Mortise and Deadbolt Locksets with Solid Brass Trim

Omnia's locksets with solid brass trim are the locks of choice when optimum security and stunning design are the objective. An extensive range of knob and lever styles in traditional, ornate and contemporary motifs are available with either mortise or tubular deadbolt lock options.

Built to withstand heavy use, our commercial grade, **UL listed**, fire rated, mortise locks combine precision engineering for security and durability with attractive designs. Available with two backset options (2 1/2" and 2 3/4"), all of our mortise locks are designed for use with heavy brass knobs or levers, with special springing provided on lever sets. A special rose assembly is bolted through the locks, and backplates feature a unique inside-to-outside mounting. Outside roses or backplates are always screwless.

Omnia's line of deadbolt locksets provide the ease of installation, while maintaining the stylish look of a mortise lockset. Unique to all Omnia deadbolt locksets is the sleek, distinctive, flush-mount cylinder design which not only enhances their appearance, but provides excellent protection against tampering with the cylinder mechanism.

To truly set off an entry in the grand style, while providing unmatched security, only Omnia mortise or deadbolt locksets will do.
