### A Remco Overview

Remco Products is a closely held business, founded by Richard L. Garrison in Zionsville, Indiana. The introduction of a one-piece polypropylene shovel more than 30 years ago established Remco as an industry pioneer. Building on a few core products and limited market exposure, we have greatly expanded our product offerings and distribution capability.

Today, Remco serves a growing number of distinct markets, ranging from food processing and pharmaceuticals to the safety and industrial markets. We offer a wide array of products, from a variety of polypropylene shovels, scoops and scrapers . . . to tubs and undercarriages . . . and the complete Vikan® line of brushes, squeegees and other professional cleaning products.

Blessed with a record of consistent sales growth and a staff that is second to none in customer service, Remco has established a strong position throughout the United States, as well as a significant international presence. We are proud of the strong and lasting relationships we have developed with our distributors, and are committed to building on that loyalty for the continued benefit of our mutual customer base.

## Tub and Undercarriages

There's more to these tubs than meets the eye. Start with versatility: they can be used for transporting, freezing and storing. Then there's variety: they're available as stand-alone items or with regular or low steel undercarriages. You can also specify an optional drain plug, and (in orders meeting a minimum quantity requirement) your choice of colors.

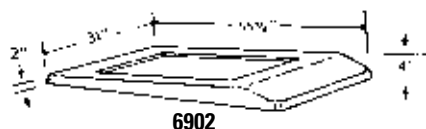

### Undercarriages

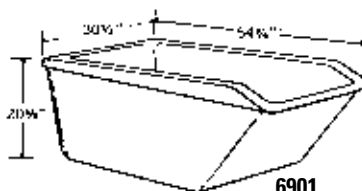

Undercarriages available in galvanized and stainless steel.

### Total Color

We've taken the next logical step in color-coding. With block and bristle made from the same color, you now have the highest degree of traceability possible for today's stringent HACCP environments. From Vikan®, hygienic and efficient cleaning.

## DESIGNED FOR ACCOUNTABILITY— COLOR CODING

- Minimizes the risk of cross-contamination
- Divides production into zones or tasks
- Allows for quick visual confirmation
- Brushes manufactured in Total Color—block and bristle are the same color
- Helps with HACCP compliance
- Prevents quality lapses before they happen

## MANUFACTURED FOR DURABILITY— QUALITY TESTING

- Autoclave test. Brushware can be autoclaved at 250° F/121° C
- Individual filament strength is tested
- Filament tufts are tested at 60 Newtons of force
- Molded parts are tested for strength
- Chemical resistance testing is performed
- ISO 9001 Certified
- ISO 14001 Certified

## VALUED FOR LONGEVITY— PROPER PRODUCT MAINTENANCE

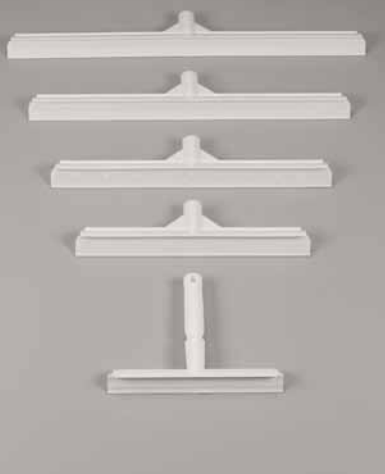

- Remove all visible dirt
- Clean with a solution of pH 9 or above
- Rinse with clean water
- If lime residues form, remove with a solution of pH 5 or less
- Rinse with clean water
- If required, tools can be disinfected after washing
- Rinse with clean water to remove any disinfectant residue
- Note: brushware can be autoclaved at 250° F/121° C if required
- Hang and dry tools properly

## Ultra Hygiene Squeegees

These single blade squeegees are molded in one piece with no seams or crevices for bacteria to hide. Use of a co-molding process produces a flexible rubber blade with a reinforced head for added hygiene and durability. In addition, the entire squeegee is color-coded to aid in your efforts of due diligence. From Vikan®, hygienic and efficient cleaning.
