HAND-HELD CONTAINERS

BULKPAK CONTAINERS

CUSTOM

PALLETS

ENVIRONMENTAL

Sustainable Solutions

Reduce | Reuse | Recycle

Welcome to the ORBIS Product Selection Guide.

As leading companies continue to drive sustainability in their business, they scrutinize every point of their supply chain, including the packaging used to move their product.

Reusable plastic containers, pallets, dunnage and bulk systems improve the flow product all along the supply chain, to reduce costs, enhance profitability and add sustainability.

Helping Customers Drive Sustainability

ORBIS helps world-class customers move their product faster, safer and more cost-effectively. Using a proven approach, ORBIS experts analyze their customers' systems, design a solution and execute a reusable packaging program for longer-term cost savings and sustainability. Using life-cycle assessments to compare reusable and single-use packaging, we help our customers reduce their overall environmental impact.

By design, reusable containers and pallets are used over and over during the course of their service life. At the end of their life, they can be recovered, recycled and reprocessed into new packaging products...without entering the solid waste stream.

Sustainability is at our Core

ORBIS is a part of Menasha Corporation, the 3rd oldest family owned business in the United States. As a steward of sustainability, ORBIS is committed to a better world for future generations. We track and measure our own resource utilization to continuously conserve natural resources and reduce waste.

We are passionate about helping our customers drive their sustainability each and every day to improve their business.

ORBIS. Just another way that Green Leads to Green.

IMPLEMENTATION SERVICES

ORBIS helps world-class customers move their product faster, safer and more cost-effectively. With on and off-site implementation support, container management programs and industry-leading recycling services, ORBIS helps today's leading companies reduce their costs and drive sustainability. Step by step, ORBIS' packaging professionals help companies optimize their supply chain with plastic reusable packaging.

Using a proven 5-step approach, ORBIS experts analyze their customers' systems, design a solution and execute a reusable packaging program for longer-term cost savings and sustainability. In many industries, ORBIS leads the implementation of reusable packaging systems that drive supply chain optimization.

With industry experience and supply chain knowledge, ORBIS experts help design and implement an effective reusable packaging program to meet your requirements. ORBIS Engineering Services experts are available on-site or off-site to seamlessly implement cost-effective reusable packaging programs.

Projects can range from one day to one year or more, depending on the application. The goal is to use packaging, engineering, material handling and logistics experience to increase the speed and effectiveness of your implementation. The Engineering Services team can provide a variety of services that add value to your program.

- >> Needs assessment
- >> Cost-benefit analysis
- >> Right-sizing studies
- >> Inbound/outbound freight analysis
- >> Packaging standards development
- >> Work station analysis
- >> Material flow analysis
- >> Environmental analysis

NEW!

ORBIS offers Environmental Analysis Services to compare and evaluate the environmental impacts of single-use and reusable packaging. Using life-cycle data, ORBIS helps companies determine the energy, greenhouse gas and solid waste impacts of their packaging.

Rely on ORBIS' industry experts to create a product and service program to add system-wide efficiency. In their analysis, they review the following drivers to fully understand what impacts your implementation:

- >> Marketplace trends
- >> Supply chain complexities
- >> Regulatory issues
- >> Supplier relationships
- >> Customer requirements
- >> Labor practices
- >> Transportation standards
- >> Cleanliness requirements
- >> Import/export requirements
- >> Product life cycles

With this understanding, ORBIS is able to recommend, design and implement an effective packaging solution for sustained cost savings.

Using our proven approach, ORBIS integrates all aspects of planning to deliver a seamless implementation that meets your financial and operational objectives:

Step 1: ANALYZE

The optimization process begins with a careful analysis to identify the product flow, determine the application and prioritize the packaging objectives (protection, improved transportation efficiencies, etc.)

Step 2: PROVE

Before a reusable packaging program decision can be made, it is important to demonstrate and prove how the packaging and related services translate into measurable efficiencies. The potential return on investment is calculated using metrics like time savings, cost reductions, safety, cleanliness or warehouse utilization.

Step 3: DESIGN

Upon approval, we start planning and designing the program. To meet the needs of your entire operation, we help you choose from our standard products or develop customized solutions, if necessary. In either case, the objective is to optimize your supply chain

whenever and wherever we can. To further validate the solution, pilot programs can be conducted.

Step 4: IMPLEMENT

Once the plan is complete, the ORBIS products (hand-held containers, bulk containers, plastic pallets, sheets and dunnage) are delivered and seamlessly integrated into your system. ORBIS can oversee the entire implementation to ensure long term success. (training, automated equipment interface, etc.)

Step 5: EVOLVE

Supply chain systems are dynamic and the packaging programs that support them must evolve with them. New product launches, quality improvements, changing production processes and new labor practices may require new and innovative reusable packaging. On an ongoing basis, we'll work with you to incorporate these innovations to sustain your long term productivity and profitability.

REUSABLE PACKAGING MANAGEMENT

To accelerate the return on your packaging investment, ORBIS offers Reusable Packaging Management services. The effective management of your reusable packaging fleet can minimize loss and optimize supply chain efficiency. ORBIS experts work closely with you to identify your needs and develop an asset management system that will provide long-term value at all points in the supply chain.

ORBIS collaborates with customers to design and manage customer-owned reusable packaging fleets to increase inventory velocity, minimize dwell time and eliminate downtime. ORBIS' value-added services include:

- >> Container demand planning
- >> Container fleet rightsizing
- >> Asset tracking
- >> Inbound/outbound freight analysis and planning
- >> Management of supplier container inventories
- >> Cleaning, sorting and repair

ORBIS operates service centers across the United States to support customers' pallet and container programs. In today's complex supply chains, it is critical that your packaging is available when and where you need it. ORBIS specializes in offering the technology, experts, processes and infrastructure to create a sustainable reusable packaging program, so you can focus on your business.

RECYCLE WITH ORBIS

Recycle with ORBIS is a comprehensive program designed to effectively recover, recycle and reprocess plastic material into other useful products.

By design, plastic reusable packaging can be fully recycled into other useful products at the end of its service life. ORBIS is an environmentally conscious company that provides alternatives to the disposal of excess, surplus, damaged or obsolete plastic packaging.

ORBIS recycles polyethylene and polypropylene material. To facilitate the efficient recovery of material, ORBIS can purchase end of life plastic products or provide credit.*

ORBIS accepts plastic material from a wide range of industries:

- >> Automotive
- >> Grocery/bakery
- >> Food processing
- >> Beverage
- >> Textile

Typical plastic products we recycle include:

- >> Crates, containers and trays
- >> Pallets and divider sheets
- >> Bulk containers

Complete your Recycling Profile today.

Visit the "Recycle with ORBIS" section of www.orbiscorporation.com or contact your ORBIS sales representative for additional information.

**For more information about any of ORBIS' services,
please contact your Sales Representative today!**

HAND-HELD CONTAINERS

ORBIS offers a variety of straight-wall and stack and nest containers, totes and bins for a wide range of applications.

Straight-wall containers provide superior cube efficiency to allow more product per container for increased productivity. Their smooth interior walls are ideal for dunnage.

Stack and nest containers are available in several styles to add superior space savings for efficient storage and distribution. ORBIS containers stack when full, either with a bail, cover or when rotated at 180 degrees. When empty, they efficiently nest inside one another for superior savings.

All ORBIS containers protect product during picking, assembly, processing, storage and distribution applications in a wide variety of industries, including beverage, dairy, pharmaceutical, poultry, automotive, appliance, aerospace, bakery, produce, apparel and electronics.

- >> Standardized sizes for industry pallet footprints
- >> Optional attached or detached covers for added product protection
- >> Compatibility with automated systems
- >> Protected areas for labels and RFID tags
- >> Easy to clean
- >> Greater ergonomics than disposable packaging

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

STAKPAK SYSTEM

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

The StakPak System offers more than 20 straight-wall modular containers with advanced features to optimize your reusable packaging system. The StakPak container system is designed for just-in-time applications where the same containers are used for shipping, storage and work-in-process.

Difficult to determine what container size you need? Talk to your ORBIS Sales Representative about Engineering Services and rightsizing initiatives. See pp. 1-2 for more information.

Reinforced external ribbing adds maximum stacking strength.

Continuous bumper to keep dirt and dust from contaminating product.

Drain holes in bumper and handles for washing.

Innovative CrossPak™ design offers secure stacking of mixed container loads.

Compatible with AIAG pallets, top caps and seat belt systems. (See pp. 89-90)

See next page for attached and detached lid options.

* When containers are stacked on top of each other, approximately 1/2" is lost to nesting. Example: Bottom container in a stack is 7.5" in height. Containers of the same height stacked on top of it are 7.0" in height.

** In use, ORBIS does not typically recommend stacking these containers to the full 50" height due to weight and safety considerations.

Add length, width or height to an existing injection-molded StakPak to create a durable, reusable container to fit your application.

Cut-N-Weld™ containers offer the strength of injection molding and a short lead time, while eliminating the tooling costs associated with a custom order. (See p. 58.)

Extended length pallets accommodate ORBIS' Cut-N-Weld™ containers. Available in both 45" and 48" widths. See pp. 91 and 93.

Optional handholes with or without plastic handle inserts.

Multiple identification options available.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

STAKPAK LIDS & OPTIONS

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

ORBIS has the most comprehensive offering of covers, including attached-lid or detached lids. Covers protect product from dust and contaminants during storage and transport.

ORBIS also offers specific identification options for StakPak containers, including cardholders, labels and hot stamping. Please note that not all options are available on all containers. Contact your ORBIS representative for more details on placement, orientation, availability, minimum order quantities, lead times and set-up charges. Nominal specifications subject to changes without notice.

Customized Hot Stamp

Label Placard 4.5 x 6.5*

Cardholders are manufactured in polyethylene and quickly snap onto StakPaks, for instant identification. These cardholders, available in a wide variety of sizes to fit on different containers, accommodate removable cards with bar codes and other identification documents.

Hot Stamp identification is also available for StakPaks. The original artwork must be supplied to ORBIS at the time of the order. Size and available location of the hot stamp will vary for each container. Minimum shipment is required.

StakPaks accommodate the **Label Placards**, developed by The Kennedy Group. Completely removable and replaceable, these label placards accommodate all types of labels. They are available in two sizes:

- 2.0" x 6.5" for 4" StakPaks
- 4.5" x 6.5" for StakPaks 5" or taller

StakPaks can also accommodate the **Smart Placard™** Radio Frequency Identification (RFID) system, developed by The Kennedy Group. This solution stores information for the efficient tracking and identification of containers, pallets and other material handling products. The reusable system provides longevity for multiple trips to reduce the cost per tag, while allowing easy removal and replacement of labels.

PALLETIZING YOUR STRAIGHT-WALL CONTAINERS

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber

ORBIS StakPak containers are designed to optimize standard 30" x 32", 30" x 36", 32" x 38", 32" x 45" and 45" x 48" pallet footprints. Please note that not all containers work on all pallet sizes. Please reference the diagrams below to confirm modularity. The pallets listed in this chart are designed to be compatible with the corresponding containers. Additional products may be compatible, but have not been tested.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

HAND HELD FOLDING CONTAINERS

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

Take the air out of shipping and storage costs with the Hand Held Folding Container System. To sharpen your material handling efficiency, the Folding Container System gets right to the point: more capacity, less wasted space, reduced shipping and storage costs, and assembles or collapses in only 3.8 seconds.

Vertically modular stack heights allow mixed loads to be shipped on the same 45" x 48" pallet for increased space efficiency and flexibility.

NEW HHFCs stack with straight-wall containers in the same footprint, for added system flexibility. All containers fit on the standard 45" x 48" AIAG pallet footprint.

NSO2422-11
on HHFC2422-11

HHFC1215-7

Molded-in cardholders provide easy access to identification cards. (HHFC models only)

HHFC2415-11

Collapses to just 3"

Ergonomic pocket handles allow safe lifting with less strain on wrist, arm and back muscles.

FC1215-075

Attached and detached lid versions available.

FC2415-075
(collapsed)

FC2415-111

Knock down ratios as high as 4.7:1 result in lower return freight and warehousing costs.

Need a dunnage solution for your folding container?

Containers with Storage Bottoms are available to safely return dunnage. Consistent inside dimensions at the top and bottom of the containers allow even multiple layer dunnage to be easily installed and removed. Please see pp. 61-64 for more information.

HAND HELD FOLDING CONTAINERS

Interested in palletizing these containers? Choose from 6 different ORBIS pallets. See p. 8 for more details.

* When containers are stacked on top of each other, approximately 0.3" is lost due to nesting. Example: Bottom container in a stack is 7.5" in total assembled height. Containers of the same height stacked on top of each other are 7.2" in height.

** Not compatible with HHFC models.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

40 X 48 ELPAK SYSTEM

Automotive Components ■ Food processing ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Food distribution ■ Electronics

This vertically modular system of stack-only and basket tray containers, top caps and dollies is standardized on the 40" x 48" pallet footprint. Applications include food processing, value-added food distribution, general manufacturing, work-in-process handling, and mechanical parts washing.

See www.orbiscorporation.com for additional details including:

- > Additional 24" x 16" and 24" x 20" sizes
- > Attached-lid or detached-lid versions
- > Hopper styles
- > Basket trays

EBTH2416-5 and ESO2416-7 on DGS6040 (dolly).

See p. 14 for dolly information.

Rigid, straight walls for cube efficiency and positive stacking.

ESO2416-7 with ECD2416 cover

Solid or ventilated sides and solid, vented, or drain hole bottom available for maximum flexibility.

AUTOMATED SYSTEMS TOTES (ASTs)

24" x 20" containers compatible with 40 x 48 MI CISS LP pallet (p. 80)

Automated System Totes (AST) are compatible with computer-assisted storage, retrieval, and parts tracking systems. These totes are ideal for automated or manual material handling and picking systems, carousels, mini-loads, tote stackers and AGVs. Multiple identification options available. Bumper and upper rim prevents shingling on conveyor systems, minimizing part damage and maximizing container flow and throughput.

See www.orbiscorporation.com for additional details about collars, covers and compatible pallets.

CONTAINERS FOR AUTOMATED SYSTEMS

Consumer Packaged Goods ■ Health and Beauty Care ■ Pharmaceutical ■ General Merchandise ■ Automotive ■ DVD/Audio

ORBIS offers a family of containers for use in today's mini-load systems to cost-efficiently standardize unit loads. ORBIS' all-plastic containers are designed for minimal deflection and will work with a variety of insertion and extraction equipment. ORBIS automation compatible containers are available in a variety of sizes and styles to meet all application needs.

Injection-molded hinged door offers excellent product protection, while providing easy access.

Molded-in channel for easy door insertion.

High cubic capacity.

4048 STACK-N-NEST CONTAINER SYSTEM

Industrial Components ■ Produce ■ Consumer Packaged Goods ■ Metal Parts ■ Bakery Items ■ Snack Goods ■ Meat/Poultry

The 4048 Stack-N-Nest System is an integrated system of 180° stack and nest containers, pallets, top caps, and dollies. Specific uses include food processing, general manufacturing, work-in-process handling, general merchandise distribution, food distribution, agricultural harvesting, and mechanical parts washing.

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Attached or detached lids make these containers ideally suited for most applications.

Column stacks of individual sizes are vertically modular, allowing level stack heights and double stacking of pallets.

Recessed and textured identification and label areas are located on the sides, ends and cover of the container. Please see p. 18 for identification options.

Recommended pallet is the 40x48-B GMA CISF LPI. (See p. 82.)

Containers available with solid or ventilated sides and bottoms for maximum air flow.

DG56040 (dolly)

- >> GSX6040-27 and GAX6040-27 containers feature a cross-stack and interlock bottom for a self-secured stack.
- >> The 6050 Series has a reinforced bottom for heavy weight loads, and a patented all-plastic attached-lid hinge element to make the container 100% recyclable and rust-free.
- >> All containers available with smooth bottom for easy cleaning, or textured bottom for conveyor system use.
- >> ESD protective materials available upon request.

FLIPAK® CONTAINERS

Healthy and Beauty Care ■ Pharmaceuticals ■ Periodicals ■ Apparel ■ Automotive Aftermarket ■ Hardware

The FlipPak family offers more than 20 container sizes with attached hinged covers that prevent expensive loss of product. These containers stack when closed or nest when open to provide the most efficient use of available space on the manufacturing floor, in the warehouse, inside a truck trailer or in the back room of your retail outlet.

Reusable for over 250 trips, FlipPak containers provide an excellent return on investment. Applications include health and beauty aides, pharmaceuticals, general merchandise, soft goods, fasteners, jewelry, office products, tapes and CD's, automotive parts, tobacco product and packaged grocery items. Multiple accessories and identification options are available, such as hot stamping, card holders, placards and dollies.

Mix loads of half-sized containers for distribution efficiency. (ie FP03 on FP075)

More than 20 sizes available

Quick-release label area on attached hinged cover and ends for easy reading and quick label exchange.

Narrow lid profile, textured bottom and optional snap (on selected totes), allow for easy conveyability.

Dollies available for easy transport

Features that Drive Efficiency in Today's Distribution Centers

Heavily reinforced hinge elements on FPN-style containers reduce breakage and cracking.

Molded-in reinforced holes for standard security ties.

Plastic hinge available for use in metal-free facilities.

Metal hinge available on selected containers.

NEW Snap Feature on lid, available on the FP182, FP242 and FP243, keeps lid closed for efficient conveyance.

Solid Bottom available for a variety of conveyor systems in today's high-speed distribution centers.

Drain Hole Bottom available for quick draining.

Plus+Grid™ Vented Bottom for easy cleaning and maximized air flow.

FP 171 Adds Transportation Efficiency

The **FP171** optimizes outbound trucks with more stacked containers per 53' trailer. Inside product clearance allows more product per container. With shorter nest stop and narrow gull wing span, more empty containers can be stacked in a standard 53' trailer for inbound trips.

Interested in recycling your plastic containers at the end of their service life? **"Recycle with ORBIS"** is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

24" X 20" FLIPAK CONTAINERS

Healthy and Beauty Care Items ■ Pharmaceutical Products ■ Food ■ Periodicals ■ Apparel ■ Automotive Aftermarket

The 24" x 20" family of FlipPak® containers are used in applications such as general merchandise and part distribution. When compared to corrugated cartons, all-plastic ORBIS containers are dimensionally consistent for repeatable performance, with no loose flaps or crushed corners to halt material handling systems. Custom containers are available.

FP261
on dolly

Totes designed specifically for automation offer locking lid, ability to band lengthwise or widthwise and textured bottom for easy conveyability.

FPN142

Sequential Numbering Hot Stamp is available with each character limited to a 1/2" height and 5 characters per line. The requirements for the area and location for sequential numbering varies for each container.

Hot Stamp identification is also available for Flipaks. The original artwork must be supplied to ORBIS at the time of the order. Size and available location of the hot stamp will vary for each container. Minimum shipment is required.

Spring Steel Clip that affixes to a container to hold order or shipping documentation. This cost-efficient option is ideal for containers in a conveying environment.

Snap-On Cardholders are available in 1-snap or 2-snap versions, attach to optional, pre-installed snaps on container, and are ideal for securing shipping and order documents. These easily removable cardholders allow for greater flexibility in product storage and transport. Replacement snaps available (Stud and Eyelet Set).

Adhesive Cardholders these clear, envelope-style cardholders have adhesive backing, are available in several sizes, and are easy to apply to many surfaces. The use of these cardholders increases inventory accuracy by facilitating easy bar code scanning in many types of automated systems.

Cardholders

Model	Outside Dimensions (in.)	
	Height	Length
CH10 - Adhesive	4.25	7.75
CH10 - 2 Snap	4.25	7.75

NEST ONLY CONTAINERS

Apparel ■ Periodicals ■ Hardware ■ Automotive ■ Health and Beauty ■ Pharmaceutical ■ Soft Goods

Nest-Only Containers meet the diverse needs of many types of order picking and shipping requirements in modern distribution systems. Durable injection-molded HDPE construction, combined with superior design make these containers returnable and reusable for over 250 trips, providing excellent return on investment and reduced distribution cost per trip over corrugated boxes. Containers with optional covers are used for wholesale and retail distribution of health and beauty aides, pharmaceuticals, general merchandise, soft goods, hardware, grocery and automotive parts. Multiple identification options and accessories available.

Smooth, drafted walls for easy handling.

Stacks firmly with covers and nests securely when empty for optimum space utilization.

DOLLIES

Industrial ■ Pharmaceutical ■ Health Care ■ Retail Display ■ Electronics ■ Food Processing ■ Medical Device

Combine totes, trays and bulk containers with ORBIS dollies for added efficiency. ORBIS offers dollies in a wide range of footprints and materials to meet a wide range of material handling needs. Non-marking casters are available for retail applications.

- > **Steel Dollies** are heavy-duty dollies available in many footprints for ORBIS and LEWISBins+ products and can be made to custom sizes. These dollies are painted in gray enamel. Stainless steel may be available in certain footprints upon request.
- > **Rotationally-Molded Dollies** are grey plastic dollies that feature smooth, contoured corners and are compatible with ORBIS 40 x 48 Stack-N-Nest Container System and EIPak System. The DGS6050 and DGS60100 is also compatible with the FP261 container.
- > The **Mobile 600** is the largest tote of the FliPak family and has casters for greater mobility.
- > **Spacesaver Dollies**, designed for the bakery industry, feature no-lip design to fit more trays per truckload. Underside of trays fit snugly in molded-in channels of the dolly.
- > The **NEW Universal Dolly** can be customized to meet unique needs.

AGRICULTURAL CONTAINERS

Leafy vegetables ■ Citrus Fruits ■ Stone Fruits ■ Vegetables ■ Organics ■ Grapes ■ Berries ■ Potted and Bedding Plants

Reliable handling, processing, storage, stocking and display is critical in today's modern food distribution systems. ORBIS offers an efficient method to protect and transport your product with high quality, impact resistant, durable and reusable hand-held agricultural containers. Choose from many styles for use in wholesale product distribution, such as field harvest, in-plant handling, staging and processing of fruits and vegetables. Containers are available in FDA-approved materials. Easily cleaned and sanitized, ORBIS containers are an economical improvement over single-use corrugated cartons and are ideal for moist environments. If FDA materials are required, please specify when requesting a quote.

FOOD HANDLING TRAYS

Confectionary ■ Bread Dough ■ Prepped Foods ■ Foodservice ■ Cafeteria

These all-plastic, stack-only, one-piece trays are designed for use in all types of food processing applications. Easy to clean trays with no deep corners or crevices ensure safe and convenient handling and long service life. Their excellent release characteristics prevent chipping and flaking and protect against product contamination. These trays have no nails to rust or corrode. Heavy-duty dollies are also available for rapid, safe transport of product.

POULTRY CONTAINERS

Chicken ■ Red Meat ■ Seafood ■ Turkey

Distribution Containers and Chill Trays are used in many types of fresh food handling and processing applications. These durable, injection-molded reusable containers provide a long service life for poultry, meat and seafood from the processing plant to distribution and retail display. Distribution Containers are available in 3 standard heights, with optional snap-tight covers. Optional drain holes are available for moisture control. Distribution Containers (NO/NOX/NPL) are compatible with standard 40 x 48 CISS LP Pallet (See p. 80) and 40 x 48 NPL 352 (p. 81). Multiple identification options and accessories available. Chill Trays are available in standard 26" x 29" footprint. Fully ventilated design speeds cooling. All products are available in FDA-approved materials. If FDA materials are required, please specify when requesting a quote.

Chill Trays

Ventilation minimizes freezing time and allows temperature control.

Nestable, for space efficiency.

Stacks with cover and nests when empty. Snap tight covers available for secure storage/transport and product protection.

NOX2416-8 with CNOX2416-3 cover

CASE READY MEAT CONTAINERS

Beef ■ Pork ■ Chicken ■ Turkey ■ Sausage ■ Patties ■ Seafood

Case Ready Meat Containers feature a well-ventilated design for the cost-effective chilling, freezer storage and distribution of meat, seafood and poultry from central processing facilities to grocery retailers. All stack with an easy-swing bail and nest when empty for reduced return transportation costs. Containers fit on the standard 40" x 48" pallet footprint designed for the food industry. All products are available in FDA-approved materials. If FDA materials are required, please specify when requesting a quote.

Controlled container tare weight, within +/- 1/2%

Open handles for secure lifting and handling

3-position plated bail on CR2420-9 3-H NPL 677 and CR2416-10 3-H NPL 678 allows maximum shipping flexibility. Bail can be positioned for varying product layer heights, so retailers can commonize on one container for all outbound shipments.

DAIRY CASES

Fluid Milk ■ Fruit Juice ■ Yogurt ■ Cheese

ORBIS Dairy Cases are designed for the efficient distribution of fluid milk products and fruit juice from dairy processing facilities to grocery stores, convenience stores and discount stores. Available in the two standard footprints mandated by the dairy industry, these cases offer exceptionally reinforced corners and bottoms. Designed for a long service life, ORBIS cases maintain their shape and performance through stacking, pressure washing and transportation.

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

See ORBIS' 40 x 40 Dairy Pallet on page 79.

This moisture-resistant plastic pallet is easy to clean and won't harbor bacteria or contaminants. Molded-in lip holds cases securely in place during transport. Narrow stringer version also available.

Case Dispenser Now Available

All plastic, fully secured case holds fluid dairy products for restaurants, concessions and cafeterias. Honeycomb design allows for easy cleaning, draining and drying.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

BAKERY SYSTEMS

Fresh Bread Loaves ■ Snack Goods ■ Cakes & Pastry Goods ■ Packaged Cookies and Pastries ■ Frozen Bakery Goods

With generous internal heights of 4.3" to 5.5", these high-profile Bread Basket systems are designed for the efficient flow of bread and baked goods throughout the supply chain...from the bakery to grocery stores, mass merchandisers, restaurants and convenience stores. When full, baskets stack securely for easy transport and merchandising. When empty, they cross-stack and nest for back room and truck space savings. Combine with pallets and dollies for a full system to quickly move, store, ship and merchandise all types of bakery items from bakery to retail.

Custom colors, hot stamping and molded in logos available

Some models available with drop sides for easy merchandising

Comfort grip open handles

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Rail and groove design facilitates blind stacking.

Space Saver Dolly

Reinforced corners

Automation compatible features

Universal Dolly

All types of dollies available for system efficiency

FDA approved materials

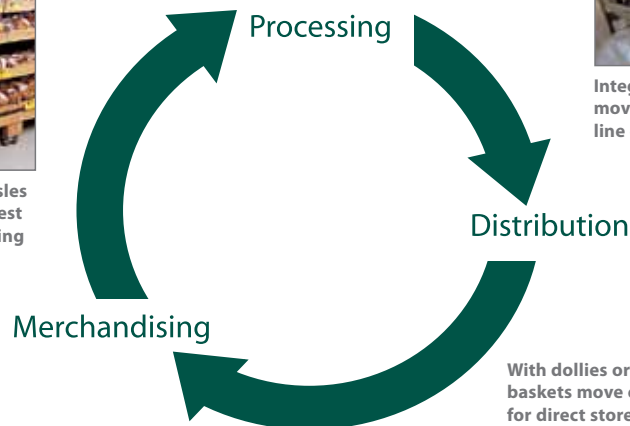

Baskets cross-stack and nest efficiently for return trip.

BAKERY SYSTEMS - BREAD

ORBIS Bakery Systems Drive Efficiency Throughout the Supply Chain

Baskets wheel easily into store aisles for merchandising. Empty trays nest for efficient return to the processing plant.

Integrates into automated systems to move bread and baked goods from the line directly into distribution.

With dollies or pallets, bakery baskets move easily into trucks for direct store deliveries

Looking for a different size? ORBIS has the largest selection of bakery baskets available in different styles, sizes and configurations. To view ORBIS' entire list of baskets, please visit www.orbiscorporation.com.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

STORAGE & ORGANIZATION SYSTEMS

Industrial ■ Pharmaceutical ■ Health Care ■ Retail Display ■ Electronics ■ Food Processing ■ Medical Device

Choose from the **LEWISBins+™** brand of plastic containers, bins and rugged metal systems to reduce linear workspace, improve assembly operations and reduce product damage. A wide array of products for all types of storage and organizational needs, some manufactured in ESD protective materials, are available through knowledgeable dealers and distributors who are dedicated to finding the best solution for your material handling applications. Visit the LEWISBins+ website at www.lewisbins.com for more information on the entire product line.

NEW! Floating Rail

- > Available in two lengths: 4" and 10"
- > Maximize space and efficiency in tight areas
- > Control wasted space with individual part bin hanging capabilities
- > Light-weight feel with comparable metal strength properties
- > Water, rust and corrosion-proof

- Storage Systems**
- > Choose from storage cabinets, floor stands, bench assemblies and wall mounted systems to optimize your facility
 - > Holds a variety of part bins to meet your storage needs
 - > NEW Floating Rail available for individual part bin hanging

ESD-Safe Products

- > Choose from ESD-Safe part bins, divider boxes, shelf bins, trays and metal systems
- > Efficiently store components, assemblies and circuit boards while protecting them from the damaging effects of electrostatic discharge and static electricity

Plexton® Containers

- > Fiberglass-reinforced containers
- > 20 styles available
- > Designed for extreme temperatures and weight
- > Metal racks available

Parts Bins

- > High-quality polypropylene bins are competitively priced to add value and efficiency
- > Bins hang or stack for versatility in controlling inventories and organizing picking systems
- > Combine with metal systems for maximum efficiency

LEWISBins+

NEW Part Bin Increases Efficiency and Organization

LewisBins+ has expanded its product offering to include its version of the industry-popular **10" x 4" x 4" part bin**. The high-performance **PB104-4** is utilized to secure storage of parts and product in industrial assembly operations, healthcare, stockroom, warehouse and hardware merchandising applications. Manufactured in polypropylene and designed for long-lasting strength and durability, the PB104-4 brings increased value and efficiency in a wide-range of work-in-process operations.

PB104-4

Wire Shelving

- > Four shelf units
- > Available in 63", 74" and 84" heights
- > 800 lbs. shelf capacity
- > Offers visibility of stored contents
- > Will not accumulate dust and dirt

Divider Boxes

- > Stack-only containers with molded-in channels for easy-to-add dividers
- > Available in 3 popular footprints and 7 heights
- > Optional covers, dollies and collars available

Shelf Bins

- > 6 industry standard sizes
- > Fits 12", 18" and 24" shelving
- > Metal shelving available

Stack-N-Nest Containers

- > Choose from 9 styles
- > Maximize warehousing space
- > Efficient and lightweight
- > Stack when full, with or without covers, and nest when empty at alternating 180° positions
- > Grey and blue are manufactured in FDA approved material

Interested in recycling your plastic containers at the end of their service life? **"Recycle with ORBIS"** is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

BULKPAK® CONTAINERS

ORBIS bulk containers protect product during picking, assembly, processing, storage and distribution applications in a wide variety of industries, including pharmaceutical, poultry, automotive, appliance, aerospace, bakery, produce, apparel and electronics.

Bulk containers offer the strength and rugged durability demanded in today's material handling and distribution systems. ORBIS offers a comprehensive selection of bulk container systems that deliver performance and add value to your operation. These containers are available in collapsible and fixed-wall styles.

- >> Smooth internal walls for insertion of custom protective dunnage
- >> Ease of cleaning
- >> Availability in industry standard footprints
- >> Protected areas for labels and RFID tags
- >> Greater ergonomics than disposable packaging
- >> Security

32" x 30" MEDIUM-DUTY BULKPAK®

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Tools

The medium-duty BulkPak® 3230 KD Series containers are ideal for high density small to medium sized parts and are perfect for tight working spaces. Designed to hold 2,000 lbs, these containers are built for medium-duty applications. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Positive stacking of one container on another to reduce floorspace.

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

Large, spring-loaded ergonomic latches make collapsing containers and opening/closing access doors extremely easy.

Multiple access door configurations: 0, 1 or 2 doors on the 32" side

40" x 48" MEDIUM-DUTY BULKPAK®

Produce ■ Caps/Closures ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders ■ Tools

The medium-duty BulkPak® 4048 GP Series was designed for a wide variety of product sizes, shapes and weights. It allows more parts to be handled, stored and shipped...with fewer containers and in fewer trips. The advanced design results in a consistent tare weight that improves inventory and shipping efficiencies. With a weight capacity 1,500-2,000 pounds, these containers are ideal for all types of food, industrial or beverage applications, as well as for international shipments. These containers are structural-foam molded in high-density polyethylene for durability. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Structural channel cover available for added product protection and secure stacking.

Structural foam base and sidewalls deliver strength and durability

CGP4048 (cover)

Ventilated sidewalls available on 32" and 46" models.

GP4048-50

GP4048-46

All-plastic construction eliminates risk of rust.

100% recyclable

Self-standing sidewall for safe and efficient assembly and collapse.

Full picture frame bottom reduces risk of "short forking".

** Internal volume calculated with cover.

*** Ventilated sidewalls with footcaps. All other models have solid sidewalls with picture frame bottom base.

40 X 48 MEDIUM-DUTY BULKPAK

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

40" x 48" HEAVY-DUTY BULKPAK®

Industrial Equipment ■ Bearings ■ Hardware ■ Food Processing ■ Beverage ■ Plastics and Rubber ■ Resins and Powders ■ Printing

The heavy-duty BulkPak® 4048 HDR series was designed for rugged applications. These containers are made of tough, durable high-density polyethylene for long-life performance under the harshest conditions and provides excellent product protection. The access doors have an articulating hinge that allows the open door to lay flat against the side of the container for tighter, safer storage. With weight capacities up to 2,000 pounds, these containers are ideal for all types of industrial, food or beverage applications, as well as for international shipments. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Planning a new packaging program?

Talk to your ORBIS Sales Representative about Engineering Services to support your rightsizing efforts. See pp. 1-2 for more information.

Consistent tare weight

Structural foam cover available for added product protection.

Secure stackability maximizes warehouse space without the use of racking.

Fixed wall styles (HDRS models) are available to supports heavy, dense components.

HDR4048-25

Large access door for interior access.

Base designed for high impact.

HDR4048-34

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

Heavy-duty solid sidewall construction for durability.

40 X 48 HEAVY-DUTY BULKPAK

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

48" x 45" MEDIUM-DUTY BULKPAK®

Automotive Components ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics & Rubber ■ Resins & Powders ■ Tools

The medium-duty BulkPak® 4845 KD Series containers offer 1,500 load capacities. The KD containers feature non-sequential collapse and multiple identification options. Based on the standard AIAG footprint, these containers are designed and constructed to efficiently move, store and ship automotive, appliance and transportation equipment components. Unitized loads can be delivered directly to the assembly line for immediate part presentation, with no unwrapping or unbanding. These containers are structural-foam molded in high-density polyethylene for durability. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Heavy-duty sidewall construction.

Large access door for interior access.

Smooth interior walls accommodate all types of custom dunnage.

Planning a new packaging program?
Talk to your ORBIS Sales Representative about Engineering Services to support your rightsizing efforts. See pp. 1-2 for more information.

Dollies available for easy handling.

KD4845-34 with Journey Top Cap

KD4845-25

100% recyclable

Structural channel Journey® Top Cap (p. 95) available with superior durability. When using the Journey Top Cap, palletized container loads can be stacked with the BulkPak, for greater shipping efficiency.

All-plastic picture frame bottom.

NEW 48" x 45" HEAVY-DUTY BULKPAK®

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Tools

ORBIS Corporation has introduced its newest series of reusable bulk containers designed to fit 84 filled bins per inbound truckload and 252 collapsed bins per return truckload. The **NEW BulkPak® HDMC4845 Series** containers stack securely when full and collapse when empty for reduced return transportation costs and condensed storage. Available in two heights (27.0" and 34.0"), these containers offer 1,800 load capacities. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

8% gain in shipping density vs. standard 25" allowing more product per bin (26.5") version

Stacks securely

Structural sidewalls offer high level of durability and load capacity

Robust spring loaded latches support handling safety

HDMC4845-27

HDMC4845-34

Color indicator strips on base for increased fork tine entry line of sight

Replaceable bottom stringer that reduces replacement cost of full base, lowering total ownership costs over the life of the bin

Full compatibility with industry 48 x 45 bulk containers

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

48" x 45" HEAVY-DUTY BULKPAK®

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

The heavy-duty BulkPak® 4845 HD/HDR Series is used extensively by the automotive industry, as it meets the specifications of the Automotive Industry Action Group (AIAG). These containers offer load capacities from 1,500 to 2,000 pounds. The HD containers offer all-plastic picture frame bottom and self-standing sidewalls. The HDR containers feature up to four access doors, including a wing-style access door on the 45" side. Based on the standard AIAG footprint, these containers are designed and constructed to efficiently move, store and ship automotive, appliance and transportation equipment components. These containers are structural-foam molded in high-density polyethylene for durability. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

Generous internal capacity for large volumes of parts.

Wing-style access door on 45" sidewalls of HDR versions.

Durable structural foam molded cover protects contents from dust.

Heavy-duty sidewalls and base design.

HDR4845-50 with optional wing-style access door

CHDR4548 (cover) on HDR4845-34

HD4845-34

All-plastic picture frame bottom with rounded legs for easy fork truck handling.

HDRS4845-19

Three non-collapsible containers (HDRS models) available for heavy, dense loads. Available in 3 heights.

Areas on all four sides for identification options.

Large access door for interior access on all 48" HDR sidewalls

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

EXTENDED LENGTH HEAVY-DUTY BULKPAK® (56 x 48, 62 x 48, 64 x 48 and 65 x 48)

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

Extended-length containers accommodate long and hard-to-fit components and parts. Choose from a variety of container heights, door styles and door configurations to meet your application needs. The **BulkPak® 5648 HDR Series** accommodates long and hard-to-fit component parts. This container features a four-way fork entry and a variety of sidewall configurations, with up to four hinged drop doors available.

Available only from ORBIS...the 62" x 48" bulk collapsible container offers the highest cube utilization in the industry today. The **BulkPak® 6248 HD Series** containers are ideal for the storage and transport of long, heavy parts. The **BulkPak® 6448 HD Series** is also available for lengthy, hard-to-fit parts. With weight capacities up to 1,500 pounds, these containers are ideal for all types of automotive and industrial applications. The all-plastic picture frame bottom reduces the risk of short-forking loads, while offering full recyclability. Self-standing sidewalls make assembly and collapse easy and safe.

The **BulkPak® 6548 HDR Series** containers are ideal for the storage and transport of long, heavy parts. With weight capacities up to 2,000 pounds, these containers are ideal for all types of automotive and industrial applications. The HDR containers have a one-piece base with four molded-in aluminum bars and drop doors on the 65" side.

All containers are structural-foam molded in high-density polyethylene for durability and are available in side-loading Maximus styles. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

56 x 48 - 65 x 48 BULKPAK

Solid sidewalls designed for increased durability.

Areas on all four sides for identification options.

Extra wide access door

Access door configurations include choice of 0, 1 or 2 doors on 48" side and 2 standard doors on 56" side.

HDR5648-34

Choice of 0, 1, 2, 3 or 4 access doors

Extra wide access door

All-plastic picture frame bottom

Cardholder

ID Plate

Label Placard*

Placard Board*

Fabricated cover available (CHDR5648)

Unique 62" x 48" footprint optimizes a standard 53' trailer, for greater freight efficiencies than competitive bulk containers.

HD6248-25

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

**HD6248-34
Collapsed = 160**

**HD6248-34
Assembled = 60**

All-plastic picture frame bottom with rounded legs for easy fork truck handling and reduced risk of "short forking".

Self-standing sidewall on all sizes

HD6448-50

All dimensions and specifications are approximate. Performance characteristics are based on uniform static loads and may be affected by distribution of load, handling methods, number and type of access doors and temperatures beyond the range of 0° F to 120° F.

56 x 48 - 65 x 48 BULKPAK

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

EXTENDED LENGTH HEAVY-DUTY BULKPAK® (70 x 48 and 78 x 48)

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

The **BulkPak® 7048 HDR Series** containers can fit almost any part or component and replaces other forms of packaging such as metal racking that can rust. All containers can be stacked, without racking, assembled or collapsed. The **BulkPak® 7848 HDR Series containers** were designed to handle extremely long, hard-to-fit parts. These containers are structural-foam molded in high-density polyethylene for durability. Custom protective dunnage is available for all ORBIS BulkPak containers. (See pp. 61-64.)

Planning a new packaging program?

Talk to your ORBIS Sales Representative about Engineering Services to support your rightsizing efforts. See pp. 1-2 for more information.

Available in 5 heights:
19", 25", 34", 41" and 50"

Closed deck

Heavy-duty sidewalls

Access doors available on the 70" side feature articulated hinges to allow the door to lay flat.

70" x 48" containers offer a wing-style access door on the 34" and 50" height. (pictured at left)

HDR7048-34

Heavy-duty sidewalls

All-plastic picture frame bottom.

Areas on all four sides for identification options.

HDR7848-34

Closed deck

All-plastic picture frame bottom

4-way forklift entry

Need additional part protection?

Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

Multiple access door configurations available.

48" X 45" MAXCUBE CONTAINER

Cosmetic Packaging ■ Health Care Packaging ■ Pharmaceutical Packaging ■ Beverage Packaging ■ Apparel ■ Food Packaging

The MaxCube was designed for superior shipping efficiency and maximum cubic capacity. It offers non-sequential folding action and collapses easily to 13". On the production floor, the MaxCube is compatible with many types of dumping equipment. The reusable, collapsible MaxCube maximizes payloads while lowering shipping costs. With smooth interior surfaces and a cover to protect contents, the MaxCube ensures product cleanliness. It is manufactured in FDA approved material to meet sanitary requirements for packaging handling in food, beverage, and pharmaceutical applications.

Smooth interior walls prevent product damage during loading and unloading.

Recessed cover reduces damage (included with container).

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Large, easy-release latches for rapid assembly and collapse.

Protected area for multiple identification options.

4-way fork truck entry

OPTE BULK SYSTEM

Cosmetic Packaging ■ Health Care Packaging ■ Pharmaceutical Packaging ■ Furniture ■ Apparel ■ Window/Door ■ Automotive

The OPTE Bulk System is an economical collapsible bulk container comprised of two mirror image pallets and a reusable sleeve. Select pallets feature a locking tab that secures the sleeve to the pallet and top cap. Sleeves can be fabricated from paper or plastic corrugated materials with custom features designed to meet a variety of applications. Multiple custom sleeve heights and designs are available. ORBIS offers custom printing and graphics available for easy identification. OPTE Bulk sleeves are available with drop panels, split-sleeves and steel wire reinforced walls. The pallet/top cap design allows for maximum cube utilization in trailers.

Protects contents from dust and dirt. Sleeves available in corrugated or plastic corrugated materials

Eliminates the need for banding or stretch wrapping pallet loads.

Split-sleeve style available for easy access to product. Custom heights available.

Z Fold style sleeve available for easy collapse. Custom heights available.

Mirror image pallet design allows the same pallet to be used as a pallet and/or top cap.

Pallets available from 30" x 52" to 48" x 57".

Lightweight, easy to handle sleeves collapse when empty to save money on return freight and storage. Access doors available.

Flat deck eliminates product damage and narrow channel ensures secure sleeve fit.

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Pallet identification options include molded-in identification areas, hot-stamps, identification plates, vinyl labels and custom color striping. See p. 97 for pallet options.

* Deck height is 5.5" on pallets.

** Maximum Load Capacity is for pallet only, weight capacity does NOT apply to sleeves.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

CUSTOM

New product launches, quality improvement requirements, new automated equipment, changing production processes, plant expansions or new labor practices may require customized packaging.

ORBIS' state-of-the-art design capabilities, combined with materials and manufacturing expertise, drive the development of custom reusable totes, Maximus side-loading containers, fabricated bulk containers and customer protective dunnage for today's leading companies.

ORBIS Design and Sales Engineers focus specifically on the design and fabrication of dunnage used to protect highly sensitive automotive, appliance and electronics components.

From concept through final production, ORBIS offers the expertise to develop cost-effective packaging products to optimize today's fast-paced supply chains.

- >> Totes, bulk containers and dunnage
- >> Product protection, orientation, presentation, cushioning and shock support
- >> Wide variety of materials and processes
- >> Proven design approach that delivers value
- >> State of the art tools and prototyping capabilities

CUSTOM BULK CONTAINERS

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment

ORBIS fabricates bulk containers and hand-held containers to deliver truly unique solutions for the most demanding applications. Add custom features to existing containers for additional functionality. These highly durable custom solutions from ORBIS are cost-effective alternatives to steel or metal transport racks. ORBIS' standard container designs allow for reusability and accommodate a wide variety of dunnage.

Need additional part protection?

Work with ORBIS Sales Engineers to develop custom protective dunnage. Custom dunnage can be designed for any type of custom container. See pp. 61-64 for more information.

Popular Applications:

- >> Removable walls and access doors
- >> Reinforced corners
- >> Reinforced fork entry pockets
- >> Hinged lids
- >> Fork strap removal

And much more....

Add length, width or height to any bulk container.

For more information about ORBIS' Cut-N-Weld capabilities, please see page 57.

CUSTOM BULK CONTAINERS

Electronics ■ Telecommunications ■ Furniture ■ Window/Door

ORBIS' custom solutions can be created from bulk and hand-held containers and can be configured with various drop door, sidewall, closure and cover options. Also, ORBIS Sales Engineers provide dunnage design capabilities and expertise to provide a fully integrated solution. ORBIS Sales Engineers work directly with customers to analyze their needs and recommend a customized solution to meet the specific requirements of the application.

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

Multiple reinforcement options available for additional durability.

Single or double side load access available on any container.

Full container access available.

Reinforcement plates add strength.

Reinforcement plates can be added at seam for increased strength.

Riveted plates for identification labels and placards.

Ideal for a wide array of parts, including:

- >> Side air curtains
- >> Blow molded step bars
- >> Brake and fuel lines
- >> Long trim components
- >> Roof ditch moldings
- >> Luggage rack rails
- >> Windows/doors
- >> Furniture

And much more....

Need additional part protection?

Work with ORBIS Sales Engineers to develop custom protective dunnage. Custom dunnage can be designed for any type of custom container. See pp. 61-64 for more information.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

CUT-N-WELD™ BULKPAK® CONTAINERS

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment

Add length, width or height to existing ORBIS BulkPak Containers. Containers can be welded or bolted to create custom sizes to hold a variety of parts. Because each application is different, ORBIS offers custom Cut-N-Weld Bulk Containers that allow any standard BulkPak container to be modified to the exact dimensions needed for your application. They are ideal for transporting or storing large parts in reusable packaging and work-in-process applications. We will work closely with you to provide a bulk container that will meet the unique needs of your application.

Want to drive supply chain efficiency?

Talk to your ORBIS Sales Representative about Engineering Services to identify your needs and design a reusable packaging program to add efficiency to your entire system. See pp. 1-2 for more information.

>> World class durability provides the strength and weight load capability required for the most rugged applications.

>> Collapsible or straight-wall styles available.

CUT-N-WELD™ STAKPAK CONTAINERS

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber

Add length, width or height to an existing injection-molded StakPak to create a durable, reusable container to fit your application. A Cut-N-Weld container offers the strength of injection molding and a short lead time, while eliminating the tooling costs associated with a custom order. Multiple identification options available. (See p. 7.)

ORBIS' innovative hot-plate technology creates strong bonds for container durability. It enables smooth inside surfaces, with no sharp edges or extrusions to damage product. The smooth inside welds create an easy fit for custom interior dunnage.

Need additional part protection? Work with ORBIS Sales Engineers to develop custom protective dunnage. See pp. 61-64 for more information.

CUT-N-WELD STAKPAK

48 x 57 MI CISS (p. 93)

Extended-length ORBIS pallets designed specifically for StakPak Cut-N-Weld Containers!

- > Choose from:
 - 45 x 54, -56, -58 and -60 CISS (p. 91)
 - 48 x 57, -60 and -62 MI CISS (p. 93)
- > Single sheet thermoformed (HMWPE)
- > Extended lengths accommodate custom sized containers, including ORBIS' Cut-N-Weld™ containers
- > Mirror-image design that allows the pallet to be used as a top cap

Interested in recycling your plastic containers at the end of their service life? **"Recycle with ORBIS"** is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

MAXIMUS™ CONTAINERS

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment

The side-loading Maximus is ideal for delivering sequenced parts to the line. Replace heavy metal transport racks with this durable, one-piece bulk solution to handle and deliver parts to the line faster than ever. Due to advanced engineering, the rugged Maximus can be prototyped and manufactured much more rapidly than traditional metal racks with pigeon hole dunnage, while exhibiting comparable durability.

The side-loading feature improves productivity and reduces worker strain. Maximus containers are ideal for long parts used in the automotive, appliance and transportation equipment industries. Maximus containers reduce labor costs by lowering handling times. The one-piece Maximus can be delivered right to the line for immediate part availability with no unwrapping or unbanding.

Maximus containers enable versatile system integration that offers stacking compatibility with bulk containers and similar pallet systems. These containers prevent product shift or damage from dust /contaminants during transport with multiple closure options, including a heavy-duty vinyl curtain with easy velcro closure.

Accommodates vinyl curtains and covers to keep parts in and dirt out.

Structural foam molded base and sidewalls for strength and durability.

HD4845-50

Additional footprints and heights available.

4-way fork and handtruck entry

HD4845-50

Planning a new packaging program?

Talk to your ORBIS Sales Representative about Engineering Services to support your rightsizing efforts. See pp. 1-2 for more information.

Ideal for packaging a wide variety of parts:

Interior Trim Components

- >> Door trim panels
- >> Center consoles
- >> Pillar trim

Exterior Trim Components

- >> Spoilers
- >> Grills

Chassis/Electrical

- >> Wiring harnesses
- >> Headlamps
- >> Coils/springs

>> Offers a flexible, cost-effective design that eliminates thousands of dollars in tooling costs and weeks of design and manufacturing lead times of steel racks.

>> Maximizes part protection with durable dunnage that holds parts in place during shipment. Class A surface protection is available. Supports Q1, ISO and zero-defect initiatives.

>> Improves worker safety and handling with side-load entry.

>> Offers same load capacity as comparably sized bulk containers.

>> Multiple product identification options available including cardholders, ID plates, molded-in logos, and label placards.

>> Approximately 20% less expensive on average compared to a steel rack.

>> Top caps or covers are available.

>> Available in multiple footprint and height options.

MAXIMUS

MAXIMUS™ RACKS

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment ■ Furniture ■ Window/Door

This side-loading rack accommodates all dunnage types and materials to create a packaging solution that protects parts throughout the supply chain. Due to advanced engineering, the rugged Maximus rack can be manufactured much more rapidly than traditional metal racks, while exhibiting comparable durability.

These racks are designed with single or double-sided access and offer a flexible, cost-effective design that eliminates tooling costs and weeks of design and manufacturing lead times for metal racks. Maximus racks are available in all standard bulk container sizes. Custom sizes can be manufactured to meet unique application needs.

Maximus racks reduce labor costs by lowering handling times and offer full recyclability. Racks are 90% plastic, for easy recycling. The durable metal frame can be easily removed and recycled. The treated metal frame is rust-free, so no rust debris will contaminate parts during storage or shipment.

Easily accommodates a wide array of custom-designed dunnage including plastic corrugated divider sets, hanging bags, trays, and solid HDPE.

Single or double-sided access available

Sample Savings Analysis*				
	Steel Rack	Maximus	% Difference	Savings
Part Information				
Annual Volume (Parts)	300,000	300,000	0%	N/A

Packaging Cost/Piece	\$0.10	\$0.08	-19%	\$0.02
Costs per Year	\$29,062	\$23,437	-19%	\$5,625
Costs Over 5 Years	\$145,312	\$117,187	-19%	\$28,125

*Based on sample application with current costs at time of printing. All costs subject to change without notice.

Shipping products via rail?

When requesting a quote, please indicate the planned mode of transportation. Additional reinforcement available for containers shipping via rail.

CUSTOM PROTECTIVE DUNNAGE

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment

Rely on ORBIS for custom interior dunnage to protect valuable parts from damage during transport, assembly and storage. ORBIS dunnage is custom designed and constructed with durability in mind. Using a variety of materials and processes, ORBIS will provide the level of protection you require for your application. ORBIS designs and manufactures dunnage for a wide variety of containers and systems, including bulk containers, hand-held containers, pallets and custom containers.

Maximus™ Container with Pull-Out Drawer Dunnage

Hanging Bags and Fabric Pouches

Custom Corrugated Containers

OPTE Bulk Systems

Plastic Corrugated Dividers

PE and XLPE Foam Inserts

Benefits Include:

- >> Part protection, separation and orientation
- >> Shock and vibration protection
- >> Cushioning support
- >> Class A surface protection
- >> Electrostatic discharge (ESD) protection
- >> Safe and ergonomic part presentation
- >> Improved container load distribution
- >> Reduced transport costs
- >> Consistent inventory measurements
- >> Reduced packaging costs
- >> Reduced waste
- >> Reduced down-time on production lines

CUSTOM PROTECTIVE DUNNAGE

Electronics ■ Telecommunications ■ Furniture ■ Window/Door

ORBIS offers a team of Design and Sales Engineers that work closely with customers to analyze their system and design dunnage to meet their requirements. ORBIS engineers provide technical expertise, design experience, personalized service, immediate design feedback, expedited prototyping and seamless implementation. ORBIS is fully integrated to provide customers with a complete working system of pallets, containers and custom dunnage to meet any reusable packaging need. As a result, ORBIS provides total control over the manufacturing processes of both the container and dunnage to ensure the proper integration of the entire system.

Dunnage Design Process

ORBIS uses an easy 5-step design approach to ensure that their dunnage solutions meet customers' needs:

- 1. Concept:** ORBIS assesses the customers' needs, documents design requirements and discusses possible solutions.
- 2. Design:** Using this information, ORBIS designs and presents a solution to the customer. While designing, ORBIS engineers select the best material and manufacturing processes to create the most cost-effective solution that offers maximum product protection. Upon customer approval of the design, ORBIS creates a detailed quotation.
- 3. Quotation:** ORBIS' quotations outline price, tooling requirements and terms and conditions.
- 4. Prototype:** Prototypes are assembled and checked against design drawings to ensure accuracy. Prototype approval allows production to start upon receipt of purchase order.
- 5. Evolve:** As customers' packaging needs change, ORBIS continues to support these new applications with innovative designs and material offerings.

Dunnage Design Considerations:

- >> Part size
- >> Part weight
- >> Weight distribution
- >> Part orientation
- >> Part separation
- >> Class A protection
- >> Shock sensitivity
- >> ESD sensitivity
- >> Pack density
- >> Production volumes
- >> Maximum container weight
- >> Lineside presentation

ORBIS Tools and Capabilities

ORBIS engineers can utilize 3D part math data along with translation software and 3D CAD design software to develop an initial design concept for customer review. Web-based collaborative tools are used to accelerate the design process.

Prototyping Capabilities

ORBIS' designs are CAD-based, which provides the ability to create prototypes exactly as they are designed. ORBIS prototyping provides customers with an approval process that ensures design accuracy.

On-Line Collaboration

ORBIS utilizes on-line tools for the productive flow of project and design information. This provides real-time communication that reduces project timelines and minimizes revisions.

State of the Art Manufacturing

ORBIS' ISO-Certified facilities offer a variety of processes and equipment to cost-efficiently manufacture dunnage that meets the specified design requirements. ORBIS integrates and consolidates dunnage, containers and pallets for timely delivery.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

CUSTOM PROTECTIVE DUNNAGE

Automotive ■ Transportation Equipment ■ Appliance ■ Industrial Equipment

ORBIS offers a wide variety of best-in-class **processes** to manufacture dunnage, including die-cutting, welding, machining, hot wire bending, thermoforming and sewing. Dunnage assembly and integration takes place at ORBIS ISO-Certified facilities by experienced staff for the timely delivery of entire systems of containers, dunnage and pallets.

Custom trays can be thermoformed and layered in containers.

Die-cut plastic corrugated pigeon hole dunnage can be inserted into side-loading Maximus™ Containers for improved part accessibility. The heavy-duty, clear vinyl curtain with an industrial strength velcro closure keeps parts clean. For more information on the Maximus, see pp. 63 and 64.

Sewn fabric bags provide improved versatility and part nestability. Fabric dunnage is also available for top and side-loading bulk containers.

Saw-cut foam offers precise contouring for perfect part fit.

Die-cut foam rails offer part separation and Class A surface protection. Custom totes can be designed for any application.

Die-cut plastic corrugated can be laminated with numerous Class A friendly materials.

CUSTOM PROTECTIVE DUNNAGE

Electronics ■ Telecommunications ■ Furniture ■ Window/Door

ORBIS incorporates a wide variety of **materials** to deliver high quality creative dunnage designs. ORBIS Sales Engineers combine processes and materials to provide a truly unique and cost-effective solution. A wide variety of foam, plastic corrugated, fabric and high-density polyethylene materials are available for the manufacture of custom dunnage. While ORBIS promotes the use of its highly successful standard materials program to control costs and shorten lead-times, ORBIS also offers special materials, colors and blank/sheet sizes to meet individual needs. Specialized materials are also available for Class A surface protection.

Duralok™ Part Cradles

Molded Foam

Plastic Corrugated

PE and XLPE Foam

Material	Thickness/ Density	Standard Colors	Properties and Potential Applications
Plastic Corrugated* (PC)	2,3 and 4 mm	White, Grey (4 mm)	- Base Pads - Divider Sets for light to medium weight parts. - Can be laminated for Class A surface protection.
	5 and 6 mm	Black (5 mm), White, Gray	- Custom Containers - Divider Sets for heavier parts & bulk bin dunnage. - Can be laminated for Class A surface protection.
	8 mm	White	- Custom Sleeve Packs (OPTE Sleeves) - Divider Sets for heavy duty and bulk bin dunnage. - Can be laminated for Class A surface protection.
Surface Protecting Lamination	Spuntex XLPE Foam Tyvek	Blue, White Black White	- Typically applied to plastic corrugated for use in divider sets. - These smooth, non-abrasive laminates will protect your parts without damaging your Class A surfaces.
Crosslink Polyethylene Foam (XLPE)	#4 and #6	Grey, Natural	- Non-abrasive, resilient foam with excellent shock/vibration protection. - Ideal for parts with Class A surfaces & other abrasion sensitive parts.
Polyethylene Foam (PE)	2#	Grey, Natural	- Durable, resilient, low-abrasive foam with excellent shock/vibration protection. - Cushion packaging, interior dunnage & foam pads for lightweight parts. - High tear resistance and tensile strength.
	4#	Grey, Natural	- Intransitive, resilient foam with excellent shock/vibration protection. - Cushion packaging, interior dunnage, foam pads, blocking & bracing. - High tear resistance and tensile strength.
	6#	Grey	- Solid, resilient, abrasive foam with good shock/vibration protection for heavy parts. - Cushion packaging, interior dunnage, foam pads for heavy parts, blocking & bracing. - High tear resistance and tensile strength.
Anti-Static	4mm (PC)	Pink	-Base pads & Divider Sets for medium weight parts. Ideal for electronics.
	2#, 4# (PE)	Pink	-Cushion packaging, interior dunnage, & foam pads. Ideal for electronics.
Industrial Fabric	13 oz PVC	Clear, Grey	- Fabric divider sets to accommodate oddly-shaped or Class A surface parts. - Lids for hand-held totes to protect parts from dust and contaminants. - Curtains for Maximus containers to protect parts from dust and contaminants.
	22 oz PVC	Grey, White	
	Tyvek	White	
PolyUrea	Various	Black, Safety Orange	- Flexible, extremely tough, monolithic membrane for protection against moisture, chemicals & acids - Virtually shave-proof, so it is excellent for sharp parts that are sensitive to shavings from the dunnage - High temperature stability with a service temperature of up to 300°F.

Foam and corrugated plastic assemblies

Fabric Bags

PALLETS

World-class companies in many industries have converted from wood to plastic pallets for their work-in-process, storage and distribution applications. They quickly recognize the economic, ergonomic and environmental benefits that plastic pallets bring to their operation. With more than 30 years of pallet manufacturing, design, application and industry experience, ORBIS Corporation offers the most comprehensive selection of plastic pallets to provide the best material handling solution.

These dimensionally consistent pallets are compatible with many palletizers, depalletizers, automatic strapping equipment and high-speed automation systems. Also, their consistent tare weights allow better inventory control. Load weights are easily obtained without costly and time-consuming off-loading.

ORBIS plastic pallets protect product during picking, assembly, processing, storage and distribution applications in a wide variety of industries, including pharmaceutical, poultry, automotive, appliance, aerospace, produce, apparel and electronics.

- >> Industry standard footprints
- >> Areas for labels and RFID tags
- >> Reduces product damage
- >> Dimensionally consistent for repeatable performance in automated systems
- >> Easy to clean
- >> Ergonomically designed

 STRUCTURAL FOAM MOLDING	 SINGLE OR TWIN SHEET THERMOFORMING (HMWPE)	 INJECTION MOLDING
Plastic and nitrogen gas are injected into a closed cavity mold. The part is cooled to create the exact shape of the mold. The combined use of these materials creates a cellular core that forms a solid skin.	In single sheet thermoforming, a sheet of plastic is heated and then drawn by vacuum over a mold to create a part. In twin sheet thermoforming, two sheets are heated and drawn by vacuum over separate molds and fused together through pressure to form a structural double walled part.	Plastic is injected, under pressure, into a closed cavity mold. The material is cooled to ensure that it maintains the exact shape of the mold. This process produces a solid wall, solid core part.

INTERNATIONAL SHIPPING PALLETS

Automotive ■ Electronics ■ Appliance ■ Industrial Equipment

Solid wood packaging continues to pose unique challenges to companies conducting business globally. Issues include compliance with national and international laws, consideration of environmental threats and recycling opportunities, worker safety and delay or rejection of shipments at inspection points.

ISPM 15 is the newest challenge companies face when making global shipments. This regulation was introduced, and agreed to by many nations, to prevent the introduction of non-native, wood-borne pests. It requires the fumigation of all solid wood pallets.

The techniques used to adhere to this regulation are less than ideal. Chemicals are harmful to workers as well as the ozone while heat treatment is costly and degrades the wood, shortening the useful life of the pallet. Wood pallet disposal can also become a significant cost driver in international shipping with many wood pallets ending up in landfills after just one use.

Plastic pallets are a valuable cost-effective solution. Plastic products are fully exempt from ISPM 15 Regulations, as they cannot harbor pests, mold or fungus. This exemption helps companies receive product on time, with minimal wait times at ports.

The plastic pallets shown are limited-use pallets that are at price points comparable to wood pallets. Their smooth surfaces and lack of sharp edges protect workers from injury. At the end of their useful life, these pallets are recyclable. Nearly 100% of the content is recoverable and available for use in new pallets.

ORBIS Plastic Pallets for International Shipping

- >> Eliminate the need for Methyl Bromide fumigation
- >> Reduce packaging waste by eliminating wood pallet disposal
- >> Offer consistent weight and size for accurate transportation costs
- >> Improve workplace safety with smooth design and stable stackability
- >> Are environmentally friendly and 100% recyclable
- >> Eliminate the costs and associated documentation required for heat treating or fumigation
- >> Feature smooth, all plastic construction that reduce product damage (no exposed nails, rust, splinters or broken boards)

¹ Guidelines for Regulating Wood Packaging Material in International Trade, produced by the Secretariat of the International Plant Protection Convention. (IPPC)

RETAIL DISPLAY PALLETS

Big Box ■ Electronics ■ Appliance ■ Grocery

ORBIS' all-plastic display pallets are available in a variety of footprints and accommodate a wide range of POP displays and structures. They easily create end-of-aisle displays. These pallets offers marketers an attractive display solution with efficient material handling. They offer a flat, smooth surface that allows easy set up in a warehouse or re-packing facility. Once pallets arrive at the retailer, they can be moved directly to sales floor, to reduce labor costs and storage space. The non-porous plastic construction enables easy floor cleaning and handling within the retail environment. Contoured corners won't damage product loads and are shopper-friendly and the heavy duty, solid body construction accommodates a variety of load sizes and weights.

40 x 48 POP pallet has rectangular legs; 42 x 48, 44 x 48, 46 x 48 and 48 x 48 POP pallets have square legs.

ORBIS Plastic Pallets for Retail:

- >> Feature smooth, all plastic construction that reduces product damage (no exposed nails, rust, splinters or broken boards)
- >> Enhances retail floor image
- >> Offer consistent weight and size for accurate transportation costs
- >> Reduce packaging waste by eliminating wood pallet disposal
- >> Are environmentally friendly and 100% recyclable
- >> Improve consumer safety with smooth, contoured designs
- >> Multiple footprints available to meet store objectives and boost sales.

Interested in recycling your plastic pallets at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic pallets into other useful products. To learn more, contact your ORBIS Sales Representative.

RACKABLE PALLETS

Health and Beauty Care ■ Food Processing ■ Beverage ■ Pharmaceutical ■ Automotive ■ Chemical ■ Dairy ■ Printing

Rackable plastic pallets optimize storage, reduce product damage that can occur from wood pallets and ease the movement of product loads throughout a system. ORBIS rackable plastic pallets are designed to store products in a wide variety of unsupported racking systems, to optimize valuable floor space in today's warehouses and distribution systems.

ORBIS offers multiple pallet styles for every racking application, with unsupported rack capacities of up to 3,000 lbs. These pallets are highly cleanable and available in a wide variety of materials, including FDA-approved and fire-retardant material. Plastic pallets are 100% recyclable at the end of their service life and can be returned for recycling.

RACKABLE PALLETS

Top 9 Reasons to Consider a Rackable Pallet:

1. Your unsupported pallet racks require dimensionally consistent pallets
2. Wood pallets cause costly product damage
3. Your ASRS, AGVs or high rise storage system requires a dimensionally consistent pallet
4. Your application has sanitation requirements
5. Your application requires highly impact-resistant handling solution
6. Your wood pallets need frequent repair
7. You have to invest in pallet support bars or wire decking to adequately support wood pallets in your facility.
8. Your insurance company recommends fire-retardant pallets
9. You use RFID to track pallets and product throughout your system

"Subject to the conditions of approval as a plastic pallet as equivalent to wood pallets as described in the current edition of the FM Approval Guide."

* If the pallet has a lip, the lip height is included in the total pallet height. LP = Perimeter Lip, LPI = Inboard Perimeter Lip, LPD = Discontinuous Perimeter Lip
 ** Available in fire-retardant material. Product specification for fire-retardant pallets differ, please see individual page for product specifications. Racking capabilities for fire-retardant pallets may differ, please contact your ORBIS Sales Representative for additional information.
 *** Reinforced version only.
 **** Ratings are for column loads only. For all other load types, please contact your ORBIS Sales Representative.
 ***** Load capacity ratings for the 40 x 48 Stack'R are for edge racking in the 40" direction.

40 x 48 Stack'R

- >> Medium-duty design ideal for food, consumer goods and agricultural applications.
- >> Rackable and stackable design.
- >> Available with or without center stringer and open or closed deck.
- >> Available in FDA-approved material.

40 x 48 OP Pallet

- >> Light-duty design ideal for food, pharmaceutical and industrial applications.
- >> Available in FDA-approved and fire retardant material.

40 x 48 RackoCell

- >> Highly sanitary, durable and easily washable.
- >> One-piece construction engineered for the food manufacturing, meat, poultry and pharmaceutical industries.
- >> Available in FDA-approved and fire retardant materials.

40 x 48 Rack'R

- >> Available in FDA-approved and fire retardant materials.
- >> Consistent weight, size and low profile make it compatible in most automated handling environments.
- >> Special bottom deck reinforcement makes it suitable for push back and flow rack systems.

40 x 48 Rackstar II

- >> Highly impact resistant.
- >> Solid wall design maintains integrity, eliminates cold flow or "creep".
- >> Increased durability and easy to sanitize.
- >> Repairable stringers and picture frame bottom.
- >> Customizable for fluid loads super sack applications.
- >> 100% recyclable with fully removable reinforcement structure.

Interested in recycling your plastic pallets at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic pallets into other useful products. To learn more, contact your ORBIS Sales Representative.

STACKABLE & NESTABLE PALLETS

Food Processing & Distribution ■ Consumer Packaged Goods ■ Pharmaceutical ■ Beverage ■ Retail Display ■ Industrial ■ Appliance ■ Automotive

ORBIS stackable pallets are designed for handling and shipping heavy product loads in warehousing, processing and manufacturing environments. With static load capacities up to 30,000 lbs, these pallets are ideal for stack loading, conveying systems, distribution and static storage. Hygiene is a priority in most food, beverage and pharmaceutical environments. These non-porous, smooth plastic pallets are easily cleanable and available in FDA-approved materials. Additionally, several styles are available in fire-retardant materials and fully approved by Factory Mutual Insurance. Available in footprints from 32" x 30" to 48" x 72", ORBIS stackable pallets are available in one-piece, two-piece assembled and welded styles. The bottom deck surface and availability of multiple pallet heights accommodate all types of conveying system requirements. When combined with top caps, sleeves or seat belts, a fully unitized load is created, with no need for stretchwrapping or banding.

Top 9 Reasons to Consider a Stackable Pallet:

1. Your typical product loads are extremely heavy.
2. You often stack-load product in your operation.
3. You can't afford costly automated system downtime caused by wood pallets.
4. You frequently convey pallets in your facility, so the pallet height and bottom deck surface is important.
5. Preventing product contamination is a priority.
6. Product loads are weighed frequently for inventory control.
7. Hassle-free cleanability is important to you.
8. You are experiencing high hidden costs of wood pallets (repair, disposal, sorting, etc.)
9. Your insurance company recommends fire-retardant pallets.

ORBIS nestable pallets move, store and distribute product loads within a single warehouse/distribution center or entire supply chain. From raw material to finished goods, plastic pallets protect product until it reaches its final destination. When empty, these pallets nest for a cost-efficient return trip or warehouse storage.

Nestable pallets offer a long service life, contoured surfaces, superior recyclability and nest ratios up to 4.0:1. Their dimensional consistency ensures effortless interface with all types of high-speed automation and material handling equipment.

ORBIS nestable pallets, available in footprints from 20" x 28" to 48" x 62", are lightweight and easy to manually handle, with no nails, splinters or broken boards to risk employee injury. And, when combined with top caps, sleeves or seat belts, a fully unitized load is created, with no need for stretchwrapping or banding.

Top 8 Reasons to Consider a Nestable Pallet:

1. Your warehouse space is limited. Nestability enables storage of more smaller area.
2. Your transportation and freight costs are increasing because your wood pallets don't nest during the return trip.
3. You can't afford costly automated system downtime caused by wood pallets.
4. Your customer is requiring a cleaner and safer method to receive product shipments.
5. You frequently have to buy wood pallets to maintain your product flow.
6. Your pallet is often used in retail environments, so aesthetics and consumer safety are a priority.
7. You use RFID to track pallets and product throughout your system.
8. Most of your product shipments occur in a closed-loop system.

* If the pallet has a lip, the lip height is included in the total pallet height.
LP = Perimeter Lip, LPI = Inboard Perimeter Lip, LPD = Discontinuous Perimeter Lip

- Height with optional lip
- Unassembled.
- Please contact your ORBIS Sales Representative.
- Available in truckload and indicated quantities only. This is a non-standard product that is produced outside of the United States and lead times will vary.
- Weight without reinforcing rods.
- Available in truckload quantities only.
- Based on "superwide" 53' trailer.
- Available in fire-retardant material. Product specification for fire-retardant pallets differ, please see individual page for product specifications.

Add Efficiency with Pallet Options!

ORBIS pallets are available with a wide variety of options for the ultimate in warehousing efficiency. Availability varies by model and version. For a full listing of pallet options and accessories, please see page 97.

Interested in recycling your plastic pallets at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic pallets into other useful products. To learn more, contact your ORBIS Sales Representative.

DIVIDER SHEETS

Beverage & Food Containers ■ Health and Beauty Care Packaging ■ Pharmaceutical Packaging ■ Household Item Packaging

Divider Sheets provide maximum product protection and load stability for unitized loads of food, beverage and industrial products. When combined with plastic pallets and top frames, an efficient shipping system is created for storage and transport. These reusable plastic Divider Sheets are placed between layers of aluminum, steel, glass and plastic cans or bottles used to package food and beverage products. They are also used in many industrial applications to protect items, including printed materials or automotive products. Divider Sheets are available in solid and corrugated styles to meet diverse application needs. The non-sloughing, plastic design reduces product contamination that can occur from dust, fiber and splinters found in alternative sheet materials. Additionally, Divider Sheets are easily cleanable, using proprietary cleaning technologies. Their reusability eliminates the packaging waste associated with the disposal of corrugated and solid fiberboard divider sheets. To support high-velocity supply chains, Divider Sheets are also available on a rental basis, through pooling services.

Rounded corners

Consistent dimensions for use with automated systems.

Available in custom sizes and colors.

Solid and corrugated styles available.

100% recyclable. Contact your sales representative about ORBIS' Recycling Program.

Customer name and other specifications can be printed on sheets

Typical Sheet Sizes:

44" x 56"
40" x 48"
44.75" x 47.5"
45" x 47.5"
1000 x 1200 (mm)
1120 x 1300 (mm)
1120 x 1420 (mm)
1150 x 1250 (mm)
1180 x 1250 (mm)
1200 x 1350 (mm)

Pooling Programs Available

CORBI Plastics, ORBIS' joint venture with Cartonplast, offers pooling and logistics services.

Pooling eliminates the upfront investment of purchasing divider sheets. Cleaning, sorting and tracking services are also available. Please visit www.corbiplastics.com.

Interested in recycling your plastic containers at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic containers into other useful products. To learn more, contact your ORBIS Sales Representative.

TOP CAPS AND TOP FRAMES

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment ■ Metal Parts ■ Plastics and Rubber ■ Resins and Powders

ORBIS offers many top cap footprints to accommodate your material handling application. Top caps help maintain the uniform weight distribution for secure load stacking, especially when used with seat belts.

Pictured: 28 x 40 Top Cap

☐ 20 x 28 and 28 x 40 CISF Top Caps

- > Enhanced durability for long life
- > 2 sizes available
- > Used in closed-loop shipping operations and work-in-process applications
- > Legs of pallet fit in molded-in pockets on the top cap to lock the loads together to provide a stable load for shipping
- > Options (p 97): Hot stamp, identification plates

☐ 30 x 32 Top Cap CISS

- > Single sheet thermoformed (HMWPE)
- > Designed to interlock with the 32 x 30 CISS pallet
- > Ideal for automotive and general manufacturing applications
- > Compatible with 32" x 15", 12" x 15" and 12" x 07" StakPak containers
- > Options (p 97): Vinyl labels, seat belt buckles

☐ 30 x 36 Top Cap CISS

- > Single sheet thermoformed (HMWPE)
- > Designed to interlock with the 30 x 36 nestable seat belt pallet
- > Options (p 97): Vinyl labels, identification plates, molded-in logo, custom color striping, seat belt buckles

☐ 32 x 38 Heavy-Duty Structo-Cell®

- > Designed to interlock with 32 x 38 Heavy-Duty Structo-Cell pallet
- > Options (p 97): Hot stamp, identification plates, molded-in logo, seat belt buckles

☐ 32 x 45 Top Cap CISS

- > Single sheet thermoformed (HMWPE)
- > Designed to interlock with the 32 x 45 nestable pallet
- > Buckle on 32" side only
- > Options (p 97): Vinyl labels, identification plates, molded-in logo, custom color striping

☐ 40 x 48 GMA Top Cap C CISS

- > Single sheet thermoformed (HMWPE)
- > Designed to interlock with the legs of the 40 x 48 CISC and 40 x 48-B GMA CISF pallet to provide secure double stacking of pallet loads
- > Compatible with 4048 Stack-N-Nest Container System
- > Options (p 97): Vinyl labels, identification plates, molded-in logo, custom color striping

☐ 45 x 48 JOURNEY Top Cap

- > Designed to interlock with the 45 x 48 JOURNEY pallet, as well as bulk containers and competitor's pallets to provide secure double stacking of pallet loads
- > Resistant to bowing and deflection found in traditional thermoformed top caps
- > Compatible with StakPak containers
- > Options (p 97): Vinyl labels, identification plates, molded-in logo, hot stamp, seat belt buckles

☐ 45 x 48 HDSC Top Cap

- > Designed to interlock with the legs of stackable pallets
- > Broad compatibility accommodates maximum trailer efficiency
- > Options (p 97): Identification plates, hot stamps, seat belt buckles

TOP CAPS AND TOP FRAMES

Aluminum Cans ■ PET Bottles ■ Glass Bottles ■ Rigid Packaging ■ Pharmaceutical Packaging

Top Frames protect product during storage and transport by unitizing full pallet loads of beverage products, aluminum and steel cans, glass and plastic bottles, and other rigid packaging. When combined with plastic pallets, top frames securely stabilize loads of product.

45 x 48-2 SBRR MI ID CISS LP Pallet (acts as top cap)

- > Single sheet thermoformed (HMWPE)
- > Mirror-image design that allows the pallet to be used as a top cap
- > Versatile system ideal for automotive and general manufacturing applications
- > Compatible with StakPak and Hand Held Folding containers
- > Options (p 97): Vinyl labels, identification plates, molded-in logo, custom color striping, seat belt buckles/retractors

45 x 48 MP3 Top Cap CISC

- > Designed to interlock with the legs of nestable pallets and many bulk bases
- > Broad compatibility accommodates maximum trailer efficiency
- > Compatible with StakPak and Hand Held Folding Containers
- > Options (p 97): Vinyl labels, identification plates, hot stamps, seat belt buckles

45 x 48 CISS Top Cap

- > Single sheet thermoformed (HMWPE)
- > Designed to interlock with bottom deck of various 45 x 48 CIISF pallets to provide secure double stacking of pallet loads
- > Compatible with StakPak containers
- > Options (p 97): Vinyl labels, molded-in logo, identification plates, custom color striping

44 x 56 4" and 6" Heavy Duty Top Frames (C= No center stringer)

- > Unit stabilizer used to support containers
- > Channeled edge design offers greater strapping strength
- > Indentation for straps
- > Standard in black
- > Fully recyclable
- > Options (p 97): Molded-in logo, hot stamp, anti-skid pads, 4" or 6" perimeter, available with center stringers

44 x 56 4" and 6" Heavy Duty Top Frames (A= Full center stringer)

- > Unit stabilizer used to support containers
- > Channeled edge design offers greater strapping strength
- > Indentation for straps
- > Standard in black
- > Fully recyclable
- > Options (p 97): Molded-in logo, hot stamp, anti-skid pads, 4" or 6" perimeter, available without center stringers

Interested in recycling your plastic pallets at the end of their service life? "Recycle with ORBIS" is a convenient program designed to effectively recover, recycle and reprocess plastic pallets into other useful products. To learn more, contact your ORBIS Sales Representative.

PALLET ACCESSORIES & IDENTIFICATION OPTIONS

Meat/Poultry ■ Refrigerated/Frozen Foods ■ Bakery Items ■ Snack Goods

A variety of options and accessories are available for ORBIS pallets and top caps to increase their efficiency and flexibility. All options are not applicable to all products. Minimum order quantities and set-up charges may apply. Nominal specifications subject to changes without notice. Contact your ORBIS representative for more details.

Molded-In Logo identification is a type of permanent identification that is molded into the pallet or top cap during production. Original artwork must be supplied to ORBIS at the time of the order. Availability, requirement and location for the molded-in identification can vary for each pallet.

Hot Stamp identification utilizes .5" block capital letters in a predefined area on the pallet or top cap. Availability, requirements, and location for the hot stamp can vary for each pallet.

Identification Plates are rigid plastic plates with adhesive backing that affix securely to your pallet. These plates are designed for durability and a long service life. All ORBIS pallets can accommodate identification plates. Availability, requirement and location of the identification plates can vary for each pallet.

Vinyl Labels are flexible plastic labels with adhesive backing that affix securely to your pallet. These long lasting labels are for use on all ORBIS thermoformed (HMWPE) pallets. Availability, requirement and location for the vinyl labels can vary for each pallet.

*Special vinyl labels are now available for some structural foam pallets. Please contact ORBIS for details.

Rubber Grommets are placed in predetermined areas on the pallet deck, fork tine area or feet on select ORBIS pallets to stabilize a unit load and guard against load shifting by providing a non-skid surface. Anti-Skid Disks are also available for many pallet styles. Standard Colors: Deck Grommets - Beige; Foot Grommets - Beige; Fork Tine Grommets - Beige; OP Grommets - Grey; Spin Disks - Natural, Clear.

Deck Inserts and Leg Covers will quickly and easily snap into the pallet to cover the leg hole openings. These inserts prevent interference with small loads, conveyor systems, and other material handling equipment. Note: Pallets will not nest after inserts have been installed. Available on all POP, 45 x 48-A, nestable and stackable 48" x 48" and 48" x 72" structural foam pallets. Standard: Black

Custom Color Striping is available on most thermoformed pallets and thermoformed OPTE Pallets to provide a unique identification alternative. Standard stripe widths are two and four inches. Stripe color must be specified at the time of the order and requires minimum order quantities.

Seat Belt Assemblies attach to the pallet and top cap to effectively secure pallet loads. ORBIS' innovative seat belts accommodate high stack loads and will not twist, tangle or jam. Easy grab tongue loop prevents the belt from retracting back into the pallet. The short lock zone provides a secure fit on short stack heights. Available on various 30" x 32", 30" x 36", 32" x 38", 40" x 48" and 45" x 48" pallets. Standard Color: Black

NOTE: Strap length is approximately 59" from housing to end of strap, but usable strap length will vary depending on load height.

Non-Skid Diamond Pattern Surface is available on selected pallets to prevent product slippage during storage and transport.

ENVIRONMENTAL PRODUCTS

Organic Waste ■ Glass, Plastic, Paper and Metal Separation ■ Rain Collection

Choose from the **Norseman Environmental** brand of products, now from ORBIS, for home, commercial and office recycling. Wheeled carts are ideal for any home and community composting program. Kitchen collectors are used to accumulate kitchen organic waste. Rugged compost bins and rain barrels are available for home use. Designed for easy handling and cleaning, all environmental products are available in post-consumer recycled materials and are available in a variety of standard and custom colors.

NORSEMAN

NPL 280 - 13 Gallon

NPL 285 - 21 Gallon

Wheeled Carts

- > 360° double rim, snap tight lid keeps pests out
- > Ergonomic side handles for easy curb transport
- > Manufactured with recycled material.
- > Cornerless, smooth interior walls for ease of cleaning
- > Two sizes available: 13 and 21 gallon

NPL 290

Kitchen Collector

- > Swing arm handle for easy carrying
- > 360° double rim, snap tight lid
- > Wide bottom facilitates easy emptying
- > Ventilated or solid lid available
- > Combine with Green Bin and Earth Machine for a full organics recycling solution

Specifications All dimensions in inches unless specified.

55 Gallon Commercial Recycler

The 55 Gallon Commercial Recycler was designed for heavy traffic areas in businesses, restaurants, public areas and institutions. It offers an efficient method to separate cans and bottles and can be combined with liners for fast and easy collection by cleaning crews.

FEATURES

- 208 litre / 55 gallon capacity
- All-plastic design ideal for indoor and outdoor use
- Manufactured with recycled material
- Snap-on lid with molded-in holes, sized for all bottle and cans
- Smooth contoured surfaces
- No-touch disposal, with no door or flaps. Just drop and go
- Optional wraps, labels and signage available for effective branding

ENVIRONMENTAL PRODUCTS

Organic Waste ■ Glass, Plastic, Paper and Metal Separation ■ Rain Collection

As part of the **Norseman Environmental** brand of products, the **Earth Machine®** is a durable backyard compost bin designed to compost food and yard waste, effectively diverting it from landfills. When residents are encouraged to divert organics from the waste stream and are educated about the benefits of composting, up to 50% of organic waste can be diverted from the waste stream. The **SYSTERN Rain Barrel** can lower municipal water demands and save energy at water treatment facilities by reducing water pollution and storm water runoff. Rain water, free from chlorine and water treatment chemicals, is an excellent water source for lawns, plants and gardens.

Rain Barrel

- > 55 gallon capacity
- > Can reduce household water bills by 40%
- > Mesh filter screens out debris and mosquitos
- > Neutral color
- > Easily works with existing downspouts

Compost Bin - Earth Machine®

- > Large capacity of 80 gallons or 10 cubic feet
- > Made from recycled plastic
- > Easy snap together assembly
- > Twist locking lid
- > User guide included

Specifications All dimensions in inches unless specified.

COLORS AND MATERIALS

Hand-Held Containers ■ Bulk Containers ■ Pallets

The colors listed on these pages are standard colors for high-density polyethylene (HDPE). Products molded in polypropylene (PP) or other materials may require a different colorant to resemble these colors. Please contact your ORBIS Sales Representative for additional information.

These colors do not represent stocked finished products, rather standard colorants that are available.

Other colors are available, however minimum order quantities, set-up charges or other special requirements may apply. Please contact your ORBIS Sales Representative for additional information.

Orders requiring FDA compliant colorant and material need to be specified at the time of quotation and order to guarantee FDA materials are used in the manufacturing process.

UV-protective colorants are available upon request. Please contact your ORBIS Sales Representative for additional information.

Exact color match to a specific color reference number is not guaranteed, nor is this printed color reference sheet guaranteed for color match exactness. Please request a representative color chip should more specific color information be necessary.

HAND-HELD CONTAINERS*

*Not all containers manufactured with FDA colorant are FDA compliant. Please contact your ORBIS Sales Representative for additional information.

The following icons provide an easy identification of ORBIS product features, material characteristics and system capabilities. Look for these icons on each product page to assist you in selecting the appropriate ORBIS product for your application.

Standard Materials:

ORBIS primarily uses recyclable polyethylene and polypropylene plastic in the manufacture of its containers, pallets and dunnage.

Polyethylene

Polyethylene (PE) is one of the most widely used plastic materials and offers excellent chemical resistance, ease of manufacturing, strength, toughness and durability. PE is suited for typical manufacturing environments as the material remains stable at temperatures encountered in the cold winters (below 0° F) and hot summers (just over 120° F). At temperatures exceeding 120° F, the material becomes rubbery and reduces its strength properties.

Polypropylene

Polypropylene (PP) material is in the same family as polyethylene and offers excellent chemical resistance and ease of manufacturing that remain similar to that of PE. PP's advantages over PE include greater stiffness and elevated use temperature. Depending on the application, PP materials can retain their strength at temperatures up to 150° F.

Special Materials:

ORBIS offers several specialty materials for unique and specialized applications. Please contact ORBIS for additional information.

If FDA materials are required, please specify when requesting a quote. These materials have been tested and verified by the FDA and are listed in 21 Code of Federal Regulations.

Products approved by Factory Mutual Research Corporation (FM) as meeting fire rating requirements equivalent to wood pallets. Subject to the conditions of approval of a plastic pallet being equivalent to wood pallets as described in the current edition of the FM Approval Guide.

Containers manufactured in ESD protective materials protect contents from static electricity and electrostatic damage. These materials are designed to absorb the charge and pass it to the ground, bypassing the contents of the containers.
