PTC[®]
FALL PROTECTION

How To Order

Leading distributors throughout the world stock and sell RTC® products. For information on your nearest RTC® distributor, write RTC® Manufacturing Company, One Sellstrom Drive, Palatine, Illinois 60067 USA or call 1.800.323.7402 (within the United States), 847.358.2000 or fax 847.358.8564. Additional product information at www.fallprotection.com.

ANSI and OSHA

The American National Standards Institute (ANSI) and the Occupational Safety and Health Act (OSHA) are currently the two standards organizations with the greatest presence in American industrial safety society. RTC® products, with such exception as noted, are developed and tested to meet these two standards. However, these are not the only standards in the industry. RTC® works diligently to keep abreast of all of the standards released by these organizations. Needless to say, many standards are subject to change without notice.

Job Protection Product Chart

While this chart provides general recommendations as to which Sellstrom® or RTC® product types are to be used for eye, ear, face, head and respiratory protection, it should be used as a general guide only and not a mandatory prescription. Each application should always be considered on its own merits since there are usually many variables that must be taken into account. In general, however, this chart follows the recommendations of the American National Standards Institute.

Introducing RTC®

The Widest Span of Fall Protection!

RTC® was founded in 1972 and is one of the foremost companies in fall protection. Since its earliest days, RTC® (Research and Trading Corporation) has been recognized as the "Technology Leader" in the industry. For more than 35 years, RTC® has provided both fall protection equipment and high quality turnkey custom solutions to the marketplace.

The founder of RTC® pioneered the concept of safety engineering in developing fall protection products and systems. Many current OSHA and ANSI standards came about from the work of RTC® in understanding the influence of mechanical forces on personal safety.

In 1996 RTC® was acquired by Sellstrom Manufacturing Company and relocated from Wilmington, Delaware to Palatine, Illinois in 1997. Sellstrom® has been a leading manufacturer of personal safety equipment for over 85 years.

For more information about RTC® fall arrest systems, call 1.800.323.7402 or your local RTC® representative or visit our website at www.fallprotection.com

- Adjustable back D-ring
- Chemical resistant polyester webbing
- Convenient inspection grid on label
- Separate serial number for each harness for tracking and record keeping
- Color coded shoulder and thigh straps
- Quick-connect buckles on leg straps
- Multiple adjustment points for best fit
- Available in cross-over or traditional vest style
- Available with adjustable front D-ring on non-slide pad
- Safe-T-Fold® stress indicator alerts the user when the harness has been stressed
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

Economy **Advantage™**

The **4400 Series Advantage™** harnesses are lightweight for all day comfort. These ergonomically designed full-body harnesses feature quick connect leg buckles and color coded shoulder and thigh straps for easy donning. The standard back D-ring is adjustable for the best fit and maximum comfort. Harnesses are made from durable chemical resistant polyester webbing for long life and easy maintenance. Convenient inspection grid on the label helps with compliance issues and makes record keeping easy.

Economy Advantage™

The **Advantage™ RoofRite® System** is the ideal fall protection means for sloped roof construction applications. The RoofRite® bracket attaches to sloped roofs at the peak of wood frame structures to provide a stable anchor point. The complete RoofRite® system includes: 1 roof bracket, mounting nails, 25' or 50' rope lifeline with double locking carabiner, Ropelok® with shock-absorbing lanyard, and full body harness. When installed properly, the RoofRite® system provides a 5,000 lb. single use anchorage.

- For fall arrest & fall restraint
- Rated for one worker with tools to 310 lb.
- Reduces swing fall hazards
- Available in 25' or 50' systems with single use or reusable roof bracket
- Quick installation
- Available with draw string kit bag in retail display box, or in convenient storage bucket with carrying handle
- Chemical resistant polyester harness, lanyard and lifeline
- Lightweight harness is comfortable and easy to use
- Separate serial number for each harness and Ropelok for tracking and record keeping
- Meets OSHA and ANSI standards

7000 Work Positioning Belts Series

7000-BLTM	Medium Work Positioning Belt with Padded Lumbar Support
7000-BLTL	Large Work Positioning Belt with Padded Lumbar Support
7000-BLTXL	Extra-Large Work Positioning Belt with Padded Lumbar Support
7000-BLTXXL	2X-Large Work Positioning Belt with Padded Lumbar Support
7000-BLTQC	Quick Connect Work Positioning Belt with Padded Lumbar Support

3252 Series

- Available in models featuring a visible “shock pack” or models with “bungee style/stretch” with shock absorber sewn inside polyester material.
- One-piece, flat, polyester webbing is resistant to chemicals
- Double locking snaphooks reduce the chance of roll-out or accidental disengagement from D-ring
- Clear cover on shock absorber for complete inspection
- Separate serial number for each lanyard for tracking and record keeping
- Wear pads on metal snap-hooks ensure long lasting strength
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

3254 Series

- Shock absorber sewn inside polyester material (No Stretch)
- Lightweight & Flexible
- Low arresting forces
- Double locking snaphooks proof tested to 3,600 lb.
- Yellow sleeve protects entire lanyard
- Separate serial number for each lanyard for tracking and record keeping
- Chemical-resistant polyester webbing
- Meets OSHA 1926.500, 1910.66, ANSI A10.14, and Z359.1 Standards

Economy **Advantage™**

3252 & 3254 Series Lanyards

The **3252 Series Advantage™** lanyard is a lightweight, flexible and economical connection between a RTC® harness and an anchorage. These shock absorbing lanyards feature a deceleration distance of 42 inches or less. The 3252 Series Lanyards are available in four configurations including a Y-lanyard that helps maintain continuous protection.

The **3254 Series Advantage™** lanyard is a lightweight, flexible and economical connection between a RTC® harness and an anchorage. These durable, chemical resistant lanyards include an inner polyester core that stretches to reduce the arresting force in the event of a fall. The shock absorbing lanyards feature a deceleration distance of 42 inches or less. The 3254 series lanyards are available in three configurations including a Y-lanyard that helps maintain continuous protection.

Nomex® is a Dupont registered trademark

Part #8250-NOMX6
Nomex® Lanyard Cover

- One-piece, flat, polyester webbing is resistant to chemicals
- Double locking snaphooks reduce the chance of roll-out or accidental disengagement from D-ring
- Convenient inspection grid on label
- Clear cover on shock absorber for complete inspection
- Separate serial number for each lanyard for tracking and record keeping
- Available in 2-ft., 3-ft., 4-ft. and 6-ft. lengths
- Wear pads on metal snaphooks ensure long lasting strength
- Adjustable length models available to reduce free fall
- Tie back style lanyards available for easy attachment to anchorage
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

8250 & 8252 Expander® Lanyards

A Flexible, Compact, Shock-Absorbing Lanyard

The **8250 Series Expander® Lanyard** is one of the safest and most reliable lanyards ever developed. This durable, chemical resistant lanyard includes double locking snaphooks and a hidden stress tag which appears once a lanyard is stressed. The 8250 Series is

available in 4 foot and 6 foot lengths.

The 8252 Expander® shock-absorbing is flexible and compact. The clear cover over the shock absorber allows for easy inspection. The 8252 Series is available in 2', 3' 4', and 6' lengths.

Part #8250-P6HH

- Convenient inspection date grid on label
- Chemical resistant polyester rope or web in 8270 & 8280 series
- Double locking snaphooks proof tested to 3,600 lb.
- Separate serial number for each lanyard for tracking and record keeping
- Meets OSHA 1926.500, 1910.66, and ANSI A10.14 and Z359.1 standards

2350, 3280, 8260, 8270, 8280 Series Lanyards

Shock Absorbing Lanyard You Can Visually Inspect

RTC® **2350, 8260, 8270, 8280 and 3280 Series Lanyards** are designed for work positioning or fall restraint. These lanyards hold a worker in place leaving both hands free to work. Any potential free fall must be limited to 2 feet or less. A fall arrest system must be used in addition when the user is exposed to a fall hazard.

Work positioning lanyards must never be used for fall arrest. They do not contain shock absorbers or deceleration devices and will apply dangerously high forces to the user, if used for fall arrest.

Anchorage Connectors

A Connector for Every Application

I-Beam Trolley

- Glides along I-beam to provide mobile anchorage
- Adjusts to fit common I-beam sizes
- Use with a self-retracting lanyard for 2-D protection

Part #9900-TROLLEY2

I-Anchor – I-Beam Anchor Clamp

- Attaches to I-beam anchorage
- Adjusts to fit a variety of widths
- No drilling or welding required

Part #9450-IANCHOR

SkyBar™

- Connects to anchorage beams
- Mobile: Easy to move
- Three configurations available

Part #9450-SBAR

SkyBar™ 3

- Portable anchorage clamp
- Connects to anchorage beams
- Clamps to beams, ladders, and rails
- Can be connected in any direction

Part #9450-SBAR3

Anchorage Slings – Wrap Style

- Chemical resistant polyester webbing
- Several lengths and styles available

Part #6600-

Anchorage Slings – Choker Style

- Chemical resistant polyester webbing
- Several lengths and styles available

Part #6601-36

D-Bolt and I-Bolt

- Bolts to anchorage
- Reduces chance of burst-out and roll out
- Provides identifiable, permanent fall protection anchorage

Part #9450-DBOLT & 9450-IBOLT

D-Ring Plate

- Bolts or welds to anchorage
- Reduces chance of burst-out or roll out
- Provides identifiable, permanent fall protection anchorage

Part #9450-DPLT

Anchor Hooks-Wire Form

- Squeeze to open
- Attaches around anchorage beam
- Available in three sizes
- Made from stainless steel

Part #91901

Anchorage Hook with Strap and D-ring

- Large snaphook opening
- Chemical-resistant polyester webbing
- D-ring compatible with standard size snaphook

Part #9450-P2DR

Carabiners

- Double locking
- 100% proof loaded
- Available in a variety of sizes
- Triple locking available

Part #9100 Series Carabiners

Ankalok – Extension Pole Anchorage

- First man up anchorage connector
- Fiberglass "hot stick" pole extends up to 24 feet
- Available with several fall protection systems

Part #2400-ANKA1

Anchorage Connectors

Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

I-Beam Anchorage

Lightweight Portable I-Beam Anchorage

Available in models for 3.5" to 16" anchorage applications

9450-SBAR	SkyBar™ Sliding Anchorage for Horizontal I-Beam
9450-SBAR2	SkyBar™ Fixed Anchorage for Horizontal I-Beam
9450-SBAR3	SkyBar™3 Fixed Anchorage for Horizontal or Vertical I-Beams -- Multidirectional Loading

Anchor Hooks

9100 Series Pipe Hooks

91901	Small Anchor Hook w/ 3.9" opening
91902	Medium Anchor Hook w/ 4.7" opening
91903	Large Anchor Hook w/ 6.3" opening
91906	Large Anchor Hook w/ 6.3" opening (3" attachment opening)

I-Beam Trolleys

Adapts to I-Beam Widths 2-5/8" to 7-1/2"

Use with carabiner to connect with self-retracting lanyard

9900-TROLLEY2	I-Beam Trolley for I-Beam 2-5/8" to 5-1/16"
9900-TROLLEY4	I-Beam Trolley for I-Beam 5-1/16" to 7-1/2"

High Load I-Beam Anchorage

Adapts to beam flange sizes from minimum width & thickness of 5.99" x 0.260" respectively to a maximum width & thickness of 21.0" x 1.0" respectively. For horizontal lifeline anchorage applications.

9450-IBOLT	I-Bolt Assembly
8450-P2DR	Anchor Hook w/ Strap & D-Ring

Fuel tank storage

Tank Trolley

- Designed for use on water and storage tanks
- 310 lb. designed working load
- Fits 1/4" to 1" flange widths
- Weighs 14.1lbs.
- Works on storage Tanks with minimum 10' diameter
- Features two roller bearings and forged O-ring or attachment to fall protection equipment
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standard

Tank Storage Trolley

Designed for use on water & fuel storage tanks

The RTC® Fall Protection **Tank Storage Trolley** is designed for use on water and fuel storage tanks. The Tank Trolley provides a 5,000 lbs. anchorage that rides on the top lip of the storage tank. The 9900-TROLLEY6 can be used with a standard lanyard or a self-retracting lifeline.

White Rope

- Polyester rope with red tracer thread
- 5/8" diameter rope
- Three-strand construction allows inspection of inner fibers
- Use for: Rappelling, Caving, Canyoneering, Climbing, Arborist, and Rope Courses

Kermantle Rope

- UL Classified to NFPA 1983:2006
- 1/2" diameter rope
- General use rope

- Stress indicator alerts user when device has been stressed
- Sturdy steel covered with neoprene housing weighs only 3 lbs.
- Quick and easy installation
- Inertial braking mechanism
- Chemical resistant polyester webbing
- Specialized webbing provides additional energy absorption
- Separate serial number for each self-retracting lanyard for tracking and record keeping
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards
- No factory recertification required

2008 Series Retractor®

Compact and Durable Self-Retracting Web Lanyard

The **2008 Series Retractor®** is compact and lightweight. This durable retracting-web lanyard provides the worker with up to 11 feet of mobility from the anchorage. The 2008 Retractor® features our unique Safe-T-Fold® stress indicator which alerts the user when

the device has been stressed. An inertial braking mechanism provides instant locking when a fall occurs. The self-retracting lanyard minimizes tripping hazards and dangerous falls that can occur with standard lanyards.

Part #2008-P07

Retractable Lanyards

All self-retracting lanyards on this page meet OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

Web SRLs

2008 Series Retractor®
Neoprene Covered Steel Housing / 2" wide Polyester Webbing
Features Safe-T-Fold® Stress Indicator

2008-P05	5' Web Retractor® w/ 3/4" Double Locking Snaphook on Web Assembly
2008-P07	7' Web Retractor® w/ 3/4" Double Locking Snaphook on Web Assembly
2008-PH07L	7' Web Retractor® w/ 3/4" Double Locking Snaphook on Web Assembly w/ Stainless Steel Swivel w/ 9111-A carabiner
2008-P09	9' Web Retractor®, w/ 3/4" Double Locking Snaphook on Web Assembly
2008-PC09	9' Web Retractor®, w/ 3/4" Double Locking Snaphook on Web Assembly w/ Stainless Steel Swivel & 9108-A Carabiner
2008-PC09AL	9' Web Retractor® (same as 2008-PC09) w/ 9120-A Aluminum Carabiner
2008-PH09	9' Web Retractor® w/ 3/4" Double Locking Snaphook on Web Assembly w/ Stainless Steel Swivel & 9111-A carabiner
2008-PS09	9' Web Retractor® (no snaphook) on Web Assembly w/ Stainless Steel Swivel w/ 9111-A carabiner
2008-PH10L	10' Web Retractor® w/ Poly Web Loop End
2008-PC11	11' Web Retractor® w/ 3/4" Double Locking Snaphook on Web Assembly
2008-PH11	11' Web Retractor® w/ 3/4" Double locking Snaphook on Web Assembly w/ Stainless Steel Swivel & 9111-A carabiner
2008-PH11C	11' Web Retractor®, No Snaphook, w/ Stainless Steel Swivel, 2 - #9111-A Carabiners on both ends
2008-P119125	11' Web Retractor® 2 Double Locking Snaphooks on both ends w/ Stainless Steel Swivel

Safe-T-Fold®
Stress Indicator

- State-of-the-art centrifugal braking mechanism
- Eliminates slack cable hazards
- Double locking stress indicating snaphook
- Galvanized, stainless steel, Kevlar-fiber, or polyester-web lifelines are available
- Lengths up to 170 ft.
- Two year recertification period
- Easy to install and use
- Separate serial number for each self-retracting lanyard for tracking and record keeping
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C, ANSI A10.14 and Z359.1 standards

2700 Series Retractalok®

Proven Tough Self-Retracting Lanyards

The **2700 Series Retractalok®** retracting lanyards provide state-of-the-art centrifugal braking technology to minimize free fall distance while cushioning the fall. Rugged cast aluminum or molded plastic housings are lightweight and chemical resistant. Every Retractalok® has a stress indicator which automatically alerts the user that the device has been stressed. The 2700 Series is available with polyester web, stainless steel, galvanized or high-strength fiber cable. These affordable lanyards provide years of dependable service.

Kevlar® Cable SRLs 2704 & 2706 Series Retractalok®

Cast Aluminum Housing / 1/4" Kevlar Cable / Features Stress Indicator Snaphook

2704-F25	25' Kevlar Cable w/ 3/4" Double Locking Snaphook
2706-F70	70' Kevlar Cable w/ 3/4" Double Locking Snaphook
2706-F95	95' Kevlar Cable w/ 3/4" Double Locking Snaphook

- No hazardous leg chains on tripod
- Tripod meets OSHA 5,000 lb. anchorage point requirement
- Adjustable tripod legs
- Tripod head provides fall protection anchorage for more than one user
- Multifunction Extricator® provides fall arrest and retrieval capabilities of up to 140 ft.
- Extricator® available with galvanized or stainless steel cable
- Some Extricator® models available with high strength Kevlar® fiber cable
- RTC® Winch provides winching capabilities for material lifting up to 150 ft. and 600 lbs.
- RTC® Winch available with stainless steel, galvanized steel, or high strength Kevlar® cable
- Meets OSHA and ANSI standards

Confined Space Systems

Fall Protection for Entry and Retrieval

RTC® provides versatile fall protection and emergency rescue systems to meet your confined space needs. On our tripods, the triple hanging plate provides a fall protection anchorage for the user and the attendant. The absence of leg chains reduces the tripping hazard near the confined space opening.

The Extricator® Series of self-retracting lanyards is equipped with an emergency personnel rescue winch. Extricators are available with cable lengths of up to 140 ft. The RTC® Winch provides for material lifting and lowering. Together they comprise the ultimate in a portable confined space system. Products are available separately or together in five Confined Space System Configurations.

Confined Space Equipment List

All Confined Space Components on this page meet OSHA 1910.146

Tripods

5500 Series Tripods

Lightweight Aluminum / No Leg Chains Required

5500-AT7	7' Adjustable tripod w/ 5500-TOT7 & one 5500-SPLATE guide pulley plate assembly
5500-AT10	10' Adjustable tripod w/ 5500-TOT10 & one 5500-SPLATE guide pulley plate assembly

Extricators

2756 Series Extricator® II - Steel Cable

Cast Aluminum Housing/ SS Cable /Bracket Not Included

2756-S25	25' 3-Way Extricator® II w/ stress indicator
2756-S50	50' 3-Way Extricator® II w/ stress indicator
2756-S80	80' 3-Way Extricator® II w/ stress indicator
2756-S110	110' 3-Way Extricator® II w/ stress indicator
2756-S140	140' 3-Way Extricator® II w/ stress indicator

2756 Series Extricator® II - Galvanized Steel Cable

Cast Aluminum Housing/ Galvanized Steel Cable / Bracket Not Included

2756-G25	Extricator® w/ 25' Galv. Cable & stress indicator
2756-G50	Extricator® w/ 50' Galv. Cable & stress indicator
2756-G80	80' 3-way Extricator® w/ stress indicator
2756-G110	110' 3-way Extricator® w/ stress indicator
2756-G140	140' 3-way Extricator® w/ stress indicator

2756 Series Extricator® II Accessories

Mounting Brackets - Brackets attach to 7' & 10' RTC tripods

2756-GBRACKT1	2756 Bracket Assembly 80' or more
2756-GBRACKT2	2756 Bracket Assembly 25'
2756-GBRACKT3	2756 Bracket Assembly 50'

Winches

5590 Series RTC® Winches

Mounting Bracket Included

5590-G80	RTC® Winch w/ 80' Galvanized Cable
5590-K55	RTC® Winch w/ 55' Kevlar® Jacketed Cable
5590-K110	RTC® Winch w/ 110' Kevlar® Jacketed Cable
5590-S55	RTC® Winch w/ 55' Stainless Steel Cable
5590-S110	RTC® Winch w/ 110' Stainless Steel Cable
5590-S150	RTC® Winch w/ 150' Stainless Steel Cable
5590-MBKTA	RTC® Mounting Bracket Assembly

Confined Entry & Retrieval Systems

Confined Space System 3 - 7' Tripod

CONF-SYS003 *Confined Space System 3 - 7' Tripod includes:*

(1) 5500-AT7 - 7' Adjustable tripod w/ 5500-TOT7 Tripod tote bag, (1) 2756-S50 Extricator® II w/ 50' SS cable, (1) 2761-GBRACKT3 Extricator® Mounting Bracket, (1) 9600-TOTL - Large Equipment Tote Bag

Confined Space System 4 - 7' Tripod

CONF-SYS004 *Confined Space System 4 - 7' Tripod includes:*

(1) 5500-AT7 - 7' Adjustable tripod w/ 5500-TOT7 - Tripod tote bag, (1) 2756-S50 Extricator® II w/ 50' SS cable, (1) 2756-GBRACKT3 Extricator® mounting bracket, (1) 5590-S55 RTC® Winch (1) 5500-SPLATE Guide, Pulley Plate Assembly, (1) 9600-TOTL - Large Equipment Tote Bag

Confined Space System 11 - 10' Tripod

CONF-SYS011 *Confined Space System 11 - 10' Tripod includes:*

(1) 5500-AT10 - 10' Adjustable tripod, (1) 2756-S50 Extricator® II w/ 50' SS cable, (1) 2756-GBRACKT3 Extricator® Mounting Brkt, (1) 5500-TOT10 - Large Equipment Tote Bag

Confined Space System 12 - 10' Tripod

CONF-SYS012 *Confined Space System 12 - 10' Tripod includes:*

(1) 5500-AT10 - 10' Adjustable tripod w/ 5500-TOT10 - Tripod tote bag, (1) 2756-S50 Extricator® II w/ 50' SS cable, (1) 2756-GBRACKT3 Extricator® Mounting Bracket, (1) 5590-S55 RTC® Winch, (1) 5500-TOT10 - Large Equipment Tote Bag

Confined Space System 17 - 7' Tripod

CONF-SYS017 *Confined Space System 17 - 7' Tripod includes:*

(1) 5500-AT7 - 7' Adjustable tripod w/ 5500-TOT7 Tripod tote bag, (1) 2756-S25 Extricator® II w/ 25' SS cable, (1) 2756-GBRACKT2 Extricator® Mounting Bracket, (1) 9600-TOTL - Large Equipment Tote Bag

Rescue Accessories

5500-PINPKG	3 Replacement Tripod Leg Pins
5560-T10	Emergency Rescue Winch - used w/ tripod & attaches to Self-Retracting Lanyard
7400-SPY	Polyester Web Spreader Bar Assembly
5500-SPLATE	Tripod Pulley Plate

Equipment Tote Bags

5500-TOT7	7' Tote Bag
5500-TOT10	Tote Bag for 10' Tripod
9600-TOTL	12" x 24" Large Equipment Tote Bag
9600-TOTS	10" x 14" Small Equipment Tote Bag
9600-TOTH	12" x 24" Nylon Harness Tote Bag w/Drawing
7400-PKT	Lanyard Tote Bag for Harnesses

Part #1000-DC000

Escape-Rite®

Emergency Escape & Controlled Descent Device

The **Escape-Rite®** is a compact, lightweight industrial descent device that can be used for emergency egress. The Escape-Rite® lowers the user to safety at a controlled rate of descent. It self-adjusts for each person's weight, operating by gravity, and uses no electricity or power. The U.S. Navy utilizes this device because of its smooth, dependable rate of descent and ease of

operation. There are no adjustments or special skills needed to operate the Escape-Rite®. Each unit comes complete with an installation carabiner, two escape belts, and a cable storage reel. It's weather-resistant Poly-steel® cable passes the test of time. When your life is on the line, depend on Escape-Rite®.

- Lightweight and compact
- Does not require electrical power or special operator training
- Cable lengths from 10 ft. to 300 ft.
- Weather resistant Poly-steel® cable has an inner core of high strength steel jacketed by a chemical resistant polyester braid
- Separate serial number for each Escape-Rite for tracking and record keeping
- 5 Year initial certification period
- Weather resistant container available
- Dust cover available
- Angled descent packages in lengths from 80' to 200'

*Angle descent approved
applications from 45 to 90 degrees*

Part #1003-DEV

Escape-Rite® Controlled Descent

Meets the NIOSH criteria for Emergency Egress

Emergency Descent Systems

1003 Escape-Rite® - Descent Rate approx. 3' per second

Poly-steel Cable Maximum working load of 400 lbs.

1003-DEV010	10' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV020	20' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV030	30' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV040	40' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV050	50' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV060	60' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV070	70' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV080	80' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV090	90' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV100	100' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV110	110' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV120	120' unit w/ 9111-A carabiner & 2 escape belts
1003-DEV130	130' unit w/ 9111-A carabiner & 2 escape belts

Emergency Descent Accessories

1000-CBLREL7	7" Replacement Cable Storage Reel
1000-CBLREL9	9" Replacement Cable Storage Reel
1000-CONTNR	Complete weather resistant ABS container w/ sealed door & internal cable reel
1000-CONTNRA	Complete weather resistant ABS container w/ sealed door
1000-DC000	Escape-Rite® dust cover
1000-RSCRD	Adult Rescue Cradle Kit w/ carabiner / 100' Tagline / Totebag

Part #1000-CONTNR

- Provides qualified anchorage for RTC® Extricators
- Davit systems are available in multiple offset mast lengths
- Portable or Permanent Mounts
- Mounting sleeves allows masts to pivot 360 degrees and are offered in plated steel or stainless steel
- Meets OSHA and ANSI Standards

Davit Arm Retrieval Systems

Permanent or Portable Mounting for Self-Retracting Extricator® Lifelines

Aluminum Davit Arm Retrieval Systems provide many options for attaching RTC® Extricators® Lifelines to qualified anchor points. Davit Arms can be mounted permanently on floors or walls. Davis Arms can also be mounted on portable bases which can be moved from location to location.

System components include offset mast arm, center post, connector elbow and a permanent or portable base. To add an RTC® Extricator® also includes a mounting bracket.

- Portable & Lightweight
- Hands-free operation or manual
- Removes from rope in seconds
- Instant locking
- Easy cleaning, inspection & maintenance
- Chemical resistant polyester rope
- Three strand polyester rope lifeline allows inspection of inner fibers
- Lifelines available up to 330 ft. long
- Spliced eye in lifeline makes installation easy and secure
- Rope weight keeps lifeline taut
- Separate serial number for each rope grab for tracking and record keeping
- Conforms to OSHA and ANSI standards

Rope Grabs & Vertical Rope Lifelines

Portable, Lightweight Rope Grab Device for Vertical Lifelines

RTC® offers a selection of rope grabs and lanyards ideal for vertical rope systems. These are easy to add or remove from rope lifelines used for tower or scaffold work. Our roofing rope grabs are available either as self-trailing or manually operated products.

Rope Grabs roll freely, but lock instantly should a worker fall. Rope grabs are designed to be used with RTC® approved safety rope or with RTC® Permacable®.

Part # 3350-OP3E3

Vertical Rope Lifelines

Meets OSHA 1910.66, 1926.500, ANSI A10.14 & Z359.1 Standards

Rope Grabs

For use with 5/8" or 3/4" diameter polyester rope and/or weather-resistant Permacable®

2300-9111	Vertical Lifeline Rope Grab w/ Carabiner for Fixed Ladder System
2300-OP3E	Vertical Lifeline Rope Grab w/ 2' Shock Absorbing Lanyard
2300-OP3E3	Vertical Lifeline Rope Grab w/ 3' Shock Absorbing Lanyard
2300-RPLK	Vertical Ropelok® Device
2300-WEIGHT	3 Lb. Rope Weight
2500-OP3E3	Roofing Rope Grab w/ 3' Shock Absorbing Lanyard
2500-WEIGHT	2 Lb. Rope Weight (Roof)
3350-9111	Self-trailing Rope Grab w/Carabiner and 2" Ring
3350-OP3E3	Self-trailing Rope Grab w/3' Shock Absorbing Lanyard
3350-RPLKL	Self-trailing Ropelok® device w/ large 2" attachment ring for vertical lifelines.

Rope Lifelines with Spliced Eyes

5/8" Polyester Rope -- Each lifeline includes spliced eye for upper connection -- Carabiners sold separately -- Contact RTC for availability of custom length lifelines

9450-PSS58020	20' Rope Lifeline w/ Spliced Eye / Back Splice
9450-PSE58010	10' Rope Lifeline w/ Spliced Eye
9450-PSE58015	15' Rope Lifeline w/ Spliced Eye
9450-PSE58020	20' Rope Lifeline w/ Spliced Eye
9450-PSE58025	25' Rope Lifeline w/ Spliced Eye
9450-PSE58030	30' Rope Lifeline w/ Spliced Eye
9450-PSE58035	35' Rope Lifeline w/ Spliced Eye

9450-PSE58070	70' Rope Lifeline w/ Spliced Eye
9450-PSE58075	75' Rope Lifeline w/ Spliced Eye
9450-PSE58080	80' Rope Lifeline w/ Spliced Eye
9450-PSE58085	85' Rope Lifeline w/ Spliced Eye
9450-PSE58090	90' Rope Lifeline w/ Spliced Eye
9450-PSE58095	95' Rope Lifeline w/ Spliced Eye
9450-PSE58100	100' Rope Lifeline w/ Spliced Eye
9450-PSE58130	130' Rope Lifeline w/ Spliced Eye
9450-PSE58150	150' Rope Lifeline w/ Spliced Eye
9450-PSE58180	180' Rope Lifeline w/ Spliced Eye
9450-PSE58200	200' Rope Lifeline w/ Spliced Eye
9450-PSE58220	220' Rope Lifeline w/ Spliced Eye
9450-PSE58250	250' Rope Lifeline w/ Spliced Eye
9450-PSE58330	330' Rope Lifeline w/ Spliced Eye

Rope Lifelines with Double Locking Snaphooks

5/8" Polyester Rope Lifelines w/ Splices as indicated / For

9450-PRHH025	25' x 5/8" Poly Rope w/ 2 Double Locking Snaphooks
9450-PRHH100	100' x 5/8" Poly Rope w/ 2 Double Locking Snaphooks
9450-PSE58025	25' Polyester Rope Lifeline w/ 1 Snaphook & 1 Spliced Eye
9450-PSE58100H	100' Polyester Rope Lifeline w/ 1 Snaphook & 1 Spliced Eye
9450-PSH58025	25' Polyester Rope Lifeline w/ 1 Snaphook
9450-PSH58050	50' Polyester Rope Lifeline w/ 1 Snaphook

Part #9450-PRHH025

- Locks in a instant in the event of a free-fall
- Easy installation
- Hands-free operation, does not interfere with climbing
- Portable and lightweight
- Release pins allow for quick attachment to safety cable
- Will not ride to the ground from a “panic grip”
- CableGrab can be removed for end of day storage or relocation to another safety cable
- Can be used with front or side D-ring harnesses
- Ladder extensions available
- Can be used with galvanized or stainless steel cable
- Meets ANSI A14.3, OSHA 1910.27, 1926.1053 standards

Steel Cable Ladder Safety Systems

Vertical Fall Arrest for Ladder Climbing Applications

The **2001 Series Cable Grab™** is a hands-free unit used for vertical fall arrest protection on 3/8" galvanized or stainless steel cable. It travels with the user and is ready to provide fall arrest at an instant. It is ideal for ladder climbing, telecommunication towers, water

towers, billboards and similar structures. The unit can be used with the RTC® ladder climbing system, which includes galvanized cable, termination hardware, ladder brackets, rung clamps and cable guides.

Part #2001-9111

Steel Cable Ladder Safety Systems

Ladder Safety Systems - Cable

2001 Series Cable Grabs

*Available with 3/8" 7x19 galvanized steel cable (stainless steel also available)
Systems include cable, turnbuckle, clamp thimble, shackle and 2 cable clips.
Cable grab unit and ladder brackets sold separately*

Ladder Brackets & Guides

One rung clamp required for every cable guide, 2 rung clamps required for every ladder bracket or ladder extension.

2500-BRACK	304 Ladder Bracket
2500-BRACK316	316 Ladder Bracket
2500-BRACKE	304 Ladder Extension (When ordering, order an additional 10' of cable)
2500-BRACKE316	316 Ladder Extension
2500-GUIDE	Cable Guide (Required every 25' of cable lifeline)

All RTC® Steel Cable Ladder Safety Systems are custom designed. Please call RTC® Customer Service to review your application and to receive a quote for your ladder system.

- Hands-free movement up and down ladder
- Rail system is easy to install and maintain
- Climbing device weighs only 2 lb.
- Arresting unit is easily installed and removed from rail
- Type 316 stainless steel rail is available for marine or other corrosive environments
- All ladder hardware is corrosion resistant stainless steel
- Can be mounted to side or center of ladder
- Ladder extensions available
- Systems used on U.S. Navy vessels
- Meets ANSI A14.3, OSHA 1910.27, 1926.1053 standards

All RTC® Climb-Rite® Safety Systems are custom designed. Please call RTC Customer

Service to review your application and to receive a quote for you ladder system.

Climb-Rite® Fixed Rail Ladder Safety Systems

100% Fall Protection While Climbing Ladders

The RTC® **Climb-Rite®** is a fixed flat rail climbing protection system, that uses a detachable sliding sleeve that rolls freely, both up and down RTC® rail (1/4" x 2"). Though primarily designed for climbing protection on vertical fixed ladders that meet OSHA and ANSI A14.3 standards, it can also be used above and below ground, on

interior or exterior surfaces. It is designed to lock the instant a fall begins, bringing the four hardened steel brakes into contact with the rail. The complete climbing system has been designed without rail notches or serrations that corrode and rust. Rail system extensions are available for safe ladder access and egress.

- Low anchorage forces
- High strength, chemical resistant polyester rope lifeline
- Quick set-up and disassembly
- Continuous protection
- Spans up to 150 feet for one or two workers
- Extremely lightweight, one piece system
- Three strand polyester rope allows easy inspection of inner fibers
- Ropevise® makes tensioning easy
- One system can be used for many different spans
- Many anchorage connectors are available for use with the Beamwalker
- Available separately or in kit form
- Meets OSHA 1926.500 subpart M, 1910.66 appendix C standards

Beamwalker® Temporary Lifeline System

Horizontal Rope Systems

The **9450 Beamwalker® System** is a temporary, polyester rope horizontal lifeline system. It is easily installed with a wrench, either at D-ring height or directly overhead. Horizontal installations have a maximum length between anchorage points of 150 feet for use

by up to two people at a time. The system can be installed between vertical columns or used with other RTC® horizontal lifeline post systems. The 9450 Beamwalker® System is ideal for electrical, built-up-scaffolding, tanks, vessels and catwalks.

9450 Beamwalker® Kit
available in bucket

Beamwalker in Tote Bag

Beamwalker® Lifeline System includes: spliced 5/8" polyester rope lifeline, Ropevise rope tensioner, (2) 2" diameter forged steel O-rings, and (2) 9111 Carabiners. For 1 or 2 Workers: Sold completely assembled. Anchor Slings are included with all kits. Beamwalker kits are offered in drawstring bags or buckets

Railwalker® Horizontal Lifeline System

Permanent Rail Systems

The **9900 Railwalker®** is a permanent rail system used on ledges, runways, walls or the sides of structures. Available in stainless steel or aluminum rail, the 9900 Railwalker is ideal for areas with limited clearance. The system can accommodate several workers while maintaining a proper distance. The trolley slides easily along the rail. The rail should be installed at a height between 4' and 15' from the walking/ working surface. Use the 2008 model RTC® Retractor or standard lanyards with this system.

Railwalker® Permanent Lifeline System

Railwalker® Permanent Rail System

9900-DEV	Railwalker® Trolley w/o Lanyard
9900-DEVSC3	Railwalker® Trolley w/ Stainless Steel Cable Restraint Lanyard
9900-P3E	Railwalker® Trolley w/ 3' Shock Absorbing Lanyard

Railwalker® Rail & Rail Components

1/4" x 2" x 10' Sections / 1 Connector required every 4' / 1 Splice required for each rail section connection / 2 End stops required for each system

9900-APSTP	Permanent Stainless Steel Rail Stop (for stainless steel rail only)
9900-SSTP	Spring Loaded Stainless Steel Rail Stop
9900-FITNG	Stainless steel connector (0.2" - 1.2")
9900-FITNG4	Stainless steel connector (1.2" - 2.2")
9900-FITNG5	Stainless steel connector (2.2" - 3.2")
9900-FITNG6	Stainless steel connector (3.2" - 4.2")
9900-FITNG7	Stainless steel connector (4.2" - 5.2")
9900-FITNG8	Stainless steel connector (5.2" - 6.2")

Part #9900-DEVSC3

- Excellent with limited clearance
- Useful in tank loading, overhead crane runways, and window cleaning
- Trolley rolls along easily
- Unique spring-loaded end stops provide method to remove the trolley
- Rail is pre-drilled for easy installation
- Stainless steel rail accommodates a bend radius as small as 4 ft.
- Type 316 stainless steel rail is available for marine or other corrosive environments
- Aluminum rail also available
- Can be used with RTC® shock-absorbing lanyards or RTC® 2008 series self-retracting lanyards
- Meets OSHA 1926.500, 1910.66, ANSI A10.14 and Z359.1 standards

ALL RTC® Railwalker Horizontal Lifeline Systems are custom engineered. Please call

RTC® Customer Service to review your application and to receive a quote for your ladder system.

RTC[®] Custom Solutions[™]

Our Name Says It All!

There are a lot of companies who claim to be in the fall protection business, but few of them understand and practice the science of fall protection like RTC[®] Custom Solutions[™] does. We are dedicated to engineering the ideal safety solution to each potential fall hazard.

Custom Solutions[™] is a design/build fall protection systems provider that integrates the finest engineering, fabrication and quality control into safety systems that not only meets, but exceeds your requirements.

RTC[®] Custom Solutions[™] has been providing high quality, turnkey custom solutions for our customers. The founder of RTC[®] (Research and Trading Corporation) was one of the original fall protection pioneers and virtually invented the concept of Safety Engineering and introduced a scientific orientation to understanding the influence of mechanic forces on personal safety.

SKYLINE

This commitment to engineering excellence at an affordable cost continues to be the driving force behind everything we do at RTC[®]. That means you won't get an "off the shelf" solution from us. Instead we go beyond the obvious by challenging every idea, fine tuning our initial concepts until we are satisfied that it is the best solution for you. We build confidence into every project.

It's imperative that you have confidence in the Fall Protection company you choose. That's why we use an in-house, multi-tiered engineering process. It differentiates Custom Solutions[™] from all the other fall protection providers and is focused on satisfying your specific objectives.

1.800.323.7402
ext. 250

From start to finish, RTC® Custom Solutions™ can do it all!

Developing an appropriate fall protection solution can often look daunting. That's why you need RTC® Custom Solutions™, a single source provider. Our experience as a manufacturer of state-of-the-art fall protection components and user equipment, combined with our comprehensive design/build procedures means you are getting the very best solution. Our comprehensive development and production procedures include the following:

Project Assessment/On Site Evaluation If appropriate, we are experienced in visiting your site to review the specifics of the safety situation.

Customer Provided Input In many cases, we can proceed based on input provided through phone conversations, faxes, emails, and diagram attachments.

Design Based on the site assessment or your detailed input, we start the design process incorporating the necessary components.

Engineering Once the design is complete and approved, detailed engineering drawings are prepared and reviewed by structural, mechanical and safety engineers to ensure the integrity of the design.

Fabrication As a manufacturer of a wide range of fall protection components, RTC® Custom Solutions™ will assemble the best components and/or custom fabrication needed to meet your requirements.

Installation Using qualified and experienced personnel, a Custom Solutions™ staff member will supervise the installation of each project.

Testing/Inspection Upon completion, the system is inspected and tested thoroughly making sure that each component performs to required specifications. Certification – After the testing is completed, Custom Solutions™ staff will certify the system for use. A certification label detailing the date of installation, maximum number of users, and type of system is installed.

Training Thorough training is provided by Custom Solutions™ staff members to ensure that each employee fully understands the operation.

- Before you decide which Fall Protection company to use, consider the benefits Custom Solutions™ delivers that are unmatched by the competitors.
- From its beginnings through today, RTC® Custom Solutions™ continues the proud tradition of applying state-of-the-art engineering expertise to every safety situation.
- Every fall protection hazard is unique, in many cases, it requires on-site inspection by a trained safety professional. RTC® Custom Solutions™ has experienced safety engineers capable of analyzing the situation and planning the best solution quickly and effectively.
- We design and build precisely what you need, nothing more and nothing less. Our systems are complete including thorough design, engineering, testing, and certification.
- Our job isn't finished until everyone who will be using one of our fall protection systems is fully trained. Custom Solutions™ provides the option of doing on-site training or including extensive training manuals whichever is most appropriate.

Videos Please contact RTC® customer service rep for a complete listing of training videos.

Contact the Custom Solutions™ manager at (800) 323-7402. For more information, check out our website at

Pre-Engineered Permacable® Systems

Budgetary pricing is now available for RTC® Permacable® horizontal lifeline systems. Each system includes 5/8" diameter synthetic cable, termination hardware and snatch-block pulley. Kits are designed for 1 or 2 users per line and range from 30' to 200' in length.*

Why Permacable®?

Permacable® provides access where fall hazards exist and worker mobility is needed. The low stretch, synthetic cable offers safety, both vertically and horizontally.

Lightweight, strong and with excellent resistance to weather and chemicals, Permacable® meets all OSHA requirements for horizontal lifelines. A special red liner in the cable alerts the user to wear or damage. Engineered anchorage design load and clearance charts are provided with each system.

Pre-Engineered Permacable

The Lightweight Shock-Absorbing Horizontal Lifeline

Great Applications for Permacable®

Aircraft Hangers

Because Permacable® spans long distances without intermediate supports, fewer structural drops need to be constructed from a hanger's ceiling. Steel cable systems require many more supports. By-pass trolleys of cable systems often have difficulty operating freely at great heights because of much higher rolling resistance.

There several good options for placing Permacable® systems in hangers: 1). Cables only down the fuselage, 2). Cables over fuselage and wings, or 3). Multiple cables running parallel over the entire hanger. This is the most typical design for hangers that service different sizes of aircraft.

Railcars

Most railcar applications are outdoors and usually require anchorage supports. Because Permacable® can span long lengths of rail track with fewer supports, the customer has a substantial savings in steel and concrete. RTC® offers several options for inverted 'L's to create a support structure. Our standard 'L' can be used for most applications. RTC® can also create custom fabrications for 'T' style structures or special sizes.

Bridge Cranes

Permacable® is also a good fit for many bridge cranes. The long runways of these cranes and substantial clearances make Permacable a good solution.

General Industry

Permacable® stands up to tough work environments. The cable is non-corrosive and the hardware withstands years of use in extreme environments. Sealed bearings and a large pulley diameter allow easy rolling along the cable even in dusty, dirty or gritty conditions. Low end-anchor forces make installation to existing structures much less costly than with alternative solutions.

Systems

ADVANTAGES

Permacable® Systems

1 User System

4000-PE0301	30' Pre-Engineered Permacable® System for 1 user
4000-PE0501	50' Pre-Engineered Permacable® System for 1 user

4000-PE1501	150' Pre-Engineered Permacable® System for 1 user
4000-PE2001	200' Pre-Engineered Permacable® System for 1 user

2 User System

4000-PE0302	30' Pre-Engineered Permacable® System for 2 users
4000-PE0502	50' Pre-Engineered Permacable® System for 2 users
4000-PE1002	100' Pre-Engineered Permacable® System for 2 users
4000-PE1502	150' Pre-Engineered Permacable® System for 2 users
4000-PE2002	200' Pre-Engineered Permacable® System for 2 users

*For complete systems quotes, including appropriate harnesses, lanyards or self-retracting lifelines, please contact RTC®. Customer information on the exact length of each system and clearance below the work area is also required.

Each system must be approved by RTC® Engineering **BEFORE** ordering.

Advantages Over Steel Cable (Wire Rope) Systems

Permacable® weighs only a fraction of steel cable. It can span up to 200' without intermediate supports. Steel cable typically requires a support structure every 30'-50'.

Permacable® installation is easy. Most systems are installed by the customer.

Permacable® won't corrode and has a much longer life span than steel cable.

Permacable® absorbs more energy than steel cable. This lowers the shock transferred to the anchorage, which in turn eliminates the need for costly structural reinforcements.

Permacable® can be tensioned virtually into a horizontal plane. This allows the trolley to roll freely along the length of cable keeping the fall arrestor directly overhead and avoiding dangerous "swing-falls".

Advantages Over Steel Beam Systems

Steel Beam systems are very expensive to erect. Costs include supports, foundations and engineering design and/or certification. Steel Beam systems also can have high costs of maintenance and repair.

Flanges on Steel Beam systems are prone to the build-up of contaminants both in outdoor and indoor environments. This contamination can slow, or even stop worker movement on the system. Snow, dirt, dust, grease and ice are all potential hazards.

- Hands-free bypass of intermediate anchorage
- Optimizes design of horizontal lifelines
- Easy to install
- Corrosion resistant construction
- Designed for use on RTC® Permacable®
- Smooth rolling ball bearing construction
- Long spans between intermediate anchors
- Easy to Roll pulley plate for SRL to attach
- Intermediate anchorage to accommodate SkyRider®
- Adjustable horizontal pre-tensioner

SkyRider™ & Permacable® Accessories

RTC® SkyRider™ & Permacable® horizontal lifelines have always spanned longer distances between anchor points with lower anchorage forces than traditional steel cable, saving money by reducing the size and number of anchorage. Permacable can now optimize the longest spans, with low clearance requirements while still reducing anchorage forces. The hands-free SkyRider™ system allows closer intermediate anchorage spacing to reduce fall distances where clearance is limited. The user enjoys uninterrupted travel along the entire length of the system.

SKYANCHOR™ I

The work station fall protection that moves with the worker

The **SkyAnchor™ I** provides true 3-D movement and 100% fall protection. It reduces the danger of a swinging collision, because the anchorage point follows overhead. The beam design provides a rigid system with no sag. It is ideal for all types of elevated workstations. The SkyAnchor™ is available in crane, truss and floor mount. The unique enclosed rail beam design inhibits contamination of trolleys. The beams are made of a lightweight aluminum alloy.

Due to the technical variations of each application, each system is custom-engineered. Please contact RTC® Customer Service for quoting information.

All RTC® model SRLs can be used with SkyAnchor™ Systems

SKYANCHOR™

Enclosed rail design

Part #2704-S25

Part #2706-GS60

- Rigid system prevents long fall distances
- Combines RTC® state-of-the-art fall protection technology with advanced overhead material handling technology
- Anchorage point moves effortlessly forward, backward, and sideways
- Overhead anchorage reduces the potential of injury due to swing
- Enclosed rail design inhibits contamination of trolleys normally associated with exposed beams
- Available in free-standing models or ceiling mounted
- Multiple workers can use the same system
- Meets OSHA 1926.500, 1910.66, ANSI Z359.1 and A10.14 standards

All RTC® Sky Anchors are custom engineered. Please call RTC® Customer

Service to review your application and to receive a quote for your ladder system.

SKYANCHOR II™

All items listed on this page meet OSHA 1910.66, 1926.500 Standards

In areas with very limited space, rigid rail fixed track can be your best fall protection solution. Because of the rigid nature of the track, the clearance distances required are generally less than with Permacable. All 2700 models of RTC® Self-retracting lifelines can be used with **SkyAnchor™II** systems.

Due to the technical variation of each application, each system is custom engineered. Please contact RTC® Customer Service for quoting information.

- Track style options are plain track, trussed track (for longer spans) and dual trussed track
- One or two person systems
- Steel or Aluminum (ideal for clean rooms and other controlled environments)
- “Fold-away” track available to conserve valuable space
- Little or no maintenance required
- Can be “flush” or “drop” hanger mounted to ceilings
- Minimizes clearances needed to work safely
- Meets OSHA 1926.500, 1910.66, ANSI Z359.1 and A10.14 standards

SkyAnchor™ II systems are used both indoors and outdoors. Fixed rail track can be designed for truck unloading/maintenance and for fall protection in manufacturing plants or warehouses. Systems can be mounted on existing building structures, or joined with specially designed ‘Inverted L’ or ‘T’ supports.

Rigid rail systems can support up to 2 workers per track. Systems can be ordered in steel or aluminum.

SkyGirder™

Portable and Adjustable Steel or Concrete Beam Anchor Posts

The **RTC® SkyGirder™** post system is a prefabricated anchorage for horizontal lifelines. It can be used with our Permacable® or BeamWalker® horizontal lifelines. This post system attaches to steel or concrete beams. It is designed to provide horizontal mobility and fall protection along the length of the beam.

Meets OSHA 1926.500 subpart M, and 1910.66 appendix C.

Due to the technical variations of each application, each system is custom-engineered. Please contact our Customer Service Dept. for additional information.

All RTC® SkyGirders™ are custom engineered. Please call RTC® Customer Service to

review your application and to receive a quote for you ladder system.

- Easily adaptable to most AASHTO-PCI concrete girders and AISG steel I-beams
- 7-ft. and 4-ft. posts available
- Lightweight. Heaviest component weighs only 60 lbs.
- Adjustable bottom bracket to fit most structures
- Brackets can be installed before setting beams
- No need for multiple anchorage
- Enhances productivity by providing workers with continuous protection
- Meets OSHA 1926.500 Subpart M and 1910.66 Appendix C standards

Horizontal Post Systems

9450 Series Horizontal Post Systems

Lifeline Systems Ordered Separately

9450-SGSTL4	4' Steel Horizontal Beam Post System
9450-SGSTL4I	4' Steel Horizontal Beam Post System Intermediate
9450-SGSTL7	7' Steel Horizontal Beam Post System
9450-SGSTL7I	7' Steel Horizontal Beam Post System Intermediate
9450-SRTIETOP	Upper Post Tieback Cable Assembly
9450-SRTIEUNIV	Universal Steel Cable Post Tieback
9450-TIEBAK2	Lower Post Tieback Cable Assembly

THE WIDEST SPAN OF FALL PROTECTION

Since 1972, RTC® has met the fall protection needs of companies in diverse industries throughout the world. Whether you need basic equipment, or an engineered fall protection system, RTC® can meet your needs.

We offer a full line of fall protection products that is as varied as the world of work itself. Every item is designed for durability. All products are extensively tested and meet or exceed all mandated safety requirements.

We can also design Engineered Systems for every fall arrest application and budget. Our experienced in-house professional staff will devise a cost-effective safety system to meet your requirements. RTC® Custom Solutions™ also provides turnkey installation and training services.
