

Sealed Air is proud to introduce a loose fill product made from non-food renewable materials* that combines performance and efficiency at a competitive price.

Performance

PakNatural™ material provides cushioning protection equal to EPS without the static cling. Independent tests demonstrate superior performance in keeping products from migrating inside the shipping box throughout distribution.

PakNatural™ fill offers equal protection and low dust generation throughout the shipping cycle. Additionally, PakNatural™ fill reduces storage issues, as it has shown better humidity resistance than starch.

Efficiency

With performance superior to starch based products in resisting settling, PakNatural™ material offers superior void fill efficiency.

PakNatural™ fill performs competitively and is priced competitively – customers need to stock only one material.
