New SL 2 for Serato Scratch Live	27
New SL 4 for Serato Scratch Live	29

Mongoose Remote Audio Interface

- Mongoose delivers digital audio between the equipment rack and remote spaces via CAT 5 cable.
- A Remote Audio Device (RAD) provides analog to digital conversion at the wall (or floor box).
- Connect up to 8 RADs to a single Mongoose with CAT 5 up to 150 meters (492 feet) away.
- 32 by 32 digital audio matrix router, supporting 32 digital audio channels from 8 RADs.
- Multiple Mongoose units can be networked to provide more channels.
- Use with, or without, CobraNet. Receive 2 and transmit 2 CobraNet Bundles.
- Supports DHCP, Zeroconf (Link-local & mDNS) & Auto MDI/MDIX.

The Mongoose's 32-by-32 digital audio matrix router receives its first 16 audio channels from up to eight RADs via the eight rear panel 8P8C (RJ-45) Remote Audio Device ports. The second 16 matrix input channels can come from two 8-channel CobraNet receive (Rx) Bundles via standard CobraNet Primary and Secondary/backup ports. The 32 matrix router outputs transmit 16 channels to eight RADs and 16 more channels to two CobraNet transmit (Tx) Bundles.

RAD NETWORK CAT 5 CABLE CONTENTS

- Data communications (COMM)
- 2 digital audio channels (Rx)
- 2 digital audio channels (Tx)
- Power: 24 VDC & ground

A family of RAD models is shown on the next page. Each converts analog audio to or from 24-bit, 48 kHz digital audio. Standard CAT 5 cable and termination transport four digital audio channels – two channels each direction – as well as power, ground and a communications channel, with status indicators at each RAD, Mongoose, and the computer. Light sensors dim the RAD indicators in dark rooms. Except for the RAD16, AM1 and AM2, all RADs mount in standard US electrical gang boxes. These RADs are available in white, ivory, or black, with a matched Decora™ plate cover included.

	RAD1 Dual XLR Mic Inputs		RADX RAD Port Extension (CAT 5 jack)
	RAD2 XLR Mic Input / Mini & RCA Mono'ed Line Input		RAD11 XLR Mic Input / Mini & RCA Mono'ed Line Input / Mini & RCA Stereo Line Output
	RAD3 Dual XLR Line Inputs		RAD12 Dual XLR Mic Inputs / Dual XLR Line Outputs
	RAD4 Dual XLR Line Outputs		RAD14 XLR Mic Input / Mini & RCA Mono'ed Line Input / Dual XLR Line Outputs
	RAD5 AES3 Input / AES3 Output		RAD15 Dual XLR Line Inputs / Dual XLR Line Outputs
	RAD6 Mini & RCA Stereo Line Input / Stereo Line Output		RAD16 Dual Mic-Line Input / Dual Line Output Euroblocks in surface-mount box
	RAD7 XLR Mic Input / XLR Line Input		RAD18 XLR Mic Input / 1/4" Balanced Line Input
	RAD8 XLR Mic Input / Mini & RCA Stereo Line Output		RAD23 XLR Line Input / XLR Line Output
	RAD9 XLR Mic Input / XLR Line Output	 AM1 and AM2 Automixers include RAD ports. Features are on the next page.	

AM1 Four-Channel Gain-Sharing Automixer

- Automixer with four gain-sharing XLR line/mic/phantom switchable Inputs, RCA and 3.5 mm Aux Line Inputs, USB audio Input.
- XLR mic/line switchable Mix Output, RCA Record Output, USB audio Output.
- Cue mics or any input with Headphones from 1/4" or 3.5 mm jacks.
- Add more gain-sharing mic/line inputs with up to seven Rane AM2 Automixers for a total of 60 gain-sharing mics.
- RAD Port connects to a Rane Mongoose system.

AM2 Eight-Channel Gain-Sharing Cascadable Automixer

- Automixer with eight gain-sharing XLR line/mic/phantom switchable Inputs; XLR mic/line switchable Mix Output.
- Add more gain-sharing mic/line inputs with up to seven more AM2 Automixers for a total of 64 gain-sharing mics.
- RAD Port connects to a Rane Mongoose system.

The RPM Series of Multiprocessors also contain Automixer blocks. See them on pages 5-7.

Fast
Easy
Awesome

Drag Net™ incorporates familiar Windows® file management tools and shortcuts. Easily self-taught or factory trained over the internet in an hour.

Drag Net offers the ultimate in signal processing flexibility, allowing you to draw any system without signal flow restrictions.

Rane's DSP algorithms are the best in the business, combining with RPM hardware for the perfect system. Got one in mind? Drag it together yourself. Download and test-drive Drag Net software free at www.rane.com.

Delay with Temperature

Mic / Line Inputs

Limiter

Crossover: 2-Way or 3-Way

Stereo Side-Chain Compressor

Parametric Equalizer

Ambient Noise Compensator

Automatic Gain Control with presets for speech and music, or tweak your own.

Everything is visible on one screen • On-the-fly DSP resource meter • Instant Auto-Compile. Clicking on any block brings up any of 18 dedicated detail blocks, some shown left and below.

Auto Mixer / Ducker with 8 levels of priority and 4 types of input delay thresholds.

Feedback Suppression with Auto-setup. Accurately rejects feedback and not music.

Graphic Equalization at its finest, with Perfect-Q or Proportional-Q.

Drag Net Processors

RANE

RPM 88, RPM 44 & RPM 22 Drag Net Multiprocessors

- Studio-grade, -128 dBu EIN mic/line inputs.
- 24 non-volatile user-configurable internal presets.
- AES3 input/output includes sample rate conversion.
- Reconfigurable multi-zone Smart Remotes on RS-485 bus.
- Logic I/O ports.; 10Base-T Ethernet control port.
- Add an ML 1 for an extra pair of mic / line inputs (see page 12).

Drag Net Processors

RANE

RPM 26z Drag Net Multiprocessor

- 2 balanced line-level analog Inputs, 6 balanced analog Outputs, AES3 stereo digital Input (total of 4 in x 6 out).

RPM 2m Drag Net Multiprocessor

- 2 balanced analog mic/line Inputs and line Outputs with AES3 digital Output (total of 2 in x 4 out).

RPM 2 Drag Net Multiprocessor

- 2 balanced analog line-level Inputs and Outputs (no AES3 digital).

Remote Controls

Smart Remotes connect to RPM 88 / 44 / 22 (RS-485), install in standard U.S. electrical boxes behind Decora™ plates (not included).

SR 2 Smart Remote

- Data encoder with integrated push switch.
- Two parameters: Level and 2nd-Level.

SR 3 Smart Remote

- Data encoder with integrated push switch.
- Customizable backlit liquid crystal display.

SR 4 Smart Remote

- Data encoder with integrated push switch.
- Eight LED source selections.

MRS 4 Memory Recall Remote

- Radio-button 4-way remote switch.
- Connects to any RPM unit.

VR 2 Volume Level Remote

- Remote pot-on-a-wall level control.
- For CP series, MA 4 or any RPM unit. (Use model VR 1 for MP 44 or DA 26S.)

LRS 4 Level Recall Remote

- Switches 4 preset trimmed levels.
- For CP series, MA 4, MP 44, DA 26S, any RPM unit.

CP 64S Commercial Processor

- 4 Stereo line inputs with priority and adjustable page ducking depth.
- 4-level priority; 2 expand outputs can select page-only, program-only or zone.
- 2 Mic/line page inputs independently assignable to 1 mono & 1 mono/stereo zone.
- Each Zone has independent 7-band EQ; Optional EQ-only security cover (SCP2S).
- Optional Remotes: for page assign (PR 2); for source selection & volume (ZR 1)

**SCP2S EQ
Security Cover**

**PR 2
Paging
Remote**

**ZR 1
Zone
Remote**

CP 52S Commercial Processor

- Mic/line page input assignable to 1 stereo (with mono switch) zone with 7-band EQ.
- 4 Stereo line inputs with priority and adjustable page ducking depth.
- 3-level priority; Expand output selectable as page-only, program-only or zone.
- Optional Remote: for source selection & volume (ZR 1); Optional EQ-only security cover (SCP1S).

**SCP1S EQ
Security Cover**

**ZR 1 Zone
Remote**

All Remotes fit in standard US electrical boxes, and may be finished with a Decora™ plate cover (not included).

DA 26S Distribution Processor with Paging

- Balanced line input, Priority mic/line paging input with adjustable Gating and Ducking.
- 6 outputs with automatic gain control; 24 dB Crossover assignable to any output.
- Balanced Euroblock connectors for audio and remote connections.
- Optional Remotes: for volume presets (LRS 4) or volume control (VR 1).

**LRS 4
Level
Recall
Switch**

**VR 1
Volume
Remote**

Distribution Amplifier

RANE

DA 216S Distribution Amplifier

- 2 balanced mic/line inputs, 16 balanced outputs individually assignable to A, B, or both.
- Broad gain range with mic or line inputs.
- Switchable 15V phantom power works with most common condenser mics.
- Balanced Euroblock connectors; Internal universal power supply (100-240 VAC).

Stereo Line Mixers

SM 26S Line Splitter / Mixer

- Combination 6 x 2 line mixer, 2 x 6 line splitter, or 6 x 6 line driver.
- Capable of 4-pair stereo line splitting or mixing.
- Mix, pan and level controls with 12 dB gain for level matching.
- Balanced 1/4" TRS connectors; Internal Universal Power Supply (100-240 VAC).

SM 82S Stereo Line Mixer

- 8 stereo (16 mono) line inputs in a single rack space. Can accept up to 10 stereo inputs using Expand In and Effects Return.
- Level, stereo balance (mono pan) and stereo send controls for each input.
- Stereo expand in and out to additional mixers, stereo effects loop with return level and balance controls.
- Unbalanced 1/4" TS inputs, balanced 1/4" TRS outputs. Internal universal power supply (100-240 VAC).

MLM 42S Mic / Line Mixer

- 4 inputs with automatic recognition of mic or line level signals
- 3-band Accelerated Slope™ (off to +6 dB) tone controls, gain trims and selectable phantom power on each input.
- Post-mix 1/4" Effects loop with Wet/Dry pan control.
- RCA unbalanced outputs; XLR and TRS balanced outputs are mic or line level selectable; Internal universal power supply.

MLM 65 Mic / Line Mixer

- 6 studio-grade mic or line-level preamplifiers with phantom power and gain trim in an easy-to-operate design.
- 5 switchable stereo line-level inputs, one with a switchable phono preamp, one with a 3.5 mm jack and USB power for portables.
- USB stereo audio input for computer playback, with simultaneous USB stereo audio output for recording to a computer.
- Cue any Input or the Main output to Headphones with either a 1/4" or 3.5 mm headphone jack.
- Outputs include balanced XLR with a mono switch, unbalanced RCA, USB audio, S/PDIF and TOSLINK.

The AM1 and AM2 Automixers also mix mic and line inputs in expandable configurations. See them on page 3.

MLM 82S Mic / Line Mixer

- 8 inputs, 2 outputs – 4 balanced mic/line inputs, 4 balanced/unbalanced stereo or mono line inputs.
- Mic inputs have switchable phantom power, mic/line level, and output assignable.
- Outputs individually switchable to mic-level, line-level, stereo or mono.
- Balanced XLR mic/line inputs, 1/4" TRS line stereo/mono inputs, XLR outputs. Internal universal power supply (100-240 VAC).

MLM 103 Mic / Line Mixer

- 6 studio-grade mic or line-level preamplifiers with phantom power.
- 2 additional stereo line-level inputs with mono switches.
- All inputs have 3 assignable outs; Mic inputs have direct outs with pre/post switches.
- Euroblock inputs and outputs; Internal universal power supply (100-240 VAC); Includes security cover (below).

Includes security cover for Input EQ and Assign switches

ML 1 Mic / Line Preamp

- Two separate mic / line inputs; Balanced analog outputs on XLR and Euroblocks; AES3, S/PDIF coaxial and optical digital outputs.
- Rear panel gain trims with included security cover; Extremely low noise; Internal universal power supply (100-240 VAC).

NM 1 Network Mic Preamp

- Microphone Preamp with 48V phantom power puts audio over CobraNet.
- Power Over Ethernet (PoE); 1.7"H x 7.2"W x 4.9"D box.
- SNMP software-controlled preamp gain. Audio power amplifier for loudspeaker.
- Switch / LED interface. Selectable address.
- Connectors L to R: CobraNet Primary; Activity/Conductor LEDs; CobraNet Secondary; Switches/Lights; Speaker Output; Mic Input.

MS 1S Microphone Preamp

- Ultra low-noise, low distortion preamp with a variable Gain control.
- 48 volt Phantom Power switch; Phase Polarity switch.
- Balanced XLR input and output; Internal universal power supply (100-240 VAC)..

C4 Quad Compressor / Limiter / Dynamic EQ

- Independent Compressor, Dynamic EQ and Limiter per channel; Auto mode for fast setup of Attack and Release.
- External side-chain includes a parametric EQ with Compress, Dynamic EQ and Listen modes.
- Independent Metering: Side-chain level, Threshold indicator, Gain reduction & Limiter headroom.

The G4 has the same rear panel connections and appearance as the C4.

G4 Quad Gate / Ducker / Expander

- Independent Quad Gate / Expander / Ducker with look-ahead peak detector; Expand mode uses rms detection.
- Side chain switch selects external input or internal High & Low Cut Filters; Side-chain metering.
- DSP with familiar analog controls; Balanced 1/4" TRS & XLR connectors.

DC 22S Stereo Gate / Compressor

- Two independent gates and compressors with output level controls; Gate acts as a downward expander, so quiet parts get quieter.
- True master/slave operation in Link mode for stereo program compression without image shifts.
- Balanced 1/4" TRS & XLR connectors; Internal universal power supply (100-240 VAC).

The RPM Series of Multiprocessors also contain compressors, limiters and gates. See them on pages 4-6

ME 15S Stereo 2/3-Octave microGraphic Equalizer

- Proven constant-Q filters for precise feedback control and reduced interaction.
- ± 6 or ± 12 dB boost/cut range switchable; 20 mm sliders with grounded center detents and dust dams.
- Input level controls; Overload indicators; Bypass switches.
- Balanced XLR and 1/4" TRS connectors; Internal universal power supply (100-240 VAC).

ME 30S Mono 1/3-Octave microGraphic Equalizer

- Proven constant-Q filters for precise feedback control and reduced interaction.
- ± 6 or ± 12 dB boost/cut range switchable; 20 mm sliders with grounded center detents and dust dams.
- Input level control; Overload indicator; Bypass switch.
- Balanced XLR and 1/4" TRS connectors; Internal universal power supply (100-240 VAC).

ME 60S Stereo 1/3-Octave microGraphic Equalizer

- 2 channels x 30 bands of constant-Q filters; Sweepable high-cut and low-cut filters.
- ± 6 or ± 12 dB boost/cut range switchable; 20 mm sliders with grounded center detents and dust dams.
- Input level controls; Overload indicators; Bypass switches.
- Balanced XLR and 1/4" TRS connectors; Internal universal power supply (100-240 VAC).

DEQ 60L Stereo 1/3-Octave Graphic Equalizer

- 2 x 30 bands of switchable Perfect-Q (no filter interaction, true WYSIWYG) or Proportional-Q (broad adjustment) digital filters.
- 45 mm sliders with switchable ± 6 or ± 12 dB boost/cut range each channel; Switchable high-resolution -12 dB Cut-Only mode.
- Input and Output Level controls; Input and Output meters; Channel Bypass switches.
- Sweepable high-cut and low-cut filters; Separate Accelerated-Slope™ Low / Mid / High full-cut Tone controls.
- A/B curve comparison switches provide stereo linking with two memories; Balanced XLR, TRS and Euroblock connectors.
- “Perfect-Q™, the Next Step in Graphic EQ Design” RaneNote is available at www.rane.com.

The RPM Series of Drag Net Multiprocessors also contain graphic equalizers with Perfect-Q. See them on pages 5-7.

Delay

AD 22S Dual Channel Audio Delay

- Distance Mode: 2 to 999.99 ms delay range, converts between milliseconds / feet / meters with temperature compensation.
- Video Mode: up to 1 second delay in .5 frame increments in frames or milliseconds in all NTSC and PAL / SECAM frame rates.
- 2 memories; Remote contact closure memory recall with switchable front panel lockout; Fail-safe bypass for each channel.

The RPM Series of Drag Net Multiprocessors also contain digital delays. See them on pages 5-7.

AC 22S Active Crossover

- Stereo 2-way or Mono 3-way configurable; Master input level and individual driver output level controls with mute switches.
- 24 dB per octave Linkwitz-Riley filters with adjustable driver alignment delays guarantee in-phase outputs.
- Balanced XLR connectors; Internal universal power supply (100-240 VAC).

AC 23S Active Crossover

- Stereo 2-way or 3-way or mono 4-way or 5-way configurable; Master input level; Driver output level controls with mute switches.
- 24 dB per octave Linkwitz-Riley filters with adjustable driver alignment delays guarantee in-phase outputs.
- Balanced XLR connectors; Internal universal power supply (100-240 VAC).

The RPM Series of Drag Net Multiprocessors also contain crossovers. See them on pages 5-7.

Headphone Amplifier

HC 6S Six Channel Headphone Console

- Six stereo amplifiers with both master and individual level controls.
- Each stage can be driven from the master stereo input or individual channel inputs.
- Drives stereo 1/4" headphone outputs on both front and rear panels.
- Balanced 1/4" TRS inputs; Internal universal power supply (100-240 VAC)

BB 44X Balance Buddy

- 2 channels: +4 dBu balanced to -10 dBV unbalanced (XLR to RCA).
- 2 channels: -10 dBV unbalanced to +4 dBu balanced (RCA to XLR).
- No front panel controls; Nickel-core transformers; Expandable to 8 channels with Option 88 Accessory (above).

BB 22 Balance Buddy

- 2 channels: -10 dBV (RCA) to +4 dBu (XLR) conversion.
- Nickel core transformers; No power supply required.
- Wide bandwidth; Low distortion.

LT 22 Line Transformers

- 2 channels 1:1; Balanced Euroblock connectors.
- Nickel core transformers; No power supply required.
- Wide bandwidth; Low distortion.

Sound System Setup

RaneGain Setup Tool

- 400 Hz sine wave generator and matching piezo transducer.
- Helps to set optimum levels through the entire audio system signal path.
- See the RaneNote "Setting Sound System Level Controls" at www.rane.com/note135.html.

Multichannel Amplifiers

RANE

MA 3 Multichannel Amplifier

- 3 independent channels @ 40 W rms into 8Ω; 60 W rms into 4Ω, 20 Hz-20 kHz all channels, all day.
- Dynamic limiters handle 20 dB of overdrive; 80 Hz high-pass filter selection; Sealed heat tunnel forced-air cooling.
- Balanced Euroblock inputs; Euroblock speaker connectors handle up to 12 gauge wire.
- Optional distribution transformers: 40 W 70.7 V (model [TF 407](#)) or 40 W 100 V (model [TF 410](#)) mount on [MT 6](#) rack panel (2U).

MA 4 Multichannel Amplifier

- 4 independent channels @ 100 W rms into 8 or 4 Ω, with built-in load monitoring, in just one rack space.
- Universal voltage, power-factor-corrected power supply with low inrush current.
- Advanced dynamics control adjusts for sensitivity setting, temperature & load Z.
- Remote fault reporting & redundancy switching; Adjustable high-pass filters; Optional remote level controls. →

VR 2
Volume Remote

MT 4 Multichannel Transformer

- 4-channel 70.7/100 volt transformers for the [MA 4](#) in a 1U rack chassis.
- Input 8Ω, 100 watts; Euroblock strain-relief connectors; Frequency response 40 Hz to 20 kHz +0, -1 dB
- Separate mounting tray and individual transformers available: [KT 4](#) rackmount tray only; [TF 4](#) individual transformers

MP25 Club Mixer

INPUTS

- Four individually switchable stereo Phono/Line inputs.
- Four stereo Auxiliary inputs.
- Four stereo USB playback inputs.
- Two microphone inputs with optional Talkover ducking:
 - One with front and rear panel connectors.
 - One with a line-level input option.

OUTPUTS

- Stereo Main Outputs on balanced XLR and unbalanced RCA:
 - Rear panel Mono/Stereo switch.
 - Rear panel Max Out level attenuator.
- Stereo balanced 1/4" TRS Zone and Booth outputs:
 - Auto-mono output on both Left and Right jacks.
- Stereo Record outputs on RCA, S/PDIF and USB.

USB

- Low-latency ASIO / Core Audio drivers eliminate delay between the control input to audio software and the audible result.
- Multiclient ASIO / Core Audio drivers allow multiple software applications to simultaneously stream audio to and from the mixer.
- Four stereo playback channels stream audio directly from your favorite playback, mixing, beat-making, and looping applications to the MP25's digital mixer engine.
- Four stereo record channels stream the four post-fader program channels to your audio application for multitrack recording. A fifth stereo record channel streams Mic 1, Mic 2, or the Main Mix.
- The USB Effects Loop enables insertion of computer-based effects processors into the MP25's powerful FlexFX bus.
- The MP25 front panel is MIDI-mappable, allowing control of audio application parameters using the mixer's control surface.

The MP25 fits in a 4U rack or coffin, able to replace a classic Rane MM8z, MP 22, or MP 24 series Mixer. [7"H x 19"W x 4.6"D] (17.8 cm x 48.3 cm x 11.7 cm)

MP 2016S Rotary Mixer

- 6 stereo input buses with 4 phono preamps, 2 mic/line preamps and 5 aux line inputs.
- Each bus includes initial input gain controls and individual cue switches. The headphone amplifier features split master/cueing.
- The Booth output is switchable master or cue. The Mic Engage switches can duck the Booth outputs 12 dB (internally defeatable).
- The Master (House) output features Accelerated Slope™ 3-band full-cut tone controls with a range of +6 dB to off.
- Switchable stereo effects loop; Pre- & post-effects tape outputs; RCA inputs, XLR mic/line inputs, 1/4" effects loop, XLR and RCA outputs.

optional XP 2016S Processor

- Adds Active Crossfader™ with full-range Contour control; Individual Crossfader assign switches.
- Adds Accelerated Slope™ 3-band tone controls to each input bus.
- Master/cue meters follow the headphone split cue selection.
- Single ribbon cable connects XP 2016S to MP 2016S (included).
- Internal universal power supplies work anywhere in the world (100-240 VAC).
- Size (each unit): 5.25" [3U] H x 19"W x 5.3"D (13.3 cm x 48.3 cm x 13.5 cm).

MP 2S Compact DJ Mixer

- 2 Phono/Line and 2 Line (total of 4) inputs to 2 crossfader buses, each with its own ± 12 dB Low and High tone controls.
- Each Program bus selects any of the four stereo Inputs, so any Input can appear on either side of the Crossfader.
- Internal 100-240 VAC power supply works anywhere in the world. Unit size: 1.75"H x 19"W x 5.3"D (4.4 cm x 48.3 cm x 13.5 cm)

MP 44 DJ Mixer

- 4 input channels: each with phono & line inputs, trim, crossfader assign, FlexFX™ effects assign.
- Accelerated Slope™ 3-band full-cut (+6 dB to off) EQ on each of the 4 input channels.
- 2 additional aux inputs.
- 2 mic inputs with EQ.
- Booth mic ducker.
- Emergency page input.
- Optional remote level.
- Crossfader CD triggers.
- Light trigger output.
- FlexFX effects loop.
- Dedicated mic effects loops.
- Master effects loop.
- Master output limiter.
- House and Booth outputs.
- 2 Extra Aux outputs.
- 8.75"H x 19"W x 5.3"D
- 22.2 x 48.3 x 13.5 cm.

Optional **VR 1**
Remote Level Control

TTM 56S Performance Mixer

Rane takes performance mixer design as seriously as performing DJs take their art form. The TTM 56S is flexible, durable, and feature packed. The audio quality qualifies it for use in the most demanding live venue, recording studio or live broadcast applications.

- Mic input with EQ and mic effects loop.
- Faders and Crossfader have Contour and Reverse controls.
- Stereo Aux Input for session mix, iPod® or keyboard.
- Stereo Aux Output for session mix, booth or recording.
- Post-fader FlexFX™ allows external reverb and echo decay effects to respond to fader action without cutting off tails.
- High, Mid & Low Accelerated Slope™ tone controls react from +6 dB to off — full bass and treble cut.

TTM 56 TO TTM 56S IMPROVEMENTS

The world's most popular battle mixer is even better:

- Internal universal power supply works anywhere (100-240 VAC).
- All four inputs are now Phono/Line switchable, letting you connect 4 turntables or 4 CD players in any combination.
- Both 1/4" and 3.5 mm headphone jacks are on the front.
- Transform switches are now Kill switches.
- Operation is simplified by putting all the controls on top.
- Unit size: 13.3"H x 10"W x 3"D (33.8 cm x 25.4 cm x 7.7 cm)

NON-CONTACT CROSSFADER AND CHANNEL FADERS

Rane's patented magnetic fader is the fastest, most accurate, and longest lasting on the planet. The design uses non-contact magnetic position sensor technology previously reserved for aerospace and industrial applications. Unlike optical non-contact faders, the magnetic fader is impervious to smoke, moisture, temperature and age. The electrical performance is unaffected by use. No noise, no bleed — ever!

3-BAND ACCELERATED-SLOPE™ FULL-CUT TONE CONTROLS

High, Mid & Low tone controls react from +6 dB to off: full bass and treble cut on each channel. Engage switches allow A/B comparison and the ability to quickly cut or add tone effects.

Empath mixers combine the vision of Grandmaster Flash and Rane technology. The name implies understanding, awareness and sensitivity to the needs of DJs. The top plate is durable Lexan™ available in four different colors, and all have these features:

- 3 phono/line switchable inputs plus a mic input and a stereo Aux input.
- 3 mixing buses, each with 3-band Accelerated Slope™ full-cut EQ (+6 dB to off).
- Switchable Auto-Gain prevents program level jumps when changing sources.
- Post-fader FlexFX™ lets external reverb and echo decay tails respond to fader action.
- Contour controls for Fader 1, Fader 3 and the Crossfader.
- Headphone outputs include tone controls with both 1/4" & 3.5 mm jacks.
- Universal internal power supply works anywhere in the world (100-240 VAC).
- Unit size: 13.3"H x 10"W x 3"D (33.8 cm x 25.4 cm x 7.7 cm)

Empath Blue

- Original blue and silver Lexan finish.

Empath Black

- Black Lexan finish.

Empath Rotary

- Black Lexan finish.
- Rotary channel faders.

Empath Signature

- Black and gold Lexan finish.
- Signature by Grandmaster Flash.
- Includes deluxe road case.

Rane Sixty-Eight Club Mixer for Serato Scratch Live

TWO COMPUTERS, TWO USB PORTS, UP TO FOUR DECKS AND A RANGE OF EFFECTS.

Introducing the first Scratch Live compatible DJ mixer that allows two computers to be connected simultaneously. Using two USB ports, the Sixty-Eight mixer lets two DJs play Scratch Live at the same time, allowing for seamless handover from one DJ to another. You can also control up to four decks with a single laptop.

Armed with studio-grade phono preamps, USB and S/PDIF inputs, the Sixty-Eight can allow a blend of analog and digital audio sources like never before. It features easy internal digital effects with on-beat effect switching, external analog insert support for legacy hardware effects, and USB insert support for computer-based effects.

- Two independent USB 2.0 high speed ports, each supporting 22 floating point 32-bit audio channels at 48 kHz.
- Core Audio and ASIO drivers support third-party software.
- Flexible USB recording options, record from any input or output.
- Support for two, three or four Virtual Decks in Scratch Live.
- Direct control of over 30 Library, Cue and Loop functions.
- 3-band, full-cut EQ with a new High-pass / Low pass Filter.
- Unique FlexFX bus with six internal effects plus USB and analog insert support for computer-based effects.
- Input Channels:
 - Four stereo Phono / CD inputs of Phono / Line or S/PDIF.
 - Four stereo Auxiliary inputs.
 - Four stereo USB playback options.
 - Two independent microphone inputs.

Rane TTM 57SL Performance Mixer for Serato Scratch Live

SCRATCH LIVE CONTROL SURFACE

“Soft” controls have multiple functions for controlling Serato Scratch Live from the matched physical controls in the red outlined area on the TTM 57SL. They also assign the internal digital effects when the mixer is operated stand-alone without a computer. Six different preset groups optimize common controls for playback, cue/looping, effects, recording and library, or customize any control with a right-click. See the “Minimum System Requirements for Serato Scratch Live” on the page 26.

EFFECTS

24-bit effects using Rane and Serato’s award-winning studio and Live sound software technologies, with BPM-synched echo, swept filter, flanger, phaser and desecrator effects.

MAGNETIC FADERS

Rane’s patented magnetic faders are the fastest, most accurate, and longest-lasting on the planet. No travel noise or bleed ever!

SIMULTANEOUSLY:

- Play a combination of digital and analog sources.
- Play two files controlled by vinyl or CD while recording the mix.
- Or, digitize two vinyl records or analog sources simultaneously.
- Cue both analog and digital sources.
- Operate standalone as a no-compromise performance mixer.

HARDWARE FEATURES

- 4 switchable phono/line inputs, plus a stereo aux input.
- Two input buses, each selects 2 analog & 2 digital sources.
- Input Gain, Left / Right Pans, and 3-band full-cut EQ with kills.
- Mic input with Level and Tone controls.
- Rane’s FlexFX effects loop system, plus built-in effects.
- Independent Contour & Reverse controls with Channel Swap.
- Both 1/4" and 3.5 mm headphone output jacks.
- RCA, TRS & XLR outputs, each with dedicated level control.
- USB 1.1 with 8 channels of streaming 16 bit / 44.1 kHz audio.
- Programmable foot switch input (up to 3 buttons; not included).
- Unit size: 13.3"H x 10"W x 3"D (33.8 cm x 25.4 cm x 7.7 cm)

4 turntables or
4 CD decks or
any combination.

Serato Video-SL Plug-in

Video-SL is an optional software plug-in for Scratch Live which adds the ability to play and mix video files. Manage a variety of video clips from within the Scratch Live library and load them onto a virtual deck for control with either vinyl or CD. The controls allow you to mix clips with a variety of transitions, as well as apply exciting effects to each clip. The mixed output is sent to your computer's second display output, connecting to external monitors or projectors.

- Add video clips to your Scratch Live performance.
- Use built-in transitions including text and image effects.
- Audio Responsive effects let the music control a variety of live video effects, controlled by analyzing the music signal.
- Videos can be previewed in the Scratch Live offline player.
- MIDI control enables use of 3rd-party controllers with Video-SL.
- Effects are stored with each video file for instant recall.
- Linked Audio-Effects that follow Scratch Live's DJ FX and the TTM 57SL's audio effects and does the same thing to the video.
- The boxed retail version includes overlays for the TTM 57SL.
- Works with the Rane SL 1, SL 3, SL 4, TTM 57SL and Sixty-Eight.

Serato Video-SL setup using a Rane TTM 57SL

Minimum System Requirements for Serato Scratch Live

PLEASE NOTE: These are the **minimum** requirements to run Scratch Live. For best performance and for use in professional situations we recommend you buy a higher spec computer. We also recommend Intel processors.

- Available USB 2.0 port.
- 1024 x 768 screen resolution or higher.
- 2 GB RAM, more for a large library.
- Hard drive space for music: 5400RPM minimum, 7200RPM recommended for high resolution audio playback.

PC

- 2.2 GHz Intel Core Duo.
- Windows XP with Service Pack 3 or higher, or Vista with Service Pack 2 or higher, or Windows 7. We recommend Windows 7 over Vista.

Mac

- 2 GHz Intel Core Duo.
- OSX 10.5.8 or higher.

*If you have a large library, you will benefit from having more RAM. Before buying a new computer, read the FAQs at www.serato.com. NOTE: If you are using Scratch Live's more system-intensive features like the DJ-FX plug-in, you may need a higher spec computer or an optimized system. Read the Computer Optimization Guide at www.serato.com.

NOTE: The optional Video-SL plug-in scales its performance based on the capabilities of your graphics card. 2 GHz minimum processor speed is required. Please read the FAQ at www.serato.com before purchasing.

NOTE: Please read the FAQ at www.serato.com if you are looking at buying a computer with an AMD Turion or Athlon processor.

Rane SL 2 for Serato Scratch Live

The Rane SL series of interfaces with Serato Scratch Live set the standard for vinyl emulation. The SL 2 advances the technology found in the original SL 1 with these improvements:

- CD / Phono input switch on the SL 2 box.
- Superior sounding 24-bit converters.
- Hotter 3 Vrms input and output.
- 44.1 or 48 kHz sample rate.
- Smaller and more compact design.
- ASIO / Core Audio drivers.

The Rane SL 2 gives you the freedom to take your entire digital music collection on the road with advanced features that add extra creativity to your DJing. This intuitive system replicates the traditional DJing experience for “real feel” usability. Low latency means the response time from touching the decks to hearing an audio signal is extremely fast. Serato engineers

developed system level audio drivers that allow accurate and reliable operation at faster speeds than any similar package.

The Rane SL 2 USB interface connects one or two standard vinyl or CD turntables to your computer using a USB cable and audio connections to line inputs on your DJ mixer. This system includes two 12" Control Vinyl records and two Control CDs, USB cable, and audio cables to your mixer.

The SL 2 interface box is 5.5" x 5" x 1.3" (14.1 x 12.5 x 3.3 cm).

THE NEW STANDARD FOR PROFESSIONAL DJS

- DJ with music files on your computer using Control Vinyl, Control CD or MIDI.
- Connect two turntables or two CD decks selected via the rear panel switch.
- High-quality 24-bit audio with software-selectable 44.1 or 48 kHz sample rate.
- Galvanic isolation guarantees audio is actively isolated from USB and power.
- Creative DJing features: cueing, looping, keylock, sample player and DJ-FX.
- Intuitive file management with crates. Easy file and iTunes playback migration.
- Multiple modes for waveform display and library browsing.
- Built-in recording interface for archiving vinyl.
- Multiple audio file type support: WAV, AIFF, ALAC*, AAC*, Ogg Vorbis and MP3.

* Requires Apple Quicktime (not included).

Rane SL 3 for Serato Scratch Live

The SL 3 connects up to three standard vinyl or CD turntables to your computer and the mixer of your choice. Using regular vinyl turntables, CD players or MIDI controllers, you can scratch and mix files from your Mac or Windows computer's CD or hard drive. This intuitive system replicates the traditional DJing experience for "real feel" usability. With unparalleled performance and stability, you'll soon see why thousands of DJs worldwide choose Rane with Serato Scratch Live.

The SL 3 builds on the success of the SL 1 with several enhancements. The auxiliary input provides a live input feed for creative sampling, recording your set or using a third vinyl turntable or CD deck. The auxiliary output delivers a third deck or the SP-6 sampler output right to your mixer. Studio

grade phono preamps and 24-bit audio processing deliver exceptional sound.

The SL 3 includes two 12" Control Vinyl records and two Control CDs, USB cable, and audio cables to your mixer. An international power supply with country adaptors is included to insure optimum performance. A soft zippered carrying case for the SL 3 is also included.

See "Minimum System Requirements for Serato Scratch Live" on page 26.

RANE || SL3

ADVANCED THREE-DECK INTERFACE FOR PROFESSIONAL DJs

serato || SCRATCH LIVE

SL 3 FEATURE AND PERFORMANCE ENHANCEMENTS

- Supports up to three turntables or CD decks switchable in any combination.
- Aux Input for Live Mix Recording, LiveFeed or a third deck.
- Aux Output can be assigned to the SP-6 Sample Player or a third deck.
- Stack mode allows all three decks on the screen at once.
- Independent Line / Phono-level selection for each input for greater flexibility.
- 6-in 6-out sound card with any software supporting ASIO or Core Audio.
- Software and driver-switchable Direct Thru connections for simplicity.
- External power supply included to provide Direct Thrus without a computer.
- Includes two control records, two CDs, cables and a soft zippered carry case.

Rane SL 4 for Serato Scratch Live

The SL 4 connects up to four vinyl turntables or CD players to your computer and the mixer of your choice. Using special control vinyl, CDs or MIDI controllers, you can scratch and mix files from your Mac or Windows computer's CD or hard drive. With unparalleled performance, stability and audio quality, you'll know why thousands of DJs worldwide choose Rane with Serato Scratch Live.

The SL 4 is the first standalone DJ interface with two USB ports for seamless DJ changeover and back-to-back performances. Superior sound is delivered with high quality 96 kHz, 24-bit audio. Built-in galvanic isolation between USB and audio, with turn on/off muting, ensures that only the purest interference-free audio signal is heard. Low-latency ASIO

and Core Audio drivers allow you to use the SL 4 as a studio production tool with multiple third-party software applications. The SL 4 is masterfully crafted by Rane for the discerning DJ.

The SL 4 includes four 12" Control Vinyl records and four Control CDs, two USB cables, and audio cables to your mixer. An international power supply with country adaptors is included to insure optimum performance. A soft zippered carrying case for the SL 4 is also included.

See "Minimum System Requirements for Serato Scratch Live" on page 26.

RANE || SL 4

TWO COMPUTERS AND FOUR DECKS USING YOUR FAVORITE MIXER

serato ||  SCRATCH LIVE

SL 4 FEATURE AND PERFORMANCE ENHANCEMENTS

- Supports four turntables or CD decks switchable in any combination.
- Two high-speed USB 2.0 ports for two DJs for uninterrupted performances.
- Aux Input for session recording or LiveFeed.
- Aux Output assignable to the SP-6 Sample Player.
- Four software-switchable analog Thru connections for regular vinyl/CD.
- 48 kHz and 96 kHz sample rate switch on the SL 4 rear.
- 10-in 10-out USB sound card with any software supporting ASIO or Core Audio.
- Bus power from either USB port or the included external power supply.
- Includes four control records, four CDs, two USB and six RCA cables.

Serato Scratch Live 2.2

Serato Scratch Live combined with Rane hardware is the ultimate solution for professional DJs, giving you the freedom to take your entire digital music collection on the road and equipping you with advanced features that add extra creativity to your DJing.

This intuitive system replicates the traditional DJing experience for “real feel” usability. With unparalleled performance, sound quality and stability, you’ll soon see why thousands of DJs worldwide choose Serato Scratch Live.

- Load music files onto Virtual Decks for playback.
- Browse your music collection by custom categories and album art.
- Prepare audio files for playback with auto-gain and BPM calculation.
- Organise music with crates, subcrates and smart crates.
- Choose from multiple play and display modes to suit your performance style.
- Use visual aides, cues and loops to perfect your mixing.
- Add extra creativity to your sets with DJ-FX, the SP-6 Sample Player and other Scratch Live plug-ins.

VIRTUAL DECKS

Music files are loaded onto the Virtual Decks, which rotate as the music plays, much like regular turntables or CDJ decks.

The Virtual Deck shows everything about the speed and position of a track. As the vinyl rotates, so does the line on the label. The circular progress bar around the edge is a visual representation of the position within the song. The Virtual Decks display pitched BPM information, and the time and remaining time are displayed in minutes and seconds.

LIBRARY

Browse your music collection by album, artist, BPM and genre. Additional column sort options can be selected for custom needs. Tracks in your library can also be browsed using three different album art modes.

Scratch Live includes an intuitive Search function to help you find tracks quickly.

SUPPORTED FILE FORMATS

Scratch Live supports multiple file formats: fixed and variable bit-rate MP3, Ogg Vorbis, AAC, ALAC, AIFF, WAV and Whitelabel (wl.mp3) file types*. M3U playlists are also supported. ***For more information on wl.mp3 files visit www.whitelabel.net.**

NOTE: Older iTunes Music Store DRM files cannot be played back by Scratch Live. iTunes Plus files are DRM-free.

TOOL TIPS

Handy built-in Tool Tips provide a simple guide to learn the software and applications of each feature. A list of keyboard shortcuts are also in the Tool Tips.

IMPORTING MUSIC

Importing music is done simply by navigating to your hard drive(s) via Scratch Live’s File pane. You can also drag and drop files directly from Explorer (Windows) or Finder (Mac). iTunes users have the option to integrate existing iTunes libraries and playlists into their Scratch live library. Importing audio files to your computer is highly recommend, however you can play files directly from CD and CD-ROM.

FILE PREPARATION

Build waveform overviews, check for file corruption and use Scratch Live’s optional auto-gain and BPM calculation with the Analyze Files button. Use the Offline Player to prepare crates, audition tracks, and set cue and loop points, without needing to have the Rane hardware connected.

CRATES AND SMART CRATES

Create Crates and Subcrates to group tracks within for quick recall and simple organisation. You can also merge these crates onto an external drive for simple migration to another laptop.

Smart Crates allow you to set rules and keywords for crates, which automatically update when relevant tracks are added or removed from your library.

HISTORY

The history button opens a complete log of all the tracks you have played and allows you to export Scratch Live session information as a data file for future reference.

PLAY MODES

Scratch Live has three different play modes which you assign to each Virtual Deck.

Absolute Mode most closely resembles the properties of regular vinyl; needle dropping, scratching, rubbing and other turntablist techniques are most faithfully reproduced in this mode. Absolute Mode is the recommended mode to use when using the standard hardware functions on CDs.

Relative Mode allows for skip free scratching and the use of Scratch Live's cueing, looping and censor controls.

Internal Mode lets you play and mix files without external vinyl or CD control. Internal mode contains a start/stop function, a pitch slider and pitch nudge controls. It is also the emergency mode Scratch Live defaults to when the end of a control record or CD is reached.

KEYLOCK

When Key Lock is on, the key or pitch of the song stays locked at what it would be if the track was playing at normal speed, regardless of the platter speed of the turntable or CD player.

DISPLAY MODES

Four different Display Modes allow you to choose the best Virtual Deck arrangement to suit your style of performance.

Library Mode simplifies the deck arrangement with a larger view of the library and no waveform matching.

Classic Vertical Mode displays two decks on the left and right side of the screen with vertical waveforms in the middle.

Classic Horizontal Mode displays two decks on the left and right side of the screen with horizontal waveforms in the middle.

Stack Mode displays the decks and waveforms on top of one another horizontally, which is useful when using more than two decks (with supported Rane hardware).

VISUAL AIDS

When a track is playing several waveforms and visual aids are displayed.

Tempo Display provides a helpful tool for beat matching - each peak represents the beats within a track. As you change the pitch of a song, these peaks shift position. When track tempos are in-time, these peaks will be aligned.

Beat Matching Display emphasizes the position of beats within a track alongside the waveform display, for quick beat matching.

Track Overview Display shows an overview of the track waveform, which is useful for finding transitions in a track and for jumping quickly to any part of the song.

Colored Waveforms by frequency for visual identification of instruments and vocals.

CUES AND LOOPS

Create up to five Cue Points for each track to mark and trigger key parts of your songs. Create and save up to nine Loops per track, either manually or with the Auto-Loop function.

SCRATCH LIVE PLUG-INS

Optional plug-ins can be switched on and off, allowing you to choose which extra features you would like to use when DJing.

SP-6 Sample Player allows you to trigger up to six additional sources of audio (e.g. sound effects, drops). Store samples in multiple sample bank slots, and choose individual output options for each slot.

DJ-FX give you control of two FX units, each with three chained effects slots per unit. Customize and save preferred effect parameter settings for quick recall.

Serato Playlists for exporting track play information to your user profile on www.serato.com. This can be done using the History export function post-set, or you can choose to live update during your set.

SERATO VIDEO-SL

Playback video files using the Serato Video-SL plug-in*, and mix them using creative effects and transitions which compliment the audio. *Serato Video-SL is available to buy separately. See page 27.
