Water Conservation

Price Pfister has teamed with the U.S. Environmental Protection Agency's (EPA) WaterSense program to help consumers conserve water for future generations and reduce costs on their water bills. The aim of the new EPA WaterSense program is to help customers identify water-efficient products in the marketplace that have been independently certified for efficiency, performance and promote water-saving techniques that reduce stress on water systems and the environment. Fully adopting water-efficient products and practices can save the average household approximately 30,000 gallons of water per year—enough to supply 150 homes for drinking water for an entire year.

Price Pfister

Can help reduce water consumption by 30%
without compromising the water experience.

Throughout the catalog, when you see this logo, you can be sure to know that the product is **WaterSense certified**.
