About Penco Products

Penco's 140 Year History

In 1869, a man named L. Lewis Sagendorph fulfilled his ambition to begin his own company that would produce the finest metal products in America. He called his fledgling business the Penn Metal Corporation of Pennsylvania, and began by making steel culvert pipe on Oregon Avenue in South Philadelphia.

Over the years, Penn Metal's product lines broadened to include lockers, shelving and even aircraft landing mats. A reputation for quality fabrication spread, and the company's influence became nationwide. In the 1950's, the name was shortened to Penco Products and today the large majority of products are manufactured in two company owned plants located in Salt Lake City, UT and Hamilton, North Carolina. Penco is also the founding member of the IMC Metal Fabrication Group with group offices based in Skippack, PA.

Today's Penco

Penco's product range falls into six unique categories; lockers, storage cabinets, shelving, pallet rack, shop furniture and hygiene products. Market sectors served include educational, healthcare, and government facilities, as well as offices, manufacturing companies, distribution warehouses, retail outlets, sports arenas and community parks.

Penco is proud to offer a wide breath of washroom solutions to all market sectors currently served. This includes our range of air freshener dispensers and cartridges, soap dispensers and refills and additional products for improved hygiene in work-areas of all kinds.

BulkMaster

1.5 Gallon Dispenser

Product Advantages :

- Industrial capacity – holds up to 1.5 gallons of product.
- Pumps both light lotion cleansers and heavy grit cleansers.
- Economical – bulk dispensing is the most cost-effective dispensing option for the customer and the large tank means fewer refills for service industries.
- The tank is translucent and thus provides easy visual check of contents.
- The high-impact polypropylene tank and heavy-duty activator stand up to heavy use.
- Top of tank has a lock so there is no risk of contamination or use by unauthorized personnel.
- Easy to clean design.
- Mounts easily.

Disposable Mat

Urinal and Toilet

Product Advantages :

A systems approach to a cleaner restroom

- Crisp green apple fragrance.
- Impregnated with Neutra Tech, a neutralizing agent to combat odors and refresh the area.
- Protects floors from stains, discoloration and uric acid damage.
- Prevents cross contamination of urine from the restroom to other areas.
- Improves facility's appearance by eliminating "unsightly" puddles.
- Holds up to 24 ounces of fluid.
- Makes restroom maintenance easier and faster, reducing labor.
- Improves safety against potential slips and falls.
- Special non-slip bottom provides a safer, drier floor surface.
- Available in two styles to accommodate urinal and toilet.
- Disposable and recyclable.
- Last 4 to 6 weeks, dependent on usage.

Urinal Screen:

- Block is enclosed in water-soluble wrap
- Cleans and deodorizes up to 30 days
- Natural odor counteractant
- Strong sudsing action assures sanitation
- Fragrance - Spice

Applications:

Penco

Storage Products

Industrial Shelving

Penco Products manufactures a wide variety of shelving products.

Clipper® and Erectomatic® Hi-Performance® shelving feature adjustable strong box beam shelves and post systems capable of supporting high-rise and multi-level installations. Wide Span shelving specializes in storing goods that are wide, high and bulky with extreme ease of assembly. RivetRite® boltless shelving's simple design offers an economical solution to most storage problems, from the small back room to the multi-level archive storage system.

Shop Furniture

Penco's products in the Shop Furniture line can make your work environment more comfortable and efficient. Various configurations of work benches, carts and stools can be combined to help organize any work area for maximum productivity.

Lockers

Penco has locker solutions for schools, recreation centers, health clubs, hospitals, back office and industry break rooms, while at the same time delivering the widest range of solutions to serve first responders in the military, law enforcement and fire and rescue profession.

Pallet Rack

Penco pallet rack is a carefully engineered system designed to provide highly efficient storage of palletized items. High strength steel and efficient design achieve a superior strength-to-weight ratio that makes Penco Rack one of the best values for your storage dollar. A wide range of sizes, capacities and accessories enables Penco pallet rack to handle virtually any job you can give it.

Storage Cabinets

Penco's E-Z Bilt Cabinets are an ideal solution to storage needs in offices, plants, schools and institutions. The contemporary design and attractive powder coat baked enamel finish is compatible with any decor. Design features include a recessed handle with built-in lock and two keys. Available in several models and sizes.

Hygiene

Penco's Hygiene Line offers one of the most complete product selections on the market today, including soap and lotion dispensers and refills as well as air fragrance cartridge dispensers.

Metal Fabrication Group

Corporate Information

Industrial Manufacturing Company (IMC)

The parent company of Penco and its affiliates in the Metal Fabrication Group is Industrial Manufacturing Company (IMC). IMC and its international arm, IMCI, are a proud family of companies that produce a wide variety of innovative products for industry. With more than 3,500 employees and 30 worldwide manufacturing, sales and distribution facilities, it produces aircraft and aerospace ducting systems, gears, lubrication systems, bleachers, steel and plastic lockers, storage systems, steel mezzanines, high-performance strainers, car and truck components, industrial hoses and industrial expansion joints.

Although each IMC and IMCI company operates independently, common to all of them is a profound respect for the integrity of established industrial principles and a practical openness to applications of new technology. With individual histories spanning decades – and in two cases more than a century – the IMC and IMCI companies are time-tested leaders in their national and global markets.

Each IMC and IMCI subsidiary strives to tailor its products and services to the wishes of its customers, and each company's success has been built on the development of enduring customer relationships. They take pride in providing not only products of consistently high quality, but also in flexible and responsive service and in realistically competitive prices.

All Star Bleachers, Inc.

For more than 50 years, All Star has been a leading designer and manufacturer

of bleachers and grandstands for indoor and outdoor seating applications. All Star takes pride in providing products of consistently high quality, responsive service and realistically competitive prices. Products range from a simple team bench to a grandstand that meets the VIP seating requirements of a NASCAR race. Visit www.allstarbleachers.com

Schmidt Structural Products, Inc.

For over 40 years, Schmidt Structural Products, Inc. (formerly W.A. Schmidt) has designed, manufactured and installed structural steel mezzanines to vertically expand floor space quickly and economically. A mezzanine can double or even triple existing space at up to 80% less than the cost of a building addition. Visit www.schmidtstructural.com

Quality Metal Products

Quality Metal Products (QMP) designs and manufactures storage equipment and outdoor shelters for use in the workplace. Its metal fabricated products include lockers, storage cabinets, modular drawers, work benches, bicycle racks and shelters. Market sectors served by QMP include educational, health, and government facilities, as well as offices, manufacturing companies, retail outlets, sports arenas and community parks.

Established in 1958, QMP is located in the West Midlands, the historical heartland of manufacturing in the UK. Their manufacturing facility occupies over 107,000 square feet and includes state of-the-art metal fabrication equipment including CNC blanking and CNC forming in addition to powder coating and robotic welding.
