Spider® Shelving System

The Rousseau Advantages

Assembly is simple: shelves are installed on the posts using 4 compression clips, in 14 gauge steel. This makes for easy and fast adjustments.

Mini-Racking integrated into your shelving optimizes your storage possibilities.

A unique and super functional post. The common post is the cornerstone of the structure. Its unique T-shape offers up to 7 fixing zones for different applications. Plus, its hollow center makes for installations without interference.

The steel beams are designed for several types of decking : wood, steel and wire. Two types of beams are available, depending on the load capacity and dimensions required. Load capacity can reach 1925 lb.

Each component is designed to offer you an easy-to-use product.

NOTE

The unique shape of the Spider® post is a Rousseau Metal Inc. trademark.
