SAFETY

Whether accidents are major or minor, they increase your costs significantly. Accidents result in damaged equipment and merchandise, injured employees, lost time and lower morale. See-All mirrors provide a wide angle that permits a view around obstructions.

SHOPLIFTING

See-All convex mirrors inhibit would-be shoplifters. In addition, they give employees a sharp-image view of an entire store area. Valued as the greatest deterrent to theft, See-All is used and acclaimed by leading retailers.

INDUSTRY

See-All mirrors assist in monitoring conveyor lines, automatic packaging, and quality control. They help prevent collision of lift trucks or other vehicles, and reduce inventory pilferage.

GUARANTEED QUALITY

Expertly engineered, sturdy construction and attractive design. Curves are precision engineered to eliminate distortion. Placed in effective locations, See-All mirrors assure excellent peripheral vision for a wide range of uses. Available in a full array of sizes and styles to meet every requirement. Adjustable mountings included.

ABS PLASTIC

A great blend of durability, impact resistance and weatherability. This backing is lightweight, easy to install and comes with a vinyl-coated aluminum edge which makes it completely weatherproof. Available on outdoor acrylic mirrors.

PANARAMIC[®]

DOMES PROTECTION MIRRORS

— FULL DOME —

— HALF DOME —

— QUARTER DOME —

New Plexiglas and Steel Dome Mirrors provide collision prevention and surveillance in hospitals, clinics, rest homes, medical facilities, industrial warehouses, retail and commercial facilities.

All steel domes are designed for use in high hazard areas.

www.seeall.com

PANARAMIC®

A MAJOR ADVANCE IN BETTER VISIBILITY

One large dome mirror does the work of at least two conventional mirrors. Eliminates blind intersections, increasing safety and security.

Two new dimensions in Safety and Security

Plexiglas and new steel dome mirrors provide collision prevention and surveillance in hospitals, clinics, rest homes, industrial warehouses, retail and commercial facilities.

Panaramic views allow personnel and others to move safely through intersections and corridors. Panaramic also provides overhead surveillance. Safety engineers specify panaramic views for industrial applications.

T-BAR Panaramic is designed for use in drop ceilings where the ultimate in visibility is required.

Plexiglas Panaramics are made of virtually unbreakable lightweight acrylic with a super-bright image that will not fade with time.

Steel Panaramics | Mr. Steely is perfect for indoor and outdoor use in high hazard areas such as steel processing plants and mining. Mr. Steely is resistant to heat, abrasives and can be suspended from ceiling or mounted flush against a wall. This special mirror can be cleaned easily. Great for the food service industry.

Assure safe passage through corridors. Choose from three easy-to-install styles

Full-Dome (360°)
Half-Dome (180°)
Quarter-Dome (90°)

4-Way
T-Way
L-Way

Full Dome
Suspends from ceiling
360° viewing angle

Half Dome
Hangs from wall
180° viewing angle

Quarter Dome
Hangs from wall corner
90° viewing angle

Be Ready Be Prepared Be **SAFE**

SEE-ALL inspection mirrors are excellent tools for searching under vehicles, machines and storage tanks. They simplify sweep searches underneath seats, counters, and other storage spaces. This becomes a necessity when searching for possible weapons, explosives, narcotics or other contraband. Easily safeguard stadiums, churches, auditoriums, airports, planes, movie theaters, offices, nightclubs, train stations and restaurants.

- The handy ergonomic mirror is easy to hold and use effectively. It hangs from your hand at the perfect angle, counterbalanced for long term use, with little or no fatigue.
- Protect the entrances to all secured areas by using **SEE-ALL** portable inspection mirrors.
- It is imperative to check under vehicles going into secured areas, such as military posts and government buildings.
- Whether they are used with a bomb squad, a drug search unit, or at a customs checkpoint; our mirrors do the job to help reveal contraband.

All mirrors come with an adjustable ball and swivel.

Wheels allow for effortless, precise maneuvering.

The deluxe model includes a mounted flashlight.

Handheld Inspection Mirrors

- Slip resistant PVC finger-grip handle
- Ergonomic chrome arm:
Adjustable - 25 in. to 30 in.
- Glass or acrylic convex mirror with a metal backer and ball swivel mount
- Flat mirrors available
- Lightweight, for easy handling

Model	Description
SUC-8C	8 in. round convex glass mirror
SUC-6C	6 in. round convex glass mirror
SUC-PLX8C	8 in. round convex acrylic mirror

Inspection Mirrors with **Wheels**

- Convex mirror gives a wide-angle view to scan large areas quickly
- Flat mirror gives a more precise view and accurate depth perception
- Deluxe model mirror is heavy duty and can be used indoors or outdoors
- Standard model is for light duty and used for indoor purposes
- Adjustable handles:
30 in. to 50 in.
- Wheels add effortless maneuvering
- Includes flashlight:
Deluxe models
