Catalog Also Available on CD

Available—156 Pages

RF Connector Catalog

You will find an extensive listing of Coaxial Connectors, Adapters, Tools, Accessories and Adapter Kits.

ALSO AVAILABLE ARE CROSS REFERENCES TO OTHER MANUFACTURERS.

IN THE RF CONNECTOR CATALOG you will find literally thousands of connectors from which to choose, but the number is still growing. As new items are added to our line, a posting will be made to our website. Visit our website for an updated selection of coaxial connectors, adapters and cable assemblies at your fingertips.

Visit us often at: www.rfindustries.com

Table of Contents

How This Catalog Is Organized and How to Use It

The Table of Contents leads off with *Accessories* such as kits and tools. For your convenience, a *Reference* section follows the Accessories section. Here you will find information such as *Terms and Conditions*, *Value Added Services* and *Standard Specifications*. Following the Reference section, you will find a section of *Newly Released* items. And finally, after the Newly Released section is a complete detailed listing of all the cable assemblies that are offered. This final section is called *Assemblies in Detail*.

Example:

If you are looking for a *75 Ohm BNC Female Bulkhead to a 75 Ohm BNC Male*, scan the Table of Contents looking for the major heading **75 OHM**. Once you find this major heading, look for the subheading

75 Ohm BNC Female Bulkhead or 75 Ohm BNC Male. (For your convenience, we have listed both choices as subheadings.) Once you have found your desired subheading, search the listing under the subheading looking for the opposite end. In other words, if you are under the 75 Ohm BNC Female Bulkhead subheading, scan down the listing for the 75 Ohm BNC Male or vice versa. Once you have identified the desired assembly, go to the page listed and find the subheading (75 Ohm BNC Female Bulkhead to 75 Ohm BNC Male or 75 Ohm BNC Male to 75 Ohm BNC Female Bulkhead), remembering that it can be listed either way on that page. Under the subheading you will find the cable types offered with this configuration along with their corresponding part numbers. Simply add the length in inches to the part number that you require and you are ready to place your order.

ACCESSORIES

Unidapt™ Kits and Accessories.....	8-9
Biomedical Interconnect Products.....	10-11
Low Loss Cable Assemblies	11
Kroy® Bar Code and Label Printers.....	12-13
Tools for Every Technician.....	128
Coaxial Connector Kits.....	Back cover

REFERENCE

Value-Added Services.....	14-17

Universal Possibilities!

Manufactured in a certified ISO 9002 facility

Our Universal Adapter is the Key

PT-4000-013
Universal
Adapter

Each UNIDAPT™ fitting has a common connector end and a universal adapter end. Simply choose the two common connector ends you need, and screw them together with the universal adapter. It's so easy. That's why technicians love it!

Our ingenious adapter kits let you mix and match any 2 male or female coaxial fittings. Build the perfect adapter or cable assembly for the job — male to male, male to female, or female to female.

All UNIDAPT™ sections are made of silver plated machined brass with a gold-plated phosphor bronze contact anchored in a Teflon® dielectric.

UNIDAPT™ Kit RFA-4024

Create any inter-series or intra-series adapter you need.

This 30-piece UNIDAPT™ Kit contains:
6 Universal Adapters, 2 BNC Males,
2 BNC Females, 2 N Males, 2 N Females,
2 SMA Males, 2 SMA Females,
2 TNC Males, 2 TNC Females,
2 UHF Males, 2 UHF Females,
2 Mini-UHF Males, 2 Mini-UHF Females

UNIDAPT™ Options, Accessories (All Pieces complement our UNIDAPT™ Kits)

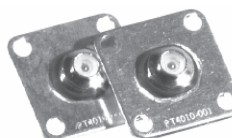

New UNIDAPT™ 5 and 10 Watt Attenuators are available in 3, 10, 20 and 30 dB versions. UNIDAPT™ 10 watt attenuators with heat sinks are also available in 3, 10, 20 and 30 dB versions. They are all rated to be used at frequencies from DC to 4 GHz.

With Heat Sink
RFA-4044-03-10W
RFA-4044-10-10W
RFA-4044-20-10W
RFA-4044-30-10W

Without Heat Sink
RFA-4043-03-5W
RFA-4043-10-5W
RFA-4043-20-5W
RFA-4043-30-5W

UNIDAPT™ flange adapters are available for both Bird and Telewave wattmeters, which convert them for use with the UNIDAPT™ system. Also for test bench use is the RF sampler and injector accessory. It is available with or without N male and N female adapters.

RFA-4045-A For Bird 43, 4304A, 4431, 4521 contains 2 PT-4010-001 UNIDAPT™ flange connectors.

RFA-4046-A For Telewave 44A, 44AP, 44L1, 44LLP contains 2 PT-4010-002 UNIDAPT™ flange connectors.

UNIDAPT™ male crimp and bulkhead connectors can be used to create your own test fixtures ready for UNIDAPT™ use.

PT-4010-030
Male Crimp
(RG-58A/U)

PT-4010-062
Male Bulkhead
Solder

RFA-4047 — Includes two PT-4010-001 (UNIDAPT™ Flange Connectors), two PT-4000-009 (N-Female UNIDAPT™), and two PT-4000-007 (UHF Female UNIDAPT™).

RFA-4048 — Includes two PT-4010-002 (UNIDAPT™ Flange Connectors), two PT-4000-009 (N-Female UNIDAPT™), and two PT-4000-007 (UHF Female UNIDAPT™).

Create custom adapters and cable assemblies in seconds!

PT-4000-026
R/A Adapter

PT-4000-027
T Adapter

Right angle and "T" adapters can be used with all female UNIDAPT™ adapters. The **RFA-4025** upgrade kit includes the Right Angle (**PT-4000-026**) and the T Adapter (**PT-4000-027**).

PT-4010-021 **PT-4010-020**

RFA-4059-A1

The UNIDAPT™ RF sampler and injector uses any fitting in our UNIDAPT™ kits. It allows a technician to either sample RF power in transmit or to inject signal on receive without affecting the antenna circuit. Simply insert between the antenna or dummy load. An adjustable BNC female port allows a 20-80 dB attenuated signal up to 3 GHz to the test measurement unit. It can also be left permanently in the antenna circuit for RF power failure monitoring purposes.

RFA-4059-A — (Motorola S8B80313B37) includes sampler with N male (PT-4000-003) and N female (PT-4000-009) connectors.

RFA-4059-A1 — Sampler without N connectors.

UNIDAPT™ RFA-4023-01 Kit

This 43-piece kit contains: all the connectors found in our 30-piece UNIDAPT™ Kit, plus 2 RCA Males, 2 RCA Female Phono Jacks, 2 F Males, 2 F Females, 1 Male to Double Banana Plug, 1 Male to Double Binding Post, 1 Female R/A Adapter, 1 Female T Adapter, 1 RF Sampler.

PT-4000-014
RCA Male

PT-4000-015
RCA Female

PT-4000-016
F Female

PT-4000-017
F Male

Additional fittings found in the RFA-4023-01

Our UNICABLE™ Kits provide an ideal way to create any test cable needed. Along with the **UNIDAPT™ Kit**, you can now mix and match any combination of connectors or adapters to the ends of double shield RG-58A/U cable terminated with PT-4010-030 (shown on previous page) on each end.

RFA-4040 — Our six-piece set essential for shop or lab use. It includes six 48" cables and a **FREE WIRE RACK** (RFW-1999), designed for storage convenience.

RFA-4041 — UNICABLE™ Kit (without rack) is a three-piece package with 48" cable, ideal for the field technician.

RFA-4070-36 — One 36" double shield RG-58A/U cable with two PT-4010-30 connectors attached

RFA-4070-48 — same as above, 48"

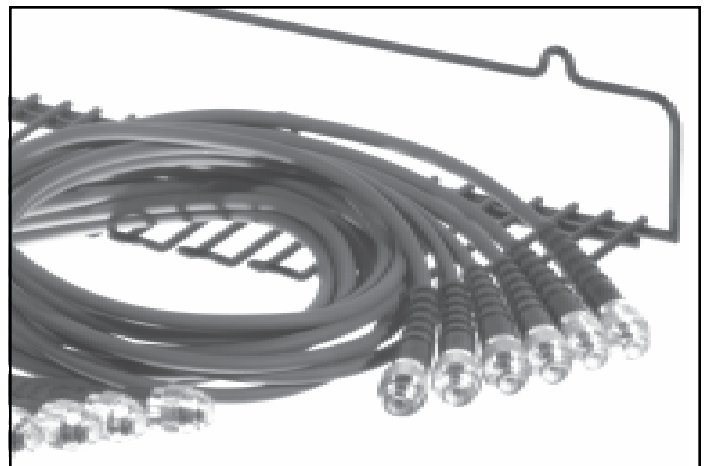

RFA-4070-72 — same as above, 72"

Frequency range — (DC to 1 GHz)
Impedance — 50 ohms, ± 2 ohms

PT-4000-150

The PT-4000-150 female-to-female barrel adapter allows UNICABLES™ to be joined to make longer jumpers.

Biomedical Interconnect Products

Specializing in the custom insert molding of Biomedical Interconnect Products

WE ARE PROUD TO OFFER American made products that provide unequalled quality, delivery, and competitive pricing. Complete product design, mold design, and mold fabrication are readily available. Virtually every major manufacturer of ECG (EKG) monitoring devices and accessories has at one time purchased and sold interconnect products developed by one member or another of our design team. If the product you are looking for connects an individual to a machine for the purpose of monitoring vital signs, our staff makes it or has made it. Products include, but are not limited to: ECG snap leads, ECG patient cables, resting ECG cables, apnea cables and leads, DIN safety systems, and pressure monitoring products.

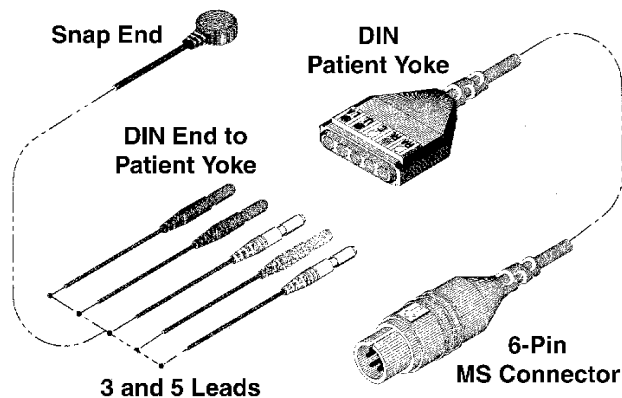

Illustration of Bioconnect design capabilities

Product Line

AAMI standard ECG patient cables, 3 and 5 lead, DIN safety snap leads

We are developing a comprehensive line of patient monitoring interconnect accessories. This new product line will utilize the latest in material and mold technology. Anticipated products include: patient monitoring cables, patient cables, ECG cables, patient leads, snap leads, connecting wires, AAMI cable, safety leads, DINs, .080" socket, diagnostic cable systems, resting ECG, stress test cables and systems.

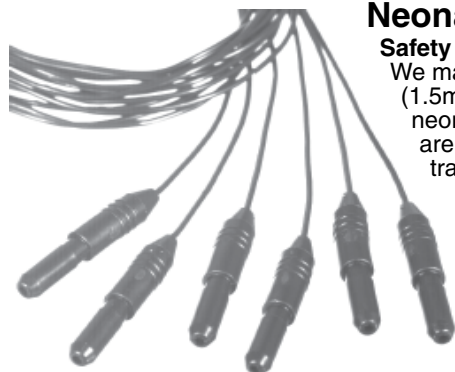

Mini-DIN Right-Angle Assembly

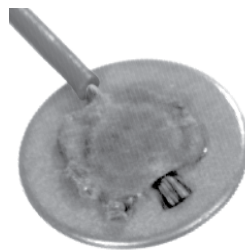

Neonatal

Safety leads for pre-wired electrodes

We manufacture molded safety leads, both DIN (1.5mm) and .080 inch socket, for creating pre-wired neonatal monitoring electrodes. These products are available with copper or carbon fiber radio translucent conductors.

Molded Safety Leads

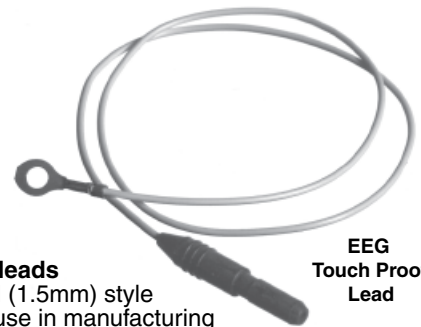

Weld of copper wire to plastic electrode.
(Shown at 300% size)

EEG

Molded touch proof leads

We make molded DIN (1.5mm) style touch proof leads for use in manufacturing reusable EEG electrodes for several wire types.

EEG Touch Proof Lead

Design Services

Tool design, mold design and product design are just a few of the many services we offer to the medical device industry.

Insert Molder

Insert molding is one of the many specialty services offered to the medical device manufacturer. In addition to insert molding, we provide complete assembly, design, tooling, and all aspects of providing a completed product built not only to your specifications, but to all GMP requirements.

Ultrasonic Welding

One of the many specialty services offered to the medical device manufacturer.

Custom Manufacturing

We manufacture custom insert molded parts and cable assemblies for medical applications.

Molded Circular DIN Cable
Available in 3, 5, and 6 pin versions, DIN Connector features an inner molding of polyethylene, outer molding of PVC, and a barrel molded of Valox. This product is ideal for a disposable device such as a thermistor assembly.

Dental Implant Insertion Tool
A titanium element is insert molded into a nylon body. The process of insert molding was selected over assembling the two parts with a press fit, due to the structural strength requirements of its intended application.

Molded Mini DIN Cable and Connector
This product is used as an incubator temperature probe. Cable can be terminated with a reusable thermistor or a proprietary connector to mate with a disposable thermistor assembly.

Yoke Assembly
This custom molded cable is used on specific medical devices.

Low Loss Cable Assemblies

TODAY'S WIRELESS COMMUNICATIONS EXPLOSION has fueled customer demand for coaxial cables required to perform better than standard coaxial cables in the demanding environments of land mobile radio, wireless network and antenna base station systems. These new RF cables exhibit low VSWR, low loss, high velocity of propagation, improved shielding, and phase stability over temperature and flexing. Land mobile radio type cables perform with losses comparable to corrugated-copper cables at lower costs giving you high performance at economical prices.

In order to offer the optimal choices to our customers, we have included the low loss cable series of Belden [7805, 7806A, 7807A, 7808A & 7810A], CommScope [WBC-100, WBC-196, WBC-200, WBC-240, WBC-400 & WBC-600] and Times Microwave [LMR-100A, LMR-195, LMR-200, LMR-240, LMR-240UF, LMR-400, LMR-400UF, LMR-600 & LMR-600UF] in our standard cable assembly offerings. All connector configurations available for flexible coaxial cables in this catalog are also available in low loss versions using cables from these three manufacturers. Custom assemblies can be fabricated to your specifications. See our customization and value-added pages for more information.

KROY® Portable Bar Code & Label Printers

The most advanced on-site, point-of-application bar code and labeling system

MIX & MATCH CARTRIDGE SUPPLY Fits K2500 & K3000-PC!

K3000-PC Desktop Printer Features

The Kroy K3000-PC desktop companion label printer solves all of your labeling needs with the click of a mouse.

K3000-PC prints on a wide variety of supplies including:

- Self-Laminating Wire Wrap
- Shrink Tube
- Industrial Labels

The easy cartridge based system offers failure-proof loading and ultimate versatility at your desk.

K3000-PC offers versatile connectivity.

- Connects to your personal computer
- Small footprint
- Label Design Software included to print logos, bar codes and data
- 25 resident bar codes within the software
- Plug and play with Windows 95, 98, 2000 and NT 4.0 drivers
- Prints labels up to 14" in length at 300 dpi
- Sequential printing capabilities

K2500 Portable Label Printer Features

The Kroy K2500 is the most advanced portable label printer for the toughest of labeling challenges.

K2500 prints on a wide variety of supplies including:

- Self-Laminating Wire Wrap
- Shrink Tube
- Industrial Labels

The easy cartridge based system offers failure-proof loading and ultimate versatility on the job.

K2500 offers built-in flexibility.

- Battery operated or AC adapter
- Real time clock with time/date stamping capability
- 10 resident bar codes
- Prompts 11 different languages
- Prints up to six lines of text from 6-72 pt at 203 dpi
- Sequential printing capabilities

K3000-PC Printer & Accessories

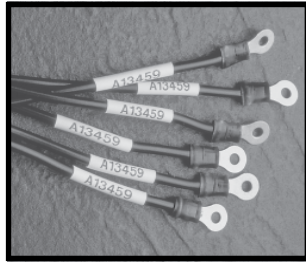

Part #	Description
RFA-2554400	K3000-PC Printer Including: AC adapter, serial cable, KLDS software with printer drivers
RFA-2558800	Serial Cable
RFA-2556600	AC Adapter (120V)
RFA-2559000	Thermal Printhead Cleaning Kit (25 pack)

K2500 Printer & Accessories

RFA-2504210	K2500 Printer Kit Including: (6) NiCd batteries and charger
RFA-2435100	AC Adapter (120V)
RFA-2449300	(6) Standard NiCd Batteries
RFA-2506600	Serial Cable
RFA-2559000	Thermal Printhead Cleaning Kit (25 pack)
RFA-2447100	Carrying Case

Shrink Tube

Kroy offers premium polyolefin tubing and black thermal transfer ribbon in a cartridge.

- Low recovery temperature of 194°F with indefinite storage.
- Shrink ratio 3:1.
- Operating temperature range of -40° to 275°F (135°C) with up to 392°F for short duration.
- All tubing is flame resistant; temperature, chemical, water and abrasion resistant.
- Meets MIL-1-23053/5 Class 1 and 3, MIL-1 R 46846 Type V and UL-224 VW-1 rating. Call for details.
- Cartridge length 110" (2.8m)

Cartridge Supply ~ Shrink Tube

*Inside diameter dimension

Industrial Labels ~ Cast Vinyl

Kroy offers cast vinyl labels especially for your curved interior or exterior industrial needs:

- 2.0 mil pressure sensitive vinyl featuring thermal transfer resin ribbon.
- Up to 10 year exterior life: chemical, water, UV and abrasion resistant.
- Operating temperature range of 50° to 180°F (82°C).
- Excellent conformability to curved or irregular surfaces.
- Cartridge length 40' (12.2m).

Cartridge Supply ~ Cast Vinyl

More Sizes & Colors Available
Call Our Sales Department for Details

Self-Laminating Wire Wraps

Kroy offers a self-laminating translucent label to professionally mark wires and cables.

- Premium 4.0 mil translucent vinyl with a white printable area.
- Featuring black thermal transfer ribbon in each cartridge.
- Aggressive permanent adhesive.
- Ideal for exterior use or harsh environments: UV, chemical, water and abrasion resistant.

This method of marking, in most cases, meets EIA-TIA-606, BS EN ISO 60950, FAA AC 43.13A, building codes and other standards.

Cartridge Supply ~ Wire Wraps

Industrial Labels ~ Polyester

Kroy offers polyester labels for your interior or exterior industrial needs:

- 2.0 mil pressure sensitive polyester featuring thermal transfer resin ribbon.
- Up to 7 year exterior life: chemical, water, UV and abrasion resistant.
- Operating temperature range of -40° to 320°F (160°C).
- High performance label stock.
- Cartridge length 40' (12.2m).

Let Us Be Your Source for VALUE-ADDED SERVICES

Our goal is for each customer to have 100% SATISFACTION with every product you purchase from us.

WHETHER YOUR PROJECT is one piece, ten pieces, ten thousand pieces, or grows through all of those stages, it can be manufactured at one of our production facilities. Application specific design assistance and materials scheduling is available. We can also assist you with materials procurement for your assemblies and auxiliary components so that “safety stock” is always available for long-term production items.

Custom Assemblies

See following page.

Cable Cutting and Stripping

See page 16.

RF Testing

See page 17.

Insert Injection Molding

Complete product design, mold design and mold fabrication are available. Our skilled staff will work with you throughout the design and development phase of your application, then carry it through production to labeling and packaging. We can provide solutions to your most demanding applications in custom injection insert molding, even those requiring complex geometric shapes and component manufacturing.

Our production team can build your sub-assemblies for molding fabrication or mold around materials supplied to us. Our expertise in molding hybrid components of metal and plastic is an important value-added service for our OEM customers. Our production equipment is capable of molding a wide range of materials. All custom molds become your property for restricted private label use.

Ultrasonic Welding

This production method combines high productivity with attractive costing. Four different assembly techniques are used in our production facility to weld plastic; install metal inserts into plastic; stake unlike materials to plastic studs; and spot weld plastics.

Kitting

Pre-kitted shipments of assemblies and components can save you both time and money. As a value-added service we will build and package kitted items to your specification, providing all components, using customer supplied items, or any combination thereof. For field installations, kits can be provided with a combination of completed assemblies, cut and stripped cable and connectors ready for assembly, which will save time, labor and dollars.

Scheduled Orders

So that you can take advantage of J-I-T inventory management, we can schedule delivery of connectors, cable assemblies or kits to minimize your inventory holding times and warehousing space. Whenever possible, safety stock is maintained at our facility so we can respond quickly should you need to call your orders forward.

Custom Assemblies

TELL US YOUR NEEDS — YOU'LL GET RESULTS!

Need something special? Look no further!

If you do not find your desired cable assembly in our regularly stocked catalog items, we will build custom assemblies to fit your specific needs:

- Any connector
- Using any of our quality cable or cable of your choice
- To any length
- Packaged to your specifications

General notes

- Crimped connectors will be assembled with adhesive-lined heat shrink tubing unless otherwise specified.
- Standard color for strain relief and adhesive-lined heat shrink tubing is black unless otherwise specified.
- All coaxial cable meets MIL-C-17 specifications.
- All assemblies will be made without marking or labels unless specified prior to fabrication.

Delivered on time
Right the first time
Competitively priced

VALUE-ADDED SERVICES

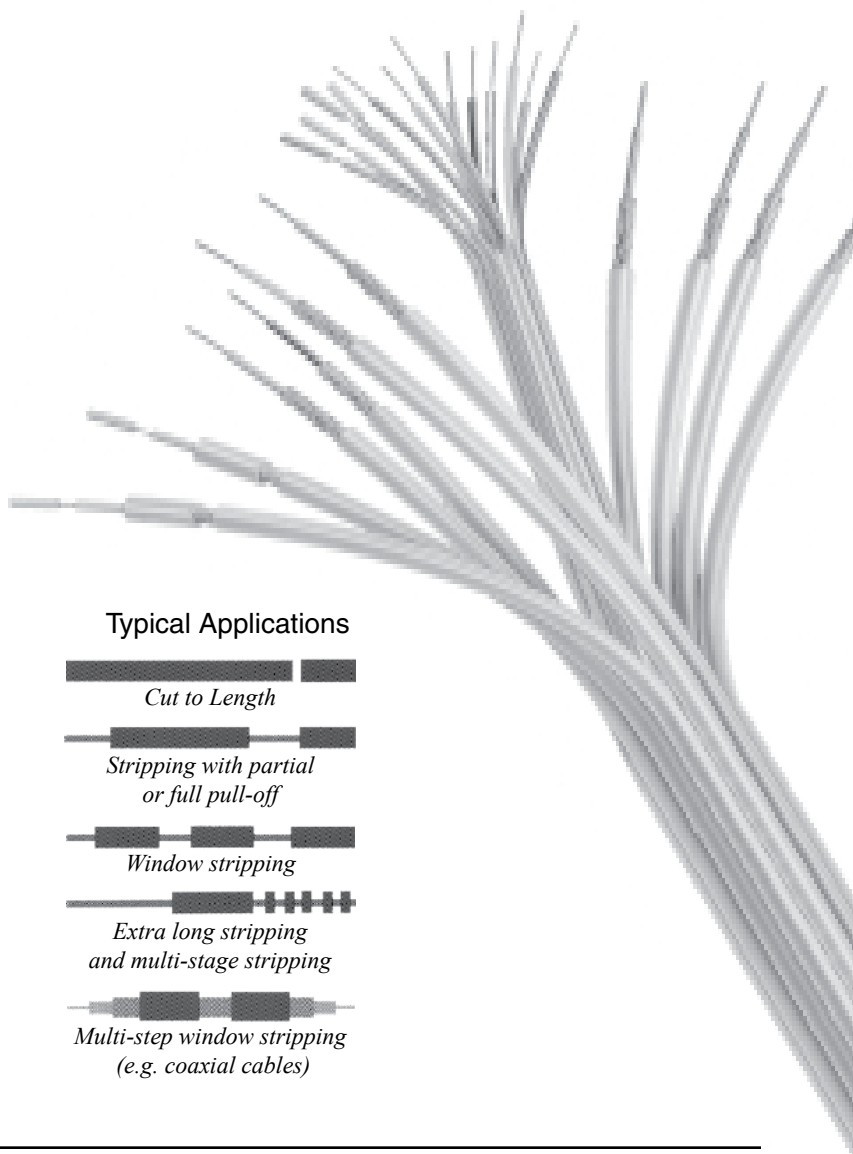

Coaxial Cable Cut and Stripped To Your Specifications

IN ADDITION to quality custom cable assemblies (see previous page), we will provide cable and wire, cut and stripped to your specifications.

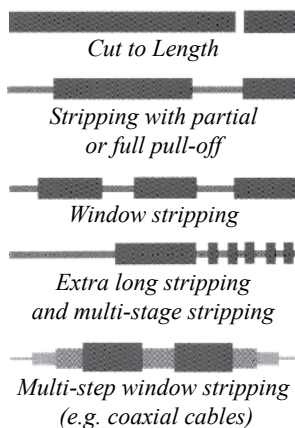

We can work with customer-supplied material or furnish processed cable directly (minimums may apply). We will cut and strip lengths from 2 inches to 3,280 feet of most cable having up to .410 inch in jacket diameter. Whether you are using RG-178/U or RG-8/U, we will process it quickly and accurately.

The cable center conductor size range for automated cutting and stripping is up to 4 AWG for most stranded center conductor cables and 10 AWG for solid copper center conductor cables. This encompasses the majority of coaxial cables now on the market.

Whether you require a simple single step strip or more than nine steps to meet your specifications, we will deliver precision stripping of one or both ends of your cable. Our digital equipment ensures that every cutting operation is consistent and accurate with a tolerance of $\pm .015$ inches [.381mm], whether we deliver fifty or fifty thousand pieces.

Typical Applications

Contact our Sales Department for quotations and delivery schedules.

Simply photocopy this page, fill out the form and fax or mail it to us. See catalog cover for contact information.

Let Us Quote Your Requirements

Please provide as much information below as possible. If you have already chosen your cable, please provide cable part number and attach specifications if available. Should you require more stripping steps than are indicated, please amend this diagram or attach a drawing or sketch of your specific requirements. If we are supplying cable to you, please indicate cable type, i.e., RG-58A/U, or attach cable specifications.

RF Testing

OUR QUALITY DEPARTMENT offers a variety of tests for connectors and cable assemblies as value-added services. Please contact us with your testing specifications and we will provide a quotation for services.

Electrical Testing

All assemblies are 100% tested electrically for continuity as standard procedure. For a nominal additional charge, measurements such as VSWR and Insertion Loss can be performed on 75 ohm BNC and F and 50 ohm BNC, N, SMA, TNC, 2.92, 3.5 and 7-16 DIN connector, adapter, attenuator, termination load and cable assembly interfaces. The testing range is 50 MHz to 40 GHz. Chart data is supplied for each test upon request.

Hi-Pot Testing

Hi-Pot testing to 2,500 volts per MIL-STD-202 M301 requirements is available for connectors, adapters and cable assemblies.

Pull/Tensile Testing

Coaxial cable assemblies can be pull tested to 150 pounds. (This is a destructive test and includes the cost of the destroyed sample assembly.)

Center Contact Retention Testing

Connectors can be tested for center contact retention per MIL-PRF-39012, p4.7.9.

Source Inspection Surcharge

A surcharge is placed upon all orders requiring source inspection (pending purchase order review). Inspection documents will be shipped with your order unless otherwise specified.

Standards

Our calibration system is traceable to the National Institute of Standards and Technology. Our Quality Assurance and Inspection system is certified to MIL-I-45208. Our connectors are manufactured in certified ISO-9001 facilities.

Terms and Conditions

WE OFFER A BROAD RANGE of standard coaxial cable assemblies using both flexible and semi-rigid cables. These standard assemblies are offered in the lengths of 12", 24", 36", 48", 60" and 72" jumpers. Our standard line is priced very competitively and can ship available stock within 24 business hours ARO.

Custom assemblies, custom kitting and value added services are available, fabricated to your specifications. For custom cable assembly guidelines, please refer to page 15. Contact your sales representative for pricing and availability.

Application specific design assistance is available. You may find, however, that a standard assembly listed in this catalog will quickly and economically meet your needs.

Delivery: In most cases stock items are shipped within 24 business hours and special assemblies using standard connectors are available within 72 business hours. Delivery for other custom assemblies will be determined at the time of formal quotation submittal.

Standards: Our calibration system is traceable to the National Institute of Standards and Technology. Our Quality Assurance and Inspection system is in accordance with MIL-I-45208 and follows ISO-9001 guidelines.

Shipping: UPS is our standard carrier. For Federal Express or other carriers please indicate your requirements at the time you issue your purchase order.

FOB: All shipments are FOB from shipping location.

Electrical Testing: All assemblies are 100% tested for continuity/open/short as standard procedure.

RF Testing: VSWR (return loss) and insertion loss can be provided for an additional cost.

Source Inspection Surcharge: A surcharge is placed upon all orders requiring source inspection (pending purchase order review).

Disclaimer: We reserve the right to make, without notice, modifications to the products offered in this catalog if the modifications do not materially effect performance. We reserve the right to upgrade the plating, as substitution, without notice. No such modification will affect the overall quality and performance of the standard assembly.

We reserve the right to withdraw from sale, without notice, any items described in our catalog.

Repairs and Returns:

- Our goal is 100% satisfaction with every product you purchase from us.
- When returning items, you must contact us for shipping instructions and an RMA number. This number must be on the outside of each shipping carton.
- Standard items, which are returned, are subject to a restocking fee.
- Custom cable assemblies are neither returnable nor refundable. Prior to fabrication, all custom work requires signed design approval and acceptance. **The company guarantees these assemblies will meet or exceed your specifications.**

General notes: Cable assemblies will be measured end to end, with a tolerance of +2 –0 inches. Unless otherwise specified, connectors used within standard line assemblies will have 50 Ohm impedance and are crimp style. Crimped connectors will be assembled with strain relief or adhesive-lined heat shrink tubing unless otherwise specified. Strain reliefs over adhesive-lined heat shrink tubing are offered on RG-58 only. Other flexible cables have adhesive lined heat shrink tubing. Images in this catalog with strain relief depict RG-58 only. Standard color for strain reliefs and heat shrink tubing is black unless otherwise specified.

Standard Specifications

Standard Lengths

Standard assembly lengths are 12", 24", 36", 48", 60", and 72".

Tolerance

Cable assemblies will be measured end to end, with a tolerance of +2 -0 inches.

Impedance

Unless otherwise specified, connectors used on standard cable assemblies have a nominal 50 or 75 Ohm impedance.

Strain Reliefs and Heat Shrinks

Crimped connectors will be assembled with strain relief or heat shrink tubing unless otherwise specified. Strain reliefs are offered on RG-58 only. Other flexible cables have adhesive lined heat shrink tubing.

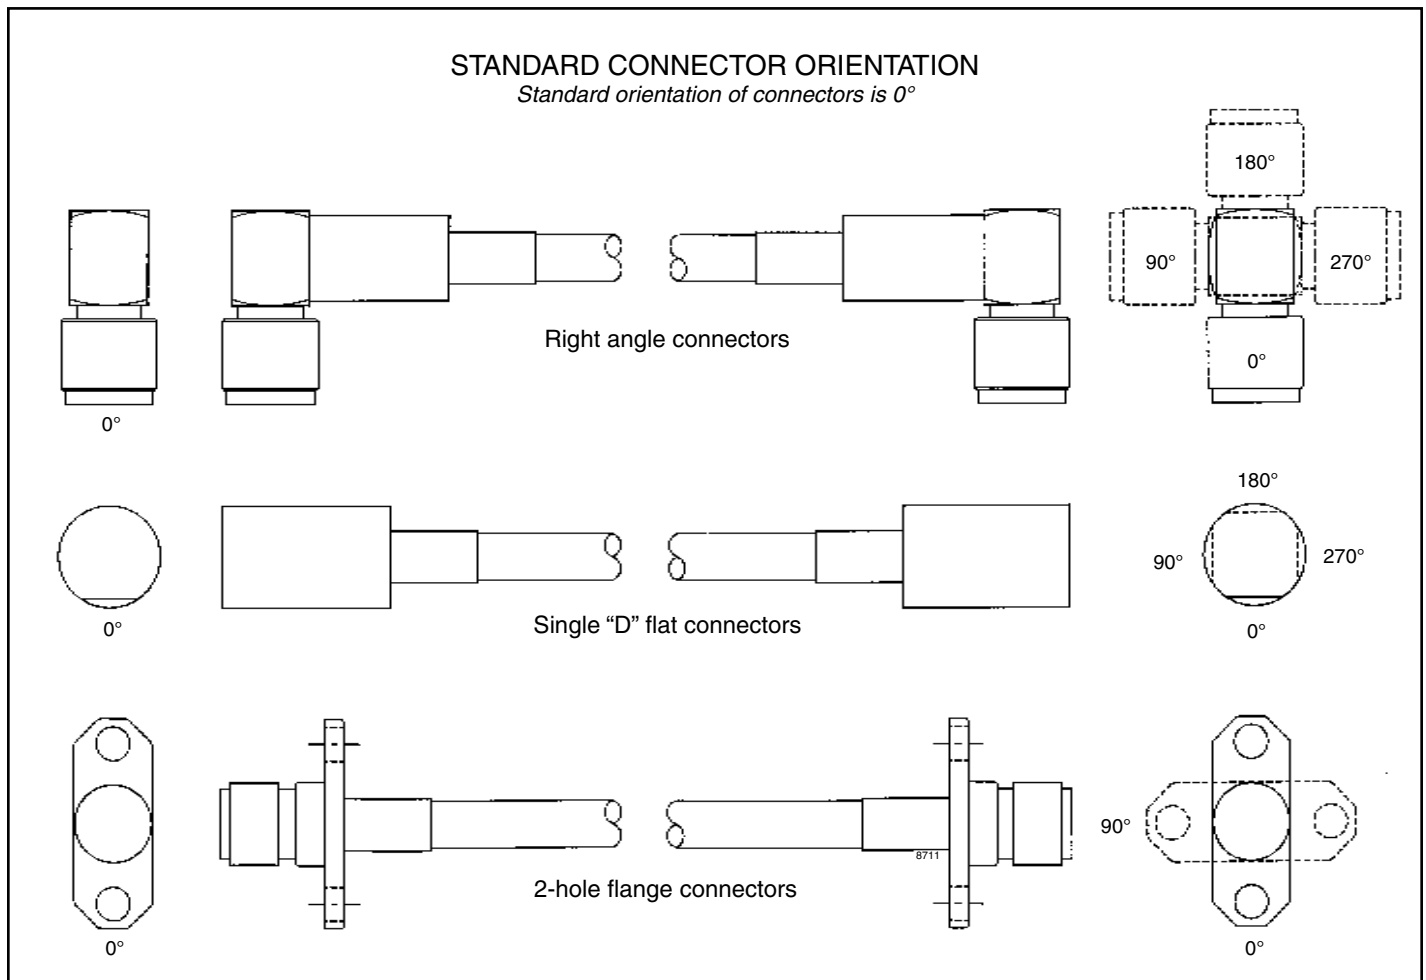

Color

Black is the standard color for strain relief and adhesive-lined heat shrink tubing unless otherwise specified.

Disclaimer

We reserve the right to make, without notice, modifications to the products offered in this catalog if the modifications do not materially effect performance. We reserve the right to upgrade the plating, as substitution, without notice. No such modification will affect the overall quality and performance of the standard assembly.

For additional information see [Terms and Conditions](#) on previous page.

75 Ohm Cable Assemblies

THE NEW DIGITAL WORLD REQUIRES 75 OHM CONNECTORS, ADAPTERS AND CABLE ASSEMBLIES. We have responded to this need by greatly expanding our 75 Ohm connector, adapter and cable assembly lines. Not only do we offer a variety of 75 Ohm BNC, SMB and Mini-SMB connectors, we also offer many standard cable assembly configurations, and build-to-order custom assemblies. If you have 75 Ohm connector or cable assembly requirements, please feel free to call any of our knowledgeable customer service personnel.

FCC Compliant Connectors and Cable Assemblies

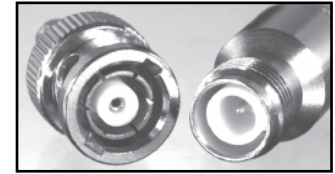

ACCORDING TO FCC REGULATIONS Part 15, under certain applications it is illegal to replace a stock antenna with one that provides higher gain. The FCC has issued an edict calling for a unique connector, thereby prohibiting the attachment of any other connector type. Some examples of compliance to this regulation are:

- Reverse Polarity/Reverse Gender
- Reverse Threads
- Non-Standard Threads
- Non-Standard Shells

We offer not only these unique connectors but also a variety of cable assemblies incorporating these connectors. The cable assemblies are available in standard as well as special order lengths.

If you have any additional requirements falling under Regulation 15 which meet our minimum quantity requirements, our design engineering and production team can provide custom connectors made to your specifications.

Reverse Polarity / Reverse Gender connectors satisfy FCC Regulation 15 by switching dielectrics and pins/contacts between genders. For example, a Reverse Gender Male consists of a male body, however, the dielectric and contact are female.

Reverse Polarity BNC male and Reverse Polarity TNC female

Reverse Polarity connectors and adapters will not mate with standard coaxial connectors. To attempt to do so will damage the connector.

Reverse Thread configurations use left-hand threads rather than the Standard Unified Screw Thread.

The **Non-Standard Threads/Shells** category incorporates two methods of modifications: extended metric threads and modified shells. The metric threads on the TNCs are incorporated on both females and males preventing interface with regular connectors. Because female metric threads are elongated, interface with a quick-disconnect male connector is prevented.

REVERSE POLARITY

Fiber Optic Patch Cords

FIBER OPTIC CABLE AND PATCH CORDS are growing increasingly popular as the medium of choice for digital VCR, DVD CATV, audio, game, hub, computer and telecommunications applications.

- Patch cords are 100% tested and manufactured in a controlled factory environment to maximize performance and reliability.
- Patch cords are terminated with connectors that are designed to be compatible with industry standards: EIA/TIA 455 (FOCIS-n), IEC 61754-13-1, ANSI, JIS C-5970, NTT, Telcordia-GR-20-CORE, Telcordia-GR-326-CORE, Telcordia-GR-409-CORE.
- Patch cords are assembled with zirconia ferrule connectors with Single-Mode fiber or Multi-Mode fiber.
- Patch cords are available in simplex and duplex styles in single-mode and multi-mode with FC, LC, MTRJ, SC and ST terminations.
- Custom lengths are available on special order.

Our Quality and Engineering staff are Registered Certified Fiber Optic Technicians and Installers by the Fiber Optic Association. We have completed in-depth written examinations on Fiber Optic Theory and Terminology and have demonstrated hands-on ability in cable handling, connectorization, splicing, testing and troubleshooting.

Customer-Terminated

Pigtail Assemblies

THERE ARE TIMES AND APPLICATIONS where an assembly needs to be run through panel enclosures or threaded through tight spaces. Having one end open allows installation of the cable itself followed by termination after placement.

When you know one end of the assembly, but are not sure of your length or which connector you need at the other end, our extensive line of pigtail assemblies should meet your requirements. One end is terminated as shown, but the other end is blunt-cut, ready to be stripped and terminated with a connector of your choice.

To determine your cable assembly part number, simply replace the XX at the end of the number shown with the length in inches you require. The cost of your assembly will then be quoted based upon that length. Overall tolerance is +2"-0, from end to end.

Tools For Every Technician

Crimping Tool and Die Kits

RFA-4005

RFA-4005 is supplied with one RFA-4005-20 crimping tool frame and two die sets, the RFA-4005-01 and the RFA-4005-02, all contained in a durable, padded, self-storage case.

RFA-4005-100 has one RFA-4005-20 crimp tool and one RFA-4005-01 die, packaged in a blue, durable, padded storage case.

RFA-4005-200 includes one RFA-4005-20 crimp tool and one RFA-4005-02 die, packaged in a blue, durable, padded storage case.

RFA-4005-300 contains 1 crimping tool frame plus the RFA-4000-02 die set packaged in a cardboard box (not shown).

RFA-4005-400 contains 1 crimping tool frame plus the RFA-4000-01 die set packaged in a cardboard box (not shown).

RFA-4006, the Deluxe Kit, is supplied with two crimping tool frames and the same two unique die sets found in the RFA-4005.

Crimp Handle — RFA-4005-20

The RFA-4005-20 crimp handle is precision manufactured of high-carbon, heat-treated, stamped steel and designed for smooth and rapid die closure. A simple pressure adjustment resets the scissors

ratchet mechanism to compensate for different crimp dies and crimp forces. When the correct die is used, the full cycle ratchet will not release until a clean and tight crimp is achieved. Should a mismatch occur, the disengagement lever quickly releases the ratchet mechanism.

Heavy Duty Crimp Handle and Die

- Professional steel ratcheting crimp tool
- Precision crimping
- Interchangeable dies

RFA-4009-01 — die for crimping the ferrules of .6 inch diameter cable connectors

The RFA-4009-20 is a piston-type crimper that offers considerably more compression when installing larger ferrules. The smooth ratcheting mechanism will not release until the ferrule is completely crimped. This tool will accommodate the popular low loss .6" diameter cable.

Miniature Pin Crimping Tool — RFA-4089

Many of the newer subminiature cable connectors are using center conductor pins smaller than .042" and therefore outside the range of most crimping die sets. If you are having trouble crimping such pins, the RFA-4089 is your perfect answer. This tool will crimp pins with an O.D. between .029" and .040". The crimping action is quite different from the normal hex die set and allows one tool to crimp different sized pins. The 4-point crimp position provides a secure cable to contact junction.

For Coax and D-Subminiature Crimp Pins

Standard Die Sets

RFA-4005-01 and RFA-4005-02

All dies are **precision diecast**, not pressed, powdered metal. Change crimp dies with ease, using either a Phillips or standard screwdriver.

The RFA-4005-01 die set is used to crimp RG-58/U, RG-59/U, RG-142/U, RG-223/U, RG-400/U, RG-8X, Proflex and various video cables, cavity dimensions: .052", .068", .100", .213" and .255".

The .052" cavity is unique and is used to crimp the center pins of the RFU-600-1 or AMP's 2266-001.

The RFA-4005-02 die set is used to crimp RG-8/U, RG-213/U, RG-214/U, and Belden 9913 cables, cavity dimensions: .100", .128" & .429". The .128" cavity crimps the center pin on Belden 9913 cable. This is the only die set with a .128" cavity for 9913 pins.

Optional Die Sets

RFA-4005-04 — .239", .068", .319", for RG-58/U, RG-59/U, RG-62/U and Cambridge Connectors Series CP-88 & CP-89

RFA-4005-05 — .160", .184", .215

RFA-4005-06 — .255", .324", .350" for RG-59/U, RG-6/U, and F-Type (CATV) Coax Connectors

RFA-4005-07 — .213", .184", .068", .042", for RG-58/U, RG-174/U Coax Connectors (RFI Cable Groups B and C)

RFA-4005-08 — .315", .255", .068", .042", for RG-59/U and Belden 8281 Coax Cable (RFI Cable Groups D and G)

RFA-4005-09 — .178", .130", .068", for RG-174/U, RG-188/U, RG-316/U and Mini 59/U Coax Connectors (RFI Cable Group B)

RFA-4005-10 — .080", .100", .429" for RG-8/U, RG-11/U and RG-213/U (RFI Cable Group E)

Q.

...Need a cross reference to other manufacturers' connectors, cable assemblies, connector to cable?
