1536-1 Positive Pressure/Demand Valve \$1125
with Universal Mask; 10 foot Hose; Mobile
Cart; Regulator and Yoke; and Porter Connection

The Porter/O-TWO Demand Valve Resuscitator provides a fast, simple and effective means to ventilate non-breathing patients and provides 100% oxygen on Demand.

Designed to meet the varying requirements of the Emergency Medical Services/Rescue Personnel, it is the only Demand Valve Resuscitator that comes standard with an Audible Pressure Relief System and sensitive Manual Ventilation Button, conveniently located on the front of the resuscitator. The Manual Ventilation Button helps to ensure a patient airway by enabling both hands to remain on the mask to facilitate a superior mask to face seal (without having to deal with cumbersome trigger levers or inconveniently located top buttons).

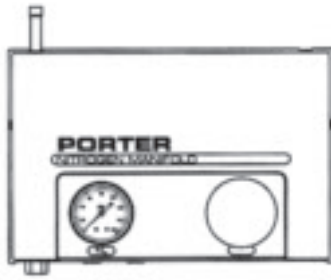

The Manual Ventilation Flow rate is fixed at 40 lpm in line with the 1992 American Heart Association Recommendations and Guidelines for Resuscitation.

During spontaneous respirations, the Demand Valve Resuscitator is designed to provide 100% oxygen to a breathing patient with minimal respiratory effort. The oxygen demand flow is controlled by the patients inspiratory effort, with flow rates up to 160 lpm, to accommodate their own respiratory distress situation.

1538 Mobile Cart Only \$183

Oxygen Resuscitation System

	Order No.	Description	List Price
	1536-1	Positive Pressure/Demand Valve with Universal Mask; 10 foot Hose; Mobile Cart; Regulator and Yoke; and Porter Connection	\$1125
	<p>The Porter/O-TWO Demand Valve Resuscitator provides a fast, simple and effective means to ventilate non-breathing patients and provides 100% oxygen on Demand.</p> <p>Designed to meet the varying requirements of the Emergency Medical Services/Rescue Personnel, it is the only Demand Valve Resuscitator that comes standard with an Audible Pressure Relief System and sensitive Manual Ventilation Button, conveniently located on the front of the resuscitator. The Manual Ventilation Button helps to ensure a patient airway by enabling both hands to remain on the mask to facilitate a superior mask to face seal (without having to deal with cumbersome trigger levers or inconveniently located top buttons).</p> <p>The Manual Ventilation Flow rate is fixed at 40 lpm in line with the 1992 American Heart Association Recommendations and Guidelines for Resuscitation.</p> <p>During spontaneous respirations, the Demand Valve Resuscitator is designed to provide 100% oxygen to a breathing patient with minimal respiratory effort. The oxygen demand flow is controlled by the patients inspiratory effort, with flow rates up to 160 lpm, to accommodate their own respiratory distress situation.</p>

N₂O/O₂ Delivery Systems

Nitrous Oxide provides safer, quicker and more comfortable dental care.

Fear. Anxiety. Pain.

A visit to the dental office is traditionally ranked as one of the leading fears of people from all walks of life. In many cases, it leads to late or broken appointments that disrupt the operation of your practice.

There is a solution.

Nitrous Oxide.

Thousands of dentists throughout the world have discovered the benefits of using a nitrous oxide/oxygen gas mixer system from Matrix by Midmark to relax apprehensive patients and drastically minimize any feelings of discomfort.

A Matrix N₂O/O₂ Mixer is simple and safe.

- It allows your patient to breathe more oxygen while enjoying a remarkable depth of relaxation
- It virtually eliminates the fear, nervousness and tension associated with dental procedures
- Your patient remains in complete control, is conscious and can follow directions
- A built-in, fail-safe in every Matrix mixer guarantees nitrous oxide will not flow unless a minimum concentration of 30% oxygen is flowing

And best of all, it makes your practice more efficient and profitable.

- Patients are more relaxed so you can accomplish more per visit
- You can work in all four quadrants
- Increased productivity means more income for you

Matrix N₂O Mixer equipment, the first choice of dental professionals throughout the world!

Over four decades ago, Fraser Sweatman developed the technology found exclusively in Matrix N₂O/O₂ Mixer machines today. Year after year, thousands of dentists have placed their trust in our machines because of our commitment to quality manufacturing and our outstanding service.

Matrix Auto-Compensation

Matrix Digital MDM and MDM are designed with our Auto-Compensation feature which allows you to maintain flow rate when you change gas mixture percentage. Plus, they also maintain percentage when you change flow rate.

Matrix Digital MDM®

The future of conscious sedation. The Digital MDM is the most accurate nitrous oxide/oxygen mixer available! Measure and control rates as low as 0.1 LPM. Plus, it features the Matrix flow and percentage Auto-Compensation.

Matrix MDM®

The only pneumatic mixer with Auto-Compensation to maintain flow rate when you change gas mixture percentage. Also maintains percentage when you change flow rate.

Matrix RA®

The relative analgesia machine designed with a built-in fail-safe that guarantees a minimum delivery of 3 LPM of oxygen at all times.
