HOW TO ORDER 3 - 5

BRANCH DIVISION MAP 6

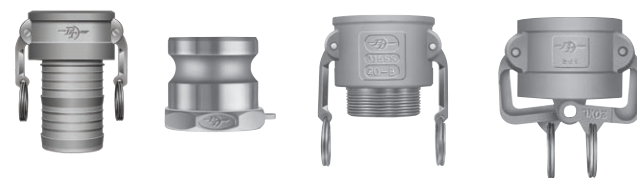

BRANCH WAREHOUSES 7

PRODUCTS 8 - 139

Appendix 140 - 150

BASIC STANDARD CAM & GROOVE COUPLINGS

A-Adapter • B-Coupler • C-Coupler • D-Coupler • E-Adapter
• F-Adapter • V-Coupler (Dust Cap) • VL-Coupler (Dust Cap w/locking arms) • W-Adapter (Dust Plug)

8 - 16

STA-LOK® and STA-LOK® II

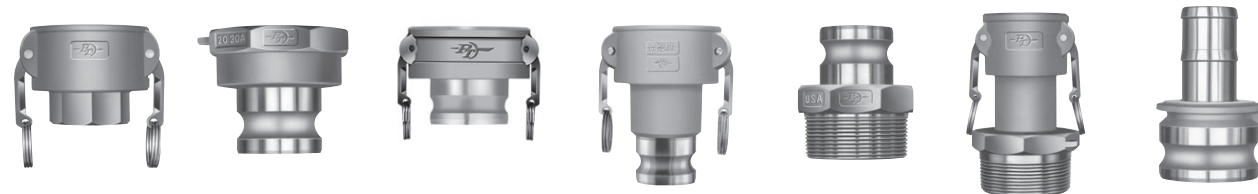

STA-LOK® Cam and Groove • STA-LOK® II
Passive Locking Cam and Groove

17 - 25

REDUCER CAM & GROOVE

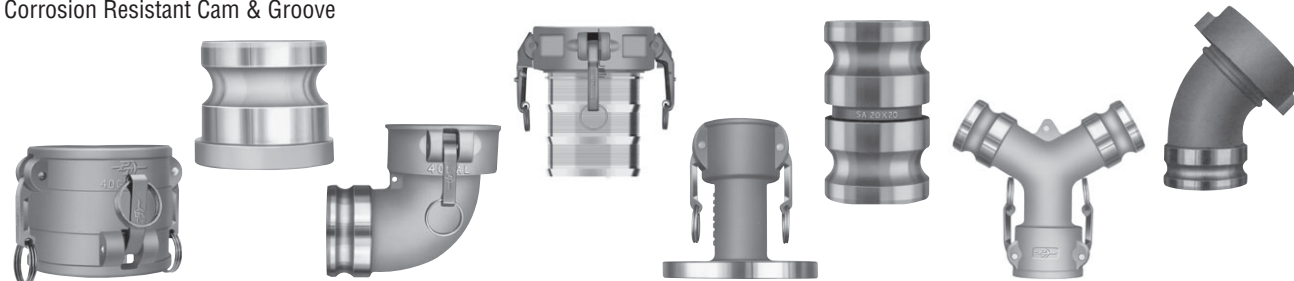

Reducer Cam & Groove • Reducer STA-LOK® II • CXA, CXA Long

26 - 30

SPECIAL CAM & GROOVE

CXC • Spool Adapters • Y-Fittings • 90 Degree Elbows • Fire Hose Threads • Straight Threads • Railroad Tank Car Connections • Weld Fittings • Compression Fittings • Check Valve • Heavy Duty Couplings • Pipe Flanges • Cam & Groove x Victaulic • Corrosion Resistant Cam & Groove

31 - 59

VERSATILE SWIVEL CAM & GROOVE • WEDGON PETROLEUM SWIVELS

Butt Weld • Socket Weld • A-F Sizes 1.5" to 6"

60 - 65

ACCESSORIES & REPLACEMENT PARTS

Gaskets • Cam Assemblies • XL Locking Handles
• Paddle Handles • STA-LOK® II Cam Assemblies • Cam Pins
• Pull Rings • Cam Straps • Secure-Lok

66 - 71

SAFETY BUMP

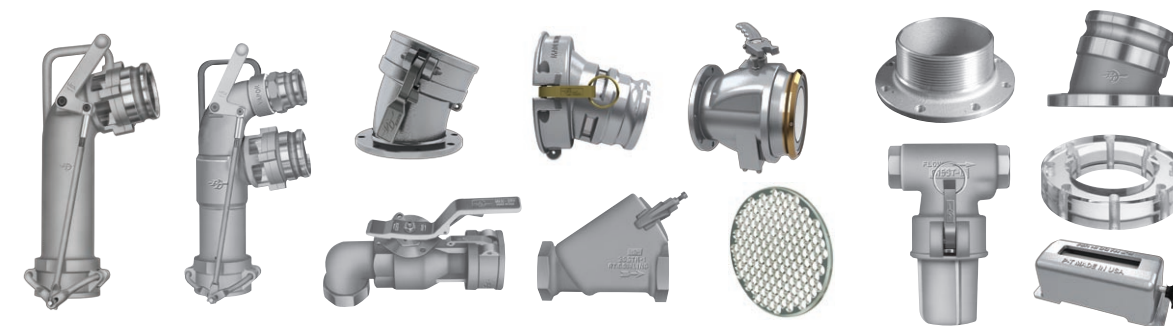

Safety Bump™ & Safety Lock™

72

PETROLEUM PRODUCTS

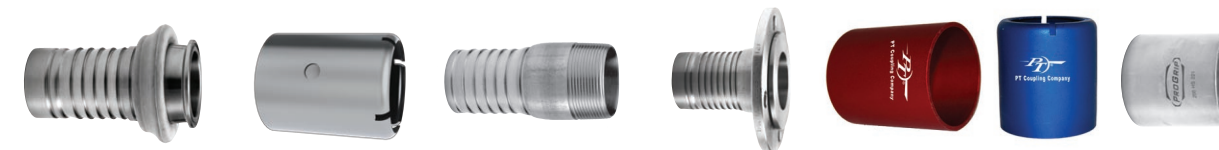

Tank Truck Flange • Y Flange • T Flange • Tight Fill Elbow • Duel Point Vapor Recovery • Single Point Vapor Recovery • API Bottom Loading • Wedgon Breakaway Fittings • Maxi-Dry Fittings • In-Line Strainers • Y-Strainers and Pump Filters • Pump and Nozzle Swivels • Curb Pump Fittings • Fuel Oil Fittings

73 - 91

PRO GRIP™

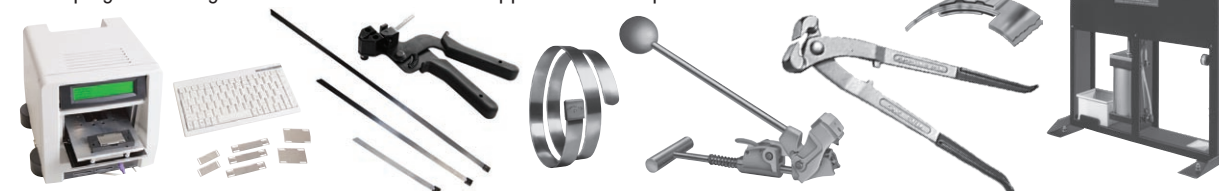

C-50 External Crimp System (Body • Heavy Duty • Crimp Ferrule & Sleeve) • Internal Expansion System (Body • Ferrule) • Sanitary Internal Expansion System (Body • Crimp Sleeve • SE & PM Body • C50 Body & Ferrule) • Wine Fittings • WSS Crimp Ferrule • Ultra-Lite Aluminum Sleeves & Ferrules

92 - 113

PUNCH-LOK™

Hose-Scribe • Stainless Steel Cable Ties & Tool • Punch-type Clamps • Special Order "Non Stock" Clamps
Preformed J-Lok Clamps • Banding, Strapping, Safety Boxes • Buckles/Clips, Strapping Loks, Brackets
Clamping & Banding Tools • TA-3 • Hex Steel Nipples • Tool Replacement Parts

114 - 126

ROLITE PT3 FITTING MASTER

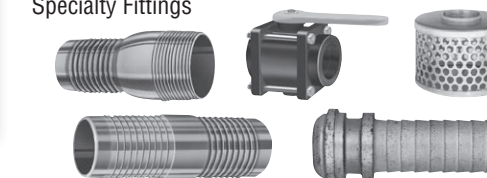

Fitting Master Hose
Assembly Tool

127

SPECIAL APPLICATION FITTINGS

Combination Nipples • Hose Mender • Weld Nipples • Pump Foot Valves • Pump Suction Strainer • Discharge & Suction Couplings • Ground Joint Couplings • Bolt Clamps • Claw Couplings • Sandblast Fittings • Polypropylene Specialty Fittings

128-139

Company & Warranty Information

CAM & GROOVE HOSE COUPLINGS

PT-Coupling, a member of the Parrish Manufacturing Group, manufactures and distributes quick connect/disconnect fittings for low-pressure liquid and dry transfer applications. PT-Coupling cam-and-groove couplings are strong and durable. The design and construction of these couplings have a superior quality body with precision machined surfaces made right here in Enid, Oklahoma, USA.

From its humble beginnings as a machining job shop in 1951 the Parrish Manufacturing Group has grown to a global supplier for companies seeking a high quality product at a fair price. Our goal is to be the single source for all of your pattern development, casting, precision machining, fabrication, heat treat and plastic injection molding needs. Our success stems from an uncompromising commitment to three core values: quality, service and integrity.

PT Quick Connect/Disconnect Couplings provide for quick connecting and disconnecting by means of the camming action. This camming action allows pipe and hose connections to be made without the need of hand tools or difficult threaded connections.

Cam and groove couplings are made up of two parts, male (adapter/plug) and female (coupler/socket) that work together. The male adapter is simply inserted into the female coupler until contact is made with the gasket. Both cam arms on the coupler are then pressed down/closed simultaneously to produce a uniform gasket compression between the seal surfaces. This seal is created because the cam arms of the female coupler fit snugly against the groove of the male adapter. A positive seal requires that the surfaces on the gasket seat, the adapter face, and the gasket are smooth and uncontaminated. Also cam arms must be in the full closed position for proper locking of the coupling. To disconnect both arms must be lifted/opened simultaneously to release the seal and release the connection.

All PT Quick Connect/Disconnect Couplings in every metal and size through 6" parts are manufactured to federal specification MIL-C-27487 and A-A-59326. Conformance to this specification allows complete interchangeability. Couplings not interchangeable in the industry are sizes 8" through 12". No standards were established by the government for these sizes. Quality is controlled in every phase of manufacture as is required for compliance to MIL-C-27487 and A-A59326. *PT Coupling's quality management system is certified and conforms to the requirements of ISO9001.*

WARRANTY

PT Coupling Company, Product Line

PT Coupling Company (PT) is the sole manufacturer of the PT Coupling Product Line (the "Product") Pt warrants the Product sold to be free from defects in material and workmanship under normal use and service. This warranty is limited to the repair or replacement of such parts as shall appear to PT upon inspection, to have been defective in material or workmanship. There must be a Returned Goods Authorization Form (RGA) form supplied by PT; properly filled out and sent to PT within 30 days of the date any warranty claim arises. Should PT in its sole discretion request, parts must be returned to the factory within thirty (30) days of notification for PT inspection before credit can be given. Warranty parts shall be shipped to the factory prepaid motor freight or UPS. No claim for breach of warranty shall be valid unless received by PT prior to the expiration of the applicable warranty period.

THERE IS NO WARRANTY OF MERCHANTABILITY FOR FITNESS FOR ANY PARTICULAR PURPOSE NOR IS THERE ANY OTHER WARRANTY, EXPRESS OR IMPLIED EXCEPT AS SPECIFICALLY STATED HERIN. PT SHALL IN NO EVENT BE LIABLE FOR SPECIAL, INDIRECT CONSEQUENTIAL OR PUNITIVE DAMAGES OR ANY NATURE OR KIND UNDER ANY THEORY OR RECOVERY ARISING OUT OF OR RELATED TO THE PRODUCT OR OTHER GOODS SOLD HERE UNDER INCLUDING, BUT NOT LIMITED TO, DELAYS, LOSS OF USE, OR LOSS OF DATA, LOSS OF PROFITS, OR LOSSOR PRODUCTION, EVEN IF PT HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

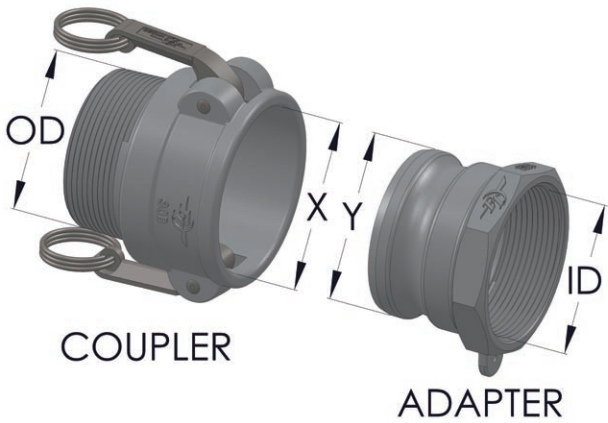

PT's liability to Buyer shall be limited in all cases as set forth herein. This warranty is in lieu of and excludes all other representation of warranties PT reserves the right to make changes in design and improvements wherever it is believed the efficiency of the Products will be improved, but without incurring and obligation to incorporate such improvements in any product which had been shipped or is in service.

How to Order

SELECTING MATERIALS FOR OPERATING CONDITIONS

Coupler Size

- Understand that coupling size is an industry designation, not the actual measured size. For parts with a female (sockets) coupler end the size is determined by measuring the open end (x) of the coupler.
- For the male (plug) adapter the coupling size is determined by measuring the adapter plug end (y).
- Threaded, hose barb or flange end? A threaded end can be male or female to match the type and size of your hose end fitting or tool. A barbed end inserts directly into a hose. Certain items are available with British Standard Pipe (BSP) threads
- Threaded end - Determine the pipe size used. Pipe size is an industry designation, not the actual measured size. Measure the inside diameter (ID) or outside diameter (OD) as shown in the drawing. Then round up the measurement to the closest ID or OD listed in the chart and select the corresponding pipe size.

Example: If ID (female) or OD (male) measures 1 3/16", the next highest ID or OD in the chart is 1 3/8", and the corresponding pipe size is 1".

- Hose – for use with barbed ends – examples: PVC, rubber, polyurethane or polyethylene hose
- Clamps: use original Punch-Lok™ center punch clamps or banding (see page 115 for more details), or an interlocked ProGrip™ C-50 ferrule or C-50 crimp sleeve (see ProGrip™ Section on page 95-100 for more details.)

Threaded ID (female) or OD (male)	Pipe Size (NPT)
3/4"	1/2"
1"	3/4"
1 3/8"	1"
1 5/8"	1 1/4"

How to Order

Material	Features	Application
Aluminum w/Brass Cam Arms (HB) or w/300 series Stainless Steel Cam Arms (HBS)	*Lightweight and economical. Good abrasion resistance. Fair corrosion and chemical resistance.	*Use with water, hydraulic oil, coolants, gasoline, and petroleum products.
Stainless Steel w/HBS Cam Arms	*Excellent corrosion-resistant material that provides high strength at high temperatures, helps prevent contamination of product being transported, maintains cleanliness and retains a lustrous appearance. Harder than brass.	*Ideal for use with salt water, waste water, and many chemicals; can also be used with hydraulic oil and coolants.
Brass w/HB Cam Arms	*A good corrosion resistance, less expensive than stainless steel. Softer and easier to thread than stainless steel and forms tight seals.	*Ideal for use with water. Can also be used with hydraulic oil, coolants, gasoline, and petroleum products.
Ductile Iron	*Excellent abrasion and wear resistance. Good strength and toughness characteristics.	*Ideal for use with sand, grout, cement, and other abrasives.
Hard Coat Aluminum	*This is a lightweight material with good abrasion resistance. Good corrosion and chemical resistance.	*Use with sand and salt water applications, as well as hydraulic oil, coolants, gasoline and petroleum products.
Polypropylene	*Glass-fiber reinforced for strength. Good abrasion and corrosion resistance. Good chemical resistance.	Color Black *Use with water and coolants
Food Grade Polypropylene	*Fair abrasion resistance.	Color White *Use with water and other food grade applications
Nylon	*Glass-fiber reinforced for strength. Good abrasion, corrosion and chemical resistance.	Color Green *Use with water, coolants, gasoline and varnish.

*For more detailed use & materials list, see pages 143-146 in the Recommended Operating Conditions and Materials in the back of the PT Coupling catalog.

OPERATION

The compression on the gasket produced by the camming action produces a positive seal that requires the surfaces on the gasket seat; the adapter face and the gasket are smooth and uncontaminated. Cam arms must be in the fully closed position for proper locking of the coupling. All couplers come with the standard Buna-N gasket and 300 series stainless steel rings, type of cam arms are by choice.

Material	Gasket	Size	Max. Allowable Working Pressure (PSI)*
Metal Couplings	Standard gaskets are Buna any variation must be specified**	1/2", 3/4 x 1/2", 3/4", 1", 1 1/4", 1 1/2", 2"	250
		2 1/2" 3"	200
		4"	150
		5", 6"	75
		8.0", 10.0", 12.0"	50
Non-Metal Couplings	Standard gaskets are Buna any variation must be specified **	3/4", 1", 1 1/4", 1 1/2", 2"	100

*Above maximum allowable working pressures are based on operating temperatures less than 100°F. If operating temperatures exceed 100°, use temperature derating factor listed in the table below.

**Numerous other gaskets are available upon request. Reference the list of gaskets in the back of the PT Catalog on pages 143 in the Recommended Operating Conditions and Materials section.

How to Order

PLACE AN ORDER

PT-Coupling only sells their products through distributors. Place your order with your local distributor in your local region (see branch warehouse listing on page 7). Extensive inventories of quick connect/disconnect couplings and replacement parts are maintained in our warehouses to insure immediate shipment and delivery to our customers anywhere in the world. If your operations require a product not shown in this Catalog, we will gladly work with you, our customer, in the custom-design and manufacture of a product to meet your fitting specification.

It is the responsibility of the end user to communicate to the distributor the application and operating conditions the parts will be subjected to. It is up to the distributor to supply the right part for the application. PT Coupling Co. is available to help you with a proper recommendation.

For the type of application required care must be taken to insure proper connection and a positive seal. Improperly fitted or applied connections can result in a serious accident and/or down time. Under no circumstances shall the pressure rating of the couplings be exceeded.

For prompt, efficient processing of your order, Please follow this procedure:

1. Specify Distributor Account #
2. Specify PT Item # or Part Name
3. Specify Size and Material
4. Specify Quantity

SHIPPING TERMS AND CONDITIONS

All orders are solicited and accepted with the understanding that the purchaser agrees to the following terms and conditions:

1. Orders are subject to approval and acceptance by PT Coupling at the home office in Enid, OK.
2. Minimum order is \$25.00.
3. PT Coupling attempts to ship all orders as promptly and efficiently as possible, however, orders are accepted with the express understanding that PT Coupling will not be liable for any losses or damages resulting from any delays in shipment or delivery.
4. Orders are subject to all government regulations, present and future.
5. Prices and design of products are subject to change without notice. Billings will be made at prices in effect at time of shipment.
6. Shortage of shipments must be reported within 5 days after receipt of goods.
7. Quotes are valid for 2 weeks.
8. Custom-made parts are non-returnable. If there is no list price, parts are considered custom made.

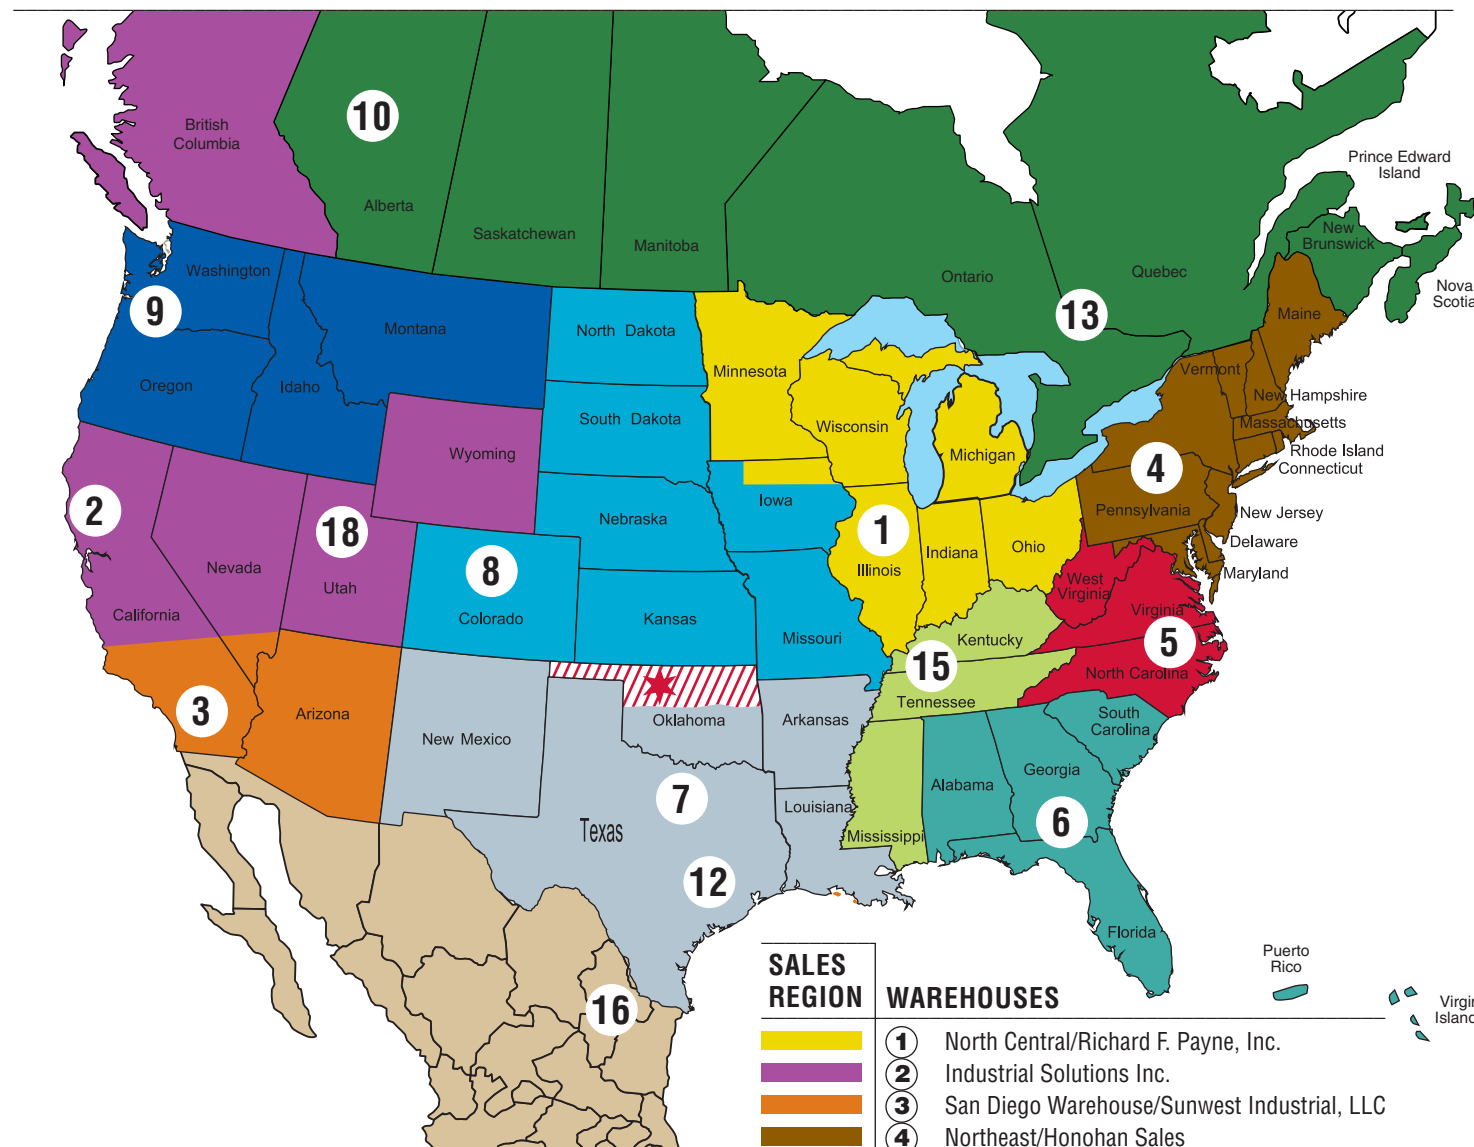

RETURN OF GOODS OR DAMAGED GOODS TO PT COUPLING CO.

If for any reason, you desire to return goods to PT Coupling Company:

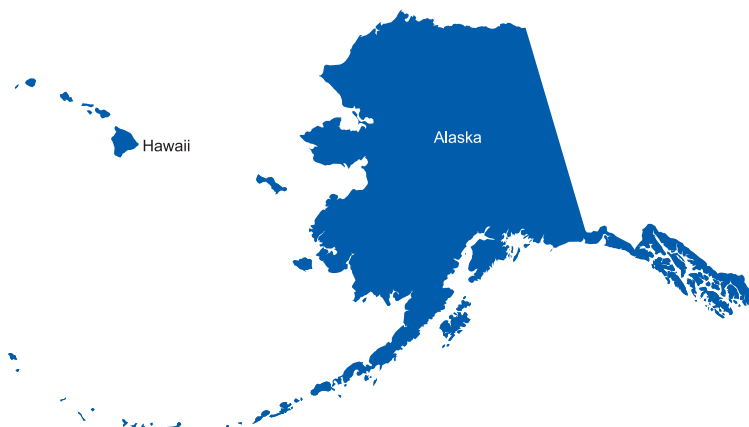

Products being returned for credits must be new and in resalable condition. A minimum handling charge of 15% is deductible from the price now in effect or purchase price, whichever is lower. This handling charge, is necessary because of our practice of individually inspecting and testing every item returned and to cover the usual costs of handling returned goods. Any return goods that have been in use, must have **MATERIAL SAFETY DATA SHEETS** attached to the packing slip on exterior of the shipping container. If not present, parts will be returned to you unopened. All return goods require a Return Goods Authorization (RGA) before credit will be given. **Any returns without proper documentation will be returned to the customer at their expense.**

B-COUPLER

COUPLER x MALE
NPT THREAD

Made in the U.S.A.

HBS cam arms are
made of 300 series
Stainless Steel.

HB cam arms are made
of Brass.

All Stainless Steel
castings are 316 and all
components are 300 series
Stainless Steel.

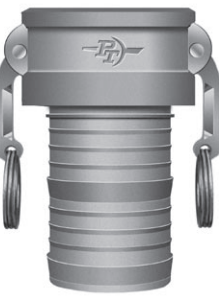

Please call for special
quote on complete cam arm
assembly and
components in 316
Stainless Steel.

8, 10 and 12 inch couplers
are 4-cam designs with the
STA-LOK® positive locking
feature.

C-COUPLER
COUPLER X HOSE
SHANK

Made in the U.S.A.

PT hose shanks are the most versatile for attaching to hose. The specially designed multi-barbed shank allows for attachment via original Punch-Lok™ center punch clamps (see pg 115 for more details), or by an interlocked ProGrip™ C-50 ferrule or sleeve (see pg. 95-100 for more details).

HBS cam arms are made of 300 series Stainless Steel.

HB cam arms are made of Brass

All Stainless Steel castings are 316 and all standard components are 300 series Stainless Steel.

Please call for special quote on complete cam arm assembly and components in 316 Stainless Steel.

8, 10 and 12 inch couplers are 4-cam designs with the STA-LOK® positive locking feature.

All 1-1/2" to 6" Aluminum or Hard Coat Aluminum castings are available with Undersized shank. To order add the letters "US" after the existing item numbers listed above.

D-COUPLER
COUPLER X FEMALE
NPT THREAD

Made in the U.S.A.

PT maintains inventories at its 16 branch warehouse locations.

HBS cam arms are made of 300 series Stainless Steel.

HB cam arms are made of Brass

All Stainless Steel castings are 316 and all standard components are 300 series Stainless Steel.

Please call for special quote on complete cam arm assembly and components in 316 Stainless Steel.

8, 10 and 12 inch couplers are 4-cam designs with the STA-LOK® positive locking feature.

E-ADAPTER
ADAPTER X HOSE
SHANK

Made in the U.S.A.

For best results use
Punch-Lok™ center punch
hose clamps with PT
Coupling'smachined hose
shanks.

PT hose shanks are the most
versatile for attaching to
hose. The specially designed
multi-barbed shank allows
for attachment via original
Punch-Lok™ center punch
clamps (see pg. 115 for
more details), or by an
interlocked ProGrip™ C-50
ferrule or sleeve (see pgs.
95-100 for more details).

All Stainless Steel castings
are 316.

All 1-1/2" to 6" Aluminum or
Hard Coat Aluminum castings
are available with Undersized
shank. To order add the
letters "US" after the existing
item numbers listed above.

Y-STRAINER
BASKET

PT Coupling manufactures ProGrip™ coupling retention systems for attaching hose to fittings, either by externally crimping or internally expanding. The products range in sizes from ½” up to 8”. Standard materials available are plated carbon steel and stainless steel. Other materials are available on request. The fittings produced cover a wide range of applications including sanitary, pharmaceutical, chemical, petroleum, indus-

trial, and fire protection. Various types of hose shank designs are utilized to maximize the performance of the different fittings and ferrule combinations. All of the different hose shanks are available with any type of connecting end. Ends available include male and female NPT Pipe, Victaulic® style groove, butt weld, socket weld, I-Line, Pacific Coast thread, tri-clamp and flanged.

MAXIMUM ALLOWABLE WORKING PRESSURE RATINGS FOR PROGRIP™ (Pressure in PSI)

Fitting	1.0"	1.25"	1.5"	2.0"	2.5"	3.0"	4.0"	6.0"
All Pro-Grip™ bodies with mechanical interlocking ferrule except as listed below	600	600	600	600	600	600	500	400
Cam & Groove	250	250	250	250	200	200	150	75
Ansi 150# Flanges	285	285	285	285	285	285	285	285

The above pressure ratings are for the fitting itself. There are several factors that determine the pressure rating of a hose assembly. Some of which are hose pressure rating, method of hose attachment, quality of hose attachment, and external fastening devices such as Tri-Clamp and I-Line clamps, flange bolts, etc. It is up to the hose assembler and the end user to assure that all components are applied properly and meet the required working pressure of the system.

FERRULE/SLEEVE CRIMP DIAMETER CALCULATION**

Following is the calculation to determine the crimp diameter required for various hoses and end fittings. The following information must be measured or determined:

	Hose Assembly End	Example
Hose O.D.		2.50
Hose I.D.		2.00
Fitting Hose Shank Mean O.D.		2.00
Ferrule/Sleeve Wall Thickness		.065
Hose Wall Compression		25%
Required (%)**		
*This number is usually supplied by hose manufacturer and generally is from 20-25%		
**See www.ptcoupling.com for MS Excel spreadsheet to assist with ProGrip™ O.D. Calculations.		

PT COUPLING & PROGRIP™ MEAN HOSE SHANK O.D.

¾" - .075"	3" - 3.00"
1" - 1.00	4" - 4.00"
1¼" - 1.25"	5" - 5.00"
1½" - 1.25"	6" - 6.00"
2" - 2.00"	8" - 8.00"
2½" - 2.50"	

THE CRIMP DIAMETER CAN BE DETERMINED USING THE FOLLOWING FORMULA

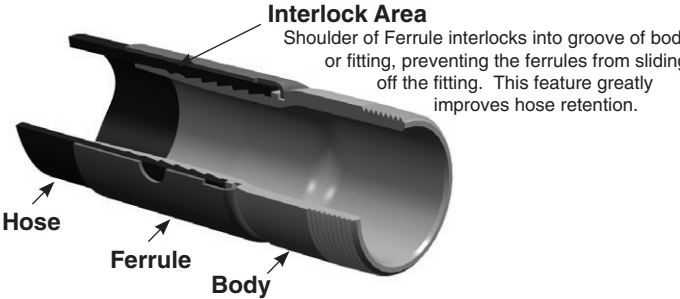

Crimp Diameter. = Hose O.D. – Hose I.D. + Shank O.D. + (2 X Ferrule Wall Thickness.) + [(- Hose Comp.) X (Hose O.D. – Hose I.D.) / 100]

Example: Crimp Diameter. = 2.50 – 2.00 + 2.00 + (2 X .065) + [(- 25) X (2.50 – 2.00) /100] = 2.505

Hose Assy. End Crimp Dia. = _____ - _____ + _____ + (2 X _____) + [(- _____) X (_____ - _____) /100] = _____

RECOMMENDATIONS FOR CRIMPING PROCEDURE

1. Squarely cut hose to desired length.
2. Remove all debris from hose I.D.
3. Bend grounding wire inside of hose with wire extending approximately ½” for conductivity if required.
4. Using a decimal based PI Tape or calipers measure the hose O.D. and input into formula.
5. Using calipers measure the hose I.D. and input into formula
6. Using calipers measure ferrule or sleeve thickness and input into formula.
7. Referring to chart below or by measuring with calipers input hose shank mean O.D. into formula.
8. Input desired hose wall compression of approximately 20% to 25% into formula to obtain crimp target diameter.
9. Slide sleeve or ferrule over hose.
10. Insert the coupling shank squarely into the hose to avoid hose damage.
11. Ferrules: slide ferrule over lock collar and make sure hose is approximately ¼” back from Ferrule inside shoulder to allow for hose expansion.
12. Sleeves: slide crimp sleeve into position and make sure the sleeve is located over shank serrations.
13. Having determined the crimp target O.D. – select proper die set and crimper setup.
14. Place hose assembly end into the die opening.
15. Jog dies making contact with the sleeve or ferrule. Verify sleeve or ferrule is properly positioned.
16. Crimp the sleeve or ferrule to target O.D.
17. Measure the crimped diameter to verify it reflects the determined target O.D.

It is recommended that hydrostatic testing be done to hose assemblies to assure the above crimp diameters are sufficient for the intended application. Reference the NAHAD hose assembly guidelines for recommended testing procedures.

PM

FERRULE

Made in the U.S.A.

Carbon Steel PM Ferrules are longer than Stainless Steel PM Ferrules to match carbon steel bodies.

For best results these Ferrules should only be used with PM bodies (internal expanded bodies).

Custom design supplied upon request.

304 Stainless Steel is the standard material.

Please call for special quote in 316 Stainless Steel.

HOSESCRIBE™ Hose Identification System

“THE FIRST SELF-CONTAINED, COMPUTERIZED HOSE IDENTIFICATION TAG ENGRAVING SYSTEM”

THREE EASY STEPS

1. Insert one of three different tags into the engraver.
2. Type desired information-up to five lines of text
3. Press the engrave key, HoseScribe™ does the rest.

THREE TAG SIZES

Up to 5 lines of copy that is automatically sized and centered on the tag.

HOSESCRIBE™ SYSTEM INCLUDES

- Engraver with compact keyboard
- State-of-the-art engraving software, allowing you to store up to 1000 different hose tag programs.
- Diamond-tipped engraving stylus
- Tag fixture designed to hold three of our tag styles.
- Easy to use instruction manual
- Unlimited maintenance and support
- Free shipping and handling
- Coming soon the option to engrave your company logo.

PT Coupling Company

P.O. Box 3909, Enid, OK 73702

Call PT Coupling for pricing or your local PT Representative

COMPLIANCE WITH NAHAD HOSE ASSEMBLY SPECIFICATION GUIDELINES

HOSESCRIBE™ promotes the responsible use of your assembly by allowing you to create a visible record of the hose serial number, bore size, month/year of assembly and maximum working pressure. Attach the tags to hoses using Punch-Lok™'s 3/8" wide banding and banding tools. Proper use ensures compliance with NAHAD industrial hose assembly identification guidelines.

SPECIFICATIONS

- Depth of Engraver: 13"
- Width of Engraver: 12"
- Weight of Engraver: 23lbs.
- Power: 110 volts

Available Hose Identification Tag Sizes:

- ¾" x 1 ½"
- ¾" x 3"
- 1 ½" x 2 ½"

Material: Tags are made from 300 series stainless steel.

Cable Tie Hand Tool & Stainless Steel Cable Ties available on Page 123.

PUNCH TYPE CLAMPS

DOUBLE-WRAPPED AND FORMED TO A GIVEN DIAMETER. CLAMPS COME READY FOR APPLICATION.

Made in the U.S.A.

To Order: Measure the Outside Diameter of the hose with its fitting inserted.

Then select the next larger Inside Diameter clamp by catalog number. Using the hose size in inches is not sufficient information, because different thickness of hose will result in varying outside diameters.

ORIGINAL PRE-FORMED PUNCH-TYPE CLAMP

DOUBLE-WRAPPED
AND FORMED TO A
GIVEN DIAMETER.
CLAMPS COME READY
FOR APPLICATION.

Made in the U.S.A.

To Order: Measure the
Outside Diameter of the hose
with its fitting inserted.

Then select the next larger
Inside Diameter clamp by
catalog number. Using the
hose size in inches is not
sufficient information,
because different thickness
of hose will result in varying
outside diameters.

CLAMP GUARDS

Clamp guards provide a
smooth ID when applied to
Punch-Lok™ center punch
hose clamps.

Made in the U.S.A.

PRE-FORMED EVERDUR CLAMPS

DOUBLE -WRAPPED,
TRIPLE LOCKED
PUNCH-LOK™ CLAMPS
HOLD THINGS TIGHTLY,
SECURELY PERMA-
NENTLY!

Made in the U.S.A.

Everdur clamps are made
of a copper based ma-
terial and are extremely
anticorrosive, and non-
magnetic. Other sizes and
materials such as monel
may be available via special
quote. Minimum quantity
is one standard carton.

OPEN-END EVERDUR CLAMPS

Made in the U.S.A.

This page consists of clamps
that are made to order and
generally not stocked at any
factory warehouse. Orders
placed for these clamps
are non-cancelable and
not returnable.

**PUNCH-LOK™
PRE-FORMED
J-LOK CLAMPS**

DOUBLE-WRAPPED,
DOUBLE LOCKED
J-LOK CLAMPS
PROVIDE VERSATILE
CLAMPING IN MANY
SITUATIONS

Made in the U.S.A.

New design on J-Lok clamp
has a smooth ID

Punch-Lok™ J-Lok clamps
have stainless steel buckles
for added strength and
corrosion resistance - with
your choice of stainless steel
or high-strength galvanized
carbon steel bands.

Totally different than punch-
type clamps, these J-Lok
clamps are not for use with
punch-type tools. They are
designed exclusively for
applications with non-punch
type mechanical and air
tools.

STEEL BANDING & STRAPPING 100 FEET PER ROLL

STANDARD LENGTH
Made in the U.S.A.

Thread band through buckle twice for greatest strength. To apply, use Punch-Lok™ banding tool model PB-001, PB-001-H or equivalent. Call for quote on any length, mill coils, or type of steel.

PLASTIC SAFETY BOXES

Made in the U.S.A.

Reusable corrugated plastic weather resistant packaging, ideal for rain, humidity, or moisture in order to prevent the natural deterioration of cardboard.

P-1000 LOKING TOOL

"The Punch-Lok™ Tool" the original. Made like no other tool! Designed for fast, economical application of punch-type clamps.

The portable P-1000 weighs only 2 1/2 pounds. Drop forged and double plated tempered steel construction.

Part Name	Item #	List Price	Description
P-1000	P200005	\$212.66	Loking Tool For Punch Clamps
P-3000	P250004	\$308.46	Loking Tool For 3/8" Punch Clamps Only
P-38	P500038	\$51.41	Clamp-Master Tool Set for 3/8" and 5/8" Punch Clamps
PB-001	P250012	\$126.19	Banding Tool
PB-001H	P250011	\$666.02	H.D. Banding Tool
D-550	P255500	\$149.09	Clamp Cutter
D-225-A	P252250	\$46.06	Mallet

PB-001 BANDING TOOL

Forged double plated tensioning tool with built in cutter for banding and buckle application. Also can be used with PJ-001 for J-Lok clamp installation.

D-225-A Mallet

Specially designed for the punch-type clamps. Malleable iron head has softer striking surface for long tool life.

Made in the U.S.A.

P-3000™ LOKING TOOL

Similar to the Model P-1000, the Model P-3000 is designed for 3/8" wide punch-type clamp applications only. It will not fit 5/8" wide clamps. Double plated construction.

D-550™ CLAMP CUTTER

Powerful 14" cutter removes any punch-type clamp with minimum effort. Rugged drop forged heat treated high-carbon steel construction. Double plated.

P-38™ CLAMP-MASTER® TOOL SET

The original, handy, low cost tool set for applying punch-type clamps. Weighs less than one pound. Excellent for confined working areas and for on-job repair and replacement work. Fits 3/8" and 5/8" wide clamps. Double plated construction.

D-229™ CLAMP ADAPTER

Fits under the pusher nose of P-1000 loking tool to apply 3/8" punch-type clamps.

Part Name	Item #	List Price	Description
D-229	P252290	\$23.04	3/8" Adapter for P-1000 Loking Tool
PJ-001	P250010	\$140.21	Clamp Adapter for PB-001 Tool
D-300-A	P253000	\$174.80	Bench Adapter for P-1000 and P-3000 Loking Tools

PJ-001 PUNCH-LOK J-LOK BANDING TOOL ADAPTER

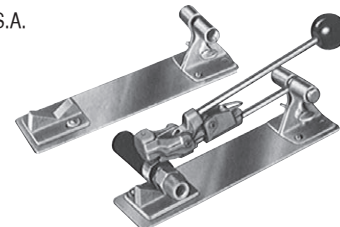

Converts PB-001 banding tool to apply J-Lok clamps.

D-300-A™ BENCH ADAPTER

Converts P-1000 and P-3000 loking tools to bench tools to speed clamp application in tool room and hose assembly shop.

Made in the U.S.A.

Simple, Secure & Quick Ball Lock

**PUNCH-LOK™ PLATED
HOSE FITTINGS**

Punch-Lok™ single and double groove hose fittings of all types are designed and engineered for use with Punch-Lok™ clamps to make connections which will withstand high pressure services. The shape of the grooves eliminates damage to the inner wall of the hose. The Punch-Lok™ clamp brings the hose wall into the grooves with even compression around the fittings. Carbon steel steam hose fittings are available in sizes ranging from 1/2" to 1" and include tie wires. Hex Steel Lok-nipples are cut from hexagon shaped cold rolled steel bar stock with full thread and tapered end for easy application. Lok-Nipples are manufactured in standard iron pipe sizes. All lok-menders are manufactured in standard iron pipe sizes except for 1/2" and 5/16" where it is necessary to use brass for a good inside diameter fit. All fittings are plated as standard except for brass fittings.

Finally, a hose assembly tool with the operator in mind.

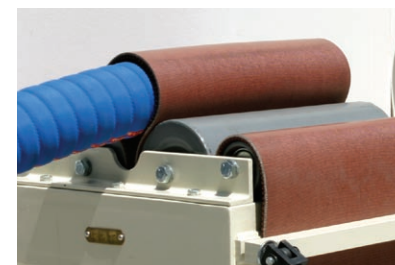

ROLITE PT3 FITTING MASTER

After struggling with many types of hoses and fittings that can make hose assembly a difficult and sometimes tedious process, PT Coupling Company has recently engineered the equipment and process that makes installation of fittings an easy, painless experience. And, unlike other methods of hose assembly, the PT Coupling Rolite PT3 Fitting Master yields performance and reliability with unique features such as:

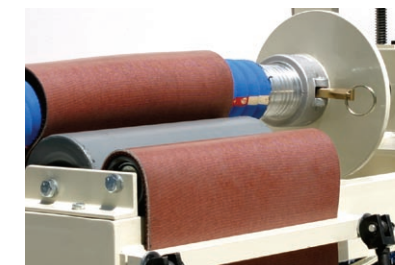

- Pneumatic air tool
- 1200 lbs. of thrusting power
- 350 lbs. of hose gripping power
- Handles hose diameters of 1" to 10"
- Accepts all styles of hoses
- Accepts all types of hose fittings
- Fully transportable
- Variable speed controls
- Dual action allows fitting removal
- Roller belts prevent hose damage
- Large diameter hose is a snap
- Call for pricing

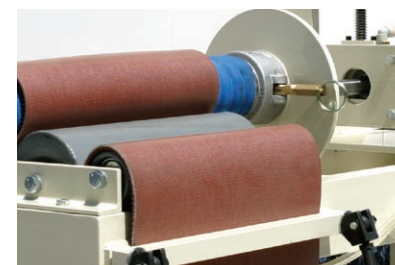

Part Name	Item #	List Price
ROLITE PT3 MACHINE	792000	

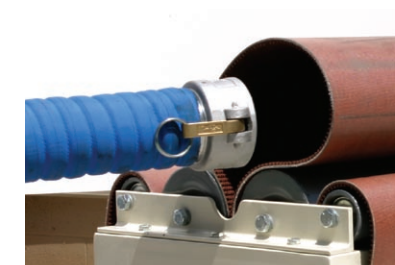

Rolite PT3 Fitting Master Pneumatic Air Tool Hose is inserted through the gripping belt loop.

Use the control levers to push the fitting into the hose with the ram plate.

Place fitting to be inserted at the end of the hose, in front of the pneumatic ram plate.

Release the tension on the gripping belt and remove the finished assembly.

Recommended Operating Conditions

PT Coupling Company does not recommend cam and groove fittings for any compressed gas service, which includes air and steam service.

Material	Gasket	Size	Max. Allowable Working Pressure (PSI)*
Metal Couplings	Standard gaskets are Buna any variation must be specified**	1/2", 3/4 x 1/2", 3/4", 1", 1 1/4", 1 1/2", 2"	250
		2 1/2" 3"	200
		4"	150
		5", 6"	75
		8.0", 10.0", 12.0"	50
Non-Metal Couplings	Standard gaskets are Buna any variation must be specified **	3/4", 1", 1 1/4", 1 1/2", 2"	100
		3", 4"	50

**Note: Above maximum allowable working pressures are based on operating temperatures less than 100°F. If operating temperatures exceed 100°F, use temperature derating factor from table below. Locate the correct factor from the table below and multiply this by the appropriate MAWP (psi) above for the elevated temperature working pressure. Example: 2" Alum. at 250°F = 250 psi x .84 = 210 psi at elevated temperature.*

These listings are not exclusive—please contact us for parts engineered to fit your needs.

All PT Quick Connect/Disconnect Couplings in every metal and size through 6” parts are manufactured to federal specification A-A-59326. Conformance to this specification allows complete interchangeability. Couplings not interchangeable in the industry are sizes 8” through 12”. No standards were established by the government for these sizes. Quality is controlled in every phase of manufacturing as is required for compliance to A-A59326. Our quality management system is certified and conforms to the requirements of ISO9001.

ACCESSORIES

CAM ARM GUARANTEE: PT Cam arms are guaranteed against breakage. If a cam arm breaks during normal use, just return it to the branch warehouse in your region for replacement.

Gaskets: Standard gaskets are Buna N. Any variation must be specified.

WARRANTY

PT Coupling Company warrants its products to be free of defects in material and workmanship, and in accordance with the specifications listed. It is the buyer's responsibility to perform testing before selection of product. Abuse or misapplication voids this warranty.

Safety Instructions

INSTALLATION

The PT line of quick disconnect couplings comes with a wide range of fittings including threaded, hose connection, and flanged end. These couplings have been engineered to meet specific requirements with large safety margins.

It is the responsibility of the end user to communicate to the distributor, the application and operating conditions the coupling will be subjected to. It is up to the distributor to supply the right coupling for the application. PT Coupling Co. is available to help you with a proper coupling recommendation.

For the type of application required, care must be taken to insure proper connection and a positive seal. Improperly fitted or applied connections can result in serious accident and/or downtime. Under no circumstances shall the recommended pressure rating of the couplings be exceeded.

OPERATION

PT couplings provide for quick and frequent connections by means of the camming action on the groove surface of the male adapter. The male adapter is simply inserted into the female coupler until contact is made with the gasket. Both cam arms on the coupler are then closed simultaneously to produce a uniform gasket compression between the seal surfaces.

The compression on the gasket produces a seal when torque is applied to the cam arms. A positive seal requires that the surfaces on the gasket seat, the adapter face, and the gasket are smooth and uncontaminated. Cam arms must be in the full closed position for proper locking of coupling.

Gasket deterioration and excessive wear on cam, groove, and seal surfaces can reduce the performance of the coupler. Periodic inspection and servicing will ensure an efficient and safe performance.

MAINTENANCE

Couplings should be well maintained and inspected, particularly when the conditions of service include high working pressure and/or the transfer or storage of hazardous materials. Periodic inspection and testing will detect signs indicating deterioration, damage, or loss of performance before failure.

Gaskets: Use only gaskets approved by PT Coupling Company. The recommended seal material for a particular application has its limitations. Initial installation of a seal material should be followed by frequent inspections. This will help establish the routine inspection and service cycle.

Replacement is required when gasket becomes hard, brittle, or otherwise loses the characteristics required to perform in the intended manner.

Couplers: Periodically check seal surfaces on both coupler and adapter for signs of wear or corrosion. The adapter should be checked for excessive wear on the groove surface where contact is made with cam arms. Cam arm and pin should also be periodically inspected for excessive wear. Worn or otherwise damaged cam arms and pins can prevent the coupler from operating in the intended manner.

To replace worn cam arm and pin, remove cam pin with hammer and punch. Install properly selected new cam arm and pin making sure the cam arm is positioned in the proper direction. The cam arm handle should always be pointed away from the female end of the cam and groove connection when the arm is in the closed position. Safety goggles should be worn during this procedure.

Recommended Materials

All recommendations are based on media temperature of 70° F. Since the resistance of metals, plastics, and elastomers can be affected by concentration, temperature, presence of other chemicals and other factors, this information should be considered as a general guide. Ultimately, the customer must determine the suitability of the material to be used.
