## Explanations

### DT (delivery time class)

| DT | Meaning        |
|----|----------------|
| ▶  | preferred type |
| A  | two workdays   |
| B  | one week       |
| C  | three weeks    |
| D  | six weeks      |
| X  | on request     |

Preferred types are device types that can be delivered immediately ex works, i.e. they are dispatched within 24 hours.

If ordered in normal quantities, the products are usually delivered within the specified delivery times, calculated from the date we receive your order.

In exceptional cases, delivery times may vary from those specified.

The delivery times are valid ex works from Siemens AG (products ready for dispatch).

Shipping times depend on the destination and the method of shipping. The standard shipping time for Germany is one day.

The delivery time classes specified in the catalog are valid as of 10/2008 and are constantly being optimized. For more up-to-the-minute information, please visit our site at:

<http://www.siemens.com/automation/mail>.

### PU (price unit)

The PU column (price unit) specifies the quantity to which the price and weight refer.

### PS/P. unit (packaging size/ packaging unit)

The first digit in the PS/P. unit column (packaging size/packaging unit) indicates the minimum order quantity. You can only order this specified quantity or a multiple thereof.

The second digit in the PS/P. unit column (packaging size/packaging unit) specifies the number of units contained in larger packaging (e.g. in a carton). You must order this quantity or a multiple thereof if you want the item to be delivered in a larger packaging quantity. Examples:

| PS/P. unit | Significance                                                                                                                                                                                                                                                                                                                                                                                          |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | You can order one item or a multiple thereof.                                                                                                                                                                                                                                                                                                                                                         |
| 5          | For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc.                                                                                                                                                                                                                                |
| 5/100      | One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units). |

### PG (Price Group)

Each product is assigned to a price group.

### Weight

The value specified in the Weight column specifies the weight in kg for the quantity specified in the PU column (price unit).

### Dimensions

Unless stated otherwise, all dimensions are specified in mm.

# ALPHA Distribution Boards and Terminal Blocks

Catalog ET A1 · 2009/2010

The products and systems listed in this catalog are developed and manufactured using a quality management system certified by VDE and according to EN ISO 9001:2000.

Supersedes:  
Catalog ET A1 · 2008

The products in this catalog can also be found in the electronic Catalog CA 01.

### **Innovation is the key to success.**

We continue to invest heavily in the research and development of new technologies. We have our own experimental and test laboratories where we carry out intensive basic research on the climate in buildings and on fire, gas and explosion protection. This gives us the experience and the opportunity to create solutions that continuously flow into our new products and systems. At special test premises, such as airport buildings and hospital premises, we test the interoperability of the individual systems. This empirical data is incorporated into industry-specific solutions that continually set new standards and underscore our claim to technological leadership.

### **Energy-efficiency and environmental protection is our business principle.**

And this business principle applies cross-company and to each and every employee: We are committed to environmental protection and the careful use of resources. Since 1994, we have been involved in more than 1300 energy efficiency projects, which have jointly contributed to the saving of around 1.5 billion euro in energy costs and reduced the annual CO<sub>2</sub> burden on the environment by approx. 700,000 t. So, as you can see, intelligent solutions in technical infrastructures benefit not only the owners and operators of buildings, but also those who have nothing to do with them.

### **Close customer relations are our USP.**

This is not just a soundbite, we make every effort to ensure close customer relations. We have in-depth knowledge of their business and involve them in the development of our innovations. Our skills make us an expert provider of industry-specific solutions and services, a preferred partner during the life cycle of a building - and allow us to enjoy mutual growth with our customers.

## Answers for Infrastructure.

Siemens Industry meets the great challenges of our time head on. With solutions for technical infrastructure in industrial and non-residential buildings, residential buildings and public facilities, Siemens ensures enhanced comfort and energy efficiency in buildings, as well as the protection and safety of persons, property and business processes. As a longstanding and professional partner with all-round expertise in the industry sector, we offer tailored solutions that generate sustainable added value for our customers.

### Gain a competitive edge - with integrated building solutions.

Total Building Solutions means more innovation from a single source for enhanced functionality under one roof. When it comes to delivering turnkey buildings equipped with cutting edge power distribution, building automation and safety and fire-protection equipment from a single source, Siemens is in a league of its own. And just to show that we are more than just the sum of our parts, our portfolio includes:

- *Electrical installation*  
Distribution boards and terminal blocks, low-voltage controls, building controls, switches and socket outlets
- *Building automation*  
Heating, ventilation and air-conditioning controls, overall energy solutions offering guaranteed savings
- *Safety solutions*  
Access control, video monitoring, burglar protection, alarm control centers, operation of alarm control centers
- *Fire protection*  
Fire alarms, alerting, evacuation, extinction and complete fire protection solutions

Take a closer look at all the options available from Siemens. Check out the opportunities our products provide and discover how we can help you sustainably enhance your competitive edge.

# Electrical Installation from A to Z

## ALPHA Distribution Boards and Terminal Blocks

The ALPHA range comprises small distribution boards, meter cabinets, distribution boards and molded-plastic distribution boards. The ALPHA FIX terminal blocks meet all your needs for clear and manageable wiring using a full range of connection systems.

## BETA Low-Voltage Circuit Protection

Siemens is the only manufacturer to offer an all-round protection concept with an optimally coordinated device range for line protection, personal and fire protection, lightning and overvoltage protection, device and system protection. Switching, measuring and monitoring devices complete the low-voltage circuit protection. Based on an all-round protection concept, our device range offers a complete spectrum of protection devices, such as fuses, miniature circuit-breakers, residual current-operated circuit-breakers and surge suppressors, as well as switching devices, measuring instruments and monitoring devices.

## GAMMA Building Management Systems

Buildings should be energy efficient and easy to adapt quickly and cost-effectively to user requirements. Lighting, sun protection and indoor environment should be achieved in an energy-saving and user-friendly manner, while persons and property are protected against hazards and damage. The tried and tested GAMMA *instabus* building management systems support the flexible networking of electrical devices and functions in buildings over two wires of the bus cable and connection to building management systems over KNXnet/IP – thus providing greater efficiency, safety, flexibility and comfort.

## DELTA Switches and Socket Outlets

The DELTA switch and socket outlet range combines a wide range of different design interfaces with innovative and safe technology. And because the operator interfaces are simple to interchange, you can enjoy complete safety – even when your taste or the environment changes.

## Modern electrical switching and installation technology

These days it's hard to imagine daily life without electricity. Modern electrical switching and installation technology is an essential requirement for ensuring that our use of electricity is safe and user-friendly.

## Shaping the future with innovations

Without innovations there can be no progress. That is a well-known fact. And that is why we make every endeavor to continue producing innovations in the area of electrical installation technology, as well as improving existing products and developing new applications. All this with the aim of offering innovative and high-quality products across the whole spectrum of electrical installation technology in order to further increase our competitive edge and open up new market opportunities.

## Our factory in Regensburg and our branches worldwide

Siemens has been developing products and innovative solutions for industry and for residential and non-residential buildings since 1883. While production began in Berlin, our production has now been based in Regensburg for the last 60 years. Today, this factory is one of the key international manufacturers of installation technology. We use cutting edge equipment: CAD, simulation and automated laboratory equipment.

We now have more than 17 production sites in Europe, Asia and America – which is the best way to ensure compliance with country-specific standards – and the best way to ensure that our customers enjoy local support.

Non-residential

Residential

# Quality and the Environment

## Quality in the context of the environment

Increasing urbanization and a growing global population have meant that it has become one of our key challenges to look after and preserve our natural resources – one we are happy to meet head on.

### Acting responsibly

As part of the ecologically responsible and globally active Siemens Group, we are setting the bar high. Our environmental protection objectives are an integral part of our rigorous quality management.

Even during the development of our products and systems, we take a critical look at their possible effects on the environment. So, without exception, they all comply with the EC Directive RoHS (Restriction of Hazardous Substances). During this development phase, we also lay the foundations for the highest quality: from the very outset, we define reliability requirements and the related quality assurance measures, and these are incorporated into all drafts.

All products and systems are also subject to strict quality specifications during production and testing. We take great care to ensure compliance with these specifications in order to guarantee our customers nothing but the very best quality. Our many certificates bear witness to our success.

### Pioneers in recycling

As a founder member of a non-profit association for the active promotion of the environment-friendly recycling of disabled LV HRC fuse links, Siemens takes a pro-active approach to recycling. The aim of the association is to create a voluntary system for the environment-friendly recycling of LV HRC fuse links, which is simple and free for participating collectors. All proceeds are used to support a range of projects in the training and research sector.

## Pro-active environmental protection

It goes without saying that we are certified to ISO 14001 – as are all Siemens premises. Furthermore, as an active member of ZVEI (German Electrical and Electronic Manufacturers' Association), we pro-actively support the protection of the environment with a wide range of measures, such as the development of binding environmental management systems.

In 2006 – following 1995, 1999 and 2002 – our factory in Regensburg was presented with its fourth Environmental Award of the City of Regensburg for its strong commitment to environmental issues. This latest prize was awarded for the fact that we have voluntarily renounced the use of hazardous substances in our products and for our consistent application of this aim in our galvanic processes.

# Our Added Extra

## Build on a sound basis

With our basic and advanced courses, you can lay the foundations for your business success. In our modern training center in Regensburg you will learn the necessary theoretical and practical essentials from lecturers who are experts in their fields. Dynamic and easy to understand training with multimedia teaching equipment and many practical examples. Available in German and English. If required, we also provide training in-house or in one of our more local Siemens branches.

Our range of training courses covers the whole span of electrical installation. You will be introduced to our entire portfolio of products and their application. Step-by-step we familiarize you with the entire spectrum of modern installation options, thus opening up a whole new world of business opportunities.

Oh, and by the way: In 1991, our Training Center was the first certified training center in the world to offer KNX training courses, and is still the only manufacturer training center to offer the whole range of KNX-certified courses in both German and English.

For details of our current range of courses, please visit our Web site at:

<http://www.siemens.de/installationstechnik/kurse>

Or contact us at:

Tel.: +49 (0) 941 790 2950

e-mail: [cscet.aud@siemens.com](mailto:cscet.aud@siemens.com)

## Comprehensive support

We offer all-round support: if you have any queries regarding our products, the planning of your electrical installation or the availability of technical documentation.

Just give us a call:

Tel.: +49 (0) 180 50 50 222

(0.14 €/minute from a German landline)

Fax: +49 (0) 180 50 50 223

e-mail: [ad.support@siemens.com](mailto:ad.support@siemens.com)

## Installation technology on the net

Visit us on the Internet. Our Web site offers information on all our products – ALPHA Distribution Boards and Terminal Blocks, BETA Low-Voltage Circuit Protection, GAMMA Building Management Systems and DELTA Switches and Socket Outlets, so visit us at:

# Software at your Services

## Enjoy the benefits of the configuration software ALPHA SELECT

Whether you are an installation engineer or a control cabinet engineer – the software ALPHA SELECT® now makes it quicker and easier than ever before to configure distribution boards and meter cabinets together with devices of the BETA Low-Voltage Circuit Protection range.

Intuitive functions guide you through the configuration process step-by-step. Collision tests ensure that installation and/or configuration errors in the software are virtually impossible.

By installing our electronic catalog CA 01 (offline mall) on your computer, you can also use ALPHA SELECT to integrate many products in your project from our industry shopping trolley. *For further information, see section [Planning and Configuration](#).*

Available free of charge at:

<http://www.siemens.com/alpha-select>

Parts list with calculation

## Labeling software for complete electrical installations

The Siemens labeling software means it has never been easier to label your switches and socket outlets, distribution boards and low-voltage controls.

Each product is labeled using a standard printer on prepunched adhesive film or simply on DIN A4 paper. Generally speaking, any device used for electrical installation can be labeled using this labeling system. This allows you to create a neat and tidy distribution board and clearly labeled switches and socket outlets - long after installation.

The benefits:

- Your work is made easier and your installation has a uniform appearance, thanks to a single and consistent labeling system
- Adhesive labels are durable, simple to apply and can be used for all devices.

The program is simple to use and available free of charge on the Internet at:

<http://www.siemens.com/labeling-tool>

# ALPHA SIMBOX Small Distribution Boards

## SIMBOX 63

### Introduction

#### Overview

- Small distribution boards for modular installation devices with mounting depths of 55 mm and from 55 mm to 70 mm
- Modular width 1 MW  $\pm$  18 mm
- Cut-out height in the cover for shock protection: 45 mm

#### Benefits

- Simple cable entry due to the plug-in and latching sliding flange
- Fast wiring through N/PE plug-in terminals (in flush mounting and hollow-wall distribution boards for modular installation devices up to a mounting depth of 70 mm) and tried and test strain-relief clamping terminals (remaining small distribution boards of the SIMBOX 63 range)
- Convenient cable routing thanks to the wiring space that has been expanded to 12 mm in versions of the modular devices with a mounting depth of up to 70 mm
- The modern design of the steel sheet door and its handle enable fast concealed lock installation
- High mechanical strength due to
  - raised masking frame,
  - double-layer wall-recessed boxes made of impact-resistant plastic and
  - electrogalvanized steel sheet doors and masking frames with powder coating
- Masking frames provide flush mounting flexibility of up to 22 mm
- Standard mounting rails can be fitted in the wall-recessed box before installation

#### Application

Small distribution boards are suitable as sub-distribution boards or floor panel boards for all applications in electrical building installations. Due to their small mounting depth, they can be installed close to the respective load center in residential and non-residential buildings, as well as in schools, commercial buildings and shops.

#### Design

##### Versions

Small distribution boards for flush-mounting, hollow-wall, surface-mounting and hood-type distribution boards (without door) are available in 1 to 4-tier versions; hood-type distribution boards with doors are only available in the 1 to 3-tier version.

##### Equipment

The distribution boards can be equipped with modular installation devices, such as MCBs and RCCBs, up to a mounting depth of 55 mm or 70 mm with mountings for snapping onto the 35 mm x 7.5 mm standard mounting rails according to EN 60715.

Each tier can be fitted with devices up to 12 modular widths. For the 3 and 4-tier versions, the upper and lower tier can be extended to 13 modular widths by cutting out the knockouts in the shock protection cover.

#### Technical specifications

|                       |                      |
|-----------------------|----------------------|
| Rated current in A    | Up to 63             |
| Rated voltage in V AC | 400                  |
| Degree of protection  | IP30                 |
| Safety class          | 2 (total insulation) |
| Color                 | Pure white RAL 9010  |

#### Standards

SIMBOX 63 small distribution boards comply with DIN VDE 0603, DIN 43871 and EN 60439-3.

#### N/PE terminals

| Distribution board version | Mounting depth<br>mm | Plug-in terminals | Screw terminals |
|----------------------------|----------------------|-------------------|-----------------|
| Flush mounting             | 55                   | --                | ✓               |

# ALPHA SIMBOX Small Distribution Boards

## SIMBOX 63

### Flush-mounting and hollow-wall distribution boards

#### Overview

- According to DIN VDE 0603, DIN 43871 and EN 60439-3
- Degree of protection IP30
- Safety class 2 (total insulation)
- Standard mounting rail spacing 125 mm, standard mounting rails 35 mm x 7.5 mm according to EN 60715
- With sliding flanges and N/PE terminals
- Color pure white RAL 9010
- Hollow-wall boxes made of flame-retardant material
- Cable binders for strain relief are included in delivery (hollow-wall distribution boards only)

# ALPHA SIMBOX Small Distribution Boards

## SIMBOX 63

Surface-mounting and hood-type  
distribution boards

1

### Overview

- According to DIN VDE 0603, DIN 43871 and EN 60439-3
- Degree of protection IP30
- Safety class 2 (total insulation)
- Standard mounting rail spacing 125 mm, standard mounting rails 35 mm x 7.5 mm according to EN 60715
- N/PE terminals with strain-relief clamping technology
- Color pure white RAL 9010

### Selection and ordering data

### Introduction

#### Overview

- Small distribution boards for modular installation devices with 55 mm to 70 mm device mounting depth
- Modular width 1 MW  $\cong$  18 mm

#### Application

Small distribution boards are suitable as sub-distribution boards or floor panel boards for all applications in electrical building installations. Due to their small mounting depth, they can be installed close to the respective load center in residential and non-residential buildings, as well as in schools, commercial buildings and shops.

#### Design

##### Versions

All versions are available with white and blue transparent door.

##### Equipment

The distribution boards can be equipped with modular installation devices, such as MCBs and RCCBs, up to a device mounting depth of 55 mm or 70 mm for snap-on mounting on the 35 mm x 7.5 mm standard mounting rails according to EN 60715.

Each tier can be fitted with devices up to 12 modular widths.

#### Technical specifications

|                       |                        |
|-----------------------|------------------------|
| Rated current in A    | Up to 63               |
| Rated voltage in V AC | 400                    |
| Degree of protection  | IP40                   |
| Safety class          | 2 (total insulation)   |
| Color                 | Traffic white RAL 9016 |

##### Standards

The SIMBOX LC small distribution boards comply with EN 60439-3 and IEC 60439-3.

### Flush-mounting and surface-mounting versions

#### Overview

- According to EN 60439-3 and IEC 60439-3
- Degree of protection IP40
- Safety class 2 (total insulation)
- Standard mounting rail spacing 150 mm according to EN 60715
- RAL 9016 traffic white

# ALPHA SIMBOX Small Distribution Boards

## SIMBOX WP

### Introduction

#### Overview

- Small distribution boards for modular installation devices with a device mounting depth of 55 mm to 70 mm
- Modular width 1 MW  $\cong$  18 mm

#### Benefits

- The wiring space behind the standard mounting rail is 15 mm and 48 mm, ensuring fast and easy wiring.
- The extremely robust transparent door can also be equipped with a lock, which can be ordered from the range of accessories. The door can be hinged on the right or left without tools; its opening angle is 180°.
- The withdrawable equipment rack ensures easy and fast assembly. The generous wiring space and clearly arranged modular design reduce assembly times by approx. 20 %.
- The plastic materials used can be recycled.

#### Application

Due to the high degree of protection IP65, these small distribution boards can withstand harsh ambient conditions in both indoor and outdoor areas.

Their resistance to dust and splashing water makes them ideal for use in a range of different application areas, such as car washes, farms, joiners' workshops, etc.

#### Special applications

Due to their large temperature operating range (-25 °C to +60 °C), UV radiation resistance and resistance to dust and splashing water, this distribution board range is especially suitable for harsh ambient conditions.

#### Design

##### Equipment

The distribution boards can be equipped with modular installation devices, such as MCBs and RCCBs with 63 A and a mounting depth of 55 mm up to 70 mm, by snapping onto the standard mounting rails 35 mm x 7.5 mm to EN 60715.

Depending on the selection, the small distribution boards can be equipped with devices of 12 to 18 modular widths.

#### Technical specifications

|                       |                      |
|-----------------------|----------------------|
| Rated current in A    | Up to 63             |
| Rated voltage in V AC | 400                  |
| Degree of protection  | IP65                 |
| Safety class          | 2 (total insulation) |
| Color                 | Light gray RAL 7035  |

#### Standards

The SIMBOX WP small distribution boards comply with EN 60439-3 and IEC 60439-3.

### Surface-mounting distribution boards

#### Overview

- According to IEC 60439-3
- Degree of protection IP65
- Suitable for outdoor use (-20 °C to +60 °C)
- Safety class 2 (total insulation)
- UV-resistant

- Standard mounting rail spacing 150 mm, standard mounting rails 35 mm x 7.5 mm according to EN 60715
- Transparent doors
- Color light gray RAL 7035

### System

The modular design of our new Siemens distribution board system draws on our long years of experience in the distribution board sector.

This system has been tailored to meet individual requirements for distribution board installation.

The system comprises unequipped distribution boards, partially equipped distribution boards with cabinet-high quick-assembly kits, cabinet-high quick-assembly kits for modular installation devices for fast equipping and wiring, assembly kits for project-related and individual assembly as well as an extensive range of accessories.

### Enclosures

Material:  
Electrogalvanized and powder-coated sheet steel.

Sheet thickness:  
Body 0.75 mm, door 1 mm

Color:  
RAL 9016 (traffic white).  
Further RAL colors are available on request.

### Quick-assembly kits and assembly kits

The assembly kits are made of sendzimir-galvanized sheet steel and are equipped with molded-plastic covers for a wide range of equipping options, e.g., for switching devices and modular installation devices.

The largest switching devices mountable with the ALPHA 160 - DIN wall-mounted distribution boards are the 3NP40 10 and 3NP40 70 fuse switch disconnectors of size LV HRC 000 and LV HRC 00 with a rated current of up to 160 A.

### Benefits

- Easy planning thanks to modular design
- Ample wiring space behind the standard mounting rail
- Comprehensive range of cabinet-high and frequently used quick-assembly kits and assembly kits for individual and project-related assembly
- Easy assembly thanks to keyhole-fastened components and modules with quick-acting locks
- Short mounting times thanks to quick-assembly kits
- System concept according to DIN, EN and VDE regulations
- Solid sheet-steel enclosure
- Degree of protection:
  - Surface mounting IP43 with door
  - Flush mounting IP31 with door and integrated masking frame
- Safety class 2 (total insulation)
- High-quality surface finish: distribution boards made of electro-galvanized and powder-coated sheet steel, system components made of sendzimir-galvanized sheet steel, galvanized and transparently chromated small components and screws
- Doors can be hinged on the right or left
- Door opening angle of 170°
- Replaceable locking systems (accessories)
- Front cover with sealable 90° quick-acting locks
- Environmentally-compatible and recyclable plastics.

### Application

ALPHA 160 - DIN wall-mounted distribution boards are used for all applications for which a small distribution board does not provide sufficient equipping or wiring space, e.g. in residential, administrative, non-residential, commercial and industrial buildings. Its ultra flat design (depth 140 mm) is an extremely useful addition to the Siemens distribution board product range.

The distribution board and its components are of modular design.

With just a few standard components, it is possible to achieve a wide range of project-related mounting and equipping options.

The ALPHA 160 - DIN wall-mounted distribution board range comprises wall-mounted distribution boards with up to 7 modular installation devices with 12 MW per mounting width (250 mm) each. The standard mounting rail tier spacing is 125 mm or 150 mm. A total of 4 cabinet widths are available, each with an internal dimension of 250 mm.

The distribution boards can be supplied in safety class 2 (total insulation). The standard degree of protection for surface-mounting distribution boards is IP43 and IP31 for flush-mounting distribution boards. The rated current is 160 A.

The modular design of the board enables easy planning, configuration, calculation, ordering and mounting.

Cabinet-high quick-assembly kits or assembly kits that only require a one-size screwdriver for assembly are available for all mountable switching devices and modular installation devices.

# ALPHA 160 - DIN Wall-Mounted Distribution Boards

## Distribution Boards with Built-In Distribution Board Panels

2

### 8GK1 surface and flush-mounting distribution boards with quick-assembly kits

#### Overview

- Cabinet depth of 140 mm
- Safety class 2 (total insulation)
- Tier spacing of 125 mm with N-/PE-bar per panel width
- RAL 9016 (traffic white)
- Surface-mounting distribution board: degree of protection IP43
- Flush-mounting distribution board with integrated masking frame: degree of protection IP31

- Enclosure complete with door. Distribution boards with a width of 750/800 mm or more will be supplied with a double door. The integral rotary handle can also be replaced with a different type of locking system, if preferred.
- Two 2-component flanges per panel width at the top and bottom

Note: wall anchors are included in delivery with flush-mounting distribution boards

For accessories, see page 2/11 ff.

# ALPHA 160 - DIN Wall-Mounted Distribution Boards

## Unequipped Distribution Boards

8GK1 surface and flush-mounting distribution boards

2

### Overview

- Cabinet depth of 140 mm
- Safety class 2 (total insulation)
- RAL 9016 (traffic white)
- Surface-mounting distribution board: degree of protection IP43
- Flush-mounting distribution board with integrated masking frame: degree of protection IP31

- Enclosure complete with door. Distribution boards with a width of 750/800 mm or more will be supplied with a double door. The integral rotary handle can also be replaced with a different type of locking system, if preferred.
- Two 2-component flanges per panel width at the top and bottom

Note: wall anchors are included in delivery with flush-mounting distribution boards

## Quick-Assembly Kits for Unequipped Distribution Boards

2

### 8GK4 quick-assembly kits for modular installation devices

#### Overview

Quick-assembly kits are pre-assembled, cabinet-high system components for the most common applications. Such kits already include the longitudinal stays and can be simply snapped into the unequipped distribution boards of the respective mounting height thanks to the time-saving quick-locking technology.

### Assembly kits for modular installation devices

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 2/7](#)).

# ALPHA 160 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits  
with mounting plates**

2

### Overview

- Assembly kits for individual and project-related assembly, comprising: mounting plate, front cover for unequipped panels including supports, screws and mounting accessories
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 2/7](#)).

# ALPHA 160 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

2

### 8GK4 assembly kits for 3NP40 fuse switch disconnectors

#### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm):
  - Height: 300
  - Width: 250
  - Panel-size grid dimensions: 150 × 250 (H × W)

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 2/7](#)).

### System

The modular design of our new Siemens distribution board system draws on our long years of experience in the distribution board sector.

This system has been tailored to meet individual requirements for distribution board installation.

The system comprises flat packed unequipped distribution boards for surface-mounting distribution boards (delivery in individual parts for self-assembly), pre-assembled unequipped distribution boards for surface and flush-mounting distribution boards, cabinet-height quick-assembly kits for ultra fast equipping and wiring, assembly kits for project-related and individual assembly - and an extensive range of accessories.

### Enclosures

Material: electrogalvanized and powder-coated sheet steel.  
 Sheet thickness, degree of protection IP43: body 0.75 mm, door 1 mm  
 Sheet thickness, degree of protection, IP55: body 1 mm, door 1 mm  
 Color: RAL 9016 (traffic white). Further RAL colors are available on request.

### Quick-assembly kits and assembly kits

The assembly kits are made of sendzimir-galvanized sheet steel and are equipped with molded-plastic covers for a wide range of equipping options, e.g., for switching devices and modular installation devices.

The largest switching devices that can be mounted with the ALPHA 400 - DIN wall-mounted distribution boards are Siemens switching devices with a rated current of 400 A.

### Cabinet dimensions

All dimensions are stated in mm.

Height (internal/external): 600/650, 750/800, 900/950, 1050/1100, 1200/1250, 1350/1400

Width (internal/external): 250/300, 500/550, 750/800, 1000/1050, 1250/1300

Depth (external): 210

Assembly kits in panel-size grid dimensions height x width: 150 x 250

### Flat pack

The new delivery option for the ALPHA distribution board product range offered by Siemens is both a new product and an innovation.

Flat packed distribution boards are delivered as individual parts packaged in cardboard boxes for self-assembly.

These boxes contain all essential individual parts, complete with brief mounting instructions and all mounting accessories.

Only a few manual steps are required to assemble the individual system components to create wall or floor-mounted distribution boards of degree of protection IP43.

The only tool required for such assembly is a one-size screwdriver.

This offers clear advantages and customer benefits: a considerable reduction in the delivery volume and storage space required.

It goes without saying that the distribution boards can also be delivered as pre-assembled items.

## Introduction

3

### Benefits

- Flat pack delivery option (assembly kit for self-assembly, i.e., the quick-assembly kits and assembly kits can be mounted directly onto the platform) or delivery as pre-assembled un-equipped distribution board
- Easy planning thanks to modular design
- Ample wiring space behind the standard mounting rail
- Comprehensive range of cabinet-high and frequently used quick-assembly kits and assembly kits for individual and project-related assembly
- Easy assembly thanks to keyhole-fastened components and modules with quick-acting locks
- Short mounting times thanks to quick-assembly kits
- System concept according to DIN, EN and VDE regulations
- Solid sheet-steel enclosure
- Degree of protection: surface-mounting version: IP43 with door, IP55 with door; flush-mounting version: IP31 with door and integrated masking frame
- Safety class 1 (protective conductor connection) or safety class 2 (total insulation)
- High-quality surface finish: distribution boards made of electrogalvanized and powder-coated sheet steel, system components made of sendzimir-galvanized sheet steel, galvanized and transparently chromated small components and screws
- Doors can be hinged on the right or left
- Door opening angle of 170°
- Replaceable locking systems (accessories)
- Transparent doors in Giugiaro design (accessories)
- Front cover with sealable 90° quick-acting locks
- Environmentally-compatible and recyclable plastics.

### Application

ALPHA 400 - DIN wall-mounted distribution boards are used for all applications where an ALPHA 160 - DIN wall-mounted distribution board does not provide sufficient equipping or wiring space, e.g. in residential, administrative, non-residential, commercial and industrial buildings.

With a mounting depth of 210 mm, it ideally supplements the Siemens distribution board product ranges.

The distribution board and its components are of modular design.

With just a few standard components, it is possible to achieve a wide range of project-related mounting and equipping options.

The ALPHA 400 - DIN wall-mounted distribution board range comprises wall-mounted distribution boards with up to 9 modular installation devices, each with 12 MW per mounting width (250 mm). The standard mounting rail tier spacing is 125 mm or 150 mm. A total of 5 cabinet mounting widths are available, each with an internal dimension of 250 mm.

The distribution boards can be supplied in safety class 1 (protective conductor connection) or safety class 2 (total insulation). The standard degree of protection for surface-mounting distribution boards is IP43 and IP55. The standard degree of protection for flush-mounting distribution boards is IP31. The rated current is 400 A.

The modular design of the board enables easy planning, configuration, calculation, ordering and mounting.

Cabinet-high quick-assembly kits or assembly kits that only require a one-size screwdriver for assembly are available for all mountable switching devices and modular installation devices.

### Design

#### Platform concept

A further innovation of the ALPHA distribution board product range is the "platform concept", which means that all supporting build-in components are mounted directly onto the platform (rear plate).

The covering parts (side panels, roofing plates, base plates and doors) are either assembled immediately or at a later point in time, irrespective of the assembly kits. The fact that the quick-assembly kits and assembly kits can be equipped and wired with modular installation devices is an additional advantage.

The completely wired assembly kits can then be placed on the platform and secured to the rear plate with a quick-acting lug. In addition, the quick-assembly kits or assembly kits can optionally be secured with a screw, which is included in delivery. The en-

closure covering parts such as top, base and side plates are then mounted.

The available wiring space can be optimally utilized as the rear plates of the modular installation devices can be manually accessed from all four sides.

The advantage of being able to fit the remaining parts of the enclosure at a later stage also makes it possible to prevent damage to the coating or other visual damage.

During the mounting phase, the platform can be optionally mounted with or without the covering parts and doors. The completely equipped and wired assembly kits or quick-assembly kits are then simply snapped onto the platform or in the pre-assembled unequipped distribution board.

The completely equipped and wired assembly kits or quick-assembly kits are fastened directly onto the platform (rear plate).

The front covers can now be mounted.

The covering parts such as top, base and side plates are then mounted.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Unequipped Distribution Boards (Flat Pack)

### 8GK1 surface-mounting distribution boards

3

#### Overview

- Flat pack: distribution board assembly kit for self-assembly; the cabinet-high quick-assembly kits and the assembly kits can be mounted directly onto the platform of this distribution board assembly kit
- Cabinet depth of 210 mm
- Degree of protection IP43
- Safety class 1 (protective conductor connection) or safety class 2 (total insulation)
- RAL 9016 (traffic white)
- Unassembled enclosure with unassembled enclosed door and rotary handle, which can be replaced by other locking systems. Distribution boards with a width of 750 mm/800 mm or more will be supplied with a double door.
- Flanges (per panel width): one 1-component flange at the bottom, one 2-component flange at the top

#### Selection and ordering data

For quick-assembly kits and assembly kits, see pages 3/13 to 3/25.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Unequipped Distribution Boards – Pre-Assembled

### 8GK1 surface-mounting distribution boards, IP43

3

#### Overview

- Cabinet depth of 210 mm
- Degree of protection IP43
- Safety class 1 (protective conductor connection) or safety class 2 (total insulation)
- RAL 9016 (traffic white)
- Enclosure pre-assembled with door and rotary handle, which can be replaced by other locking systems. Distribution boards with a width of 750/800 mm or more will be supplied with a double door.
- Flanges (per panel width): one 1-component flange at the bottom, one 2-component flange at the top

For quick-assembly kits and assembly kits, see pages 3/13 to 3/25.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Unequipped Distribution Boards – Pre-Assembled

### 8GK1 surface-mounting distribution boards, IP55

3

#### Overview

- Cabinet depth of 210 mm
- Degree of protection IP55
- Safety class 1 (protective conductor connection) or safety class 2 (total insulation)
- RAL 9016 (traffic white)
- Enclosure pre-assembled with door and rotary handle, which can be replaced by other locking systems. Distribution boards with a width of 750 mm/800 mm or more will be supplied with a double door.
- Flanges (per panel width): one 2-component flange each at the top and bottom

#### Selection and ordering data

For quick-assembly kits and assembly kits, see pages 3/13 to 3/25.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Unequipped Distribution Boards – Pre-Assembled

### 8GK1 flush-mounting distribution boards

3

#### Overview

- Cabinet depth of 210 mm
- Degree of protection: IP31 (flush-mounting design comes with an integrated masking frame)
- Safety class 1 (protective conductor connection) or safety class 2 (total insulation)
- RAL 9016 (traffic white)

- Enclosure pre-assembled with door and rotary handle, which can be replaced by other locking systems. Distribution boards with a width of 750/800 mm or more will be supplied with a double door.
- Flanges:
  - Safety class 1 is delivered without flange
  - Safety class 2 include a 1-component flange, top and bottom

Note: wall anchors are included in delivery with flush-mounting distribution boards.

#### Selection and ordering data

For quick-assembly kits and assembly kits, see pages 3/13 to 3/25.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Quick-Assembly Kits for Unequipped Distribution Boards

8GK4 quick-assembly kits  
for modular installation devices

3

### Overview

Quick-assembly kits are pre-assembled cabinet-high system components for the most common applications. Such kits already include the longitudinal stays and can be simply snapped

into the unequipped distribution boards of the respective mounting height, thanks to the time-saving quick-locking technology.

The quick-assembly kits with a width of 250 mm are equipped with 7.5 mm standard mounting rails.  
The quick-assembly kits with a width of 500 mm are equipped with 15 mm standard mounting rails.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Quick-Assembly Kits for Unequipped Distribution Boards

### 8GK4 quick-assembly kit combinations

3

#### Overview

- Terminal compartment height: 300 mm
- Quick-assembly kits are pre-assembled cabinet-high system components for the most common applications. Such kits already include the longitudinal stays and can be simply

snapped into the unequipped distribution boards of the respective mounting height.

#### Selection and ordering data

The quick-assembly kits with a width of 250 mm are equipped with 7.5 mm standard mounting rails.

The quick-assembly kits with a width of 500 mm are equipped with 15 mm standard mounting rails.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for modular installation devices

3

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 3/15).

The assembly kits with a width of 250 mm are equipped with 7.5 mm standard mounting rails.

The assembly kits with a width of 500/750 mm are equipped with 15 mm standard mounting rails.

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits  
for terminal blocks**

3

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)
  - For horizontal terminal blocks
    - Height: 150, 300, 450
    - Width: 250, 500, 750
    - Panel-size grid dimensions H × W: 150 × 250
  - For vertical terminal blocks
    - Height: 300, 450, 600
    - Width: 250, 500, 750
    - Panel-size grid dimensions H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 3/15).

### Selection and ordering data

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits with mounting plates

3

#### Overview

- Assembly kits for individual and project-related assembly, comprising: mounting plate, front cover for unequipped panels including supports, mounting brackets (depth-adjustable), screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).
- If the mounting plate is fitted so that it extends over several panel widths, it is not possible to place a longitudinal stay in the middle.

#### Selection and ordering data

For accessories, see page 3/28 ff.

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for unequipped panels

3

### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 75, 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for unequipped panels with deep-drawn cover, 40 mm

3

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NP4 fuse switch disconnectors for busbar mounting

3

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions H x W: 150 x 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).
- The Cu busbar and busbar supports must be ordered separately ([see page 3/30](#)).

#### Selection and ordering data

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4/8GE3 assembly kits  
for SENTRON VL/VF circuit-breakers

3

### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).

# ALPHA 400 - DIN Wall-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for bus-mounting fuse bases for mounting on busbar systems

3

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, busbar supports for bus-mounting fuse bases, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).
- The Cu busbar must be ordered separately ([see page 3/30](#)).

**8GE assembly kits  
for meter mounting**

### Overview

- Assembly kits for individual and project-related assembly, not standardized, only for internal measurements, comprising: meter support plate with all-round partitions, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 450  
Width: 250  
Panel-size grid dimensions H x W: 150 x 250

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 3/15](#)).

### System

The modular design of our new Siemens distribution board system draws on our long years of experience in the distribution board sector.

This system has been tailored to meet individual requirements for distribution board installation.

The system comprises unequipped distribution boards with degree of protection IP43 in the form of flat packs (delivery in individual parts for self-assembly, explained in detail in chapter 3), pre-assembled unequipped distribution boards with degree of protection IP55, assembly kits for project-related and individual assembly and an extensive range of accessories.

### Enclosures

Material: electrogalvanized and powder-coated sheet steel.

Sheet thickness, degree of protection IP43/IP55: body 1 mm, door 1 mm

Color: RAL 7035 (light gray), further RAL colors available on request.

### Assembly kits

The assembly kits are made of sendzimir-galvanized sheet steel and are equipped with molded-plastic covers for a wide range of equipping options, e.g., for switching devices and modular installation devices.

The largest switching devices mountable with the ALPHA 630 - DIN floor-mounted distribution boards are Siemens switching devices with a rated current of up to 630 A.

### Cabinet dimensions

All dimensions are stated in mm.

Height: Internal dimensions: 1800, external dimensions with base: 1950

Width (internal/external): 250/300, 500/550, 750/800, 1000/1050, 1250/1300

Depth (external): 210, 250, 320

Assembly kits in panel-size grid dimensions, height x width: 150 x 250

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Introduction

4

### Benefits

- Flat pack delivery option (assembly kit for self-assembly, the assembly kits can be mounted directly onto the platform) or as pre-assembled unequipped distribution boards
- Easy planning thanks to modular design
- Ample wiring space behind the standard mounting rail
- Comprehensive range of assembly kits for individual and project-related assembly of Siemens switching devices and modular installation devices
- Easy assembly thanks to keyhole-fastened components and modules with quick-acting locks
- System concept according to DIN, EN and VDE regulations
- Solid sheet-steel enclosure
- Degrees of protection: IP43 and IP55
- Safety class 1 (protective conductor connection) and safety class 2 (total insulation)
- High-quality surface finish: distribution boards made of electrogalvanized and powder-coated sheet steel, system components made of sendzimir-galvanized sheet steel, galvanized and transparently chromated small components and screws
- Doors can be hinged on the right or left
- Door opening angle of 170°
- Replaceable locking systems (accessories)
- Transparent doors in Giugiaro design (accessories)
- Front cover with sealable 90° quick-acting locks
- Environmentally-compatible and recyclable plastics

### Application

The ALPHA 630 - DIN floor-mounted distribution boards are used for all applications for which the ALPHA 400 - DIN wall-mounted distribution boards do not provide sufficient equipping or wiring space, e.g. in administrative, non-residential, commercial and industrial buildings.

With three available mounting depths of 210 mm, 250 mm and 320 mm, it ideally supplements the Siemens distribution board product ranges.

The distribution board and its components are of modular design.

With just a few standard components, it is possible to achieve a wide range of project-related mounting and equipping options.

The ALPHA 630 - DIN floor-mounted distribution board range comprises wall-mounted distribution boards with up to 12 modular installation devices each with 12 MW per mounting width (250 mm). The standard mounting rail tier spacing is 150 mm. A total of 5 cabinet mounting widths are available, each with an internal dimension of 250 mm.

The distribution boards can be supplied in safety class 1 (protective conductor connection) and safety class 2 (total insulation). The standard degree of protection for floor-mounted distribution boards is IP43 for cabinet depths of 210 mm (flat pack: delivery as individual parts) and IP55 (pre-assembled unequipped distribution boards) for standard cabinet depths of 250 mm and 320 mm. The rated current is 630 A.

40-mm or 60-mm busbar systems with dimensions of up to 30 mm × 10 mm may be installed.

The modular design of the board enables easy planning, configuration, calculation, ordering and mounting.

Assembly kits that only require a one-size screwdriver for assembly are available for all mountable switching devices and modular installation devices.

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Unequipped Distribution Boards

### 8GK1 surface-mounting distribution boards, IP43

#### Overview

- Delivery options:
  - Flat pack (assembly kit for self-assembly: the cabinet-high quick-assembly kits and the assembly kits can be mounted directly onto the platform (rear plate) of this assembly kit)
  - Pre-assembled unequipped distribution board
- Cabinet depth of 210 mm
- Safety class 1 (protective conductor connection) and safety class 2 (total insulation)
- Degree of protection IP43
- Color RAL 7035 (light gray)
- Enclosure (with base) with unassembled enclosed door or pre-assembled enclosure (with base) complete with door and espagnolette lock, which can be replaced with other locking systems. Distribution boards with a width of 750 mm/800 mm or more will be supplied with a double door.
- Flanges (per panel width): one 2-component flange at the top

##### Longitudinal stays

- To mount the assembly kits in unequipped distribution boards, two longitudinal stays are required for each assembly kit width
- Height 1800 mm, width 210 mm
- 1 set = 2 stays

For assembly kits, see page 4/9 ff.

For accessories, see page 4/21 ff.

\* You can order this quantity or a multiple thereof.

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Unequipped Distribution Boards

### 8GK1 surface-mounting distribution boards, IP55

#### Overview

- Type of delivery: Pre-assembled unequipped distribution board
- Cabinet depths: 250 mm and 320 mm
- Safety class 1 (protective conductor connection) and safety class 2 (total insulation)
- Degree of protection IP55
- Color RAL 7035 (light gray)
- Enclosure (with base) with unassembled enclosed door or pre-assembled enclosure (with base) complete with door and espagnolette lock, which can be replaced with other locking systems. Distribution boards with a width of 750 mm/800 mm or more will be supplied with a double door.
- Flange, SCII:
  - Depth 250 mm: per panel width: one 2-component flange each at the top and bottom
  - Depth 320 mm: per panel width: two 2-component flanges each at the top and bottom
- Flange, SCI:
  - Depth 250 mm: per panel width: one 2-component flange at the top
  - Depth 320 mm: per panel width: two 2-component flanges each at the top (to achieve degree of protection IP55, one 2-component flange is also required at the bottom, please order separately if required)

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Marshaling Boxes

### 8GK1 surface-mounting distribution boards

#### Overview

- Marshaling boxes for supporting the incoming/outgoing cables, option for terminal blocks available
- Large, foamed front cover with fixing screws
- Dimensions  
Height 350 mm, depths 210 mm, 250 mm and 320 mm

- Safety class 1 (protective conductor connection)
- Degree of protection IP43 and IP55
- Color RAL 7035 (light gray)

Note: Flanges and 8GK9 920-0KK31 connecting kit must be ordered separately, [see accessories on page 4/21 ff.](#)

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits  
for modular installation devices**

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for terminal blocks

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits, horizontal (mm)  
Height: 150, 300, 450  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250
- Dimensions of assembly kits, vertical (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
with mounting plates

### Overview

- Assembly kits for individual and project-related assembly, comprising: mounting plate, front cover for unequipped panels including supports, mounting brackets (depth-adjustable), screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).
- If the mounting plate is fitted so that it extends over several panel widths, it is not possible to place a longitudinal stay in the middle.

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for unequipped panels

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 75, 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NP4 fuse switch disconnectors for busbar mounting

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H x W: 150 x 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 4/5 and 4/7).
- The Cu busbar and busbar supports must be ordered separately (see page 4/25).

#### Selection and ordering data

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4/8GE3 assembly kits  
for SENTRON VL/VF circuit-breakers

### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NJ4 in-line fuse switch disconnectors

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, busbar supports on support plate, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 600, 750  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 4/5 and 4/7).
- The Cu busbar must be ordered separately!
- Caution: max. rated current of 630 A!
- The assembly kits for sizes 1-3 require a mounting depth of 320 mm.
- If the assembly kits are fully equipped, an incoming feeder bay is required.
- If mounting the in-line fuse switch-disconnectors with 3NJ4 911-3AA00 busbar terminals, the assembly kits cannot be fully equipped!

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits for bus-mounting fuse bases, for mounting on busbar systems**

### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, busbar supports for bus-mounting fuse bases, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 4/5 and 4/7](#)).
- The Cu busbar must be ordered separately ([see page 4/25](#)).

# ALPHA 630 - DIN Floor-Mounted Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for SR60 busbar systems, 60 mm

### Overview

- Assembly kits for individual and project-related assembly, comprising: deep-drawn front cover with supports
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250, 500, 700  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see pages 4/5 and 4/7).
- The Cu busbar and busbar supports must be ordered separately (see page 4/25).

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for SR60 busbar systems, 60 mm

- ① Three-pole NEOZED bus-mounting base
- ② Three-pole DIAZED bus-mounting base
- ③ NEOZED bus-mounting switch disconnecter
- ④ Adapter for modular installation devices acc. to DIN 43880
- ⑤ LV HRC fuse switch disconnecter

Built-in components

### 8GE assembly kits for meter mounting

#### Overview

- Assembly kits for individual and project-related assembly, not standardized, only for internal measurements, comprising: meter support plate with all-round partitions, screws and mounting accessories
  - Dimensions of assembly kits (H x W): 450 mm x 250 mm
  - Panel-size grid dimensions (H x W): 150 mm x 250 mm
- Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 4/5 and 4/7](#)).

# ALPHA AS Modular Distribution Boards

## Introduction

### Overview

#### System

The modular design of our new Siemens distribution board system draws on our long years of experience in the distribution board sector.

This system has been tailored to meet individual requirements for distribution board installation.

The new ALPHA AS modular distribution board system comprises unequipped distribution boards with removable rear plates, doors, bases with degree of protection IP55, assembly kits for project-related and individual assembly - and an extensive range of accessories.

#### Enclosures

Material: electrogalvanized and powder-coated sheet steel.

Sheet thickness, degree of protection IP43/IP55: body 1.25 mm, door 1 mm

Color: RAL 7035 (light gray), further RAL colors available on request.

#### Assembly kits

The assembly kits are made of sendzimir-galvanized sheet steel and are equipped with molded-plastic covers for a wide range of equipping options, e.g., for switching devices and modular installation devices.

The largest switchgear that can be installed in the ALPHA AS is Siemens switchgear up to a maximum rated current of 630 A. An expansion to 1250 A will be available soon.

#### Cabinet dimensions

All dimensions are stated in mm.

Height: internal dimensions: 1800, external dimensions with base: 1950

Width (internal/external): 250/300, 500/550, 750/800, 1000/1050, 1250/1300

Depth (external): 400

Assembly kits in panel-size grid dimensions, height x width: 150 x 250

### Benefits

- Busbars are routed over the rear plate through butt-mounted distribution boards
- The removable rear plate facilitates installation
- Degree of protection IP55
- Safety class 1 (protective conductor connection)
- Easy planning thanks to modular design
- Flexible expansion with a range of assembly kits from the ALPHA 630 cabinet system
- Generous wiring spaces
- Easy assembly thanks to keyhole-fastened components and modules with quick-acting locks
- System concept according to DIN, EN and VDE regulations
- High-quality surface finish: distribution boards made of electrogalvanized and powder-coated sheet steel, system components made of sendzimir-galvanized sheet steel, galvanized and transparently chromated small components and screws
- Doors can be hinged on the right or left
- Door opening angle of 170°
- Replaceable locking systems (accessories)
- Front cover with sealable 90° quick-acting locks
- Environmentally-compatible and recyclable plastics

### Application

The ALPHA AS modular distribution board is ideal for use where busbar routings are required to be fed through butt-mounted floor-mounted distribution boards or where distribution boards with deeper enclosures are required (e.g. in administrative, non-residential, commercial and industrial buildings). It supplements the Siemens floor-mounted distribution board range with the mounting depth 400 mm.

The distribution board and its components are of modular design.

The ALPHA AS modular distribution board is designed for use with ALPHA DIN assembly kits.

The modular distribution boards can be supplied in safety class 1 (protective conductor connection). Degree of protection IP55 can be achieved if used together with the required flanges.

With just a few standard components, it is possible to achieve a wide range of project-related mounting and equipping options. 40-mm, 60-mm and 185-mm busbar systems with dimensions up to 100 mm x 10 mm can be installed.

The modular design of the board enables easy planning, configuration, calculation, ordering and mounting.

Assembly kits that only require a one-size screwdriver for assembly are available for all mountable switching devices and modular installation devices.

# ALPHA AS Modular Distribution Boards

## Unequipped Distribution Boards

### Modular distribution boards

#### Overview

- Type of delivery: pre-assembled unequipped distribution boards, with removable rear plate, door and open side panels
- Cabinet depth of 400 mm
- Safety class 1 (protective conductor connection)
- Degree of protection IP55
- Color RAL 7035 (light gray)
- Enclosure (with base) pre-assembled with door and espagnolette lock, which can be replaced by other locking systems. Distribution boards with a width of 750 mm/800 mm or more will be supplied with a double door.
- Flanges must be ordered separately

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for modular installation devices

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).

The assembly kits with a width of 250 mm are equipped with 7.5 mm standard mounting rails.

The assembly kits with a width of 500/750 mm are equipped with 15 mm standard mounting rails.

For accessories, see page 5/20 ff.

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits  
for terminal blocks**

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits, horizontal (mm)  
Height: 150, 300, 450  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250
- Dimensions of assembly kits, vertical (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits with mounting plates

#### Overview

- Assembly kits for individual and project-related assembly, comprising: mounting plate, front cover for unequipped panels including supports, mounting brackets (depth-adjustable), screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).
- If the mounting plate is fitted so that it extends over several panel widths, it is not possible to place a longitudinal stay in the middle.

#### Selection and ordering data

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for unequipped panels

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 75, 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 5/4).

#### Selection and ordering data

- Dimensions of assembly kits (mm)  
Height: 300, 450,  
Width: 250, 500, 750  
Panel-size grid dimensions H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 5/4).

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NP4 fuse switch disconnectors for mounting on support plate

#### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250, 500  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits for 3NP4 fuse switch disconnectors for busbar mounting

### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 5/4).
- The Cu busbar and busbar supports must be ordered separately (see page 5/20).

## Assembly Kits for Unequipped Distribution Boards

### 8GK4/8GE3 assembly kits for SENTRON VL circuit-breakers

#### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 5/4).

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits for  
3NJ4 in-line fuse switch disconnectors

### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, busbar supports on support plate, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 600, 750  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).
- The Cu busbar must be ordered separately!
- Caution: max. rated current of 630 A!
- The assembly kits for sizes 1-3 require a mounting depth of 320 mm.
- If the assembly kits are fully equipped, an incoming feeder bay is required.
- If mounting the in-line fuse switch-disconnectors with 3NJ4 911-3AA00 busbar terminals, the assembly kits cannot be fully equipped!

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for bus-mounting fuse bases for mounting on busbar systems

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, busbar supports for bus-mounting fuse bases, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).
- The Cu busbar must be ordered separately ([see page 5/20](#)).

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for SR60 busbar systems, 60 mm

### Overview

- Assembly kits for individual and project-related assembly, comprising: deep-drawn front cover with supports
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250, 500, 700  
Panel-size grid dimensions H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately (see page 5/4).
- The Cu busbar and busbar supports must be ordered separately (see page 5/20).

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for SR60 busbar systems, 60 mm

- ① Three-pole NEOZED bus-mounting base
- ② Three-pole DIAZED bus-mounting base
- ③ NEOZED bus-mounting switch disconnector
- ④ Adapter for modular installation devices acc. to DIN 43880
- ⑤ LV HRC fuse switch disconnector

Built-in components

# ALPHA AS Modular Distribution Boards

## Assembly Kits for Unequipped Distribution Boards

### 8GE assembly kits for meter mounting

#### Overview

- Assembly kits for individual and project-related assembly, not standardized, only for internal measurements, comprising: meter support plate with all-round partitions, screws and mounting accessories
- Dimensions of assembly kits (H x W): 450 mm x 250 mm

- Panel-size grid dimensions (H x W): 150 mm x 250 mm

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately ([see page 5/4](#)).

### Benefits

- Modular components for manifold distribution board combinations for stand-alone or side-by-side mounting
- High quality standards and safety standards
- Flexible application with a wide range of assembly kits and accessories
- Easy mounting thanks to modular component system
- Safe contacting thanks to grounding concept with self-tapping screws
- The right version for any requirement
- Easy planning and configuration
- Attractive design

### Application

The stand-alone and modular distribution boards comply with the relevant regulations.

They can be used as main distribution boards and sub-distribution boards in:

- Administrative and non-residential buildings
- Industrial and commercial buildings
- Public buildings, e.g. schools and hospitals
- They can also be used as control cabinets for heating ventilation, electronics and communication.

### Technical specifications

#### Environmental aspects

The plastics used can be recycled. The colors used are solvent, cadmium and lead free.

#### Internal partitions (separations)

Partitions increase operator safety and offer protection against ingressing foreign solid bodies from adjoining units.

# ALPHA Modular Distribution Boards up to 1600 A

## Unequipped Distribution Boards

Distribution board racks and add-on parts  
for side-by-side mounting

### Overview

- Modular distribution boards for side-by-side mounting
- According to DIN VDE 0660, Part 500, EN 60439-1
- Degree of protection up to IP55
- Safety class 1 (protective conductor connection)
- Cabinet frames made of 2 mm profiled sheet steel, electrogalvanized, powder-coated
- Color: RAL 7035 light gray, further RAL colors available on request
- Fixing grids 25 mm vertical and horizontal, according to DIN 43660
- Installation with self-tapping screws
- 400 mm wide sections for lateral cable or busbar compartments

### Design

Assembled modular distribution boards, consisting of:

- Cabinet frames
- Rear plates

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
for modular installation devices

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H x W: 150 x 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

The assembly kits with a width of 250 mm are equipped with 7.5 mm standard mounting rails.

The assembly kits with a width of 500/750 mm are equipped with 15 mm standard mounting rails.

For accessories, see page 6/16 ff.

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for terminal blocks

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of the assembly kits
  - For horizontal terminal blocks (mm)
    - Height: 150, 300, 450
    - Width: 250, 500, 750
    - Panel-size grid dimensions
    - H × W: 150 × 250
  - For vertical terminal blocks (mm)
    - Height: 300, 450, 600
    - Width: 250, 500, 750
    - Panel-size grid dimensions
    - H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

8GK4 assembly kits  
with mounting plates

### Overview

- Assembly kits for individual and project-related assembly, comprising: mounting plate, front cover for unequipped panels including supports, mounting brackets (depth-adjustable), screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).
- If the mounting plate is fitted so that it extends over several panel widths, it is not possible to place a longitudinal stay in the middle.

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for unequipped panels

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 75, 150, 300, 450, 600  
Width: 250, 500, 750  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

#### Selection and ordering data

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits for unequipped panels with deep-drawn cover, 40 mm**

### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450,  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

8GK4 501-2KK13

For accessories, see page 6/16 ff.

**8GK4 assembly kits for 3NP4 fuse switch disconnectors for mounting on support plate**

### Overview

- Assembly kits for individual and project-related assembly, comprising: support plate, front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250, 500  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NP4 fuse switch disconnectors for busbar mounting

#### Overview

- Assembly kits for individual and project-related assembly, comprising: front cover for unequipped panels including supports, molded-plastic cover, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

#### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).
- The Cu busbar and busbar supports must be ordered separately (see page 4/25).

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

8GK4/8GE3 assembly kits  
for SENTRON VL/VF circuit breakers

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450, 600  
Width: 250, 500  
Panel-size grid dimensions H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see page 6/16).

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

### 8GK4 assembly kits for 3NJ4 in-line fuse switch disconnectors

#### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 600, 750  
Width: 250, 500, 750  
Panel-size grid dimensions H × W: 150 × 250

- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary ([see page 6/16](#)).

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

**8GK4 assembly kits for bus-mounting fuse bases for mounting on busbar systems**

### Overview

- Assembly kits for individual and project-related assembly, comprising: equipment racks, front cover for unequipped panels including supports, busbar supports for bus-mounting fuse bases, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 300, 450  
Width: 250  
Panel-size grid dimensions  
H × W: 150 × 250
- The front cover for unequipped panels is sealable as standard and the quick-acting locking technique facilitates fast and reliable fixation on the supports

### Note:

- To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary ([see page 6/16](#)).
- The Cu busbar must be ordered separately ([see page 4/25](#)).

# ALPHA Modular Distribution Boards up to 1600 A

## Assembly Kits for Unequipped Distribution Boards

### 8GE assembly kits for meter mounting

#### Overview

- Assembly kits for individual and project-related assembly, not standardized, only for internal measurements, comprising: meter support plate with all-round partitions, screws and mounting accessories
- Dimensions of assembly kits (mm)  
Height: 450  
Width: 250  
Panel-size grid dimensions H × W: 150 × 250

Note: To mount the assembly kits in unequipped distribution boards, 2 longitudinal stays are required per assembly kit. These must be ordered separately if necessary (see [page 6/16](#)).

#### Connecting kits

##### Versions

- IP41  
For side-by-side mounting of enclosures with screws, washers and nuts
- IP55  
For side-by-side mounting of enclosures with screws, washers, nuts and 10 m of sealing strip roll

#### Longitudinal stays acc. to DIN 43870 (8GK system)

- For mounting assembly kits that are smaller than the overall width of the distribution board
- 1 set = 2 stays

8GK4 854-8KK05

#### Locking systems

##### Versions

- Rotary handles
  - Recessable
  - With mounting options for profile semicylinders

8GG3 800-1

- Profile semicylinders with E012 lock
  - Incl. key
  - 1 set = 2 locking systems

8GD9 255

- Profile semicylinders with Senat tumbler
  - With 2 keys

# ALPHA Modular Distribution Boards up to 1600 A

## Accessories

### Standard busbar supports for horizontal mounting

#### Overview

- For mounting and allocation on the rear plate, minimum cabinet depth 600 mm
- For rated current of busbars at +35 °C ambient temperature, observe derating factor to DIN 43671
- Crossarms must be ordered separately

#### Technical specifications

## Introduction

### Overview

|                                                                                     | Devices                                     | Page | Function                                                                                                                                                                                                           |
|-------------------------------------------------------------------------------------|---------------------------------------------|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | Unequipped distribution boards              | 7/6  | Totally insulated empty enclosures for flush and surface mounting, which can be equipped with counters, distribution boards and telecommunications panels.                                                         |
|    | Distribution board panels                   | 7/8  | Cabinet-high quick-assembly kits with standard mounting rails and tier spacing of 125 mm. Includes N/PE bar.                                                                                                       |
|    | Distribution board panels with S-system     | 7/9  | Cabinet-high quick-assembly kits with standard mounting rails and tier spacing of 125 mm. Includes N/PE bar. Lower connection compartment with busbar system 4 or 5-pole.                                          |
|   | Quick-assembly kits, for telecommunications | 7/10 | Cabinet-high quick-assembly kits with perforated steel plate for the mounting of multimedia components. Includes captive nuts.                                                                                     |
|  | Quick-assembly kits, without wiring kits    | 7/11 | Counters and reserve sections with standard mounting rail in the lower connection compartment, without wiring kits. Sections for tariff switching devices including backup fuse and short-circuit resistant cable. |

The new Siemens ALPHA 400-ZS meter cabinets are designed for universal applications in residential and non-residential buildings. Based on the ALPHA 400-DIN wall-mounted distribution boards, we have designed a modular system that meets all the current technical supply conditions of the public utilities as well as offering a wide variety of options with regard to enclosures, delivery form, degree of protection and equipment.

Special emphasis was placed on the different regional requirements of the distribution network providers (DNP) and their different methods of installation.

The system comprises pre-assembled unequipped distribution boards for surface mounting and flush mounting, cabinet-high quick-assembly kits for ultra fast equipping and wiring, and a comprehensive range of accessories.

The clear, modular system concept enables easy planning, calculation, ordering, delivering, transportation, equipping and mounting of components and complete cabinets.

The ALPHA SELECT software helps installation technicians, planners and electric wholesalers to quickly plan and determine prices for distribution boards and meter cabinets. Once you have specified location, zip code and respective DNP, you will be offered a suitable assortment of complete meter cabinets and mounting examples to suit your requirements. In addition, you can also plan your own customized combinations of unequipped distribution boards and quick-assembly kits.

### Benefits

- Planning is in accordance with the current TAB and respective DNP requirements
- Short assembly times
- Low stock levels

### Application

ALPHA 400-ZS meter cabinets are used everywhere where electric energy is fed in, measured and distributed.

Meter cabinets and components are of modular design to ensure that only a few standard components are required to create a wide variety of project-related installation and equipping options.

In addition to the standard meter cabinets in degrees of protection IP31 and IP43, the system also offers meter cabinets for damp rooms in degree of protection IP55.

### Design

The modular meter cabinets of the ALPHA 400-ZS series comprise the following system components: Unequipped distribution boards in 4 heights and 5 widths, quick-assembly kits in 3 different widths, and accessories.

The universal system concept and the combination options offered by the ALPHA 400 - DIN distribution board ensure that there are a wide variety of options for the planning and configuration of larger meter and distribution cabinet systems.

And to complete these systems, ALPHA cable entry boxes are available. For internal measurements, the meter cabinet mounting kits can be mounted into any Siemens installation system with a 210 mm mounting depth.

## System overview

# ALPHA 400-ZS Meter Cabinets

## Unequipped distribution boards

### Overview

- Cabinet depth of 210 mm
- Safety class 2 (total insulation)
- Enclosure each with door (If the doors are wider than 750 mm/800 mm, they will be supplied as a double door) and rotary handle, which can be replaced by other locking systems
- Surface-mounting distribution boards, degree of protection: IP43
  - RAL 9016 (traffic white)
  - Incoming-side: one 1-component flange per panel width
  - Outgoing-side: one 2-component flange per panel width
- Surface-mounting distribution boards, degree of protection: IP55
  - RAL 9016 (traffic white)
  - Incoming and outgoing-side: one two-component flange per panel width
- Flush-mounting distribution boards, degree of protection: IP31D
  - RAL 9016 (traffic white)
  - Incoming and outgoing-side: one two-component flange per panel width
  - Without wall-recessed boxes (wall-recessed boxes not essential)

**Distribution boards, with steel  
sheet door and mounting plate**

## Distribution boards, with steel sheet door and mounting plate

### Overview

The ALPHA BOX distribution boards comprise a metal enclosure and a closed metal door with seal. The interior is fitted with a mounting plate for mounting a wide range of devices. The locking system with double-bit lock – one lock for the small distribution boards and two locks for the larger ones – is simple to open and close.

These mechanically robust distribution boards with corrosion-proof surface are ideal for a wide range of applications, not only in residential and non-residential buildings, but also in harsh environments.

### Benefits

- Mechanically robust and corrosion-proof according to IEC/EN 62208
- Simple mounting of devices on the mounting plate

### Application

ALPHA BOX distribution boards are ideal for a wide range of indoor applications, not only in residential and non-residential buildings, but also in harsh environments.

### Design

Door opening angle of 180°

Interior view with mounting plate

Locking system

## Introduction

NEW

### Assembly kits for modular installation devices with snap-on mounting

With cover plates; with one N bar, one PE bar, both 6 mm x 6 mm, and one incoming terminal, 35 mm<sup>2</sup>; the required terminals must be ordered separately (8WA2 860 4 mm<sup>2</sup>)

[See page 9/12](#)

### DIAZED or NEOZED fuse assembly kits

With bus-mounting fuse bases and cover plates; with N and PE bars, 6 mm x 6 mm; with incoming terminal, 35 mm<sup>2</sup>, as well as one outgoing terminal per 3-pole circuit

[See page 9/14](#)

### Assembly kits with LV HRC fuse bases

Connections:

- NH00 clamp connections
- NH1 M10 terminal screws
- NH2 M10 terminal screws
- NH3 M12 terminal screws
- **Without** N and PE terminals

[See page 9/16](#)

### Assembly kits for fuse switch disconnectors

Without cover plates, fixing screws for the fuse switch disconnectors are included in delivery

[See page 9/18](#)

### Enclosures with in-built 3VL circuit-breakers

Connection-ready control switch for the protection of large plants

[See page 9/26](#)

# ALPHA 8HP Molded-Plastic Distribution Systems

## Introduction

The 8HP distribution system is a modular system for low-voltage small distribution boards, control panels and power distribution boards.

## Benefits

The optimum design of these high quality materials fulfills all the demands made on enclosures. This includes:

- Total insulation
- Corrosion resistance
- Mechanical strength
- Simple finish
- Temperature resistance
- No maintenance
- Flame retardant, self-extinguishing
- Halogen-free (thus preventing consequential damage resulting from external fire), excludes cable space cover
- Lightweight components.

### Total insulation

All enclosure parts and operating mechanisms are designed so that, if closed during operation, they fulfill the requirements of the protective measure "Total Insulation" according to DIN VDE 0100 Part 410. All enclosure fixings are on the outside.

## Application

It is suitable for use in all industrial and commercial areas, in power plants, large public and private buildings, public utility companies, as well as office and residential buildings.

The components of the 8HP distribution system comply with the requirements of type-tested low-voltage switchgear assemblies (TTA) according to EN 60439-1/DIN VDE 0660 Part 500. The enclosure complies with the protective measure "Total Insulation" according to DIN VDE 0100.

### Standards

#### DIN VDE 0660 Part 500

Specifications for type-tested low-voltage switchgear assemblies (TTA)

#### DIN VDE 0110

Specifications for rating the creepage distances and clearances of electrical equipment

#### IEC 60439-1

Ready-made switchgear assemblies for low voltage

#### DIN VDE 0660 Part 107

Specifications for low-voltage controls

#### DIN VDE 0100

Specifications for the erection of power installations with rated voltages of up to 1000 V.

### Declaration of conformity

This declares conformity of the components and distribution boards with the safety requirements for low-voltage equipment as specified in the EU Directive dated 19.02.1973.

### Special tests passed

Fire tests for equipment used in mining are performed by the Versuchsgrube Tremonia, Dortmund, Germany.

Shock tests for equipment used in protective rooms are performed by the Bundesamt für Zivilschutz, Bad Godesberg, Germany, regulation category RK 1.0/10 to safety level "A", certificate of use 036/95.

Earthquake tests are performed by the IAB, Ottobrunn, Germany.

The enclosure is [UL-certified](#).

| Indoor       | No further measures necessary                                                                                      | An indoor climate is an environment in rooms that are designed so that objects are largely separated from the direct influence of an open-air climate                                                                           | If the operating and ambient conditions differ from the standard conditions to DIN VDE 0660 Part 500, Item 6.1, appropriate measures must be taken to protect and maintain the operating capability of the switchgear assembly for "Special operating and ambient conditions" according to Item 6.2 (mechanical protection, ventilation, indoor heating, breathers, etc.). |
| External     | e.g. protected installation or protective cover, if necessary with additional walls and door (protective cabinet). | An external environment is an environment in rooms that are designed so that objects are protected against direct sunlight and precipitation and, if necessary, against wind, but are otherwise exposed to an open-air climate. |                                                                                                                                                                                                                                                                                                                                                                            |
| Outdoor      | Only permissible with measures as for external installation                                                        | An open-air climate is an environment that affects objects in the open air                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                            |

### Conversion from Pg to metric screw connections

We tested a new option for using metric screw connections with the 8HP molded-plastic distribution system. The results of this test showed that the Pg openings listed in the following table are also able to accommodate metric screw connections. We have used metric screw connections with lock nuts. Appropriate sealing washers are used in order to ensure degree of protection IP65.

The values for the tested conversions from Pg to metric screw connections are shown in the following table.

The knockouts in the enclosure base parts need to be drilled out.

| Heavy-gauge threaded joints | Lock hasp diameter<br>mm | Metric screw connection | Lock hasp diameter fits | Lock hasp diameter must be enlarged to<br>mm |

### Design

The distribution system comprises five enclosure sizes with a basic size of 307 mm.

The enclosures have knockouts for flange openings and cable entries. They can be used for distribution board applications as well as for stand-alone installations.

The covers are available in opaque or transparent versions (size 2.5 only available in the transparent version).

The covers are equipped with quick-acting locks for tool actuation. These can be replaced with locks for manual actuation.

The mounting depth of the enclosure is 147 mm. For enclosure size 2 there is also a cover for a mounting depth of 212 mm, and for enclosure size 2.5 there is a transparent cover for a mounting depth of 185 mm.

Intermediate frames can be used to increase the mounting depth of size 3 and 4 enclosures. Several intermediate frames can be used together. Each intermediate frame increases the mounting depth by 92.5 mm.

Installation conditions for different climatic conditions, "Application – Installation Conditions". If installed in rooms with high humidity and strongly fluctuating temperatures, suitable measures must be taken (e.g. ventilation, indoor heating) to prevent the generation of harmful condensation water. In the event of extreme temperature fluctuations, breathers must be installed.

# ALPHA 8HP Molded-Plastic Distribution Systems

## Single Enclosures

### Empty enclosures

#### Overview

- All complete empty enclosures are equipped with metal mounting plates.
- The quick-acting locks of the covers need tools for opening and can be shut manually.
- The enclosures have knockouts for flange openings and cable entries.
- High covers (for sizes 2 and 2.5) and intermediate frames (for sizes 3 and 4) are available to increase the mounting depth.

## Single Enclosures

### Enclosures for modular installation devices with snap-on mounting

#### Overview

- Complete enclosures with assembly kits, including cover plates.
- The equipping options are specified in modular widths (MW = 18 mm).
- PE- and N-outgoing feeders, 1 PE and N bar 6 × 6 mm, each with one incoming terminal, 16 mm<sup>2</sup> for size 1 and 35 mm<sup>2</sup> for sizes 2 - 3.
- Covers with quick-acting locks for opening with tool
- Opaque cover with and without actuating flap, or transparent cover.

## Single Enclosures

### Enclosures with DIAZED/NEOZED screw-in fuses 25 A and 63 A

#### Overview

- Enclosure complete with connection-ready *assembly kits with DIAZED and NEOZED bases* including cover plates.
- PE- and N-outgoing feeders:  
1 rail-mounting terminal each on Cu bar, 6 mm x 6 mm, for each 3-pole circuit  
25 A/4 mm<sup>2</sup> (8WA2 860),  
63 A/16 mm<sup>2</sup> (8WA2 861).
- The bars can be equipped with further terminals,  
[see Accessories from page 9/28](#).
- Transparent cover with quick-acting locks for opening with tool.
- For fuse links, [see Catalog ET B1](#).

1) Available in assembly kits sizes 2.5 and 3.

2) Also as cross-connection to the next enclosure, [see page 9/38](#).

| Enclosure size         | Size and number of DIAZED or NEOZED fuses                                                                 | Incoming cable, single or stranded<br>Main conductor/PE/N mm <sup>2</sup> | Complete enclosures<br>(delivery in individual components)<br>Type | Individual components |                                  |

## Single Enclosures

### Enclosures with LV HRC fuse bases

#### Overview

- Complete enclosures with integrated NH fuse bases
- All integrated NH fuse bases (660 V AC, 440 V DC) up to 250 A with integrated PEN terminal.
- From 400 A without N and PE terminal.
- Connections:  
NH00 over terminal clamp,  
NH1 and NH2 over M10 terminal screws,  
NH3 over M12 terminal screws.
- For NH fuse links, [see Catalog ET B1](#).

- 1) PEN connection up to 35 mm<sup>2</sup>, 1 × 8JH4 04 installed.  
An additional 8JH4 04 terminal can be installed for the 5th conductor.
- 2) PEN connection up to 35 mm<sup>2</sup>, 1 × 8JH4 043 installed.  
An additional 8JH4 043 terminal can be installed for the 5th conductor.

- 3) PEN connection up to 70 mm<sup>2</sup>, 1 × 8JK4 01 installed.  
An additional 8JK4 01 terminal can be installed for the 5th conductor.
- 4) N/PE conductors must be passed through uncut.

## Single Enclosures

Enclosures with fuse switch disconnectors,  
160 A to 630 A

### Overview

- Complete enclosures with integrated fuse switch disconnectors
- Transparent cover with quick-acting locking screws.
- Terminals:
  - 3NP40 1: Tunnel terminal,
  - 3NP4.: Cable lug connection,
  - 3NP52: Terminal clamp
  - 3NP53: M10 terminal screws.
- For LV HRC fuse switch disconnectors, see [Catalog LV 1 "Switching and Protecting with SENTRON – Switch Disconnectors"](#).
- For LV HRC fuse links, see [Catalog ET B1](#).

<sup>1)</sup> 8WA1 205 terminals or 8GF9 318-2 holders can be installed for 2 Cu bars, 6 mm x 6 mm for a 4th and 5th conductor.

<sup>2)</sup> N/PE conductors must be passed through uncut.

<sup>3)</sup> 8WA1 205 terminals, 50 mm<sup>2</sup> can be installed for a 4th and 5th conductor.

<sup>4)</sup> Mounting option for 2 PEN 8WA1 206 terminals, 95 mm<sup>2</sup>.

<sup>5)</sup> Fuses with max. 21 mm width (according to IEC 269-2-1 and DIN 43620). For 125 A and 160 A fuses and feeder terminals up to 95 mm<sup>2</sup>, see [Catalog LV 1 "Switching and Protecting with SENTRON - Switch Disconnectors"](#).

<sup>6)</sup> Without 3NY7 120 terminal clamps, see [Accessories](#), page 9/28.

<sup>7)</sup> Mounting option for 8JK4 04 terminal.

# ALPHA 8HP Molded-Plastic Distribution Systems

## Single Enclosures

Enclosures with fuse switch disconnectors,  
160 A to 630 A

For 3NP fuse switch disconnectors and 3TX6 terminal covers,  
see catalog LV 1 "Switching and Protecting with SENTRON –  
Switch Disconnectors".

For accessories, see page 9/28 ff.

For fuse switch disconnectors for busbar mounting,  
see Accessories, page 9/32.

# ALPHA 8HP Molded-Plastic Distribution Systems

## Single Enclosures

### Meter enclosures

#### Overview

- Enclosure incl. support rails for meters or ISO meter support plate with meter fixing screws.
- Sealing cap can be ordered as an accessory, [see page 9/39](#).
- Distance bolts (15 mm) for raising the meter support plates are included in delivery if cables are routed underneath.

# ALPHA 8HP Molded-Plastic Distribution Systems

## Single Enclosures

Enclosures with main and  
EMERGENCY-STOP switches, 63 A to 800 A

### Overview

- Enclosures with integrated switch disconnectors as main and EMERGENCY-STOP switch.
- With integrated door-coupling rotary operating mechanism, lockable with padlocks:
  - Operating mechanism version **A**  
Handle: black  
Display plate: light gray
  - Operating mechanism version **B**  
EMERGENCY-STOP (handle: red; display plate: yellow).
- For switch disconnectors, see [Catalog LV 1 "Switching and Protecting with SENTRON – Switch Disconnectors"](#).

## Single Enclosures

### Enclosures with switch disconnectors with fuses, 63 A to 250 A

#### Overview

- Enclosures with switch disconnectors and mounted LV HRC fuses.
- With motor switching capacity and disconnector characteristics, can be used as main and EMERGENCY-STOP switch to DIN VDE 0113.
- With integrated door-coupling rotary operating mechanism, lockable with padlocks:
  - Operating mechanism version **A**  
Handle: black  
Display plate: light gray
  - Operating mechanism version **B**  
EMERGENCY-STOP (handle: red; display plate: yellow).
- LV HRC fuse links must be ordered separately, see [Catalog ET B1](#).
- For switch disconnectors with fuses, see [Catalog LV 1 "Switching and Protecting with SENTRON – Switch Disconnectors with Fuses"](#).

| <sup>1)</sup> Values in brackets apply to parallel switches. For thermal reasons the rated operational current is reduced to approximately 80 % of the rated current.                                                                                                                                                                                                              |    |                     |              |         |                 |     |
| <sup>2)</sup> The "break-before-make" version of the changeover contact is supplied. If the "make-before-break" version is required, the Order No. must be supplemented with " <b>-Z</b> " and " <b>make-before-break</b> " specified in plain text.                                                                                                                               |    |                     |              |         |                 |     |

For accessories, see page 9/28 ff.

# ALPHA 8HP Molded-Plastic Distribution Systems

## Single Enclosures

### Enclosures with in-built 3VL circuit breakers

#### Design

ALPHA 8HP, diagram of enclosure with 3VL circuit-breakers

#### Features

- Enclosure complete with in-built 3VL circuit-breaker, door-coupling rotary operating mechanism in black and terminals
- Terminal covers and connecting bars for safe use with maximum possible rated current
- All circuit-breakers in size 3 enclosure with intermediate frame
- Opaque cover
- Emergency-Stop operating mechanisms on request

#### Mounting instructions

- Caution: The distribution board must be installed in accordance with the data in the table
- Minimum volume (see table) of the flange-mounted distribution board on the enclosure with 3VL to accommodate the switching pressure on tripping (the supplementary enclosure does not have to be an empty enclosure)
- Values valid for rated voltage of 415 V AC

9

| <sup>1)</sup> In the case of finely stranded and very finely stranded conductors, it is sometimes necessary to reduce the maximum cross-section by up to two units. If necessary the conductors must be protected against fanning out by using end sleeves or similar. When connecting Al conductors, commercially available Al-Cu adapter pieces or clamping connections must be used.<br><sup>2)</sup> When using different cross-sections, the larger conductor must be laid underneath. |                                                |                     |                                                |                         |         |                 |            |

# ALPHA 8HP Molded-Plastic Distribution Systems

## Accessories

### Support racks and cable space covers

#### Design

ALPHA 8HP, support rack and cable space cover

#### Support rack

Support rack made of galvanized sheet section, with thread-chaneling screws for connection

Punched holes with spacings of 307 mm × 307 mm enable the different sized distribution boards to be fixed using captive nuts.

Lateral profiles for creating distribution boards with a width of two to six sections, support profiles for creating distribution boards with a height of three to six sections.

The height can be expanded by one section respectively using support profile extensions, and the width by adding further racks to existing distribution boards using connecting brackets.

One section corresponds to the basic dimensions of the ALPHA 8HP system: 307 mm.

#### Cable space cover

Cable space cover for mounting on the ALPHA 8HP support rack, with plug-in molded-plastic covers in light gray, RAL 7035, heights; 370 and 677 mm.

With the 8HP9 057 double flange, enclosures can also be fitted under the cable space cover.

If connecting several support racks, you need to order the matching covers. For each width expansion, only one set of side panels 4 and one set of corner covers 1 are required. We therefore recommend ordering these cable space covers for the expansion as individual parts – without the specified units.

Individual parts for support rack and cable space cover

**ALPHA SELECT**

# Planning and Configuration

## ALPHA SELECT

### Overview

Whether you are an installation engineer or a control cabinet engineer, an electrical wholesaler or a planner – the software ALPHASELECT makes it quicker and easier than ever before to plan and configure distribution boards and meter cabinets. Easy-to-use, intuitive functions accompany you step-by-step through the entire project, from planning to installation. Configuration errors are virtually impossible thanks to collision tests and configuration rules saved in the program.

ALPHA SELECT comprises:

- ALPHA SIMBOX small distribution boards
- ALPHA 400-ZS meter cabinets
- ALPHA distribution boards
- ALPHA 8HP molded-plastic distribution boards
- ALPHA BOX

In addition you can use the electronic catalogs (EGH selection catalog and CA 01) to select BETA low-voltage circuit protection products, GAMMA *instabus* products (for building management) and many other items from the Siemens Industry product selection.

Calculation of power loss

Selection of the ALPHA distribution system

Parts list with calculation

Distribution board equipment, front view

Workshop edition: configuration with layer representation

The process is started by selecting a suitable distribution system. By specifying the required degree of protection, safety class and dimensions, you will then find the right distribution board. Finally, simply select the assembly kits, devices and accessories of your choice using drag & drop. Essential accessories are determined automatically.

The graphic display enables individual levels, e.g. of covers, equipment racks or devices, to be visualized, rendered transparent and hidden so that the user can obtain an overview of already configured components at any time.

A new feature in V5.0 and higher is the power loss calculation function. This compares the calculated power loss values of the devices installed in the distribution board with the dissipatable power loss of the distribution board, giving due consideration to the point of installation and the permissible overtemperature (related to 35 °C ambient temperature).

Frequently required components can be saved as favorites for integration in other projects at any time.

Used in conjunction with existing calculation aids, users are able to tailor parts lists, assembly drawings and assembly structures to individual requirements and output as both a hard copy and in electronic form.

In addition to planning and calculation in the program itself, this enables the user to produce parts lists and graphic documentation, which can be submitted to customers along with a quotation, or as an aid to ordering any components required.

The workshop edition, which comprises a structured list of distribution boards and their parts, as well as a graphic representation of various levels chosen by the user, directly supports the building of distribution boards configured using ALPHA SELECT.

<http://www.siemens.com/alpha-select>

### Benefits

- Cabinet selection: simple selection of cabinet system, degree of protection, safety class and dimensions
- Positioning of assembly kits and devices using drag & drop
- Automatic determination of key accessories
- Numbering of assembly kits in the assembly drawing
- Automatic issue of item codes for devices
- Calculation of power loss
- Differentiated calculation options, including allowance made for assembly work
- Listing in the assembly structure of devices placed in the assembly kits, including numbering of the assembly kits and the item codes of the devices.
- Easy drawing up of quotations for projects: clearly arranged output selection for parts lists, assembly drawing and assembly structure.
- Clearly arranged calculation aids. Calculations for individual items and assembly, for material surcharges, shipment costs, discounts and miscellaneous extras are easy to perform in the parts list. Also, standard discounts for each price group can be saved in the memory.
- Quotations with individual company logo are possible.

### Technical specifications

ALPHA SELECT system requirements:

- Processor: from 1 GHz
- Main memory: minimum 512 MB
- Operating system: VISTA / XP / 2000 / NT 4 (Service Pack 5)
- Free hard disk space: 100 ... 500 MB (depending on the number of modules installed)
- Display resolution: minimum 1024x768 with 16-bit color intensity

|   | 8WH bolt-type screw terminals                      | 11/18 | Connection of incoming and outgoing cables for cable lugs according to DIN 46234 and DIN 46237                                                                                                                                                    |
|  | 8WH flat terminals                                 | 11/21 | Connection of incoming and outgoing cables for cable lugs according to DIN 46234 and DIN 46237 from 25 to 240 mm <sup>2</sup>                                                                                                                     |
|  | 8WA neutral isolating and branch terminals         | 11/25 | Connection of neutral isolating terminal to neutral busbar 6 mm × 6 mm                                                                                                                                                                            |
|  | 8WA Insta or three-tier terminals                  | 11/27 | These terminals have up to three terminal functions in one enclosure and may also have a neutral isolating terminal connection to a neutral busbar 6 mm × 6 mm. They are optimized for distribution board applications in installation technology |
|  | 8WA two-tier terminals                             | 11/29 | Compact design of the terminal blocks, which can accommodate installation of two connecting cables                                                                                                                                                |
|  | 8WA two-tier terminals with solid-state components | 11/31 | Terminal blocks with integrated diodes                                                                                                                                                                                                            |
|  | 8WA diode and isolating terminals                  | 11/33 | Terminal blocks with integrated diodes or isolation for testing purposes                                                                                                                                                                          |

# ALPHA FIX Terminal Blocks

## Screw Terminals

### Introduction

|                                                                                     | Devices                                                         | Page  | Function                                                                                                                                                       |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | 8WA terminals for components                                    | 11/34 | Terminals that enable installation of components in the circuit                                                                                                |
|    | 8WA fuse terminals                                              | 11/35 | Terminals that protect, e.g. control circuits                                                                                                                  |
|    | 8WA through-type terminals with soldered and plug-in connection | 11/36 | Terminals with connection for soldered or plug-in connection                                                                                                   |
|    | 8WA measuring transformer terminals                             | 11/37 | Measuring transformer terminals can be used for testing and isolating circuits in switchgear installations, control rooms, etc. without interrupting operation |
|   | 8WA transformer terminals                                       | 11/42 | Optimized terminals for transformers and rectifiers                                                                                                            |
|  | 8WH shield terminals                                            | 11/43 | Terminals for connection of shielded cables                                                                                                                    |

# ALPHA FIX Terminal Blocks

## Screw Terminals

### General data on 8WA

#### Overview

Terminal strips with different terminal blocks: 8WA1 011-1DG11 terminal blocks, 8WA1 011-1NG31 neutral isolating terminals with feeder terminal for neutral busbar  $6 \times 6$  mm, 8WA1 011-1PG00 PE terminals, 8WA1 011-1SF12 fuse terminals, and various two-tier terminals. The EN 50022-35-compliant standard mounting rail serves as the PE bar.

Terminal blocks are used for the space-saving connection of incoming and outgoing lines in switchgear and distribution boards.

#### Standards

EN 60664-1,  
EN 60999 and  
IEC 60947-7-1 or  
IEC 60947-7-2.

The terminals are finger-safe according to IEC 60529 and EN 50274 (except for bare terminals and soldering connections). Through-type terminals are resistant to earthquakes according to IEC 60068-2-6.

#### Rated short-time withstand current

Our screw terminals are able to withstand a rated short-time current corresponding to a current density of  $120 \text{ A/mm}^2$  specific to the nominal cross-section for a duration of one second.

#### Colored terminal blocks

With colored wiring according to EN 60204-1, the connecting level can also be included in the colored markings:

- Red for control circuits with AC current
- Blue for control circuits with DC current or neutral conductor
- Orange for interlock circuits with AC or DC current which are fed from outside and are live when the main switch is turned off
- Green-yellow through-type terminals for protective conductors (without a link to the support rail).

#### Design

The terminal blocks are insulated on both sides, with the exception of two-tier, flat-type and bolt-type screw terminals, which are insulated on one side only.

The insulating material for terminal sizes up to  $240 \text{ mm}^2$  is made of thermoplastic, polyamide 6.6.

The materials used are environment-friendly: For example, they are cadmium-free and contain no halogens or silicone.

The plastics used are flame-retardant and self-extinguishing according to EN 60695-2-2, VDE 0471 Part 2-2 and UL 94 V-2.

#### Clamping methods

The terminals are designed so that when the terminal screws are tightened, any tensile stress which occurs causes elastic deformation of the terminal bodies. This compensates for any creepage of the clamping conductor. The deformation of the threaded section prevents loosening of the clamping screw, even under heavy mechanical and thermal strain (for example vibration stress of  $10 \text{ g}$  or thermal cycles).

The following clamping methods are used: Terminal body with pressure plate for terminal sizes  $16$ ,  $35$  and  $70 \text{ mm}^2$ . Strain-relief clamps for terminal sizes  $2.5$ ,  $4$  and  $6 \text{ mm}^2$ . Screw with connection disk for fuse terminals and component terminals.

#### Terminal size

The terminal size corresponds to the nominal cross-section. According to EN 60947-7-1, a finely stranded copper conductor of nominal cross-section can be connected to any clamping point with or without end sleeve.

#### Mounting

The terminals are snapped onto  $35 \text{ mm}$  support rails according to IEC 60715 TH35 and secured against movement using end retainers.

A lateral mounting tolerance of  $0.2 \text{ mm}$  must be maintained between the terminals.

#### Connection of conductors

Except for flat and bolt-type versions, all terminals are designed so that solid, stranded and finely stranded conductors with or without end sleeves (according to DIN 46228) can be securely clamped (please observe cross-section).

Damage to the clamped conductors is prevented by pressure plates or strain-relief clamps. For the conductor cross-sections when 1 or 2 conductors are connected, see technical specifications.

# ALPHA FIX Terminal Blocks

## Screw Terminals

### General data on 8WA

#### Connection of aluminum conductors

Siemens screw terminals are suitable for connecting aluminum conductors when the normal processing guidelines are complied with prior to connection, e.g. the brushing and greasing of conductors.

After a few days, the connection should be tightened again for safety reasons.

8WA1 through-type terminals with screw terminals at both ends, sectional view

#### PE and PEN terminals

In switchgear and controlgear systems the support rails for the terminal blocks are frequently used as protective ground busbars. The PE (protective ground) terminals provide the connection to the mounting rail.

The fact that there is no separate PE busbar means the PE terminals, the insulated main conductor terminals and neutral isolating terminals can be arranged according to user requirements. This makes the individual circuits clearly manageable.

The bare 8WA1 010-1PH01 PE terminals are primarily for connecting the shields of screened cables. They are normally mounted on a standard mounting rail, which is installed by means of an 8WA1 857 insulation carrier.

#### Accessories

##### Parallel link rails

The link rails are screwed into the terminals from above and allow parallel connection of up to 10 terminals up to terminal size 35 mm<sup>2</sup>. The 10-pole link rails can be shortened as required. On 70 mm<sup>2</sup> terminals the link rails are two-pole. On the 50 mm<sup>2</sup> to 240 mm<sup>2</sup> terminals they are inserted in the clamping points. Link rails for flat-type and bolt-type screw terminals are not included in delivery.

##### Barriers

Barriers are yellow in color and project beyond the contours of the terminals. They serve the visual separation of groups of terminals, the electrical isolation of adjacent link rails and to improve the insulation rating for soldered and plug-type connections.

##### Insulation plates

8WA1 825 and 8WA1 022-7TK00 insulation plates can be used with different terminals for providing electrical insulation between link rails.

##### Test sockets and plugs

The 8WA1 854 test sockets for Ø 2.3 test plugs and reduction plugs with a Ø 4 mm borehole can be screwed into some terminals in place of the link rails.

##### Jumpers

The 8WA1 865 jumpers provide a detachable connection between two adjacent terminals sizes 2.5 to 6 mm<sup>2</sup>.

##### Covers with lightning symbol

The purpose of these covers is to identify the power input terminals. At the same time, they provide additional touch protection.

##### End retainers and labeling plates

End retainers are available in thermoplastic or galvanized and chromated steel. The end labeling plate can be fitted in an 8WA1 808 end retainer or, in any of three positions, in an 8WA1 805 end retainer.

# ALPHA FIX Terminal Blocks

## Screw Terminals

### 8WH high-current terminals

#### Overview

The high-current terminals cover cross-sectional areas from 16 to 240 mm<sup>2</sup>. A reliable cable connection is ensured through effective design measures, such as:

- Three-point centering of the conductor in the prismatic sleeve base
- Low contact resistance of the contact area through grooved surface
- Screw locking through spring-loaded elements
- Terminals enclosed at both ends.

The terminals have an insulating enclosure made of polyamide 6.6.

The terminals are available in gray and blue.

8WH labeling plates must be used for inscription purposes.

For terminals with terminal sizes up to 95 mm<sup>2</sup>, green-yellow PE terminals are available.

Mounting on support rails according to IEC 60715.

*Note: For flat terminals with terminal bolts, see section [Flat terminals](#).*

#### Benefits

- Larger connection up to 240 mm<sup>2</sup>
- The right terminal is always available – whatever the connection functions
- Simple inscription using 8WH standard
- Comprehensive range of accessories available
- Enclosed insulating body made of polyamide 6.6

#### Design

Assembled terminal blocks

Using the 50-mm<sup>2</sup> terminals, permanent links can be mounted in 2- and 3-pole versions. Combs are required with 95- to 240-mm<sup>2</sup> terminals.

## Screw Terminals

### 8WH bolt-type screw terminals

#### Overview

The bolt-type screw terminals complement the range of flat terminals. The bolt-type screw terminals for cable lugs according to DIN 46234 and DIN 46237 are available in M6, M8 and M10 versions. The screws are locked with spring washers. Large labels can be applied to the bolt on both sides of the support rail. A comprehensive range of accessories, such as the link rails for cross-linking, allow reliable, convenient wiring of the conductors.

The bolt can be labeled on both sides of the support rail with large clip-on labeling strips.

Mounting on support rails according to IEC 60715.

# ALPHA FIX Terminal Blocks

## Screw Terminals

### 8WH flat terminals

#### Overview

The range of flat terminals cover cross-sectional areas from 4 to 240 mm<sup>2</sup>. Each terminal size is available as a bolt terminal for cable lugs. The screws are secured on the bolt terminals using spring washers.

For mounting on support rails according to IEC 60715.

#### Safe cable lug connection

The cable lugs in flat terminals are securely clamped with screws. The screws are secured with a spring washer. Connection of cable lugs according to DIN 46234 and DIN 46235 is permitted. Two-wire connection is also possible by clamping one conductor with cable lug underneath the current bar and the second on the current bar.
