop
- Manufactured with high strength components ideal for screw compressors

Packed Line Valves, Angle

**Backseating Solder
to Solder**

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- Forged brass body
- Plated steel stem suitable for refrigerants and other industrial fluids non-corrosive to brass and steel
- Asbestos-free stem packing material

Packless Diaphragm Valves

Angle, NPT/FE to Flare

Features:

- Maximum working pressure (PS) with the flow in the direction of the arrow on the body: 700 psig, 48 bar
- Maximum working pressure (PS) with the flow against the direction of the arrow on the body: 300 psig, 24 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Listed, CE Certified
- Forged brass body with full size openings for maximum flow and minimum pressure drop
- Fitted with two stainless steel diaphragms and one phosphor bronze diaphragm for positive isolation
- Thermally stable hand wheel for operation in wide temperature ranges
- Counter seat design assures no moisture intrusion

Features:

- Maximum working pressure (PS) with the flow in the direction of the arrow on the body: 700 psig, 48 bar
- Maximum working pressure (PS) with the flow against the direction of the arrow on the body: 300 psig, 24 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Listed, CE Certified
- Forged brass body with full size openings for maximum flow and minimum pressure drop
- Fitted with two stainless steel diaphragms and one phosphor bronze diaphragm for positive isolation
- Thermally stable hand wheel for operation in wide temperature ranges
- Counter seat design assures no moisture intrusion

Brass Angle Isolation Valves

Solder to Rotolock

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested
- Asbestos-free packing material
- Quick-change packing gland allows easy replacement without refrigerant loss
- Solid brass construction for maximum protection in all environmental conditions
- Backseating design

Steel Angle Isolation Valves

Manual stem service valves are typically installed in systems to isolate circuits or critical system components, thereby allowing access to the refrigeration system for repair purposes while safely assuring no loss of refrigerant. Valves in this product category can have many different body styles including forged brass and cast iron versions that mount directly on compressors, as well as angle style in solder and rotalock configurations that can mount in circuits, lines, or on adapter fittings.

The Steel Isolation Valve series (SIV) have been designed for ultimate flexibility and performance in any system. The unique design starts with a flexible 3-gauge port configuration allowing easy access to any service port no matter where the valve is mounted in the system. Each valve has dual ports on either side of the valve which remain open during normal operation and can be used with pressure switches or gauges as required for system operation or service purposes. The top service port is the furthest back of all ports, and is completely isolated when the stem is fully back-seated. This port can be used for pressure readings or charging/evacuation when slightly cracked from the back-seat.

Valves may be further customized to any design requirement by identifying individual ports that should be permanently sealed using the special locked brass seal cap option that protects ports from unwanted tampering and potential leaks.

All valve bodies are specially plated to maximize protection against rust while also offering unique solid copper connections that allow for easy and quick installation.

Steel Angle Isolation Valves

Solder, Rotolock

Upcoming Release. Contact Factory for Details.

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- 100% tested

Pressure Relief Valves

Selection Process

A Pressure Relief Valve (PRV) is a system safety device that has been designed to function in accordance with specific country codes to prevent and protect the operation of systems and vessels above allowable safe levels.

Relief valves conform to the American Standard Safety Code for Mechanical Refrigeration (ANSI/ASHRAE 15), and are designed and manufactured in accordance with ASME Section VIII Division I, certifying specific capacities and identified by the ASME and National Board NB stamps on each valve. These valves are also compliant with European Union Pressure Equipment Directive (PED 97/23/EC), and exhibit the appropriate EC marking and identification number.

Relief valves operate automatically when the system pressure exceeds the valve set pressure and exerts a force on the valve disc that overcomes the opposing internal spring force. By code, valves may open with allowable tolerances within a +/- 3% range of stamped set pressure, with full discharge capacity realized at 10% above the actual opening pressure.

Selection of a relief valve should be based on the discharge capacity required for the system or vessel, based on the size of the equipment and the refrigerant being used. Minimum settings for valves should be at least 25% above the designed Maximum Operating Pressure, while additional consideration must be given if the valve location may experience high ambient temperatures such as an equipment room or rooftop. Sizing valves to the maximum allowable setting will minimize the possibility of seepage or early discharge.

While valves are designed to reseal after discharge, it is advisable that they are replaced, since system impurities such as piping debris, solder, and metal shavings can accumulate under the valve disc and inhibit the proper resealing of the valve.

Selection of a relief valve:

Determine the discharge capacity based on system design.

Determine the pressure setting required, ensuring the valve is at least 25% higher than maximum system operating pressure.

Verify system operating temperatures and expected ambient conditions for valve setpoint consideration.

Determine the connection size required.

Discharge Capacity

The minimum required discharge capacity of the pressure relief device or fusible plug for each pressure vessel is determined by the following formula, specified by the ASHRAE Standard 15, Safety Code for Mechanical Refrigeration:

$C = kfDL$ where:

C = minimum required discharge capacity of the relief device, lb. air/min (kg air/min)

D = outside diameter of vessel, ft (m)

L = length of the vessel, ft (m)

k = factor dependent on units used ($K = 1$ for I-P units, $K = 4.88$ for SI units)

f = factor dependent on the kind of refrigerant from Discharge Capacity Chart

Pressure Relief Valves

Certification

Certifications:

Conforms to ASME Section VIII, Division I and The National Board of Boiler & Pressure Vessel Inspectors, Certificate Number 16,564

Conforms to Pressure Equipment Directive 97/23/EC B. CE Certification Number 69517, BSI Product Services Notified Body Number 0086.

Canadian Registration Number 0G0314.9C

Certification Documentation Levels:

Level 1 Certificate: A Certificate of Conformance can be provided based on customer request at the time of order placement, or after customer receipt of product. Information necessary to provide a Certificate of Conformance includes: customer name, purchase order number, manufacturing part number, quantity shipped and date of shipment.

Level 2 Certificate: A Certificate of Conformance and a UV-I Form can be provided based on customer request at the time of order placement, or after customer receipt of product. Information necessary to provide a Certificate of Conformance includes: customer name, purchase order number, manufacturing part number, quantity shipped and date of shipment.

Level 3 Certificate: A Certificate of Conformance can be provided based on customer request at the time of order placement. A serialized certificate can be provided to document the pressure setting of each valve at the point of production.

Pressure Relief Valves

Angle NPTFE to Flare

Features:

- Working temperature range (TS): -40°F/300°F, -40°/149°C
- Designed primarily for use on liquid receiver applications above the liquid refrigerant level (it is recommended that the factory be consulted before the valves are used on ther applications)
- Satisfy ASHRAE Standard 15 code requirements for a refrigerant vessel safety device (Application information can also be found in ASHRAE Guide and Data Book)
- Comply with ASME code for unfired pressure vessels
- Discharge rates are certified by National Board of Boiler & Pressure Vessel Inspectors
- Designed for maximum discharge capacities

References

- * CE Certified, CRN, Compatible with all CFC, HCFC and HFC refrigerants and oils
- *** Prefixed for standard pressure settings
- ** CE Certified, CRN, Compatible with all CFC, HCFC and HFC refrigerants and oils, Compatible with R410A

Features:

- Working temperature range (TS): -40°F/300°F, -40°/149°C
- Designed primarily for use on liquid receiver applications above the liquid refrigerant level (it is recommended that the factory be consulted before the valves are used on other applications)
- Satisfy ASHRAE Standard 15 code requirements for a refrigerant vessel safety device (Application information can also be found in ASHRAE Guide and Data Book)
- Comply with ASME code for unfired pressure vessels
- Discharge rates are certified by National Board of Boiler & Pressure Vessel Inspectors
- Designed for maximum discharge capacities

References

- * CE Certified, CRN, Compatible with all CFC, HCFC and HFC refrigerants and oils
- ** Prefixed for standard pressure settings

Internal Pressure Relief Valves

Internal pressure relief valves (IPR) are compressor safety devices that limit the maximum operating pressure of the compressor. Valves are designed in accordance with individual country code requirements, and are set to open at specific settings when the high side to low side differential pressure has been exceeded.

When the valve opens, high side pressure is relieved to the low side and once equalized the IPR valve will reseal. When evaluating compressor problems, it is important to note that small amounts of system contaminants may become trapped in the relief valve seat area, potentially allowing some high to low side leakage within the compressor.

Ball Isolation Valves for Relief Valves

Ball isolation valves for relief valves (BIR) are designed to ensure that there is no flow restriction created during normal operation with the attached relief valve or rupture disc assembly, while providing complete isolation of the circuit when necessary for routine maintenance or replacement.

Depending on specific local or country codes, BIR valves can be used for relief valve isolation as long as they are supplied in an open position as certified by the manufacturer. In accordance with this requirement, valves are only provided in the open position with a sealed safety wire around the cap assembly. Valves can only be shut off by removing the sealed safety wire and cap assembly, which should only be performed by authorized service personnel who must then replace the sealed safety wire assembly with their own identifiable method.

Ball Isolation Valves for Relief Valves

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- No flow restrictions to the attached relief valve circuit
- Full isolation of relief valve circuit for maintenance or replacement
- Various connections available
- Multiple cap options
- Tamper-proof wire lock

Rupture Discs

Rupture discs are non-resealing system safety devices that are typically used in conjunction with pressure relief valves, and are designed to function in accordance with specific country codes to prevent and protect the operation of systems and vessels above allowable safe levels.

The domed style non-fragmenting disc is housed inside a single piece brass body, that has two threaded access ports for gauge and transducer installation, which provide a visual and electronic signal for opening indication. Rupture discs have been designed to be used with relief valves to prevent any leakage through the PRV, and a total loss of refrigerant after the disc bursts.

Rupture Disc and Pressure Gauge

NPTFE X NPTFI

ASME Code

Guidelines for the application of Rupture Disc Devices in combination with pressure relief valves is provided by ASME Code. The following is an excerpt from the ASME Code, Section VIII, Division I, UG-127.

A rupture disc device may be installed between a pressure relief valve and the vessel provided:

The marked capacity of a pressure relief valve, when installed with a rupture disc device between the inlet of the valve and the vessel, shall be multiplied by a factor of 0.90 of the rated relieving capacity of the valve alone.

The space between a rupture disc device and a pressure relief valve shall be provided with a pressure gage, or suitable telltale indicator. This arrangement permits detection of disc rupture or leakage.

Features:

- Working temperature range (TS): -40°F/300°F, -40°/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- CE Certified Category 4 Product, Certified to meet ASME Code
- Wide range of pressure settings available
- One-piece brass design assures setting accuracy
- Non-fragmenting disc

RELIEFMASTER® Change-Over Manifold

Changeover manifolds are service valves that have been designed to be used with pressure relief valves and rupture discs, providing the ability to isolate one valve circuit from the other, so that routine maintenance or replacement can be easily made while the system is operative.

Manifold valves have two internal seats that provide complete isolation of either individual relief valve circuit, while ensuring a pressure drop that is compatible with the relief valve and rupture disc. Relief valves and rupture discs should be sized individually so that either circuit has sufficient capacity for the system or vessel protection, and the changeover manifold must correspond by being set in either the forward or back seat position, and not an intermediate position.

RELIEFMASTER® Change-Over Manifold

NPTFE x NPTFI

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°C/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- Allows easy replacement of attached relief valves and rupture discs while the system is operative.
- Dual internal seats ensure complete isolation of individual circuits.
- Available with various inlet connections.
- Multiple cap options available.

Butterfly Valves, Lug Style

Suction Line Refrigerant

Upcoming Release. Contact Factory for Details.

Features:

1. Body Cast Iron, Epoxy coated ASTM A126 CL.B
2. Body Bushing PTFE
3. Liner Neoprene with Phenolic Backing
4. Stem Stainless Steel ASTM A582 Type 416
5. Disc Ductile Iron ASTM A536 Grade 65-45-12 (plated)
6. Taper Pin Stainless Steel ASTM A582 Type 416
7. Name Plate Aluminum
8. Shaft Bushing PTFE
9. Stem Seal Neoprene

DRYMASTER® Filter Driers

Liquid Line Flare

Features:

- Maximum working pressure (PS): 667 psig
- Maximum working temperature: 160°F/70°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils, and refrigerants requiring XHII desiccant
- UL/cUL Listed, CE Certified
- Solid core design, composed of 80% molecular sieves / 20% activated alumina for exceptional moisture and acid removal
- High retention filter for removal of particulate as small as 25 microns
- High pressure shell and connections
- Powder paint finish approved for marine applications

DRYMASTER® Heat Pump Driers

Flare Connection

Features:

- Maximum working pressure (PSI): 667
- Maximum working temperature: 160°F/70°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils, and refrigerants requiring XHII desiccant
- UL/cUL Listed, CE Certified
- High retention filter for removal of particulate as small as 25 microns
- High pressure shell and connections
- Powder paint finish approved for marine applications

DRYMASTER® Filter Drier Cores

48 Cubic Inch

Features:

- Universal replacement for 48 cubic inch filter drier cores
- 48-CGH High Capacity Core offers 100% molecular sieve composition for high drying capacity
- 48-CGM Molecular Sieve Core offers 80% molecular sieve and 20% activated alumina composition designed for polyester oils
- For use on liquid or suction line of system
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- Each core is packaged with filter pads and gasket set

Sight Glass/ Moisture Indicators

**Hermetically Sealed,
Solder x Solder**

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/185°F, -40°C/85°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Recognized, CE Certified
- Solid Brass construction, hermetically sealed
- Designed for maximum flow and minimum pressure drop
- Large viewing window and indicator for better visibility
- Provides accurate identification of system conditions

Strainers

Copper Inline

Features:

- Maximum working pressure (PS): 700 psig, 48 bar
- Working temperature range (TS): -40°F/300°F, -40°/149°C
- Compatible with all CFC, HCFC and HFC refrigerants and oils
- UL/cUL Listed, CE Certified

45° Flare Fittings

Features:

- Recommended maximum working pressure (PS): 700 psig, 48 bar
- In conformance with Refrigeration Fitting Standards SAE J513, Military Standards MS-35867 through MS35873 inclusive, MS-35919, MS-24815 and MS-16993
- Fabricated from brass forgings or drawn brass rod eliminating the possibility of seepage by porosity
- Accurately machined and fully protected against damage during shipping, handling and storage to assure tight leak-proof joints
- Smooth interior finish provides unrestricted flow and reduced pressure drop

Tees are described by first sizing the run (1 to 2) and then the branch (3).

The letter in the first position of the catalog number is derived from the name of the fitting. Examples:

B - Bonnets
E - Elbows
F - Fuse Plugs
N - Nuts
T - Tees
U - Unions

The numeral in the second position of the catalog number designates the combination of threads on the fitting.

1 - External Pipe Thread (U1, E1, T1)
2 - Flare to Flare Fitting (U2, E2, T2)
4 - Forged Nut

Indicators preceding the numeral in the second position of the catalog number designate the following:

R - Internal pipe to flare fitting (excludes tees)
R - Pipe thread to flare on the run (tees)
R - Reducing flare nut (forged nuts)
S - Short (forged nuts)

The last two characters in the catalog number designate the size. (Flare sizes are designated by numerals and pipe sizes are designated by letters.)

3 - 3/16 A - 1/8
4 - 1/4 B - 1/4
5 - 5/16 C - 3/8
6 - 3/8 D - 1/2
8 - 1/2 E - 3/4
10 - 5/8 F - 1
12 - 3/4

Order and Schedule Policy

Scope

The Terms and Conditions and Order Policy ("Terms") contained herein shall apply to all quotations and offers made by and purchase orders accepted by Mueller Streamline Co. These terms apply to all sales made by Mueller Streamline Co except the extent the Terms conflict with an agreement signed by Mueller and Buyer. These Terms apply in lieu of any course of dealing between the parties or usage of trade in the industry. These Terms may in some instances conflict with some of the terms and conditions affixed to the purchase order of other procurement document issued by the Buyer. In such case, the Terms contained herein shall govern, and acceptance of Buyer's order is conditioned upon Buyer's acceptance of the terms and conditions herein, irrespective of whether the Buyer accepts these conditions by a written acknowledgement, by implication, or acceptance and/or payment of products ordered hereunder. Mueller Streamline Co's failure to object to provisions contained in any communication from Buyer shall not be deemed a waiver of the provisions herein. Any changes in the Terms contained herein must specifically be agreed to in writing signed by a representative of Mueller Streamline Co. before becoming binding on either party.

Scheduling and Cancellation

Standard Product: Product is considered standard product if it is listed in the Mueller Streamline Co., general product catalog, or in published product literature sheets.

Scheduling Standard Product Orders: Manufacturer will build product according to the customers' written scheduled releases or forecasts for each order.

Products scheduled to ship within a thirty-day (30) window from original ship date on P.O> are non-cancelable and may only be rescheduled one time.

Products scheduled to ship within a 31-60 day window may be rescheduled, but the product must be taken within three months of the original scheduled date and may only be rescheduled one time.

Cancellation of Standard Product: If Seller determines the Product being cancelled to be Standard Product, the amount of the cancellation charge will vary according to the (a) quantity being cancelled, (b) time frame between Buyer's request to Seller to cancel and the scheduled ship date for the order, and (c) dollar amount of order being cancelled. The calculation of the exact cancellation charge will be governed by Sellers published policies as amended from time to time at Seller's discretion. In no case will the cancellation charge be less than twenty percent (20%) of the original agreed upon purchase price.

Custom Product: Product is considered custom if it is not listed in the Mueller Streamline Co.'s general product catalog or in other published product literature.

Scheduling Custom Product Orders: Manufacturer will build product according to the customers' written scheduled releases or forecasts for each order.

Products scheduled to ship within a ninety (90) day window from date of request are non-cancelable. Products scheduled to ship within a 60-90 day window

from date of request may be rescheduled. The product must be taken within three (3) months of the rescheduled date and may only be rescheduled one time. In the event Mueller has established a stocking program in an effort to support customer production schedules, any uniquely purchased materials, finished goods inventory, or work in process required to build modified or custom product is the responsibility of, and must be paid for by the customer in the event of a cancellation or product modification that may result in obsolete inventory.

Cancellation of Custom Products: If the Product cancelled is Custom Product, Buyer agrees to pay Seller for all of Seller out of pocket costs associated with the cancellation or modification to parts or orders including, but not limited to: (i) raw materials, (ii) work in process, (iii) finished goods inventory, (iv) inventory carrying costs, (v) scrapping and disposal fees, (vi) administrative fees, (vii) reasonable and equitable profit for Seller (collectively, "Cancellation Expenses"). In no case will the cancellation charge be less than the Seller's actual costs (including overhead and other indirect costs). The amount of cancellation charge to be paid by Buyer shall be determined at the sole discretion of Seller and may equal 100% of the amount of the order cancelled or modified. Buyer shall be entitled to receive all raw materials and work in process, and Seller agrees to ship such goods to Buyer at Buyer's expense upon receipt of payment in full or Cancellation Expenses incurred by Seller.

Expedited Order Fees: If an order is received, or quantities are increased, for a non-stocked part, without proper lead time, Buyer's expense will include applicable surcharges for inefficiencies and costs created in production and scheduling if Seller can meet requested receipt dates. Expenses shall be determined at the sole discretion of the Seller and will minimally be the greater value of \$150 or 10% of the order total.

Order and Return Policy

Standard Order Information

Minimum Order Requirements: A minimum charge of \$50 net applies to all orders from Mueller Streamline Co. Orders less than this amount may be subject to special charges or requirements.

Package Requirements: Standard cataloged parts must be ordered in packaged quantities. If the order does not comply, Mueller Streamline Co. reserves the right to increase or decrease to the nearest standard package quantity.

Order Visibility: The customer recognizes that Mueller Streamline Co. requires visibility to complete an order in an accurate and timely manner. Depending on the part ordered, quantity required and stock on hand, the customer will be provided with lead-time information at the time of order.

Emergency Orders: Mueller Streamline Co. reserves the right to charge a special service fee for orders that are placed with short lead-time or considered emergency requirements. The charge may include a standard order fee for the entire order, a per piece fee for each part ordered, or fees to cover extraordinary costs including overtime or scheduling charges.

Special Order Information

Minimum Order Requirements: A minimum charge of \$100 net and 25 pieces minimum applies to all orders. Orders less than this amount may be subject to special charges or requirements.

Package Requirements: Depending on the part, specialized packaging may require adjustments to the order quantities to meet appropriate packaged quantities. This is subject to inquiry at the time of the order.

Order Visibility: Due to the nature of special orders, the customer recognizes Mueller Streamline Co. may not have stock available at the time of order. Due to this, Mueller Streamline Co. will require a minimum of 2 weeks to process any new part orders. Depending on the part ordered, quantity required and stock on hand, the customer may be provided with better lead-time information at the time of order.

Emergency Orders: Mueller Streamline Co. reserves the right to charge a special service fee for orders that are placed with short lead-time or considered emergency requirements. The charge may include a standard order fee for the entire order, a per piece fee for each part ordered, or fees to cover extraordinary costs including overtime or scheduling charges.

Return Policy

Return Requests: All returns to Mueller Streamline Co. must be issued a Return Material Authorization (RMA) number prior to the return of the product. The number will be provided by a Customer Service Representative. Mueller Streamline Co. reserves the right to refuse any product that has not been accompanied by an RMA number. All buyer/credit requests are to be made within 12 months of the Buyer's receipt of goods. Buyer shall provide specific original purchase information or documentation for all RMA/Credit requests. If no such information can be provided, Seller reserves the right to establish all RMA/Credit pricing.

Stocking Fees: Buyer shall assume a minimum 20% restock fee for all returns of current product where no fault was attributable to the Seller. Product must be returned in original packaging, unused, and be packaged to eliminate any possibility of damage in shipment. Mueller Streamline Co. may opt to charge a higher fee, depending on the part being returned, the quantity, or the age of the product. At any time, Mueller may decide that it will not allow the return of product based on its discretion.

Package and Shipping Requirements: The seller reserves the right to refuse returned product that upon inspection by the Seller is determined to be in "non-sellable" condition. Unless authorized by the Seller on a Mueller Streamline Co. RMA, the Buyer shall assume all return freight charges. In Seller authorized exceptions, only Mueller Streamline Co. approved carrier may be used. Any freight damaged or shipment shortage issues must be presented to the freight carrier or Seller within 15 days of the Buyer's receipt of goods.

Terms and Conditions of Sale

THE FOLLOWING CONSTITUTE THE TERMS AND CONDITIONS OF SALE FOR ALL PRODUCTS MANUFACTURED, DISTRIBUTED AND/OR SOLD BY MUELLER STREAMLINE CO. (SELLER).

ACCEPTANCE OF SELLER'S OFFER TO SELL OR BUYER'S ORDER IS EXPRESSLY MADE CONDITIONAL ON BUYER'S ACCEPTANCE OF THE PROVISIONS STATED HEREIN. BUYER'S ACCEPTANCE OF EACH SHIPMENT OF GOODS SHALL BE DEEMED TO BE AN ACCEPTANCE OF THE PROVISIONS HEREOF NOTWITHSTANDING ANY ACT OF SELLER, INCLUDING SHIPMENT, ACCEPTANCE OF PAYMENTS, AND NOTWITHSTANDING ANY TERM OR CONDITION CONTAINED IN ANY FORM OF BUYER, AND ANY PROPOSAL FOR ADDITIONAL OR DIFFERENT TERMS OR ANY ATTEMPT BY BUYER TO VARY ANY OF THE PROVISIONS HEREIN IS HEREBY DEEMED A MATERIAL ALTERATION AND REJECTED. THE PROVISIONS HEREIN MAY NOT BE ADDED TO, MODIFIED, SUPERSEDED, OR ALTERED EXCEPT BY WRITTEN AGREEMENT OR MODIFICATION SIGNED BY AN OFFICER OF SELLER, NOTWITHSTANDING ANY TERMS WHICH MAY NOW OR IN THE FUTURE APPEAR ON BUYER'S FORMS OR COMMUNICATIONS, ALL OF WHICH ARE REJECTED WITHOUT FURTHER ACTION OF SELLER.

NO PERSON (EXCEPT AN OFFICER OF SELLER) IS AUTHORIZED TO BIND SELLER TO ANY ORDER FOR ANY GOODS EXCEPT ACCORDING TO THE PROVISIONS HEREIN.

1. **PRICES.** All prices for SELLER's products are subject to change or withdrawal without notice. Unless otherwise stated by SELLER, prices, terms of payment and pricing policies will be those of the SELLER in effect at the time of shipment. SELLER reserves the right to make price changes within the periods of contracts, including installment contracts or blanket orders. The cost of packing and crating other than in accordance with the standards of SELLER may constitute an additional charge and may at SELLER's discretion be added to the sales price(s). SELLER also reserves the right to divide Buyer's order into separate shipments and to invoice and otherwise treat each shipment as a separate contract subject to these Terms and Conditions. All sales and shipments are subject at all times to credit approval by SELLER.

2. **TRANSPORTATION AND RISK OF LOSS.** Unless otherwise agreed in advance in writing by SELLER, delivery of products hereunder shall be F.O.B. shipping point, with transportation expenses paid by Buyer unless standard SELLER freight prepayment qualifications are met and the risk of loss or damage to products in transit shall fall upon Buyer (whose responsibility it shall be to file claims with carrier at delivery to Buyer at Buyer's premises) upon delivery (a) to Buyer's designated representative, or (b) to a common carrier or other designated shipper (not including SELLER), whichever of the foregoing occurs earlier. SELLER in its discretion shall select the appropriate transportation method and routing. All orders, unless otherwise agreed in writing, are for shipment at SELLER's earliest convenience. Stated delivery dates are approximate and will be calculated from the date that SELLER has received all information necessary to permit SELLER to proceed with work immediately and without interruption. If any or all products are not delivered when ready due to the request of Buyer, SELLER reserves the right to invoice Buyer at any time thereafter and to place such products in storage with all risk of loss or damage borne by Buyer and with all expenses and costs attributable thereto for the account of Buyer, which shall be payable by Buyer upon submission of SELLER's invoices to Buyer.

3. **DELAYS.** SELLER shall not be liable for any delays in delivery due or resulting in whole or in part from or made impossible or impractical by any cause beyond the control of SELLER including but not limited to fire, explosion, epidemics, accident, material and significant breakdown, strike or labor disputes, adverse weather conditions, loss or damage in shipment, shortage or lack of materials, fuel or power, sale or transfer of manufacturing facilities, embargo, acts of God, acts (including delay or failure to act) of any governmental authority (de jure or de facto) or any other contingency or delay or failure or cause beyond SELLER's control. If, due to any such occurrence, SELLER is unable to supply total demands for any goods specified, SELLER may, but shall not be obligated to, allocate production, inventory and deliveries (in any manner fair and reasonable to the extent that goods are not special or unique) and will notify Buyer reasonably that there will be delay or non-delivery.

4. **TAXES.** All prices are exclusive of any applicable foreign or U.S.A. federal, state or local sales, use, excise or other taxes, which SELLER may be required to pay or collect, under any existing or future law, upon or with respect to the sale, delivery, storage, processing, use or consumption of any of the products covered hereby, which shall be for the account of Buyer, who shall promptly pay the amount thereof to SELLER upon demand.

5. **PAYMENT TERMS AND SECURITY INTEREST.** Payment terms are set forth in SELLER's quotation to BUYER. All payments not made within such time may be subject to a carrying charge of one percent per month on the unpaid balance or the highest rate permitted by applicable law, whichever is less. Until the entire amount due hereunder is paid, SELLER reserves a security interest in all products sold, with all rights, privileges and remedies of a selling secured party in the jurisdiction to which the goods may be shipped or within which they may be kept at any time. In pursuance thereof, Buyer agrees to timely execute any documents that SELLER may request from time to time in order to give notice of, perfect or otherwise give effect to the existence of said security interest.

6. **TERMINATION.** Any cancellations, changes, or terminations by Buyer received after order placement will be subject to Seller's approval and payment by Buyer of all actual expenses incurred or for which Seller has become obligated related to the affected goods. Seller may terminate any order or any part thereof upon written notice to Buyer. Buyer waives all claims to damages upon such termination, including, without limitation, any cost of cover to obtain substitute goods.

7. **PERMISSIBLE VARIATIONS.** Seller reserves the right to ship and Buyer agrees to accept, overages or shortages of up to 10% of the quantity ordered by Buyer and any such overage or shortage will be charged or credited to Buyer.

8. **FINANCIAL RESPONSIBILITY.** If Seller has any reasonable doubt at any time as to Buyer's financial condition and ability to perform, Seller, at its option, may (a) decline to make further shipments other than on a cash in advance basis or upon Buyer providing other security satisfactory to Seller, or (b) terminate this agreement.

9. **RECEIVING AND INSPECTION.** Any claim by Buyer based upon or relating to any claimed defect in the products ascertainable upon visual inspection thereof, including without limitation any claim relating to size, type, quantity or shipping damage and the like, must be presented to SELLER or its representative within fifteen (15) days following the date of receipt of the product by Buyer. Buyer's receipt of any product delivered hereunder shall be an unqualified acceptance, and a waiver by Buyer of any and all such claims with respect to such product unless Buyer gives SELLER notice of claim within fifteen (15) days after such receipt. Unless otherwise agreed in advance in writing by SELLER, variations in the products as to composition, dimensions, quantity and the like shall be permissible and not cause for Buyer's rejection or revocation if within prevailing industry (United States of America) standards. Buyer assumes all risk and liability for results.

Terms and Conditions of Sale

10. TOOLING. Buyer will indemnify, defend and hold SELLER harmless from and against any liability, damage, loss or expense arising from the use or handling of any tooling supplied or designed by Buyer from which products are to be cast or manufactured by SELLER.

11. PATENT INDEMNITY. SELLER agrees to protect, indemnify and hold harmless the Buyer, its successors, assigns, customers and users of its products against any liability, loss, damage or expense whatsoever resulting from any infringement of any United States Letters Patent by any thing, number, material, design, composition, or processing of SELLER's origin or practice supplied by SELLER. With respect to any thing, number, material or design, composition, or processing, specified by Buyer and not of SELLER's origin or practice, BUYER agrees to save SELLER harmless from any liability, loss damage or expense whatsoever resulting from any infringement of any United States Letters Patent arising out of SELLER's making, using or selling the same for or to BUYER in fulfillment of its orders or contracts. SELLER and BUYER severally agree to notify the other in writing promptly of any charge of infringement made and of any suit brought in respect to such device or composition and to assume or tender to the other the full control of the defense or settlement of such suit in accordance herewith.

12. WARRANTY. Seller warrants only to Buyer that products furnished of Seller's own manufacture will conform to prevailing (United State of America) industry standards as to quality, inspections, composition, quantity and type, and will be free from defects in workmanship and materials under normal conditions of use and service for a period of one year from the date of receipt by Buyer, or 18 months from the date of manufacture of the products. This warranty will not apply to damage resulting from normal wear, improper installation, misuse or neglect. Seller does not warrant any aspect of product representation, installation, modifications or manufacturing carried out by parties other than Seller nor does Seller's warranty extend to any products used in combination with Seller's goods, and Buyer indemnify, defend and hold harmless Seller for any loss, cost or expense to which Seller may be exposed as a result of any such activities by Buyer, Buyer's customers or other suppliers. Weight figures shown in Seller's catalogue and price sheets, and documents of sale are approximate only. Product is sold on a per unit basis not on a weight basis. Seller's sole obligation for failure to comply with this warranty will be, at its election, to repair or replace the defective product where Buyer notifies Seller and such product is made available to Seller for inspection F.O.B. Seller's facility or point of manufacture [within the year warranty period. Except to the extent that (1) descriptions of size, quality and type, which may appear on Seller invoices and other documents, and (2) statements of conformity of products with specification of certain industry, government, or professional organizations standards, which may appear as product information disclosures in Seller's literature and documents, may from time to time be construed to be express warranties.. THIS WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

13. LIMITATION OF LIABILITY. Under no circumstances will Seller's liability in the aggregate to Buyer under any legal theory, including without limitation, breach of contract or warranty, or commission of any tort, including negligence and strict liability, or claims for indemnification, exceed the invoice price for the affected product. Buyer must commence any action at law or in equity against Seller within one year after the product is delivered to Buyer. Buyer will not have any recourse against Seller for any loss, which reasonably could be prevented by cover or otherwise. Exceptions to Seller's warranty and limitation of liability provisions or waivers of the same granted by Seller will not constitute a precedent, default or waiver of Seller's rights to enforce such provisions in whole or in part in the future. SELLER WILL NOT BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY KIND WHATSOEVER, WHETHER ANY CLAIM OR POTENTIAL CLAIM IS BASED UPON THEORIES OF CONTRACT, NEGLIGENCE, OR TORT AND INCLUDING WITHOUT LIMITATION, SELLER WILL HAVE NO LIABILITY FOR SHIPPING CHARGES, LABOR, INSTALLATION, COSTS OR ANY OTHER LOSSES OR EXPENSES RELATED TO OR ASSOCIATED WITH THE INSPECTION, REPAIR OR REPLACEMENT OF THE WARRANTED PRODUCTS.

14. DEFAULT. Buyer will be in default if (a) Buyer fails to pay Seller any amount when due under this agreement, (b) Buyer otherwise fails for a period of five days after receiving written notice from Seller to fulfill or perform any provisions of this agreement, (c) Buyer becomes insolvent or bankrupt, or a petition is filed voluntarily or involuntarily and not dismissed within 30 days of filing, or (d) Buyer makes a general assignment for the benefit of its creditors, or a receiver is appointed, or a substantial part of Buyer's assets are attached or seized under legal process and not released within 30 days thereafter.

Upon buyer's default, Seller may, at its option, without prejudice to any of its other rights and remedies, and without demand for payments past due, (a) make shipments subject to receipt of cash in advance, (b) terminate this agreement and declare immediately due and payable the obligations of Buyer for goods previously shipped, notwithstanding any other provision in these terms and conditions, (c) demand reclamation, or (d) suspend any further deliveries until the default is corrected, without releasing Buyer from its obligations under this agreement. In any event, Buyer will remain liable for all loss and damage sustained by Seller because of Buyer's default.

15. OTHER. (a) SELLER accepts no responsibility to BUYER or to any person claiming by or through BUYER, for compliance with any statute, governmental rule or regulation made applicable to this contract by reason of BUYER's intended use of the products unless SELLER has received from BUYER prior timely written notification of such statute, rule or regulation and has accepted the same by a separate writing signed by an officer of SELLER.

(b) SELLER's forbearance or failure to enforce any of these conditions as set forth herein or to exercise any right accruing from any default of BUYER shall not affect, impair or waive SELLER's right if such default continues or if any subsequent default of BUYER occurs.

(c) The provisions herein constitute the entire agreement between BUYER and SELLER and no terms or conditions other than those stated herein and no agreement or understanding oral or written in any way purporting to modify these conditions shall be binding on SELLER unless hereafter made in writing and signed by SELLER's authorized representative. All orders are subject to acceptance at SELLER's offices and BUYER and SELLER's contract shall be construed in accordance with the laws of Tennessee. Any disputes arising under these terms and conditions, and the orders to which they pertain, shall be brought exclusively in Shelby County, Tennessee.

(d) The provisions of this agreement shall be considered severable. In the event that any of the provisions, or portions or applications thereof, of this agreement are held to be unenforceable or invalid by any court of competent jurisdiction, all remaining portions shall remain in full force and effect in accordance with the spirit of this agreement.

(e) The rights and obligations of BUYER and SELLER hereunder shall not be assigned to any third party without the prior written consent of the other party.

(f) ACCEPTANCE OF THE PRODUCTS SOLD HEREUNDER SHALL CONSTITUTE ASSENT TO THESE CONDITIONS AND SELLER HEREBY OBJECTS TO AND REJECTS ANY AND ALL ADDITIONAL OR DIFFERENT TERMS PROPOSED BY BUYER, WHETHER CONTAINED IN BUYER'S PURCHASING OR SHIPPING RELEASE FORMS OR ELSEWHERE. ALL PROPOSALS, NEGOTIATIONS, AND REPRESENTATIONS, IF ANY, MADE PRIOR AND WITH REFERENCE HERETO ARE MERGED HEREIN, AND ANY PROPOSED ADDITIONS, MODIFICATIONS, DELETIONS OR CHANGES NOT IN SEPARATE WRITINGS SIGNED BY AN OFFICER OF SELLER ARE REJECTED WITHOUT FURTHER ACTION BY SELLER.

Notes

This image shows a full page of blank white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page, providing a template for writing or drawing. There are no margins, text, or other markings present.
