REMOTE AREA LIGHTING SYSTEMS ■ TACTICAL/DUTY ■ SAFETY APPROVED LIGHTS ■ LED/RECOIL ■ DIVE

The Future of Lighting.

By now we have all heard about the expected LED revolution in lighting. We believe with the environmentally responsible factors, energy efficiency and durability of LED lights, what we have seen in development over the last 5 years will pale in comparison to what is right around the corner. Pelican is leading the way by positioning itself to be a major company in developing products utilizing this great new technology.

By now you've seen LEDs in traffic lights, auto tail lights and, of course, Pelican flashlights. Our Advanced Area Lighting Group (AALG) is a leading innovator in Remote Area Lighting. One of the most dramatic examples was the use of our RALS 9430 on the wing of US Airways flight 1549 in the Hudson River. Jet fuel had to be pumped out of the aircraft at night and generator based lighting was too dangerous and impractical.

AALG has also changed the way our warfighters use night vision technology. With the 9430IR, invisible infrared LED light allows our troops to observe the enemy through hundreds of yards of complete darkness, while at the same time the enemy has no idea they are being illuminated. This is just the beginning of the LED revolution and Pelican's position within it. Soon, entire LED walls will produce clean, white light- with no lamp modules, wires or reflectors.

And using less energy will literally make the world a brighter place. We are excited to be working with you in creating this new market.

Lyndon Faulkner
President & CEO

MISCELLANEOUS

100 THE PELICAN™ FLOAT
Marker Recovery System
The Pelican Float is a reusable buoy made of
structural high visibility foamed resin and
weighs only 16 oz. Includes over 100 ft. of
polyethylene 225 lb. test line and a 6 oz.
non-drag dispatchable anchor.
Shipping weight: 1.2 lbs.

770 UNIVERSAL HELMET LIGHT HOLDER

Fits most known helmet designs and functions with 17 different Pelican flashlights. Tough polymer construction with brass inserts and stainless steel hardware.
Fits the Following Pelican Lights:

- MityLite™ 2300 ■ M6 2320 ■ M6 2330 LED
- MityLite™ 2340 & 2340NVG ■ M6 3W 2390 LED
- StealthLite™ 2400, 2400NVG & 2400PL Photoluminescent
- StealthLite™ 2410 Recoil LED™ & 2410PL Recoil LED™
Photoluminescent ■ MityLite™ 2420 ■ MityLite™ 2430
- StealthLite™ Rechargeable 2450
- StealthLite™ Rechargeable 2460 Recoil LED™
- PM6 3320 ■ PM6 3330 LED
- Other Helmet Light Holders availble (see chart below)

3340 PM6 HELMET LIGHTING SYSTEM

Includes PM6 3320 and Universal Helmet Light Holder 770.
Also available: CAT. NO. 3350
(same as 3340 but with PM6 3330 LED)

> THE ANATOMY OF A SAFETY APPROVED FLASHLIGHT

Unbreakable non-conductive LEXAN® EXL Resin body

O-ring sealed body prevents switch-spark explosions

Extremely bright, safety approved Xenon lamp module. Internal gas pellets absorb excess hydrogen

PELICAN® Super SabreLite® SUBMERSIBLE

One way purge valve allows gases to escape

Polarity battery tray safeguards against hydrogen "outgassing" from inverted cells

Glow-in-the-dark photoluminescent shroud

Hi-impact nylon lens withstands extreme temperatures

HAZARDOUS AREA ELECTRICAL GUIDELINES

	SUBSTANCE	TYPICAL ENVIRONMENTS	CLASSIFICATIONS	VOLATILITY
CLASS 1	Flammable Gases, Vapors, or Liquids (Acetylene, Hydrogen, Ethylene, Propane)	Oil Refinery Paint Warehouse Spray Booth Offshore Oil Rig	Division 1 (Hazard Likely)	MOST
			Division 2 (Hazard Not Likely)	
CLASS 2	Combustible Dusts (Metals [Div. 1 only], Coal, Grain)	Coal Mine Munitions Factory Grain Silo Hay Storage Facility	Division 1 (Hazard Likely)	
			Division 2 (Hazard Not Likely)	
CLASS 3	Ignitable Fibers & Flyings (Machined Magnesium)	Paper Mill Woodworking Facility Textile Mill Cotton Gin	Division 1 (Hazard Likely)	
			Division 2 (Hazard Not Likely)	LEAST

Division 1:
Where volatile substances can exist all of the time or some of the time under normal operating conditions.

Division 2:
Where volatile substances are not likely to exist under normal operating conditions.

Gas Station

Service Garage

WHAT IT MEANS TO HAVE SAFETY APPROVAL

Products must pass a series of rigorous tests conducted by safety agencies before getting stamps of approval. When you're in a potentially hazardous environment, using a flashlight that carries the appropriate hazardous approvals is vital.

| UL Underwriters Laboratory | FM Factory Mutual | MSHA Mine Safety Health Administration | CSA Canadian Safety Health Administration | IECEx International Electrotechnical Commission | CE ⟨Ex⟩ ATEX Europe | USAR Urban Search and Rescue | ETL Electrical Testing Laboratories | SGS USTC SGS U.S. Testing Company | PS Certified Electrical Safety |

> PRIVATE LABEL

Pelican Products offers the ultimate in private labeling. You can put your company name and logo or a special statement on many Pelican light. Our in-house private label molding and production department has complete short and long run capabilities for a variety of custom applications and custom colors. We have the latest hot stamping equipment, utilizing the world's most durable epoxy inks and foils in our screening, hot tipping, embossing, and molding programs.

GRAPHIC DESIGN STUDIO

Our in-house graphics studio will take your logo and size it appropriately to the flashlight of your choice.

HOT STAMPING DEPARTMENT

Our hot stamping department, equipped with the latest technology in custom imprinting. Minimum quantities apply.

100% ACCURACY

Pelican's strict QA inspection team will check for quality of print and 100% accuracy in color and placement.

> MEET THE OTHER HALF OF PELICAN

STRONGER BY DESIGN

Pelican Protector™ Cases are made with Copolymer Polypropylene, using an open cell core and solid wall construction, which is actually stronger and lighter than the solid core wall that our competitors produce. Travel light with heavy protection. And you know it's a Pelican™ Case by the distinctive dual band top surface. Stainless steel pins are used for hinges and handles. The Double-Throw latches are smarter and easier to open: it's the classic "C" clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

PANEL FRAME MOUNTING SYSTEM

Pelican offers an easy solution for installing interface panels to most Pelican Protector Cases. Our mounting bracket installs beneath your panel and fits against stops molded inside the case walls. With pre-drilled holes and stainless steel screws, fabricating a custom case is faster, stronger, and more accurate.

WATERTIGHT

The secret is the tongue-and-groove fit with a Polymer o-ring acting as a waterproof seal. Also, the new Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open.

EXTRA PROTECTION

Pelican's Pick N Pluck™ foam and versatile padded divider sets are available for cushion and extra protection. For a better fit, our engineers will map the layout of your equipment for custom foam inserts. Just send a CAD drawing of the part and we'll die cut the foam insert and install it in a matching case.

ADDED SECURITY

Stainless steel reinforced padlock protectors provide added strength and extra security against cutting and theft.

PELICAN LEGENDARY LIFETIME GUARANTEE OF EXCELLENCE

Pelican Products, Inc. guarantees its products for a lifetime against breakage or defects in workmanship. Pelican™ injection molded cases are guaranteed to be watertight to a depth of 3.3 feet (1 meter) for 30 minutes (IP 67) unless otherwise stated if properly closed with undamaged o-ring in place. Pelican's liability is limited to the case and not its contents or foam. This guarantee does not cover the lamp or batteries (rechargeable or alkaline) for lights. Any liability, either expressed or implied, is limited to replacement of the product. This guarantee is void if the Pelican product has been abused beyond normal and sensible wear and tear. This guarantee does not cover shark bite, bear attack or damage caused by children under five.
