CROSS REFERENCE CHART	84-85	

Showa® Best® Glove is an acknowledged leader in the hand protection industry. With U.S. headquarters in Menlo, Georgia, and manufacturing and sales operations in the United States, Canada, Central and South America, Europe, Africa, Asia and the Pacific Rim, we offer more than 1800 individual glove choices in a variety of styles for use primarily in the industrial, construction, automotive, healthcare, retail and commercial fishing industries.

Our customers enjoy best-in-class technology, a comprehensive hand protection portfolio, extensive channel coverage, and global production facilities — all offered by a team that is committed to the world's highest quality hand protection and customer service.

Recognized internationally for innovative technology and superior quality, we manage our entire production process, from research and development to manufacturing to product management. This strict "start-to-finish" control over production processes provides the foundation for the enhancement of existing products and new product development. **ATLAS®**, the world's most popular brand of flat-dipped, latex-palm-coated gloves, and **N-DEX®**, the industry's first non-latex, non-vinyl disposable glove, are both groundbreaking examples of our R&D innovation.

We also provide customers with the industry's most comprehensive chemical resistant guide, Chemrest. This guide is free online at [www.chemrest.com](http://www.chemrest.com) and is powered by one of the world's most comprehensive hand protection websites, [ShowaBestGlove.com](http://ShowaBestGlove.com). As Showa Best Glove, we continue to sell our products and services through our network of authorized distributors.

Active Memberships: International Glove Association; Safety Equipment Distributors Association; International Hand Protection Association; American Industrial Hygiene Association; American Society for Testing and Materials; European Standardization Committee (CEN); National Fire Protection Association.

**DISPOSABLE GLOVES**

Showa Best Glove is the most accomplished innovator and manufacturer of disposable hand protection ever. The first to create disposable nitrile and accelerator-free nitrile hand protection – we offer the broadest line of disposable choices within the industry.

Natural Rubber is the most elastic substance known to man. Gloves made from Natural Rubber Latex are often used in janitorial applications because they provide excellent protection from household cleaning chemicals and detergents. Durability and comfort make Natural Rubber Latex gloves the glove of choice for food preparation applications from red meat and poultry initial processing, to final food preparation. Natural Rubber Latex gloves are widely used in laboratory applications where aqueous chemicals are used because they provide excellent protection.

Showa Best Glove manufactures a wide array of Natural Rubber Latex products made from our own rubber plantations. Quality Control is the hallmark of all Showa Best Glove Natural Rubber Latex products from the Hevea brasiliensis tree to the strong, comfortable, flexible finished gloves on the hand. Superior quality is what you expect from Showa Best Glove with over a century of combined experience in hand protection manufacturing.

**Black Knight®****CHEMICAL RESISTANT GLOVES****Duz All™****Cannonball™****Hustler™****Neo Hyde®**

PVC (Polyvinyl Chloride) gloves provide unmatched durability and abrasion resistance. PVC is a long-wearing economical choice for refineries and jobs where multiple hazards are present. For high resistance to abrasion and moderate chemical resistance to oils and petrochemicals, PVC gloves may be the best value. Showa Best Glove manufactures a wide range of PVC from the most economical Black Knight to the premium grade nitrile-reinforced Hustler glove.

6781R-145-10	Large	12" Gauntlet w/ 14" nitrile sleeve			• 1 dozen pair per case

**GLOVE APPLICATIONS** Manufacturing, refining, petrochemicals, metal fabrication, plating, insulated against heat and cold

## BEST® Chem Master™

Neoprene over Natural Rubber, 26-mil Thick

\*In compliance 21CFR, parts 170-199

ITEM NO.	SIZE	DESCRIPTION	COLOR	GRIP	PACKAGING
CHMS-07	Small	• 26-mil thick	Black	Tractor tread	• 12 dozen pair per case
CHMM-08	Medium	• 12" long	w/ Blue cuff		• Individually polybagged
CHML-09	Large	• Cotton flock lining			
CHMXL-10	Extra Large	• Wear indicator over-dip			

**GLOVE APPLICATIONS** Manufacturing, aircraft assembly, automotive manufacturing, battery manufacturing, chemical plants, pesticides, plant maintenance

Showa Best Glove's **Chemrest.com** dedicated web portal contains all of the information one needs to correctly select the most applicable and protective chemical resistant glove for multiple potentially hazardous applications. This user-friendly website contains easy-to-read chemical resistance data from several thousand conclusive tests, including rankings from most effective protection for that particular chemical to least effective, not only for ASTM F739 Method for Heavy Exposure, but also for the often overlooked ASTM F1383 Method for Intermittent Contact with Chemicals – an important factor for many industries.

## CHEMICAL RESISTANT GLOVES

BEST Neoprene gloves were some of the safety industry's first Neoprene gloves made with a rough textured grip. Neoprene gloves offer protection from a broad range of chemical substances. Neoprene gloves are the first choice for protection from almost every acid and caustic, and may also be used for protection from exposure to organic solvents.

BEST Chem Master gloves, made with Neoprene over Natural Rubber Latex, offer an inexpensive alternative to 100% Neoprene gloves with similar protection properties. Insulated Neo Grab gloves offer excellent liquid-proof protection for elevated temperatures.

The job applications where Neoprene gloves would be recommended are numerous.

**GLOVE APPLICATIONS** Manufacturing, chemical processing, petrochemicals, food processing, aerospace, automobile degreasing, automotive assembly, painting applications, machine applications using cutting oils.

Showa Best Nitri-Solve gloves are the safety industry's first Nitrile glove certified as NFPA 1992 Compliant for Splash Protection in a Hazmat situation. Best Nitri-Solve glove family of products may be the very best choice for handling fuels and cleanup in hazmat operations especially when fuels, petrochemicals, oils and greases are involved. Nitrile is the ideal choice for Hazmat Decontamination operations where a Level A suit is not required, for spill kits in laboratories and for Meth Lab clean-up. Nitrile gloves are also used extensively for food processing and preparation applications much like Natural Rubber Latex but without the potential for allergic reactions. Nitrile gloves are extremely versatile and used in a wide variety of applications for protection from exposure to hazardous chemicals.

**Nitri-Solve®**

Nitri-DEX® 707

Showa and Best combine over 100 years of experience in making the world a safer place by providing the highest quality in hand protection exemplified by the Nitrile product family.

ATLAS® 720

From hybrid Nitrile gloves that bridge the gap between chemical resistant and disposable to work gloves that provide excellent protection from multiple hazards such as chemical exposure and puncture and abrasion resistance to shoulder length Nitrile gloves, we have a Nitrile glove that fits almost every application.

ATLAS® 772

## Nitri-DEX® 707

MADE IN AMERICA

Unlined Nitrile, Hybrid Formulation, 9-mil Thick

*\*In compliance 21CFR, parts 170-199*

NSK24-11	Extra Large				

**GLOVE APPLICATIONS** Petrochemicals, chemical handling, plating, sewage treatment, oily/greasy applications, fuel handling, refineries, painting, light-to-medium-duty maintenance and clean up, masonry.

## NSK 26™

### Nitrile-Coated, Cotton Interlock Liner

\*In compliance 21CFR, parts 170-199

ITEM NO.	SIZE	DESCRIPTION	COLOR	GRIP	PACKAGING
NSK26-08	Small	• 100% premium nitrile	Royal Blue	Rough	6 dozen pair per case  
NSK26-09	Medium	• 26" long			
NSK26-10	Large	• Cotton interlock liner			
NSK26-11	Extra Large	• Extended gauntlet for upper arm protection			

**GLOVE APPLICATIONS** Petrochemicals, chemical handling, plating, sewage treatment, oily/greasy applications, fuel handling, refineries, painting, light-to-medium-duty maintenance and clean up.

Showa Best Nitrile gloves provide excellent protection for workers in numerous industries such as aerospace, agriculture, construction, masonry and crime scene investigation. The two companies together create a synergy with an array of products stronger than ever before in the safety industry.

Nitrile gloves provide excellent chemical resistance to petroleum hydrocarbon-based products, and rugged polymer characteristics when applied as a coating. Extremely long-wearing durability and puncture resistance is imparted by Nitrile when applied as a coating to a textile substrate.

Nitrile shoulder-length gloves may be ideal for deep tank dipping or work in municipalities and water treatment facilities where protection is needed higher on the arm.

Nitri Master®

NSK 24™

NSK 26™

**BEST® Butyl****BEST® Butyl II****BEST® Viton®****BEST® Viton® II****CHEMICAL RESISTANT GLOVES**

Showa Best Glove provides gloves that protect from extreme hazards such as those encountered in a threat to Homeland Security from a terrorist attack. Butyl gloves provide the highest chemical resistance to nerve agents such as Sarin and Mustard gas and other Toxic Industrial Materials that might be used in a soft target attack. Butyl gloves are a vital component of Level A suits used in the worst hazmat situation from accidental or intentional release of numerous highly toxic chemicals. Butyl gloves also offer the best protection from Ketones such as Acetone or MEK in laboratory or industrial applications.

Best Viton® gloves are made to resist aromatic and halogenated hydrocarbons where hardly any other glove works. Many aromatic hydrocarbons are acutely toxic and some are carcinogens. Protecting the skin from exposure to such toxic chemicals is of paramount importance and in some cases can only be accomplished with highly chemical resistant Best Butyl and Viton® gloves.

# BUTYL

## BEST® Butyl

Unlined Butyl, 25-mil Thick

ITEM NO.	SIZE	DESCRIPTION	COLOR	GRIP	PACKAGING
878-08	Medium	• 25-mil thick	Black	Smooth	1 pair per polybag
878-09	Large	• 14" long			
878-10	Extra Large	• Rolled cuff

**GLOVE APPLICATIONS** Cold storage, outdoor work, maintenance, landscaping, food handling.

Showa® Glove revolutionized the industrial glove market in 1994 with the introduction of the **ATLAS®** line of palm coated gloves. Years of painstaking research resulted in the development of a new generation of hand protection, gloves that not only increased safety, but also enhanced dexterity, comfort and durability. The innovation of **ATLAS** hand protection raised the bar in industrial hand protection and, as a result, remains the world's most popular brand of palm coated latex palm coated gloves.

## GENERAL PURPOSE GLOVES

Nitrile is one of the most abrasion-resistant polymers used in hand protection. Because of this attribute they are very popular in general purpose work gloves. The newest addition to our nitrile general purpose gloves is the **ATLAS®** Assembly Grip. This is a fully coated, liquid-resistant nitrile glove that offers great dexterity and maximum flexibility.

**GLOVE APPLICATIONS** Heavy-duty handling of castings, cores and fabricated metals, brick, tile, plywood, drywall.

**SHOWA®** **BEST®**  
**GLOVE**

For heavy duty jobs where abrasion and puncture are common the NitriPro family is an excellent choice. This family of products was one of the first general purpose nitrile gloves offered in the industrial markets. These gloves feature double dipped design for maximum wear and are a great alternative to leather palm and driver style gloves.

**Nitri-Pro®**

In utilizing our R&D and innovative strategies, we've raised the bar again. The next generation of our Zorb-IT® family is the Zorb-IT® Black-Lite. Feel the second-skin comfort of the seamless black liner. The purpose of the breathable black shell is to reduce odors and to hide grime consistent with everyday wear, thus extending the life of the product. The black sponge nitrile has four distinguishing features: Lite Oil Absorbency without sacrificing grip, innovative design, tactile sensitivity and exacting grip-ability.

Zorb-IT® HV

Zorb-IT Black-Lite®

### GLOVE APPLICATIONS

**Zorb-IT®** Material handling, metal fabrication, durable goods assembly.

**Zorb-IT® Extra** Material handling, metal fabrication, durable goods assembly.

**Zorb-IT® HV** Highway work, construction, material handling, metal fabrication, durable goods assembly.

**Zorb-IT Black-Lite®** Material handling, metal fabrication, durable goods assembly.

**IMPORTANT NOTE:** We have several styles of general purpose gloves that are manufactured with a Kevlar® Liner. Given the cut resistant properties of the Kevlar® Liner, we have moved those styles to our cut resistant section.

Sanitized® is a registered trademark of Sanitized AG.

Kevlar® is a registered trademark of E.I. DuPont de Nemours and Company. Kevlar® is cut resistant but not cut-proof. Do not subject to high speed moving parts or serrated edges.

**WHEN HANDS-ON IS THE ONLY WAY TO GET THE JOB DONE,** it's good to know there's a company hard at work helping to protect you—DuPont. It starts with gloves made of DuPont™ Kevlar® brand fiber, the world's most cut-resistant fiber. It's the same material that's proven itself protecting law enforcement officers, military personnel and firefighters for over 40 years. Our scientists and engineers pioneered a way to use it to give you superior protection against cuts, abrasion and heat, while maintaining the dexterity it takes to do the job. But how do you know you're getting the genuine article? It's simple. Look for the Kevlar® brand, and see a full list of licensed glove and apparel manufacturers at [personalprotection.dupont.com](http://personalprotection.dupont.com)

D/FLEX®

D/FLEX® Plus

Showa Best Glove is now officially recognized as a Trademark Licensee partner of D.S.M. Dyneema N.V. This partnership will have an immediate and sustained impact on many of our high performance fiber categories. Additionally, Showa Best Glove will be able to offer the latest innovations in Dyneema® fiber technology to our customers. All of our hand protection products with Dyneema® fiber are clearly marked throughout the catalog.

Our D/FLEX series of hand protection utilizes several different combinations of engineered fibers (e.g. Dyneema®, steel, composite yarns). The D/FLEX series provides an elevated level of cut resistance in heavy duty and light weight options.

A0620-XL	Extra Large				3121

**GLOVE APPLICATIONS** Electronics, chips and circuit board manufacturing, intricate small parts handling.

Seamless liners reduce contaminants while providing outstanding fit and comfort. Flexible polyurethane coatings provide excellent grip for oily parts while the porous characteristic of PU also allows hands to breathe. This combination of comfort and function enhances worker compliance and increases productivity. Ideal for assembly operations where touch, sensitivity, dexterity and cleanliness are a priority. Protect your delicate parts from lint, fingerprint contamination and static electricity with Showa Hi-Tech gloves. Protect your hands from cuts by utilizing the Hi-Tech gloves that are knitted with HPPE (High Performance Polyethylene).\*\*

## PARTICLE COUNT DATA

The particle count data shows the tendency of gloves to shed particles and cause product contamination. The data illustrates the cleanliness of the textile portion. The particle count data was generated using JIS-B-9923 Method by tumbling the gloves and using optical particle counter. Each value is the average of four tests.

Particle Size (Micron)	Particle Count

## ESD PROPERTIES

This chart shows the range of surface electrical resistivity characteristics of ESD dissipative and conductive gloves from Showa Best Glove.

## ANALYSIS OF EXTRACTABLE IONS IN POLYURETHANE COATING

The extractable ion analytical data shows the chemical cleanliness of mainly the polyurethane coating. The data was generated by the ICP Analytical method. Most ions were below the detection limit. The Polyurethane coating is extremely clean and free from chemical contaminants.

## SURFACE RESISTIVITY EFFECTS OF LAUNDERING

This table shows the surface and volume resistivity after washing of glove A0600. The surface resistivity shows a steady rise with increased number of washings.

Recommended Laundering Procedures: Gloves should be laundered up to 40° C (104° F) in neutral detergent. Hang to dry.

Number of Washings	Surface Electrical Resistivity ( $\Omega$ )	Volume Electrical Resistivity ( $\Omega \cdot \text{CM}$ )
0	$4.3 \times 10^6$	$3.2 \times 10^7$

# ABOUT SHOWA BEST GLOVE

## SHOWA BEST GLOVE IS...

The 2009 integration of Showa Glove and Best Glove created a powerhouse of hand protection. Showa Glove and Best Glove combined have well over a century of hand protection innovations under one roof. SBG is an innovative leader in developing, manufacturing and supplying premium quality hand protection to industrial and medical professionals around the world. An innovative pioneer, SBG boasts an impressive list of firsts in hand protection technology.

## INNOVATION

By percentage, no other glove manufacturer spends more on research and development and overall technical services than does Showa Best Glove. With our state-of-the-art eight-thousand-square-foot Tillotson-Looper Research Center, Showa Best Glove not only develops new hand protection but also conducts the most comprehensive chemical analysis and testing within the personal protective equipment industry. Showa Glove introduced the world's first flat dipped seamless knit glove, the **ATLAS** Fit® in 1994. It's that commitment that delivers revolutionary breakthroughs like N-DEX® and N-DEX Free®, the world's first disposable nitrile and accelerator-free nitrile gloves.

## SUPPORT

Showa Best Glove's dedicated roster of worldwide sales representatives means that no matter where you and your job are, access to a knowledgeable hand protection expert is always nearby. Showa Best Glove hand protection specialists can help you identify your hazardous challenges in the workplace and the hand protection solutions to meet them. And with our new website simply click onto "Contact Us" and find your salesperson by zip code. And don't forget to ask for a comprehensive Hand & Arm Hazard Assessment™ from the Showa Best Glove Sentinel Program.

## SERVICE

Extending the absolute best in customer service is more than simply lip service at Showa Best Glove. We consistently achieve a 98(+)% customer satisfaction and on-time product delivery score. Our Customer Service department consistently ranks among the top among safety manufacturers of any size. That satisfaction rating also owes to our continuous development of new and more customer-friendly terms for doing business. Programs like our Best Bet™ trial order program allow customers to try before they buy. Simply purchase a case quantity of a glove through your authorized Showa Best Glove distributor and if you're not satisfied, return the gloves and pay nothing.

## OUR QUALITY

At Showa Best Glove, we are dedicated to supplying you with the highest quality hand protection available in the world today. We have dedicated professionals at each of our manufacturing facilities to ensure that every glove meets our tight specifications for quality. Many of our manufacturing facilities are also ISO 9001 registered. The goal of our total quality management program is to provide you, our customer, with total satisfaction.

## WHAT'S THE BEST GLOVE/SLEEVE FOR ME?

To help determine which SBG glove/sleeve to use in a specific application, visit [www.showabestglove.com](http://www.showabestglove.com) or contact Showa Best Glove Technical Services via Showa Best Glove Customer Service at 800-241-0323. Let the experts in hand/arm protection for over half a century ensure that you choose the right product for the right application.

## GLOVE LAUNDERING

Many of our gloves can be laundered, which means they can be washed or dry cleaned and then re-used for added value. We include specific laundering instructions with the appropriate SBG glove styles.

## SANITIZED®

Showa Best Glove supported and cut-and-sewn gloves are Sanitized®, a value-added process in which we chemically treat the fabrics we make for our gloves with an anti-microbial bacteriostat, which retards the growth of mold, mildew, and other normal skin microbes and helps negate the effects of perspiration. This means SBG Sanitized® gloves stay fresher and serviceable longer, giving you greater value.

## SENTINEL PROGRAM/EXPERT HAND & ARM ASSESSMENTS

For a comprehensive, no-obligation analysis of all your glove needs, including chemical-resistant gloves, and our Sentinel Program, please contact Showa Best Glove Customer Service at 800-241-0323. A Showa Best Glove sales representative will then contact you or the appropriate individuals within your organization to discuss and arrange details of the assessment. After the assessment, you will receive a detailed, written report with our recommendations for a hand-and-product-protection program designed to give you the most cost-effective combination of safety and productivity.

## BEST BET TRIAL ORDER PROGRAM

Our Best Bet trial order program lets you evaluate our protective products in actual applications and conditions on a no-risk, satisfaction-or-no-pay basis. Trial order either a case, a dozen or a dispenser of the style most suited to your needs. We'll pay the freight. You'll have thirty days from distributor invoice date to test the products to determine if they're the solution to your particular hand/arm or product protection problem. We bet they will be, but if you're not completely satisfied, you don't pay for the gloves. It's that simple. Ask your authorized Showa Best Glove distributor or sales representative, or call our Customer Service Department in Menlo, GA (800-241-0323) for details on how to place a Best Bet order.

## GLOVE/SLEEVE SAMPLES

Upon request, Showa Best Glove will provide you with actual glove/sleeve samples to assist you in determining which SBG glove/sleeve to use in a particular application. Call, fax or e-mail your sample request(s) to the following contact information:

Sample Department  
Showa Best Glove, Inc.  
579 Edison Street  
P.O. Box 8  
Menlo, GA 30731  
FAX: 706-862-6528

[www.showabestglove.com](http://www.showabestglove.com)

## ASSOCIATIONS

Showa Best Glove is a member of the following industry associations:

American Chemical Society/ACS  
American Industrial Hygiene Association/AIHA  
American Institute of Chemical Engineers (AIChE)  
American Society for Quality (ASQ)  
(formerly American Society for Quality Control)  
ASTM International  
International Safety Equipment Association/ISEA  
Institute of Environmental Sciences and Technology/IEST  
National Fire Protection Association/NFPA  
National Hand Protection Association/NHPA  
International Glove Association/IGA  
Safety Equipment Distributors Association/SEDA

**Showa Best Glove is a proud partner with DuPont™ and is a licensed U.S. manufacturer for cut-resistant Kevlar® gloves and apparel.**

# WHAT MAKES THE BEST GLOVE

## POLYMERS

Naturally occurring and man-made polymers are essential building blocks of hand protection. Specific polymers protect workers from specific hazards. There is no ideal glove that works in every situation. Showa Best Glove utilizes a variety of polymer coatings and fabrics, designed for a variety of tasks.

### NATURAL RUBBER

Natural Rubber, the most elastic substance known is found in over two hundred plants including the rubber tree (*Hevea Brasiliensis*), the source of natural rubber latex used to manufacture some Showa Best gloves.

Natural rubber is a flexible and soft, yet tough and durable coating that provides excellent protection from physical hazards and provides an outstanding grip. Natural rubber provides excellent protection from exposure to aqueous chemicals such as acids and caustics, and limited protection from alcohols and ketones. Natural rubber gloves do not hold up well in organic solvents, oils, greases or fuels such as kerosene or gasoline.

**CAUTION:** Natural rubber latex has been shown to cause allergic reactions in sensitized individuals.

### BUTYL (Butyl Rubber)

Butyl Rubber's tight molecular structure provides excellent chemical resistance to gases and ketones. Butyl gloves are manufactured in unsupported version only and are used by the military for protection from chemical warfare agents. Butyl rubber is severely affected by exposure to fuels and aliphatic and aromatic hydrocarbon solvents.

### VITON® (Fluoroelastomer)

Viton provides excellent chemical resistance to fuels used in the aerospace industry. It provides excellent protection from exposure to aromatic hydrocarbons such as benzene, toluene or xylene. Viton gloves are available in unsupported version only. For working with extremely hazardous chemicals such as carcinogenic or highly toxic chemicals, Viton works where no other glove works.

### POLYMER COMBINATIONS FOR THE BEST OF BOTH WORLDS

Certain combinations of polymers are used to make hybrid gloves. Neoprene over natural rubber latex is used in Best® Chem Master™ gloves. Viton over Butyl is used to make the highly chemical resistant Best® Viton® II glove. Nitrile is used as an overdip in several Showa Best natural rubber gloves to provide added resistance to aging, ozone and chemicals.

### NEOPRENE (Polychloroprene, CR)

Strong, durable Neoprene gloves provide excellent protection from physical hazards such as cuts and abrasions and also provide excellent chemical resistance for protection from exposure to organic and inorganic acids. Neoprene gloves also provide excellent

protection from many organic solvents, oils, greases and petrochemicals and resist degradation from ozone, sunlight and oxidation. In addition, Neoprene remains functional and flexible at temperatures ranging from -10° to 300° F (-23° to 150° C).

### NITRILE (Acrylonitrile-Butadiene Rubber)

Nitrile, a versatile synthetic copolymer, is used to make a variety of gloves ranging from heavy-duty work gloves to ultra-thin medical and clean room gloves. Nitrile coating provides tough protection from physical hazards such as cut, puncture or abrasion. Nitrile dipped gloves also provide chemical resistance to petrochemicals (especially fuels), oils, greases, pesticides and other agricultural chemicals while providing excellent dexterity.

### PVC (Polyvinyl Chloride)

PVC is an economical synthetic thermoplastic polymer that is exceptionally durable. PVC gloves provide excellent protection from limited chemical exposure and physical hazard protection. They are noted for being durable and function well in temperatures ranging from -30° up to 212°F (-34° up to 100° C).

## CUFF DESIGNS

**Knitwrist:** designed to keep glove firmly in place, prevents debris from entering glove, enhances warmth, should not be used where quick glove removal is needed.

**Safety Cuff:** allows glove to slide on and off easily, helps protect wrist, releases quickly from hand, won't soften when exposed to perspiration or washing.

**Gauntlet:** provides additional protection for lower forearm, allows maximum forearm dexterity, lets glove slide off easily, protects wrist, releases quickly from hand.

**Note:** Unsupported gloves may have a rolled cuff, a serrated cuff or a straight cuff.

**Color Coded Cuffs:** Many of our styles have color-coded cuffs for easy size identification and pairing after laundering.

## GRIP DESIGNS

### Supported gloves

### Unsupported gloves

**Note:** Some Showa Best gloves have no special grip design, yet still provide good gripping power due to the intrinsic properties of the particular glove polymer.

**Flat Dipped Technology:** The process where various polymers are dipped onto a seamless liner to form a palm coating. This coating enhances grip, dexterity, and puncture and abrasion resistance. The open back design on flat dipped gloves also allows hands to breathe and increases flexibility.

**Disposable Gloves:** This category of unsupported gloves is generally characterized as a thin-gauge glove that is not intended for repeated use. They may have a donning agent such as powder or may be powder-free.

**Laminated Gloves:** This special nitrile-coated fabric is made by transfer-coating the nitrile polymer onto a textured surface and then laminating the nitrile film onto Sanitized® poly-cotton fabric for superior comfort and flexibility.

**Impregnated Gloves:** This special nitrile or PVC-coated fabric is made by knife-coating nitrile or PVC directly onto Sanitized® cotton fabric.

**Supported Gloves:** These gloves offer a polymer coating over a cotton, nylon or Kevlar® liner. The textile substrate imparts added strength and resistance to abrasion, cuts and punctures.

**Unsupported Gloves:** These are polymer gloves with no textile lining. These gloves include heavyweight, medium weight or disposable gloves. They may be chlorinated or have a cotton flock lining for easier donning.

**Cut Resistant Gloves:** This special category is characterized by the utility of the gloves and includes either polymer coated gloves or special high performance yarns that are designed to impart cut-resistance or combinations of these.

## GLOVE SIZE CHART

Glove Size	XS	S	M	L	XL
Hand Size	6-7	7-8	8-9	9-10	10-11

**Sizing:** Use a tape measure to find the circumference of your hand around the palm area. This is close to your actual glove size. For example, 7" is equal to a size 7 glove. Sizes can vary among different manufacturers and styles. For easy size comparison, refer to the above chart and note color coding.

**Mil Thickness:** 1 mil = 1/1000 of an inch

# ADDITIONAL SERVICES

## CHEMREST.COM

Showa Best Glove's CHEMREST.com is the website dedicated strictly to selecting gloves for chemical resistance. This user-friendly website contains ASTM and EN compliant chemical resistance data for several thousand chemical tests and includes the following features:

- Several hundred pure chemicals or chemical mixtures tested
- Various Showa Best gloves tested including new styles
- ASTM test methods for two levels of exposure, heavy and intermittent
- ASTM F739-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Heavy Continuous Exposure where glove materials are totally immersed in the test chemicals for eight hours
- ASTM F1383-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Intermittent Contact where glove material is exposed to the test chemical intermittently
- Degradation testing at four time intervals
- EN 374 ratings for permeation breakthrough time
- Toxicity and risk information for several hundred chemicals
- NFPA health, flammability and reactivity for several hundred chemicals
- International Agency for Research on Cancer status for each chemical
- American Conference of Governmental Industrial Hygienists "Skin-Notation" chemicals are noted
- Environmental Protection Agency's "Extremely Hazardous Chemicals" are noted
- Pictures of each glove with complete information on ordering and uses
- Search the Website by chemical name or CAS number
- E-mail technical questions to Showa Best Glove Technical Services or contact your Best representative in your national or international area
- Print out chemical resistant table to your printer for each chemical
- Linked to showabestglove.com

## CUSTOMIZED CHEMREST™ TESTING

Under certain conditions, we can use our state-of-the-industry permeation testing equipment to analyze the particular chemical or chemical mixture from which you're seeking protection to help you determine which Showa Best Glove chemical-resistant glove you should use. Call 800-241-0323, for more information. Some testing procedures are subject to a modest service fee. Quotations offered upon request.

# TERMS & CONDITIONS

## LIMITED WARRANTY AND DISCLAIMERS

Showa Best Glove warrants only that gloves manufactured by Showa Best Glove will be free from defects in materials and workmanship at the time of manufacture. This limited warranty expires one (1) year after shipment. This limited warranty is exclusive and in lieu of all other warranties, express, implied, or statutory. Showa Best Glove's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement or refund of the original purchase price of the product, at Showa Best Glove's option, and subject to customer's compliance with Showa Best Glove's Returns policy. Showa Best Glove's limited warranty shall not apply, however, to SBG gloves that have been subject to misuse, accident, or negligence during service, handling, or storage.

## DISCLAIMER OF IMPLIED WARRANTIES

All implied warranties which may arise by implication of law or application of course of dealing or usage of trade, including, but not limited to, implied warranties of merchantability or fitness for a particular purpose, are expressly excluded. There are no warranties which extend beyond the description on the face hereof. The end user is solely responsible for the suitability of the glove selection for a particular application.

## FORCE MAJEURE

Showa Best Glove shall not be liable for delay in or failure to perform any of its obligations if the delay or failure results directly or indirectly by Force Majeure. "Force Majeure," as used herein means any law, order, regulations, or government action; failure or delay of transportation; suspension or cancellation of any required license(s); insurrection, riots, national emergencies, war, acts of public enemies, strikes or other labor difficulties; inability to obtain necessary labor, manufacturing facilities, materials or components from Showa Best Glove's usual sources; fires, floods or other catastrophes; acts of God or any cause of like or kind beyond our control.
