PROTECTIVE CLOTHING

GORE-TEX® PROTECTIVE OUTERWEAR

- Gore-Tex® offers the most durable combination of waterproofness and high breathability
- Keeps users dry and comfortable and makes their work safer and more productive
- Tough durability for real working conditions
- Water vapor escapes through the fabric, avoiding a build-up of heat and perspiration

We start by bonding the Gore-Tex® fabric membrane to high performance textiles to create laminated fabrics tailored to meet the most stringent needs of the wearer. Water cannot penetrate the membrane because it is made up of millions of micropores, which are too small to allow a water droplet to pass through. However, the microporous structure aids the body's natural cooling process by allowing moisture vapor to escape - making the fabric breathable. The result is the wearer stays dry, warm and comfortable.

Gore-Tex® High-Visibility Bomber Jacket

370-0100	High-Vis Yellow	S - 5XL
370-1100	High-Vis Orange	S - 5XL

- 100% Gore-Tex® laminated polyester shell fabric with fully taped seams
- ANSI/ISEA 107 Class 3
- Removable fold away hood for easy storage and additional protection
- Elasticized inner storm cuff for a weather tight seal around your wrist
- Double storm flap with a reliable heavy duty zipper and snap closure to ensure waterproofness
- Exterior flap pocket for extra storage
- 2" 3M Scotchlite™ long lasting reflective tape for reliable performance

Gore-Tex® High-Visibility Pants

370-0300	High-Vis Yellow	S - 5XL
370-1300	High-Vis Orange	S - 5XL

- 100% Gore-Tex® laminated polyester shell fabric with fully taped seams
- ANSI/ISEA 107 Class 3
- Plain Front
- Gusseted zipper cuff closure allows donning over boots
- Elasticized waist band for a comfortable fit
- 2" 3M Scotchlite™ long lasting reflective tape for reliable performance

HIGH VISIBILITY

The ANSI Standard:

The ANSI (American National Standards Institute) is a private, non-profit organization that promotes standards for industry and government. The ANSI/ISEA 107 - 2010 is now the approved 107 Standard on High Visibility Apparel offering garment categories of Performance Classes. These Classes are based on worker hazards and tasks, the job site's complex background and vehicular traffic and speed.

While the requirements for reflective apparel remains largely unchanged from the second edition (ANSI/ISEA 107-2004), there is a new requirement that now includes a minimum amount of retro reflective material in the shoulder area. The new standard does not make any changes to the amount of background or reflective material required for the performance classes. Our clothing has and will continue to meet these requirements while we change our labeling and certification procedures to conform to the ANSI/ISEA 107-2010 standard.

There are also other changes which include clarification on definitions of waterproof, water resistant and water repellent and significant new labeling and test requirements for flame resistant garments. We will continue to move forward on all of the changes and incorporate these into our garments. Printed copies of the official ANSI/ISEA 107-2010 standard are available at www.safetysiteequipment.org.

Minimum Requirements:

ANSI Class	Background Fabric	Retro Reflective Material
Class E	465 in ²	108 in ²
Class 2	775 in ²	201 in ²
Class 3	1240 in ²	310 in ²

FR Standards

Flame Resistant: The characteristic of fabric to resist ignition and to self extinguish if ignited. Washing does not diminish flame resistance. Garments that are labeled as flame resistant must also be compliant with at least one of the following standards in its entirety: ASTM F1506-08, ASTM F1891-06, ASTM F2302-08 or ASTM F2733-09.

Flame Retardant: A chemical substance used to impart flame resistance on a fabric (chemically treated). Flame resistance fades with washing. Meets NFPA 701.

FR Disclaimer, Layering of Protective Clothing

Layering Using FR Clothing over Natural Fiber Clothing Under Layers:

Under some exposure conditions, natural fiber under layers can ignite even when they are worn under FR Clothing

If the arc flash exposure is sufficient to break open all the FR clothing outer layer or layers, the natural fiber under layer can ignite and cause more severe burn injuries to an expanded area of the body. This is due to the natural fiber under layers burning onto areas of the worker's body that were not exposed by the arc flash event. This can occur when the natural fiber underlayer continues to burn underneath FR clothing layers are not broken open due to a "chimney effect"

ANSI and Safety Workwear

ANSI Class 3

What is Class 3?

Class 3 apparel is intended for workers requiring the highest level of visibility who have high task loads and need to be visible throughout a full range of body motions.

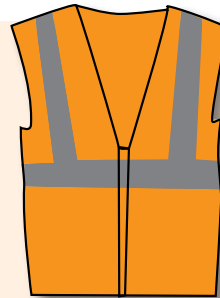

Required For Workers Who:

- have high task loads that often divert their attention
- are exposed to significantly reduced sight-distances
- are clearly placed in danger
- must be conspicuous through a full range of body motions at a minimum of 1280 feet and must be identifiable as a person

Who Wears Class 3?

- roadway construction workers
- survey crews
- construction vehicle operators
- utility workers
- accident scene investigators
- railway workers
- emergency response personnel
- flagging crews

ANSI Class 2

What is Class 2?

Class 2 apparel is intended for workers who are exposed to traffic traveling over 25 mph and who are working against complex backgrounds.

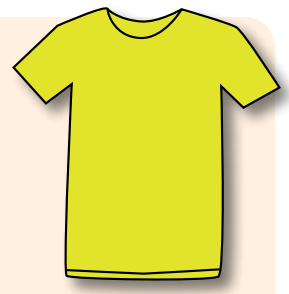

Required For Workers Who Are:

- performing tasks that divert their attention from approaching traffic which is traveling more than 25 mph
- working in close proximity to traffic

Who Wears Class 2?

- roadway construction workers
- survey crews
- parking and toll gate personnel
- railway workers
- emergency response personnel
- forestry workers
- accident site investigators
- utility workers
- airport baggage handlers & ground crew
- school crossing guards
- law enforcement personnel

NON ANSI

What is Non-ANSI?

Non-ANSI garments are color enhanced clothing that offer an additional level of safety for low risk activities, but does not meet ANSI standards.

Useful For Workers Who Need:

- a base layer under ANSI certified workwear
- an added level of visibility
- a uniforming option
- a change of clothing for lunch periods on jobsite

Who Wears Non-Ansi?

- shopping cart retrievers
- dog walkers
- parking lot attendants
- joggers
- delivery vehicle drivers
- recreational workers
- anyone who wants to stand out

Performance Classes and scenarios depicted in this brochure are intended for assessment purposes only. Certain specific conditions such as atmospheric, sight/stop-distance, training, regulations, proximity, etc. must be taken into account in any final hazard/safety assessment. Vehicle speed should not be considered in isolation to these variables. Extreme conditions might exist which require performance levels in excess of Class 3. Personal protective equipment should be selected to optimize color conspicuity between the wearer and the work environment. Visit www.ansi.org for more information. Vest Stripes on the torso may vary due to inventory changes.

Public Safety Vests

**ANSI
Class
2**

The **ANSI/ISEA 2007-2006** public safety vest standard was developed in response to a public safety group demand for a high-visibility safety vest garment differentiated from ANSI/ISEA compliant apparel. This primary concern was a need for flexibility of designs that would provide tactical capability not achievable with ANSI garments. Additionally, user groups expressed a desire for a high-vis standard for law enforcement and emergency responders distinct from ANSI, avoiding interchangeability with construction and traffic vests.

All Public Safety Vests have:

- Class* • ANSI 207-2006 Class 2
- Fabric* • Breathable Mesh Top, Durable Solid Bottom
- Features* • 5 Point Off Shoulder Breakaway System for Added Safety
- Adjustable Sides for Comfortable Fit
- 2 Mic Tabs with Reinforced Stitching
- Oversized Lower Internal Pocket, 1 External Pen Pocket on Chest
- 2 Sizes* • Made Specifically to Allow Easy Access to Utility Belt
- M/XL, 2X/5X

FLAME RESISTANT WORKWEAR

Flamesafe-Flame Resistant Cotton Garments

Everyday work clothes made from regular cotton or polyester/cotton fabrics can readily ignite and continue to burn upon exposure to electric arc flash and flash fire.

Flamesafe MaxiSoft® Flame Resistant Cotton knit garments meet the requirements of NFPA 70E, ASTM F 1506, OSHA 29, CFR 1910.269 and NESC 2007 to offer optimum protection, superior comfort, corporate style and great value.

The Flamesafe MaxiSoft® engineering process imparts durable flame resistant properties to cotton by producing an invisible, long chain flame retardant polymer, impregnated into the core of every fiber. *When flame comes into contact with MaxiSoft® FR cotton, an insulating char is formed with no melting, dripping, smoldering or after glow.*

MaxiSoft® FR Cotton retains all the essential comfort features of natural cotton such as air permeability and moisture transmission. **MaxiSoft® FR Cotton does not build up static electricity.** MaxiSoft® flame resistant properties will not be diminished for the wearer's life of the garment.

After a 50 year history as the completely "safe choice" this very same technology has protected over 40 million people from injury and death by fire since its introduction and it continues to do so today.

Standard for NFPA 70E Safety Requirements for Employee Workplaces; 2009 Edition

Hazard Risk Category	Clothing Description	Minimum Arc Rating
0	Non-Melting, Flammable Materials	Not Applicable
1	Arc Rated FR Shirt and FR Pants or FR Coverall	4
2	Arc Rated FR Shirt and FR Pants or FR Coverall	8
3	Arc Rated FR Shirt and FR Pants or FR Coverall, and arc flash suit selected so that the system arc rating meets the required minimum	25
4	Arc Rated FR Shirt and FR Pants or FR Coverall , and arc flash suit selected so that system arc rating meets the required minimum	40

FLAME RESISTANT WORKWEAR

Flame Resistant Hoods

- 100% Nomex® flame resistant hoods offer limited chemical splash protection along with excellent wear and durability
- 100% Nomex® Fabric's protective qualities will not wash out
- Fabric meets OSHA requirements for flame resistance
- All bibs are 6" single-layer, front and back
- Ideal for use in chemical plants, metal and glass manufacturing, natural gas production and distribution and law enforcement
- One Size Fits Most

Protective Barrier

A key factor in the thermal protection Nomex® provides is that it carbonizes and thickens when exposed to the intense heat of today's fires. This increases the protective barrier between the heat source and the skin and minimizes burn injury. This tough, protective barrier stays supple and flexible until it cools, which gives you valuable extra seconds of protection when you need it most.

Durability

Garments made from Nomex® are also durable, lasting on average two to three times longer than most other standard protective fabrics, including 100% cotton, polyester garment blends and typical flame retardant treated cotton. Industrial launderers estimate that the average wear life of protective apparel made of Nomex® is approximately five years, and that it can be washed and worn at least 125 times. Comparatively, garments made of FRT cotton can be washed and worn an average of only 36-50 times.

Nomex® Hoods with Bibs

HEAT STRESS MANAGEMENT

Heat Stress Cooling Vests

- **Alleviates the negative impact of heat stress through evaporative cooling**
- **Improves concentration and performance**
- **Simply activated with water in seconds**
- **Stays cool for hours**
- **Helps the body maintain its core temperature**
- **No wetness or drop formation, keeping the user dry for hours**
- **Soft, smooth material for convenient wearing comfort**
- **Retains cooling properties for the lifetime of the vest**
- **Eliminates perspiration and body odors**
- **Wide hook and loop closure for the perfect fit**

390-1009	Navy, Small
390-1010	Navy, Medium
390-1011	Navy, Large
390-1012	Navy, X-Large

390-1014	Navy, 3X-Large
390-1015	Navy, 4X-Large

E-COOLINE

In the human body, around 70% of muscular work is transformed into heat. Elevated temperature and protective clothing reinforces thermal stress. Concentration and performance suffer with negative impact on productivity for the company and on safety for the individual.

E-COOLINE protects fire fighters, security staff, servicemen and workers in hot environments from high temperatures by improving concentration and performance while preventing heat stress and exhaustion.

The high tech fleece significantly alleviates the negative impact of heat stress through evaporative cooling, helping the body maintain its core temperature of 98.6 degrees.

As a result of the physical principle of evaporation cooling, E-COOLINE cools more intensively at higher temperatures and less intensively at low temperatures. This produces optimal cooling at all times, the high tech material also absorbs the body's own perspiration, thereby also promoting the body's own cooling system. Dependent on the ambient temperature, the cooling effect is maintained for hours up to several days and is therefore suitable for any period of work and deployment.

Lighter and more effective than the competition!

390-M1864P-YEL Hi-Visibility Cooling Vest with Pocket

- ANSI/ISEA Class 2

-----------------	--------------

Heat Stress Cooling Vests

- Activates in just 10 - 30 seconds when submerged in water
- 3 layer patented cooling fabric
- Zipper closures for easy on easy off

COOL MEDICS

Cool Medics cooling vests are constructed from a patented three-layer fabric by combining hydrophilic fibers into a fibrous batting core and a thermally conductive lining. This construction will provide cooling after allowing the product to soak in water for 10 - 30 seconds.

The water activates the cooling process by charging the fibers with moisture and creating an environment for evaporation. When moisture in the batting evaporates, heat is removed and cools the surrounding area, transferring the cooling effect to the wearer.

Fire Resistant Material Styles

Our Cool Medics fire retardant products are manufactured from 100% cotton flame resistant fabric. Flame resistant means that it resists ignition when faced with fire and can self extinguish if ignited. This fabric will not lose its flame resistance if washed. A product that is flame retardant is treated by the chemical substance used to make it flame resistance but its potency washes out.

The fabric we use is 7oz and has flame resistance that is guaranteed for the life of the garment. This fabric has met Federal test method 191 and standard test method 5903, and meets NFPA70E Category 2. The NFPA70E (National Fire Protection Agency) is considered industry practice by OSHA including information on electric arc flash hazards, required flame resistant clothing and personal protective equipment (PPE).

HEAD PROTECTION

HEAD PROTECTION

MK8 Evolution® Hard Hat

The **STRONGEST** Industrial Safety Helmet in the World

JSP Has Evolved Head Protection...

The MK8 Evolution® meets the ANSI Z89.1-2009 standard for Type II impact protection. However, it is also the only industrial safety helmet in the world meeting and exceeding the new, tougher European standard EN14052... the biggest advance in industrial head protection in over 45 years.

MK8 Evolution® was designed for today's highest risk environments where high impact/side impact situations are a concern... such as Construction, Mining, Oil and Gas, Demolition, High Pressure Jetting, Energy Companies and certain Emergency Services (like FEMA & USAR).

Designed and developed over two years, MK8 Evolution's® excellent construction quality complements the high standard of design and materials which go into the helmet. This includes features such as a high density liner and a comfortable new harness system which creates unparalleled wearer comfort and acceptability.

But more importantly, MK8® demands protection from SIDE IMPACTS and SIDE PENETRATION to the same level as ANSI Z89.1 Type I testing, with almost 20 times the coverage area.

EN14052 Testing

Requires each helmet to be hit twice. ANSI Type II testing only requires the test sample to pass one hit.

1a. Penetration Test - Crown

Helmet is hit twice, once in the crown area with a 2.2 lb. chisel shaped striker from 8 feet.

1b. Penetration Test - Side

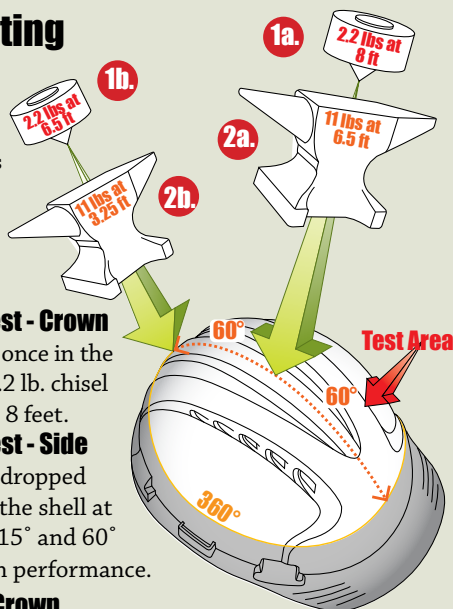

The same weight is dropped from 6½ feet onto the shell at any angle between 15° and 60° for Side Penetration performance.

2a. Impact Test - Crown

Helmet is hit twice, once in an area within a 1⅜" radius of the crown with a 11 lb. weight from just over 6½ feet.

2b. Impact Test - Side

The same weight is dropped from just over 3¼ feet onto the shell at any angle between 15° and 60° for Side Impact performance.

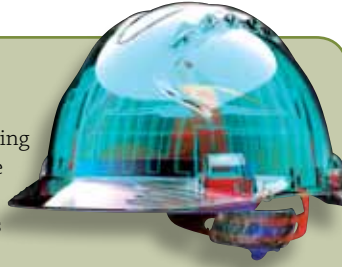

MK8 Evolution® features:

- Meets and Exceeds ANSI Z89.1-2009 Standard for Type II, Class E, G and C
- Offers side (Lateral) Impact Protection... reduces the force of impact resulting from a blow which may be received off center as well as to the top of the head
- Also offers side penetration protection...in addition to crown penetration
- Expanded Polystyrene (EPS) Impact Liner...helps absorb the forces of impact
- High-Density Polyethylene (HDPE) shell
- Deluxe polyester strap suspension with crown pad webbing
- Ratchet suspension...allows user to easily adjust fit while wearing
- Universal accessory slots

Impact Protection

Side, front and rear impact protection from the shock absorbing EPS liner. Vented liner to increase comfort while maintaining high protection factor. Liner optimizes low angle impact performance.

Comfort

Extremely comfortable polyester fabric webbing molds to the individual wearer's head. Lightweight EPS liner reduces weight while still offering maximum protection.

Outer Shell

Ultra high strength outer shell. Ribbed upper section dissipates impact energy. All round protection down to 60° from vertical. Large imprint area on front and sides for logos.

Adjustment

Intuitive thumb and forefinger press points for easy adjustment of the wheel ratchet. Offers diverse size ranges for true "One Size Fits All".

MK8 Evolution® Top & Side Impact Hard Hat

HEAD PROTECTION

Surefit™ Contour Helmet Mounted Ear Muffs

Fits All Hard Hats with Universal Accessory Slots... MK8®, Comfort Plus and Comfort

Designed for added long-term comfort and increased protection. When not in use, the arms allow the cups to stand off clearly from the head.

- Easy to attach and detach from helmet
- Spring loaded arms...give an excellent fit to the ear
- Soft foam ear cushions ensure comfortable wear
- Durable polystyrene ear cups pivot and slide for a secure seal
- NRR of 25 dB for protection against common industrial noise

Surefit™ Contour Helmet Mounted Ear Muffs

262-AEJ030-50

Blue

Top Cap™ Bump Cap

Bump Caps are designed as a safeguard against accidental bumping or scraping of the head. This sporty baseball cap style will increase wearer acceptability. The profile of the Top Cap™ allows it to be worn with other safety protection such as ear muffs, eyewear, and respiratory masks.

- Inner high-density polyethylene (HDPE) with foam cushioning
- Fabric cap has six ventilation holes... to help keep the head cool
- Adjustable back... so one-size-fits-all
- High-Profile Baseball or "Truckers" cap style

Top Cap™ Bump Cap

282-ABG100-11	Black
282-ABG100-21	Navy
282-ABG100-50	Blue
282-ABG100-20	Yellow
282-ABG100-30	Green
282-ABG100-80	Orange

Bump Caps are NOT designed for use in ANSI hard hat designated areas.

See page 90 for details...

HardCap A1+® Bump Cap

The HardCap A1+® Bump Cap is another major innovation from JSP in head protection design. Years of thought and design iterations were undertaken to develop a product that is unrivalled in both performance and style. Sleek and low-profile, it's almost impossible to distinguish from a standard baseball cap.

Getting workers to wear head protection can be tough, especially in areas where hard hats are not required. It's estimated that a third of all impact injuries to the head are suffered by workers who bumped into stationary objects while not wearing any head protection. The sporty baseball style of the HardCap A1+® is sure to increase wearer acceptability...thereby reducing injuries.

Low-Profile Design

Ultra sleek design means the HardCap A1+® is almost indistinguishable from a low-profile baseball cap.

All Round Protection

The protective HDPE liner is removable, so the outer cap is fully washable.

Unique Size Adjuster

Unique angled adjuster slides on the elastic strip to give a quick, secure fit.

Sweatband

Terry cloth sweatband adds comfort and absorption for the wearer.

Reflective Piping

Reflective piping adds extra visibility and therefore safety in all working environments.

Ventilation

Extra holes in the liner plus the two mesh panels on the outer cap mean added ventilation for coolness and comfort.

HardCap A1+® Bump Cap Standard 2 3/4" Brim

282-ABR170-62	Gray/Red
282-ABR170-21	Navy/Navy

- Universal hole pattern will fit most head gear and hard hat adapters in the market
- Available in the popular .040" x 8" x 15½" clear configuration. Also available in .060" clear upon request
- Visors have masking on both sides to protect from scratches during shipping

PETG Visors (Polyethylene Terephthalate Glycol)

- PETG visors are suitable for general grinding applications
- Also available in medium and dark green
- Certified to ANSI Z87.1 and CAN/CAS Z94.3-07

Polycarbonate Visors

- Polycarbonate visors are suitable for "High Heat" and "Impact Resistant" situations, as well as general grinding applications
- Certified to ANSI Z87.1-03+ and CAN/CAS Z94.3-07

All visors should be worn with approved ANSI Z87.1-2003 eyewear for full OSHA compliance

Headgear

- Blue polypropylene
- Ratchet suspension adjustment around head circumference
- Pin adjustment across the crown for a comfortable fit
- Lightweight and durable with brow sweatband for the forehead

251-01-5200	Blue Headgear with Ratchet
251-01-5201	Clear Polycarbonate Face shield-Universal 8"x15.5", .040"
251-01-5211	Clear Polyethylene Face shield-Universal 8"x15.5", .040"
251-01-5002	Green, Polycarbonate face shield-8"x15.5", .040"

Chemical Splash Goggles - Indirect Venting

- Excellent protection against liquids and chemicals
- Indirect vents on top and bottom of goggles allow air to enter from the reverse direction, providing maximum splash protection
- Clear PVC mask to reduce glare
- Facial flange for maximum comfort
- Fits over most prescription glasses
- Ultra comfortable, soft body for snug seal
- Meets ANSI Z87.1 Standard

251-30-0020	Clear, With Anti-Fog Coating
251-30-0080	Clear, Non-Coated
251-20-0020	Green, With Anti-Fog Coating
251-20-0080	Green, Non-Coated

Impact Goggles - Direct Venting

- Clear PVC mask to reduce glare
- Fits over most prescription glasses
- Ventilation surrounds mask for all-around airflow

251-32-0020	Clear, With Anti-Fog Coating
251-32-0080	Clear, Non-Coated
251-22-0080	Green, Non-Coated

EYE AND FACE PROTECTION

Eva™

Smaller and more narrow than standard safety glasses.

Women's Eyewear

Rimless Frame, Rubber Temple End Piece, Polycarbonate Bridge.

- The first woman's safety eyewear for women in the workforce
- Eva's construction allows for the eyewear to better fit the facial structure of a woman
- Provides a more secure fit on your bridge

250-10-0900	Clear/Pink Temples, Clear Hard Coat Lens
250-10-0920	Clear/Pink Temples, Clear Anti-Fog Lens
250-10-0904	Clear/Pink Temples, Pink Hard Coat Lens
250-10-5501	Gray/Pink Temples, Gray Hard Coat Lens

Lady Eva™

Women's Reader Eyewear

Magnification Reader, Rimless Frame, Pink Temples, Hard Coated, Anti-Fog Lens.

- The first woman's safety eyewear for mature women in the workforce
- Lady Eva™ readers help enhance your vision
- Offered in increments of .25 diopters to give your employees the correct reading power for their prescription

250-12-0100	Reader Bifocal +1.00 Diopter, Clear Lens
250-12-0125	Reader Bifocal +1.25 Diopter, Clear Lens
250-12-0150	Reader Bifocal +1.50 Diopter, Clear Lens
250-12-0175	Reader Bifocal +1.75 Diopter, Clear Lens
250-12-0200	Reader Bifocal +2.00 Diopter, Clear Lens
250-12-0225	Reader Bifocal +2.25 Diopter, Clear Lens
250-12-0250	Reader Bifocal +2.50 Diopter, Clear Lens
250-12-0275	Reader Bifocal +2.75 Diopter, Clear Lens
250-12-0300	Reader Bifocal +3.00 Diopter, Clear Lens

Eva™ Petite

Women's Eyewear

Rimless Frame, Rubber Temple End Piece, Polycarbonate Bridge.

- The first woman's safety eyewear for women in the workforce
- The Eva™ Petite eyewear frame is smaller and more narrow than standard safety glasses, designed specifically for women

250-11-0900	Clear/Pink Temples, Clear Hard Coat Lens
250-11-0920	Clear/Pink Temples, Clear Anti-Fog Lens
250-11-0904	Clear/Pink Temples, Pink Hard Coat Lens
250-11-5501	Gray/Pink Temples, Gray Hard Coat Lens

Eva's™ construction allows for the eyewear to better fit the facial structure of a woman, and provides a more secure fit on the nose. Eva Petite™ is 12mm slimmer than "standard" sized safety glasses, ensuring a great fit for women with more slender facial profiles. Better fitting eyewear will protect the eyes more effectively.

Breast cancer has impacted everyone in one way or another, and Eva™ provides a great venue to promote awareness. Perhaps one more woman in the workplace will get a mammogram because she sees the pink ribbons on all of her co-worker's glasses. PIP has partnered with the American Cancer Society, and will be donating a portion of all proceeds to assist in finding a cure for Breast Cancer. Please help PIP support this wonderful cause as we provide a VISION FOR A CAUSE!

Michele is a breast cancer survivor

Ear Muffs

Classic® Extreme Ear Muffs

These ear muffs have been designed with comfort in mind for users requiring protection for extended periods. Suitable for high noise levels like airports, excavation equipment, generators and high frequency welding.

- Soft foam ear cushions for all-day comfort
- Padded foam headband rests comfortably on the head
- Durable Acrylonitrile Butadiene Styrene (ABS) ear cups pivot for a comfortable fit
- 2-Point cup suspension ensures even pressure and a good seal against noise
- NRR of 28 dB for greater protection in noisier environments

261-AER110-50 Blue

J Muff™ Light Duty Ear Muffs

A lightweight, yet sturdy ear muff providing cost effective protection. Suitable for light industrial duty and outdoor construction applications.

- Soft foam ear cushions ensure comfortable wear
- Lightweight headband maintains proper tension for all-day comfort
- Durable Acrylonitrile Butadiene Styrene (ABS) ear cups pivot and slide for a secure seal
- Muffs can be worn over-the-head, behind-the-neck or under-the-chin for maximum versatility
- NRR of 20 dB is ideal for protecting against most common industrial noise

261-AEA000-50 Blue

SureFit™ Contour Helmet Mounted Ear Muffs

Will fit all hard hats with universal accessory slots. Designed for added long-term comfort and increased protection. When not in use, the arms allow the cups to stand off clearly from the head.

- Easy to attach and detach from helmet
- Spring loaded arms...give an excellent fit to the ear
- Soft foam ear cushions ensure comfortable wear
- Durable polystyrene ear cups pivot and slide for a secure seal
- NRR of 26 dB for protection against common industrial noise

262-AEJ030-50 Blue

HEARING PROTECTION

Ear Muff Mounted Faceshield

Bushmaster™ Mesh Visor

The Bushmaster™ unit was designed with optimum protection and maximum comfort for users where head protection (hard hats) is not mandatory. Combines high protection rated Classic® Extreme ear muffs with a 200 mm wire mesh visor. Ideal for forestry and landscaping applications.

1 Quick Release Detachable Visor

Allows ear muffs to be used on their own.

2 Quick Release/Change Visor Fittings

Allows quick and easy replacement of mesh visor.

3 Flip-Up Locking Hinge

Allows the visor to be safely flipped up and locked at a 90° angle for closer inspection of work in-between or after work sessions.

4 Padded Headband and Ear Cups

Means added comfort for prolonged use.

- Pleated style with ear loops
- 3-ply construction
- Latex-free and hypo-allergenic
- Adjustable nose clip

270-4000

50 masks per box, 40 boxes per case

Breathing Hazards

Particulates - can be created from a solid or a liquid. Solid particles are produced by operations such as grinding, crushing, drilling, blasting, sanding and milling. Spraying operations, planting operations, mixing and cleaning operations create liquid particles.

Fumes - created when solid materials vaporize under high heat. Fumes come from operation such as welding, smelting and pouring of molten metal.

Gases - substances similar to air in their ability to diffuse or spread freely throughout a container or area. Examples include oxygen, carbon monoxide, carbon dioxide, nitrogen and helium.

Vapors - formed when a solid or liquid evaporates. Common vapors are gasoline, paint thinners and degreaser solvents.

Federal Safety Regulations

OSHA has developed detailed standards for personal respiratory protection in the workplace. General industry OSHA exposure limits can be found in 29 CFR 1910.100. General industry standards are explained in 29 CFR 1910.134 and application-specific information is in other relevant subsections of section 1910. General respirator requirements for construction can be found in 29 CFR 1926.103; general respiratory requirements for maritime work is in 29 CFR 1915.152. In addition, look for certification by the National Institute for Occupational Safety & Health (NIOSH).

Please Note: The PIP products in this section of the catalog must be used in accordance with OSHA regulations, and the user instructions, warnings and limitations accompanying each product.

RESPIRATORY PROTECTION

Powered Respirator

PowerCap® Lite with Impact Protection

The PowerCap® Lite provides the wearer with a greater feeling of freedom and ease of use. PowerCap® provides a consistent airflow of 5.6 CFM for 8 hours continuously, with a head weight of under one pound. Impact protection is provided by incorporating a bump cap along with an impact faceshield. The PowerCap® Lite utilizes lithium ion batteries derived straight from the latest cell phone technology. This has enabled the battery to be incorporated within the headpiece, so it is completely self-contained without any additional battery pack.

1 Powered Air

Positive pressure system delivers a cooling, comfortable supply of filtered air at 5.6 cubic feet per minute (CFM)

2 Bump Cap Protection

Baseball style cap with protective liner is ideal for working in confined spaces where there is a danger of bumping or scraping the head

3 Rechargeable Batteries

Lithium rechargeable 8-hour batteries are incorporated into the headpiece

4 Impact Protection

Faceshield provides eye and face protection where there is a danger of flying particles

The PowerCap® Lite is ideal for:

- Agriculture
- Food processing
- Anywhere that requires 95% filter efficiency against solid & non-oil based particulates
- Woodworking
- Gardening
- Allergy Relief
- Light Industrial

Note: PowerCap® Lite is not NIOSH approved and can only be used with a minimum of 19.5% oxygen in the atmosphere.

ERGONOMICS

Back Support Belts

Back supports remind workers to lift properly, which helps reduce costly back injuries and work days lost.

Mesh

- Economical 9" belt with elastic back panel
- Breathable nylon mesh body
- Five back stays prevent belt from riding up and assure consistent support
- Front panels with hook & loop closure offer a custom, secure fit
- Detachable elastic suspenders are adjustable for added convenience

Mesh Back Support Belt *(shown at right)*

290-440M	Medium (36" - 40"), Black, 9" Width
290-440L	Large (40" - 44"), Black, 9" Width
290-440XL	X-Large (44" - 48"), Black, 9" Width
290-440XXL	XX-Large (48" - 54"), Black, 9" Width

High-Visibility

- High-Visibility 8" belt with elastic back panel
- Features bright lime yellow solid elastic side bands
- Five back stays prevent belt from riding up and assure consistent support
- Front panels with hook & loop closure offer a custom, secure fit
- Detachable bright lime yellow suspenders are adjustable for added convenience

High-Visibility Back Support Belt

290-550M	Medium (36" - 40"), High-Visibility Lime Yellow, 8" Width
290-550L	Large (40" - 44"), High-Visibility Lime Yellow, 8" Width
290-550XL	X-Large (44" - 48"), High-Visibility Lime Yellow, 8" Width
290-550XXL	XX-Large (48" - 54"), High-Visibility Lime Yellow, 8" Width

Knee Pads

Protect your knees against injuries often sustained as a result of constant kneeling.

Hard Plastic Cap

- Durable lightweight pads that deliver all-day comfort
- Abrasion resistant plastic knee cap for long-lasting protection
- Thick foam center padding
- Adjustable hook & loop closure straps ensure a secure fit

Hard Plastic Cap Knee Pads

291-100 Hard Plastic Cap Knee Pads, Pair, One Size

Clear Flat Cap Gel

- Air-injected gel pads are ideal for work on hard surfaces
- Clear PVC cap features slip-resistant ridges to prevent sliding
- Flat kneeling surface prevents rocking to minimize fatigue
- Adjustable hook & loop closure strap ensures a secure fit

Clear Flat Cap Gel Knee Pads

291-130 Clear Flat Cap Gel Knee Pads, Anti-Slip, Pair, One Size

Non-Marring

- Extended rubber-like cap won't mar, scratch or scuff surfaces
- Ergonomically designed to flex with knee movement
- Slip-resistant ridges prevent sliding on floors
- Adjustable hook & loop closure straps ensure a secure fit

Non-Marring Knee Pads

291-110 Non-Marring Knee Pads, Anti-Slip, Pair, One Size

News You Can Use

The Benefit of Wearing a Back Support

- Many jobs require a lot of heavy lifting and when objects are not lifted properly they can cause stress and strain on the back. In some severe cases the trauma to the back requires weeks or months of therapy and if the damage to the back is critical, it may lead to surgery. Wearing a back brace on the job site can help give much needed support to the back and help to prevent back related injuries.
- Safety equipment is essential on any job site, from safety glasses to hard hats, back braces are also mandatory when heavy lifting has to be done while working. People that are employed at labor intensive jobs that require heavy lifting, find that certain parts of the job require heavy repeated lifting. One tool that workers should never be without on the job site is a back brace to help support the lower back.
- When one is wearing a back brace in the workplace it helps to cut down the risk of a back injury. By wearing a back brace can also minimize the number of workmen's compensation claims that are filed each year by employees. Back injuries are one of the top related reasons why employees miss days of work. From a financial point, requiring employees to wear back braces when doing any type of heavy lifting can save the employer money over an extended period of time since the chances of back injury are greatly lessened.
- The two most common reasons that a person ends up with lower back issues is from improper lifting or from lifting an object too quickly. Knowing proper lifting technique and wearing a back brace correctly reduces the risks of injury to the back.

The Benefit of Wearing Knee Pads

- The purpose of knee pads is to protect the thin layer of cartilage and tissue called the meniscus and the patella, or kneecap, while kneeling.
- Knee pads help slow down the "wearing down" process in those who do more than everyday activities involving the knee. The kneecap itself is only 2 inches across and 1¼ inches thick. Even during normal activity, over a lifetime, the knees wear down. With kneeling, we exacerbate the wear and tear on our kneecaps.
- Wearing knee pads when engaged in activities that overwork the kneecap can reduce the occurrence of injuries such as bursitis, which is the inflammation of small fluid sacs that cushion and lubricate the knee; tendinitis or tendinosis, caused by inflammation of or small tears to tendons; plica syndrome, when knee ligaments become thickened or unnaturally folded; patellofemoral pain syndrome, indicated by pain in the front of the knee related to the kneecap; or tears of the meniscus, the rubbery cushions that protect the knee joints. These injuries are serious. Some, such as a torn meniscus, may require surgery.

Protective Industrial Products & Hand Protection

Over the years, Protective Industrial Products has grown from a specialist in inspection gloves to a full line provider of work gloves. Our strategy is a simple one: To be the best at providing the highest value work gloves at the lowest possible cost overall. Call for our complete industrial hand protection catalog or visit our website at pipusa.com.

PROTECTIVE INDUSTRIAL PRODUCTS

Here are the Hand Protection Categories we offer and some Featured Products

Cut Resistant

PIP offers the widest range of Cut-Resistant gloves anywhere in the world. Our cut-resistant gloves are manufactured using a variety of yarns such as Kevlar, Aramid, Dyneema, Nuralid and engineered yarns in styles with the broadest use of coatings and grips. Cut resistant gloves can be used in a variety of applications. Some examples might be automotive industry assembly, glass operations, electrical work, metal stamping, sheet metal, food processing and recycling. We can help recommend which cut and abrasion-resistant glove or sleeve can give you the best protection. Please contact your PIP Sales Representative for further information.

KUT-GARD®

Polyurethane Grip made with Dyneema®

19-D622 XS-XXL

Great White™, white spun Dyneema® and Lyrca®, EN Cut Level 3, coated palm and fingertips, lightweight

Kevlar® Fabric Sleeves

10-K4726

Interlock Aramid and cotton sleeve with Kevlar® knitwrist, thumb hole, EN Cut Level 2

High Performance

These high quality, ergonomic gloves are designed for the demanding applications where specialized protection is required. Styles offered include the professional mechanic gloves, anti-vibration gloves and lifting gloves. All boast exceptional protection against injury from repetitive movements, cuts and abrasions.

Torque by Maximum Safety®

120-4500 S-XXL

Diamond grip PVC impregnated fingertips, cotton brow wipe, spandex back

General Purpose & Work Gloves

PIP has invested significantly in the development of a new generation of hand protection that offers a remarkable comfort and tremendous fit across the wide range of hand sizes. There are many jobs where hand protection is important and we can help you find the glove that is tailored to your exact needs. We offer a variety of Uncoated or Coated and Knit or Fabric Gloves. Along with the choice of material there is a large range of grips, including Solid or Foam Nitrile, PVC, and Latex Crinkle or Smooth. All gloves are ultra cool and very comfortable to wear because of the breathable coating. The coated gloves offer good snag, puncture, cut and abrasion resistance. A small sample of what types of jobs these gloves are ideal for are assembly, construction, landscaping, gardening, warehouse and package handling, general work situations, material handling and farming.

Maxi-Flex™ Nylon with Micro Foam Grip

34-874 XXS-XL

Black, micro-foam, coated palm and finger tips, MaxiFlex™, grey liner

Air Infused PVC Palm Dip

32-747 XS-XL

G-Tek® Air Force™, Black Air-Infused PVC on Black Nylon, Excellent wet and dry grip, Abrasion Resistant

Chemical Resistant

Chemical Resistant hand protection is really important when you are working with dangerous or harmful substances. PIP offers a wide range of Latex, Nitrile and PVC coated protection along with a variety of grips to maintain hold in wet and oily conditions. All of our economical liquid-proof gloves provide superior protection, provide resistance to acids, alkalis, alcohols, salts, keytones and animal fats, and feature a rolled beaded cuff for tear resistance. We offer both unlined styles for less risk of product contamination and flock lined styles that are more comfortable and easier to put on. With our wide variety of choices you're sure to find the glove with the protection you need and the tactile flexibility and sensitivity necessary for the job.

Nitrile Coated with Microfinish™ Grip

56-AG588 S-XL

Grey, 15 gauge, poly/cotton liner, yellow safety cuff

ProCoat® PVC Dipped with Sandy Finish

58-8658DL

Premium sandy finish, blue, 12" length, cold resistant outer shell, detachable insulating orange terry liner

Leather Palm & Driver

Leather Palm gloves are made using traditional cut-and-sew methods and offer protection from rough objects, heat sparks and abrasion. Generous sizing, a variety of cuff designs and choices in leather quality make leather palms one of the most widely used gloves in the industry. From tough jobs like lumberjacking, mining and heavy machinery to construction, metalworking, maintenance, warehousing there is a quality and type of glove for everyone. Leather driver gloves offer many of the durable aspects of leather palmed gloves coupled with better fit and dexterity. Driver styles are easier to slip on and most have a shirred wrist for a snug fit.

Split Leather with Safety Cuff

82-7563 M-XL

Rubberized fabric cuff, gunn cut pattern, blue and green striped, A/B select shoulder, silver quality, cotton lined palm for extra comfort

Unlined Top Grain Cowhide Driver

68-163 S-XXL

Regular grade, keystone thumb for extra comfort and wear, excellent dexterity and abrasion resistance

Protection from Cold

Insulated gloves from PIP offer a variety of materials to allow the user to choose in dexterity and protection. Some common applications include construction, refrigeration or cold storage, transportation, utility work, farming and any general purpose protection in inclement weather.

Thinsulate Lined Pigskin Leather Palms

78-3927 M-XL

Safety cuff, blue and green striped fabric back and cuffs, cotton lined for comfort

Protection from Heat

Heat protection gloves offer not only superior safety in high heat situations but also a variety of treated leathers and reinforcements to improve durability and wear life.

Mig Tig Welder's Gloves

75-4854 S-XL

Top grain goatskin, wing thumb, 4" leather cuffs, sewn with Kevlar® thread to prolong glove life and protect seams from burning

You can find our complete industrial hand protection catalog or visit our website at www.pipusa.com

Critical Environment

PIP technical offers many products for critical environment industries such as Wafer Manufacturing, Disc Drive Manufacturing, Electronics Assembly, Pharmaceutical, Medical Device Manufacturing, Biotechnical, Aerospace, Automotive, Photography and Cleanroom applications. Products range from disposable nitrile, latex, vinyl, co-polymer vinyl gloves, glove liners, contamination control mats and clean room paper. All of these products are designed and manufactured to meet the strict standards of the industry.

Electrostatic Dissipative Nylon Gloves

40-6416 S and L

ESD fiber blended with nylon which reduces static, seamless nylon and copper fiber yarns, white urethane coated finger tips

Parade & Uniform

PIP now offers a variety of dress gloves for formal occasions by police, firemen, waiters, marching bands, military and pallbearers. Nylon and Cotton versions are all constructed to have a tailored fit and to look professional.

Cotton Dress Gloves

130-100WM S-XL

100% cotton, white open cuff, three lines of raised stitching, tailored fit. Used for formal occasions by police, firemen and food service personnel.

Disposable

Our disposable gloves are unsupported latex, vinyl and Nitrile dipped gloves. For economic purposes all gloves are ambidextrous and provide good protection against dirt and mild chemicals. Some common applications are medical and dental, food service, food processing, sanitation, and even cosmetology. All disposable gloves have a roll cuff to prevent ripping or tearing.

Black Pearl™

Ambi-dex®

Ambi-dex®, Nitrile

63-332 S-XL

Industrial grade, ambidextrous, contains no rubber latex, powdered, 100 per box

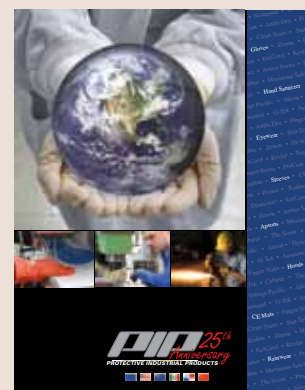

Black Pearl™ Latex for Cosmetologists

100-9240 S-XL

Ambidextrous, powder free, 12" length, 4 gloves per box

You can find our complete industrial hand protection catalog or visit our website at www.pipusa.com

WARNING BEACONS

WARNING BEACONS

Designed and built to provide the fastest and easiest way to BE SEEN and BE SAFE!

Patented fresnel lens allows beam to be visible for more than ½ mile

Low-battery indicator

Reflective strip and fluorescent body for maximum visibility

Impact resistant ABS body and cap

Colored pins indicate beacon light colors

High-strength clips allow easy attachment

Most models have an operating life of more than 40 hours for each set of batteries

Beacon Colors:

Intensely Bright...can be seen for over ½ mile away without the night vision, point fixation and distance judgement problems associated with strobe and incandescent lights.

Portable...unit is 8" tall and weighs only one pound, making it easy to carry or store anywhere.

Simple To Use...just twist the lens to turn on or off. Place unit(s) around to provide a highly visible warning and safety zone for people, work areas, hazards and accidents.

Durable...waterproof and dust proof, plus e-Flare will survive a 3-foot drop onto a concrete surface.

Double the Safety...e-Flare provides safety by ensuring maximum 360° visibility. Unlike pyrotechnic flares, there is no risk of fire or explosion, and there are no toxic fumes or residue.

Versatile...available in 1- or 2-color light combinations, flashing and/or steady-on, and built-in work light versions. Easily attaches to belts, clothing, vehicles, traffic cones or signs.

HAZMAT Accreditation: e-Flare is certified to operate safely in Class 1, Division 2 / Zone 2 hazardous areas.

E-Flare Safety & Emergency Beacon

Item #	Operation	Light Intensity	Beacon Colors Available

- 4 LED light source
- 16" long – 1¼" diameter
- Operates on two "C" batteries

935-004 Flash Baton, 16" Length

3 Modes: Red Flashing – Red Steady – Off
(Includes carrying strap and attachment clip)

HAND SANITIZER

HAND SANITIZER

X3 : clean

Benzalkonium
Chloride 0.13%

**alcohol
FREE**

X3 clean is the safe alternative to alcohol-based gel hand sanitizers:

Safe - Non-Flammable, Non-Toxic, Non-Corrosive

Gentle - Alcohol free, fragrance free, and residue free

Effective - Kills 99.99% of germs

3X More - Get three times the number of applications per ounce compared to gel sanitizers

Save! - Reduce absenteeism by 30%

Fact: 80% of all infections are transmitted by hands. The answer seems simple. Wash your hands and reduce the risk of infection and illness.

Reality: Life is busy. Access to soap and water isn't always possible.

Solution: X3 Clean Foaming Hand Sanitizer kills germs in less than 15 seconds when handwashing isn't possible.

IMPRINTING

Custom imprinting is available on PIP safety eyewear (most styles), hard hats, gloves, vests, tee shirts, sweatshirts and jackets.

Customer must supply "Vector Art" electronically in one of the following formats: (AI, EPS, TIFF). **Logo's or artwork downloaded from your web site is NOT at a high enough resolution and will not be acceptable. Photocopies, business cards, stationary, drawings, decals and faxes are not acceptable forms of art.**

Please Note: If any fonts have been used in the creation of your logo they must be converted to outlines.

If your company logo does not meet our printing requirements and must be re-created, we do offer this service for a one time fee. This may also add extra time to your delivery date.

Our standard Pantone colors are: Black, White, Silver (PMS 877), Red (PMS 185), Blue (PMS 300), and Green (PMS 355). Special order Pantone colors are available, however, this may add extra time to your shipping.

Shipment will be made within 5 business days after receipt and sign-off of approved artwork.

Initial orders are subject to a one-time plate charge. PIP does not charge this fee on re-orders.

Prices quoted will be for a single location imprint only. Additional imprint locations will be extra.

A. Eyewear

Quantity

144-299
300-1199
1200+

B. Hard Hats

Custom imprinting is available on all JSP hard hats. Hard hats can be printed on the front, sides or back.

Quantity

8-35
36-90
91-299
300+

Please Note: When printing on helmet colors other than white it may be necessary to add an underlay color to achieve a better color match. In these instances, an additional imprint charge may be applied. A PIP representative will notify you if this situation occurs. Quantities given are per helmet style.

C. Vests, Tee Shirts & Sweatshirts

Quantity

1-49
50-149
150-299
300-499
500+

Formerly the Industrial Distributor Association (IDA) and the Industrial Supply Manufacturer Association (ISMA).

NetPlus Alliance

The Alliance for Distributors and Manufacturers

IBC - Industrial Buyer's Consortium

Alliance of Leading Industrial Supply Distributors in the U.S.

Evergreen Marketing Group

The Evergreen Marketing Group is an alliance of over 60 independent construction and industrial tool distribution companies located throughout the United States. Evergreen members work in partnership with more than 70 leading suppliers of industrial/construction tools and equipment. Evergreen preferred suppliers are national companies widely recognized as leaders in their fields, providing the highest quality industrial products available. Working together, Evergreen distributor members and preferred suppliers provide a broad range of high-quality construction and industrial tools, equipment and services.

Limited Warranty

Protective Industrial Products, Inc.® (PIP) warrants only that PIP products will be free from defects in materials and workmanship at the time of sale. Upon receipt of each shipment, the customer must examine the products for defect or shortage and notify PIP in writing within thirty (30) days after such receipt of any claims reasonably discernible within such thirty (30) day period. All claims not reasonably discernible within thirty (30) days must be made in writing within one (1) year after receipt of shipment. Any claim not timely made shall be waived. This limited warranty is exclusive and in lieu of all other warranties, express, implied or statutory. PIP's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement of the defective product or refund of the original purchase price of the product, at PIP's option. PIP's limited warranty shall not apply to PIP products that have been subject to misuse, accident, negligence, handling, storage, or use.

It is the responsibility of Employers and Individuals to carry out proper risk assessment by qualified Health and Safety personnel of any situation, activity or process where there is potential risk or hazard which would be detrimental to an individual if exposed to it. The seller shall not be held liable for any loss, damage or injury sustained in a situation where no proper risk assessment has been carried out.

In addition, the Seller shall not be held liable for any loss, damage or injury sustained from the misuse of any of its products. All the Seller's products contain instruction leaflets which must be read and understood prior to use of the product.

Disclaimer of Implied Warranties

All implied warranties which may arise by implication of law or application, course of dealing, usage of trade, including, but not limited to, implied warranties of merchantability, fitness for a particular purpose, title, and non-infringement are expressly excluded. The user is solely responsible for the suitability of the product selected for a particular application.
