# ALPHA FIX Terminal Blocks

## Plug-In Terminals

### 8WH through-type screw terminals

#### Overview

We offer a comprehensive range of plug-in installation terminals for use in building management systems. We also offer a range of compact, cost-effective terminal blocks with screw terminals for connecting larger cross-sections.

Terminal blocks mounted on neutral busbars are most commonly used in building management systems. In order to enable the butt-mounting of different terminals, contact to the neutral bars is always on the same mounting level. This means that 8WH1 screw terminals and 8WH4 plug-in terminals can be combined as required and mounted on a single support rail.

# ALPHA FIX Terminal Blocks

## Plug-In Terminals

8WH neutral isolating terminals

### Overview

The neutral isolating valves are in the same position on all terminals using 8WH4 plug-in technology.

A 10 mm x 3 mm busbar is used.

**Note:** Only Cu busbars must be used.

Installation instructions: to ensure that the neutral busbars are securely mounted, the support brackets must be placed at the beginning and end of each terminal strip (in the case of longer terminal strips: every 20 cm).

#### Terminal size 2.5 mm²

8WH4 000-0BF00

8WH4 003-0BF00

#### Neutral isolating terminals, terminal size 2.5 mm²

- Terminal width 5.2 mm
- Terminal length 59.5 mm
- Terminal height 43 mm
- Maximum load current 30 A
- Cross-section max. 4 mm²
- Rated voltage 400 V
- Rigid 0.2 to 4 mm²
- Flexible without end sleeve 0.2 to 4 mm²
- Flexible with end sleeve 0.2 to 2.5 mm²
- AWG 24-12

#### Versions

- Two clamping points
- Three clamping points

#### Accessories

- Support brackets, for terminal sizes 2.5 to 4 mm²
- Covers, for terminal size 2.5 mm²

# ALPHA FIX Terminal Blocks

## Plug-In Terminals

### 8WH neutral isolating screw terminals

#### Overview

We offer a comprehensive range of plug-in installation terminals for use in building management systems. We also offer a range of compact, cost-effective terminal blocks with screw terminals for connecting larger cross-sections.

Terminal blocks mounted on neutral busbars are most commonly used in building management systems. In order to enable the butt-mounting of different terminals, contact to the neutral bars is always on the same mounting level. This means that 8WH1 screw terminals and 8WH4 plug-in terminals can be combined as required and mounted on a single support rail.

The compact design of our neutral isolating terminals makes for a neat and clearly arranged terminal strip. The neutral bar can be connected over the terminal or over the contact separator of the neutral isolating terminal. The neutral isolating terminal also makes it easy to perform insulation measurements.

**Note:** Only Cu busbars must be used.

#### Technical specifications

# ALPHA FIX Terminal Blocks

## Plug-In Terminals

### 8WH installation terminals

#### Overview

The three-tier plug-in terminals offer optimum operating characteristics for modern building installations. The plug-in terminal allows the tool-free wiring of solid conductors.

These terminals can be used interconnected with the neutral busbar 10 × 3 mm.

**Note: Only Cu busbars must be used.**

Thanks to their compact design, the three-tier terminals can be installed in all types of building distribution boards. A load circuit can be wired quickly and easily, for example, with a 5.2 mm narrow installation terminal with terminal size 2.5 mm<sup>2</sup> and PE/L/NT terminals.

The double bridge slots support a multitude of individual switching tasks. This also means it is practical and convenient to make subsequent modifications to the installation.

<sup>1)</sup> Only the main terminal types are listed here. You will find further versions on the following pages.

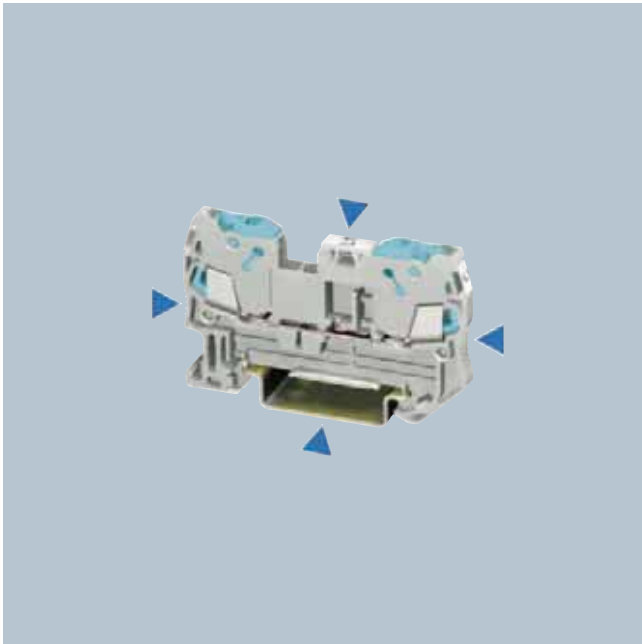

#### Rated short-time withstand current

Our insulation displacement terminals are able to withstand a rated short-time current corresponding to a current density of 120 A/mm<sup>2</sup> specific to the nominal cross-section for a duration of one second.

# ALPHA FIX Terminal Blocks

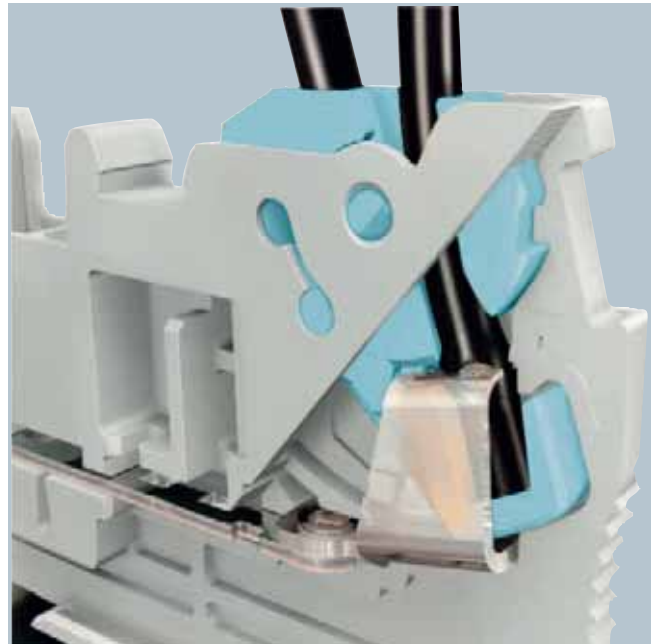

## Insulation Displacement Terminals

### Introduction

The insulation displacement series stands out with its IDC rotary connection. This concept saves considerable space in the control cabinet without impairing other quality features, such as

- Large surface marking,
- Maximum connection compartment,
- Flexible connecting combs.

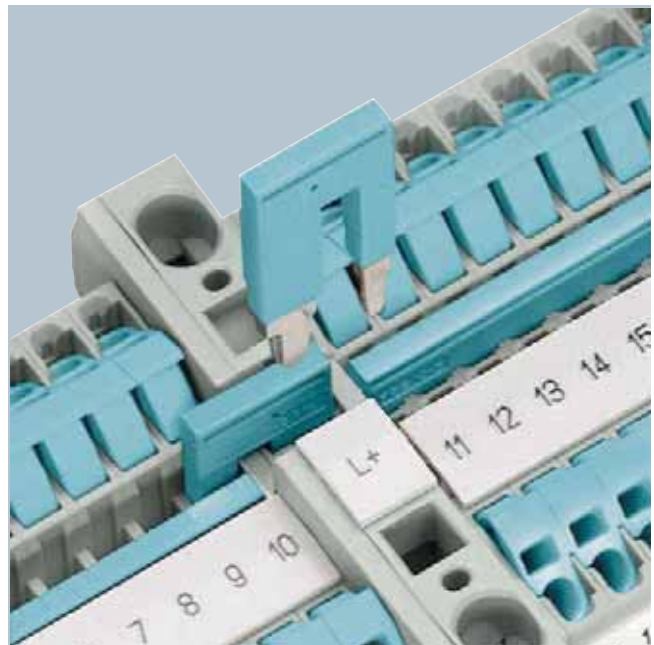

Conductors from 0.25 to 2.5 mm<sup>2</sup> are connected by the insulation displacement contact. High-grade special alloys and latching of the switch states ensure reliable electrical connections at all times. Large, spring-loaded contact points guarantee a current load rating of 24 A.

Time savings of 60 % and more compared to other connection systems.

With the high-speed insulation displacement terminal system, there is no need to strip the insulation or protect the splice. Just cut the cables to length and they can be contacted in seconds.

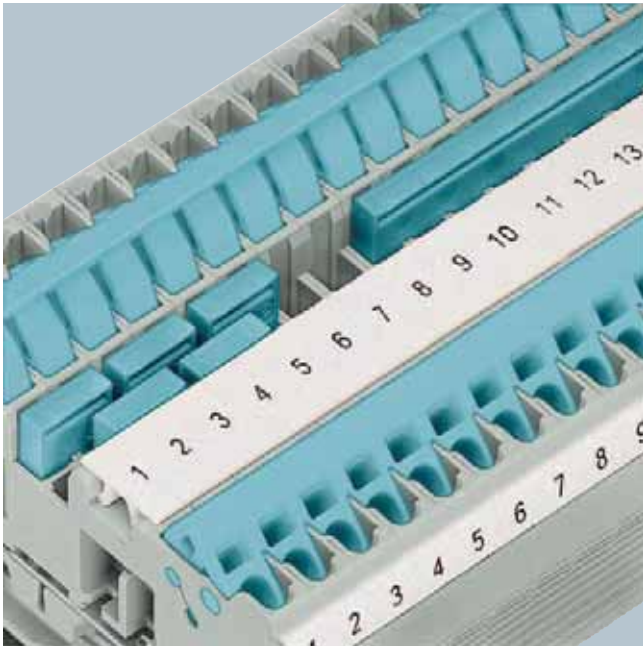

When feeding in large cross-sections, the reducing comb enables time and cost-saving distribution of the potential. The reducing comb can be used to connect a 10 mm<sup>2</sup> spring-loaded through-type terminal with an insulation displacement through-type terminal for terminal size 1.5 mm<sup>2</sup> and two clamping points or an insulation displacement through-type terminal for terminal size 2.5 mm<sup>2</sup> and two clamping points.

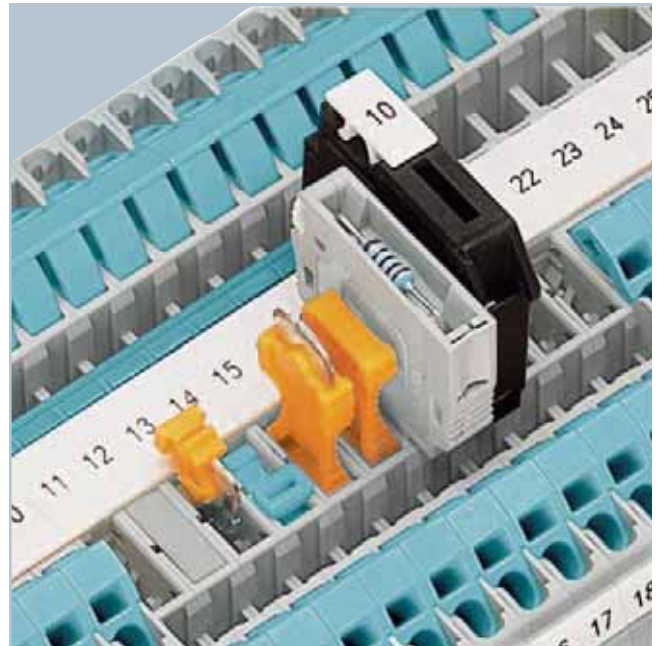

# ALPHA FIX Terminal Blocks

## Insulation Displacement Terminals

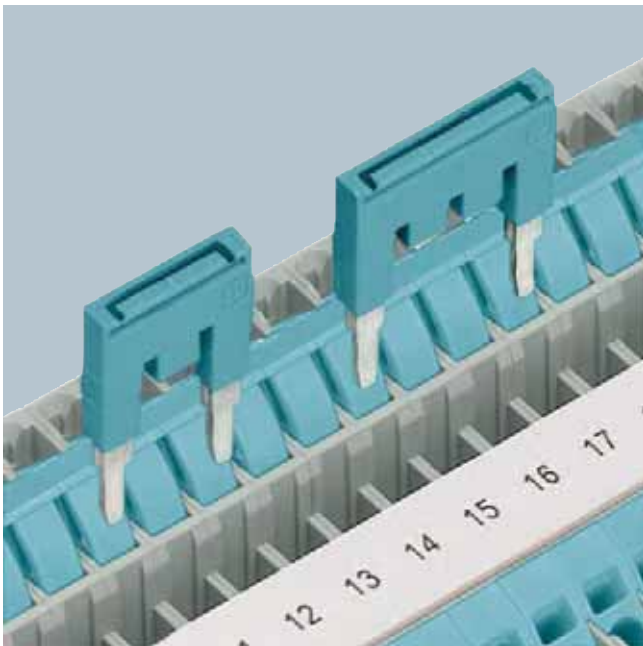

### Introduction

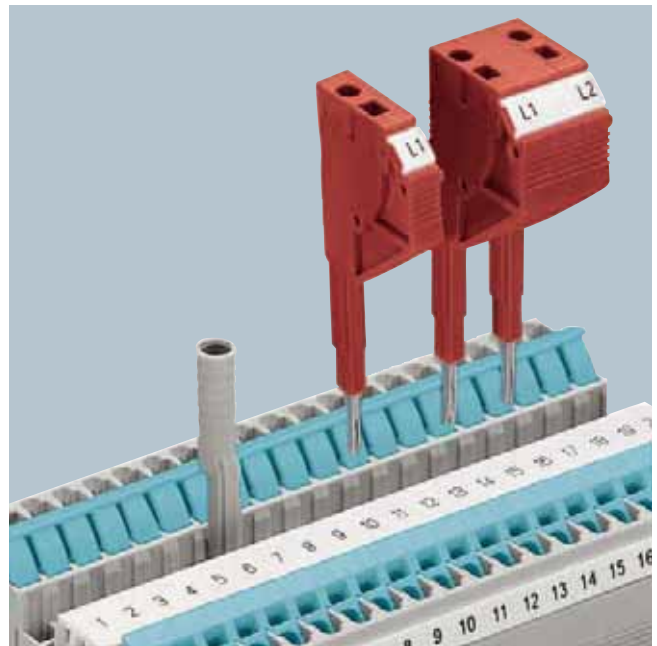

The standardized connecting comb system allows several terminals to be linked efficiently and quickly with a single jumper. The range covers 2- to 50-pole connecting combs, which considerably reduces the amount of wiring work.

The universal plug-in zones of the isolating terminal can accommodate isolated through-type connectors, isolating plugs, component connectors and fused connectors.

Teeth can be removed from the standard comb in order to skip individual terminals, so that two potentials can run in parallel. A marking option is available on the top of the connecting comb.

Test adapters are available for Ø 4 mm test and safety test plugs. Test adapters can be individually assembled, thanks to the modular design of the test plugs. Test leads can be connected with a 1.5 mm<sup>2</sup> spring-loaded/insulation displacement terminal.

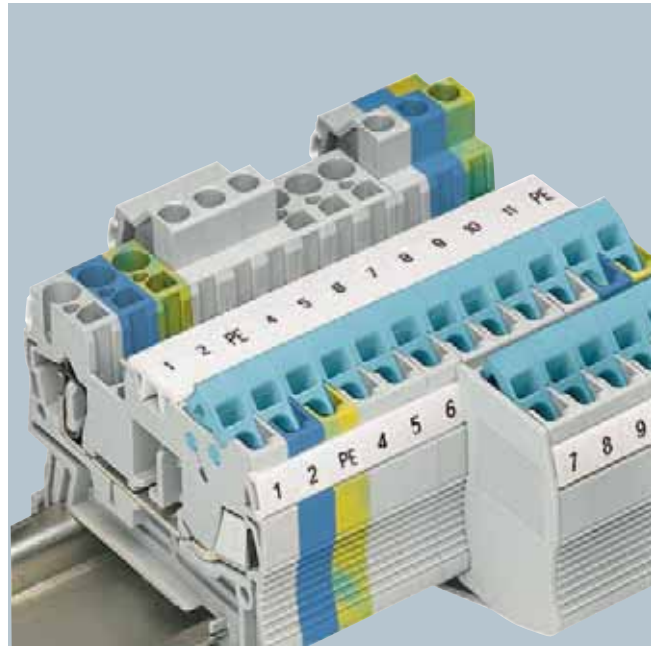

## ALPHA FIX Terminal Blocks

### Insulation Displacement Terminals

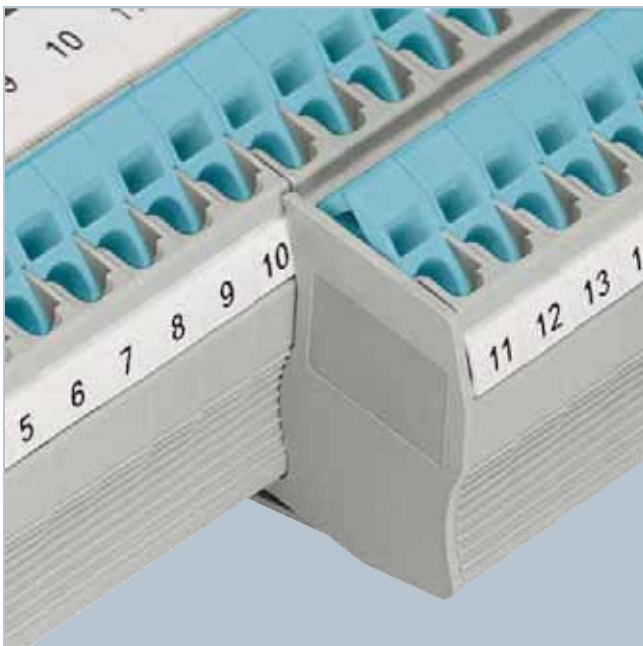

#### Introduction

The unambiguous and easy-to-read marking in the center of the terminal is essential for time-saving installation. In addition to the large inscription in the center, each clamping point can be separately labeled.

The hybrid versions combine the time-saving insulation displacement terminal system with the advantages of a screw or spring-loaded terminal.

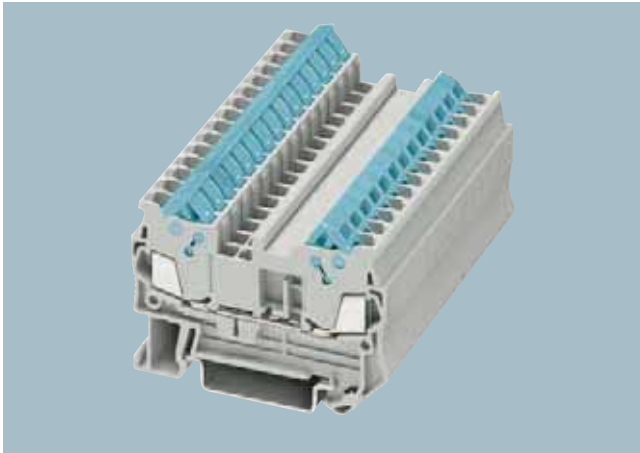

The cover segment is used to cover multi-wire terminals when mounting two-wire terminals side-by-side. These devices meet all fingerproof requirements.

# ALPHA FIX Terminal Blocks

## Insulation Displacement Terminals

### 8WH through-type terminals

#### Overview

A key feature of the insulation displacement through-type terminals is their compact design. With its clear and space-saving front connection arrangement, this insulation displacement series provides additional space between the cable ducts for wiring. The double bridge slot enables not only individual chain bridging but also reduction bridging, e.g. between the spring-loaded through-type terminals with terminal size 2.5 mm<sup>2</sup> and spring-loaded through-type terminals with terminal size 35 mm<sup>2</sup>. Used in this way, reducing combs enable the quick and easy assembly of potential incoming feeders and distributors.

# ALPHA FIX Terminal Blocks

## Insulation Displacement Terminals

### 8WH hybrid through-type terminals

#### Overview

The advantages of the various connection systems are combined in the hybrid versions. In a control cabinet for example, it is preferable to use the time-saving insulation displacement terminal. The screw terminal can be used for wiring to the end user.

PE terminals are also available with the same contour as the through-type terminals.

# ALPHA FIX Terminal Blocks

## Insulation Displacement Terminals

### 8WH two-tier terminals

#### Overview

Key features of the insulation displacement two-tier terminals for terminal size 1.5 mm<sup>2</sup> are their compact design and double bridge slot per tier. This enables simultaneous bridging and testing.

With its clear and space-saving front connection arrangement, this two-tier terminal series provides additional space between the cable ducts for wiring.

The PE/ground conductor terminal of this series meets all the requirements of IEC 60947-7-2.

These include:

- Low contact resistance
- Stainless clamping points and PE mounting foot
- Green-yellow enclosure and
- Additional inscription options.

#### Technical specifications

## Insulation Displacement Terminals

### 8WH isolating blade terminals

#### Overview

Through-type terminals with isolating capability are the most commonly used terminal types in instrumentation and control. The isolating and isolating blade terminals with insulation displacement terminals have a mounting width of 6.2 mm and a current load rating of 16 A. A special feature of both terminal types is their three bridge slots. Two in the same position as that of the insulation displacement and spring-loaded terminal series and an additional slot on the other side of the isolating point.

The isolating blade terminal for terminal size 2.5 mm<sup>2</sup> has an integrated blade; the isolating terminal for terminal size 2.5 mm<sup>2</sup> can accommodate through-type connectors, isolating plugs, component connectors and fused connectors.

The isolating blade is secured to the terminal so that it cannot be lost.

# ALPHA FIX Terminal Blocks

## Accessories for 8WH Terminal Blocks

ALPHA FIX PRINT  
printer labeling systems

### Overview

With ALPHA FIX PRINT, the inscription of plastic signs for the marking of terminals is as simple as normal printing.

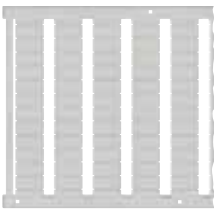

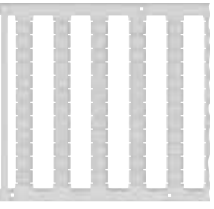

Cutting edge UV technology makes ALPHA FIX PRINT an environmentally friendly high-speed printer. Printing of up to 10,000 signs per hour without the emission of solvents. The marking is instantly smudge-proof and can be used immediately.

The simple and time-saving operation is supported by the automatic material feed.

ALPHA FIX PRINT is network-capable over Ethernet and also supports wireless control using Bluetooth.

Simply connect, insert the standardized UniCard marker cards in the tray - and you're off!

| Note<br>The labeling plates can only be printed using the plotter, or they can be written by hand.                                                                                                                                                                                                                                                                                                                                        |                                                                                          |           |                                                                                                                                                                                             |         |             |     |

### Adapters for 8WA labeling plates

#### Design

Adapters for inscription of 8WA8 front labels

Using the 8WH9 060-4AA00 adapter, all 8WA8 labels can be snapped onto the 8WH terminal blocks (front).

# ALPHA FIX Terminal Blocks

## Accessories for 8WA Terminal Blocks

**ALPHA FIX PRINT**  
printer labeling systems

### Overview

With ALPHA FIX PRINT, the inscription of plastic signs for the marking of terminals is as simple as normal printing.

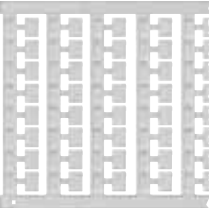

Cutting edge UV technology makes ALPHA FIX PRINT an environmentally friendly high-speed printer. Printing of up to 10,000 signs per hour without the emission of solvents. The marking is instantly smudge-proof and can be used immediately.

The simple and time-saving operation is supported by the automatic material feed.

ALPHA FIX PRINT is network-capable over Ethernet and also supports wireless control using Bluetooth.

Simply connect, insert the standardized UniCard marker cards in the tray - and you're off!

 ## Order information

### Trademarks

All product designations may be trademarks or product names of Siemens AG or supplier companies whose use by third parties for their own purposes could violate the rights of the owners.

### Ordering special designs

When ordering products that differ from the standard designs, the Order No. in the catalog must be supplemented by a "-Z", the required characteristics must then be specified either by means of brief alphanumeric data or in plain text.

### Ordering very small quantities

When ordering very small quantities, the cost of order processing often exceeds the order value. We therefore recommend that you combine several small orders. Where this is not possible, please note that we are obliged to make a small processing charge: for orders with a net goods value of less than € 100.– we charge a € 15.– supplement to cover our order processing and invoicing costs

### Internet

Visit us on the Internet. Our addresses are as follows:

- For the sector Automation and Drives:  
<http://www.siemens.com/automation>
- For Installation Technology:  
<http://www.siemens.com/e-installation>
- For the offline mall CA 01:  
<http://www.siemens.com/automation/ca01>
- For the online mall:  
<http://www.siemens.com/automation/mall>

### Notes

All technical data, dimensions and weights are subject to change without notice unless otherwise specified on the pages of this catalog. All dimensions are specified in mm, the illustrations are for reference purposes only.

The technical data are for general information. The instruction manuals and the instructions on the products must be observed during assembly, operation and maintenance.

## Explanations on the Selection and Ordering Data

| <b>DT (delivery time class)</b>                    | <table><tr><th>DT</th><th>Meaning</th></tr><tr><td>▶</td><td>preferred type</td></tr><tr><td>A</td><td>two workdays</td></tr><tr><td>B</td><td>one week</td></tr><tr><td>C</td><td>three weeks</td></tr><tr><td>D</td><td>six weeks</td></tr><tr><td>X</td><td>on request</td></tr></table>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | DT | Meaning    | ▶            | preferred type | A                                             | two workdays | B                                                                                                                                                                      | one week | C                                                                                                                                                                                                                                                                                                                                                                                                         | three weeks | D | six weeks | X | on request | <p>Preferred types are device types that can be delivered immediately ex works, i.e. they are dispatched within 24 hours.</p> <p>If ordered in normal quantities, the products are usually delivered within the specified delivery times, calculated from the date we receive your order.</p> <p>In exceptional cases, delivery times may vary from those specified.</p> <p>The delivery times are valid ex works from Siemens AG (products ready for dispatch).</p> <p>Shipping times depend on the destination and the method of shipping. The standard shipping time for Germany is one day.</p> <p>The delivery time classes specified in the catalog are valid as of 10/2008 and are constantly being optimized. | <b>PU (price unit)</b>                             | The PU column (price unit) specifies the quantity to which the price and weight refer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>PS/P. unit (packaging size/ packaging unit)</b> | <p>The first digit in the PS/P. unit column (packaging size/packaging unit) indicates the minimum order quantity. You can only order this specified quantity or a multiple thereof.</p> <p>The second digit in the PS/P. unit column (packaging size/packaging unit) specifies the number of units contained in larger packaging (e.g. in a carton). You must order this quantity or a multiple thereof if you want the item to be delivered in a larger packaging quantity. Examples:</p> <table><tr><th>PS/P. unit</th><th>Significance</th></tr><tr><td>1</td><td>You can order one item or a multiple thereof.</td></tr><tr><td>5</td><td>For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc.</td></tr><tr><td>5/100</td><td>One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br/><br/>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units).</td></tr></table> |    | PS/P. unit | Significance | 1              | You can order one item or a multiple thereof. | 5            | For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc. | 5/100    | One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br><br>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units). |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 1                                                  | You can order one item or a multiple thereof.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5                                                  | For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5/100                                              | One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br><br>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>PG (Price Group)</b>                            | Each product is assigned to a price group.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Weight</b>                                      | The value specified in the Weight column specifies the weight in kg for the quantity specified in the PU column (price unit).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Dimensions</b>                                  | Unless stated otherwise, all dimensions are specified in mm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |    |            |              |                |                                               |              |                                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                           |             |   |           |   |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Approvals and certificates

**ALPHA distribution boards**

Our ALPHA distribution boards and components are series produced. Regular type tests and routine tests, by both internal and external testing laboratories, ensure uniform quality and the highest technical standards. Our product spectrum ranges from small distribution boards (up to 63 A) through to distribution boards with 630 A busbar load capacity.

The ALPHA distribution boards comply with standards EN 60439-1 (VDE 0660-500) and EN 60439-3 (VDE 0660-504). The respective type tests are performed according to Table 7, sections 8.2.1 ... 8.2.7 or 8.2.15 of the aforementioned regulations.

# Appendix

## Approvals and certificates

The standard VDE 0660-500 /-504; EN 60439-1/-3; IEC 60439-1/-3 is one of the most important standards for distribution systems. It stipulates the requirements for the safe operation of low-voltage switchgear assemblies.

The standard VDE 0660-500; EN 60439-1 distinguishes between:

- **TTA (type-tested switchgear assemblies)**  
TTA refers to factory-assembled switchgear combinations that conform to an established type or system without deviations likely to significantly influence the performance from the typical assembly verified to be in accordance with the standard DIN VDE 0660-500.
- **PTTA (partially type-tested switchgear assemblies)**  
PTTA refers to switchgear assemblies, including factory-assembled, type-tested and non-type-tested arrangements, which comply with the relevant test requirements as specified in DIN VDE 0660-500.

Both versions (TSK and PTSK) are equivalent to each other. They offer the same level of safety and the same high standard of quality. The difference between TTA and PTTA lies in the scope and the type of tests performed.

All switchgear assemblies produced with type-tested components are required to undergo routine tests (according to Table 7, sections 8.3.1 ... 8.3.4 of the aforementioned regulations). These switchgear assemblies are then TTA-approved

In the case of switchgear assemblies containing both type-tested and non-type-tested arrangements, proof must be provided (according to Table 7 of the aforementioned standard) that the latter are derived (e.g. by calculation) from type tested arrangements which have complied with the relevant tests. These switchgear assemblies are then PTTA-approved

### 7 Type tests

1. Proof of compliance with the temperature-rise limit
2. Proof of insulation resistance
3. Proof of short-circuit strength
4. Proof of the proper connection between the bodies of the switchgear assemblies and the protective conductor by monitoring the resistance measurement
5. Proof of creepage distance and clearance
6. Proof of mechanical functionality
7. Proof of IP degree of protection

### 3 Routine tests

1. Wiring, electrical functionality
2. Insulation
3. Protective measures
4. Insulation resistance

- Not yet submitted for approval.

O Device submitted, available on request.

1) For registration numbers and references of approvals, please visit our Web site at: <http://www.siemens.com/automation/support>, and select the option "Product Support".

2) cUL or cUL-approved in accordance with USA approval.

### Siemens contacts on the World Wide Web

At

<http://www.siemens.com/automation/partner>

you can find details of Siemens contact partners worldwide responsible for particular technologies.

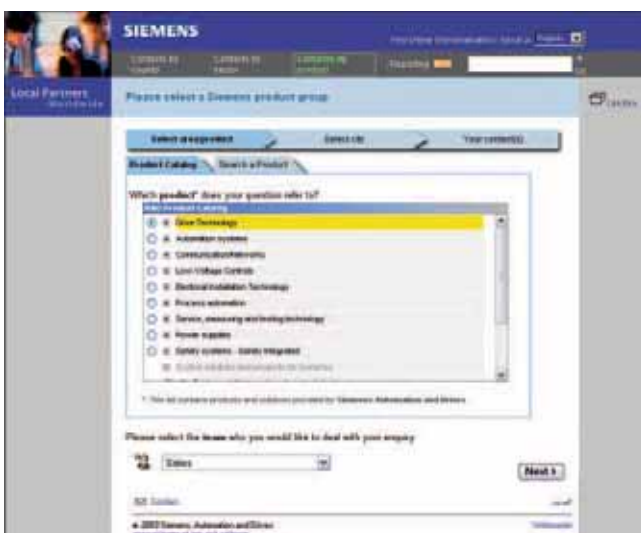

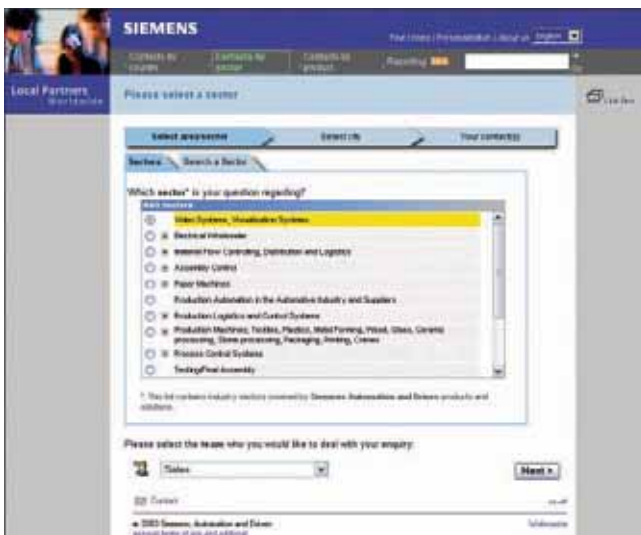

You can obtain in most cases a contact partner for

- Technical Support
- Spare parts/repairs,
- Service,
- Training,
- Sales or
- Consultation/engineering.

You start by selecting a

- Country,
- Product or
- Sector.

By further specifying the remaining criteria you will find exactly the right contact partner with his/her respective expertise.

## Online Services

### Information and Ordering in the Internet and on CD-ROM

#### Siemens Industry Automation and Drive Technologies in the WWW

A detailed knowledge of the range of products and services available is essential when planning and configuring automation systems. It goes without saying that this information must always be fully up-to-date.

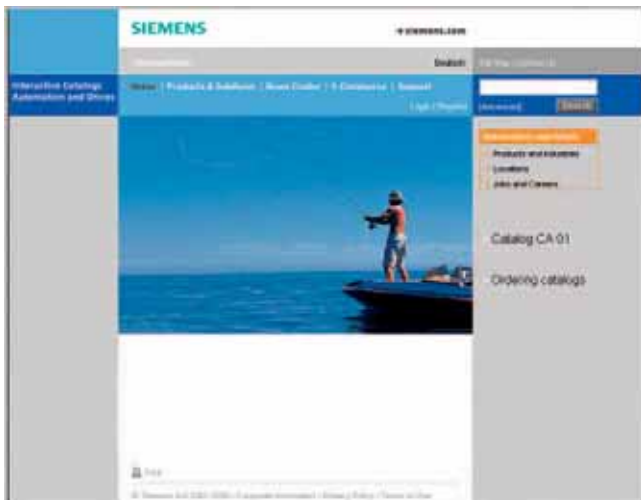

Siemens Industry Automation and Drive Technologies has therefore built up a comprehensive range of information in the World Wide Web, which offers quick and easy access to all data required.

Under the address

<http://www.siemens.com/automation>

you will find everything you need to know about products, systems and services.

#### Product selection using the offline mall

Detailed information together with convenient interactive functions:

The Offline Mall CA 01 covers more than 80,000 products and thus provides a full summary of the Siemens Automation and Drives product base.

Here you will find everything that you need to solve tasks in the fields of automation, switchgear, installation and drives. All information is linked into a user interface which is easy to work with and intuitive.

After selecting the product of your choice you can order at the press of a button, by fax or by online link.

Information on the Offline Mall CA 01 can be found in the Internet under

<http://www.siemens.com/automation/ca01>

or on CD-ROM or DVD.

#### Easy shopping with the Online Mall

The Online Mall is the virtual department store of Siemens AG in the Internet. Here you have access to a huge range of products presented in electronic catalogs in an informative and attractive way.

Data transfer via EDIFACT allows the whole procedure from selection through ordering to tracking of the order to be carried out online via the Internet.

Numerous functions are available to support you.

For example, powerful search functions make it easy to find the required products, which can be immediately checked for availability. Customer-specific discounts and preparation of quotes can be carried out online as well as order tracking and tracing.

Please visit the Online Mall on the Internet under:

<http://www.siemens.com/automation/mall>

## Customer Support

### Our Services for Every Phase of Your Project

In the face of harsh competition you need optimum conditions to keep ahead all the time:

A strong starting position. A sophisticated strategy and team for the necessary support - in every phase.

Service & Support from Siemens provides this support with a complete range of different services for automation and drives.

In every phase: from planning and startup to maintenance and upgrading.

Our specialists know when and where to act to keep the productivity and cost-effectiveness of your system running in top form.

#### Online Support

The comprehensive information system available round the clock via Internet ranging from Product Support and Service & Support services to Support Tools in the Shop.

<http://www.siemens.com/automation/service&support>

#### Technical Support

Competent consulting in technical questions covering a wide range of customer-oriented services for all our products and systems.

**Tel.: +49 (0)180 50 50 222**  
**Fax: +49 (0)180 50 50 223**  
 (€ 0.14 /min. from a German landline network, mobile telephone prices may vary)

<http://www.siemens.com/automation/support-request>

#### Technical Consulting

Support in the planning and designing of your project from detailed actual-state analysis, target definition and consulting on product and system questions right to the creation of the automation solution.<sup>1)</sup>

#### Configuration and Software Engineering

Support in configuring and developing with customer-oriented services from actual configuration to implementation of the automation project.<sup>1)</sup>

#### Service On Site

With Service On Site we offer services for startup and maintenance, essential for ensuring system availability.

In Germany  
**0180 50 50 444<sup>1)</sup>**  
 (0.14 €/minute from a German landline network, mobile telephone prices may vary)

#### Repairs and Spare Parts

In the operating phase of a machine or automation system we provide a comprehensive repair and spare parts service ensuring the highest degree of operating safety and reliability.

In Germany  
**0180 50 50 446<sup>1)</sup>**  
 (0.14 €/minute from a German landline network, mobile telephone prices may vary)

#### Optimization and Upgrading

To enhance productivity and save costs in your project we offer high-quality services in optimization and upgrading.<sup>1)</sup>

<sup>1)</sup> Country-specific telephone numbers can be found on our Internet site at: <http://www.siemens.com/automation/service&support>

## Subject index

### Numbers

8HP single enclosures 9/10  
 8WA Accessories  
   ALPHA FIX 16/13  
 8WA mounting accessories 16/17  
 8WH Accessories  
   ALPHA FIX 16/3  
 8WH mounting accessories 16/10

### A

Accessories for meter enclosures 9/39  
 Actuating flaps 9/37  
 Actuator terminals 12/84  
 Adapter sets for assembly kits 6/4  
 Adapters for individual inscription of 8WA labeling plates 16/4  
 ALPHA 160 - DIN wall-mounted distribution boards 2/4  
 ALPHA 400 - DIN Wall-Mounted Distribution Boards 3/2  
 ALPHA 400-ZS meter cabinets 7/2  
 ALPHA 630 - DIN Floor-Mounted Distribution Boards 4/2  
 ALPHA 630 - DIN floor-mounted distribution boards 5/2  
 ALPHA 8HP molded-plastic distribution systems 9/2  
 ALPHA assembly tools 2/12, 3/32  
 ALPHA BOX 8/1  
 ALPHA FIX  
   8WA Accessories 16/13  
   8WA Terminals with spring-loaded connection 12/65  
   8WH Accessories 16/3  
   8WH combination plug-in terminals 13/2  
   8WH insulation displacement terminals 15/2  
   8WH plug-in terminals 14/2  
   8WH Terminals with spring-loaded connection 12/2  
   Screw terminals 11/2  
   Terminal blocks 11/2, 12/2, 13/2, 14/2, 15/2, 16/3  
 ALPHA FIX PRINT  
   Printer 16/3, 16/13  
   Printer labeling system 16/3, 16/13  
 ALPHA SELECT 10/2  
 Assembly kit front cover for measuring instruments 3/17, 4/10, 5/7  
 Assembly kits  
   for bus-mounting fuse bases 3/24, 4/17, 5/14, 6/13  
   for fuse switch disconnectors 2/10, 3/21, 3/22, 4/13, 4/14, 5/10, 5/11, 6/9, 6/10  
   for horizontal terminal blocks 2/8, 3/17, 4/10, 5/7, 6/6  
   for in-line fuse switch disconnectors 4/16, 5/13, 6/12  
   for load break switches 9/25  
   for meter mounting 3/27, 4/20, 5/17, 6/16  
   for modular installation devices 2/7, 3/16, 4/9, 5/6, 6/5  
   for parallel switches 9/25  
   for SENTRON VL circuit-breakers 5/12  
   for SENTRON VL/VF circuit-breakers 3/23, 4/15, 6/11  
   for SR60 busbar systems, 60 mm 3/25, 4/18, 5/15, 6/13  
   for unequipped distribution boards 2/7, 3/15, 4/9, 5/6, 6/5  
   for unequipped panels 2/9, 3/19, 4/12, 5/9, 6/8  
   for unequipped panels with deep-drawn cover, 40 mm 3/20, 4/12, 5/9, 6/9  
   for vertical terminal blocks 3/17, 4/10, 5/7, 6/6  
   with mounting plates 2/9, 3/18, 4/11, 5/8, 6/7  
 Assembly tools 2/12, 3/32, 4/26, 5/22

### B

Barriers 11/11, 11/28, 11/30, 11/33, 11/36, 11/41, 12/71, 12/75, 12/82  
 Base frames 6/4  
 Base terminals 9/34  
 Baseboards 9/46  
 Bases for ALPHA 630 - DIN 4/21, 5/18  
 Blank labeling plates 11/28  
 Blanking covers 9/38  
 Blanking strips 1/6, 1/10, 1/13, 2/12, 3/31, 4/26, 5/22  
 Bolt-type screw terminals 11/18  
   for cable lugs 9/29  
 Branch terminals 11/25  
 Bridging links 11/35, 12/76  
 Busbar assembly kits 9/31  
 Busbar supports 3/30, 4/25, 5/20, 6/18, 9/28, 9/30  
 Bus-mounting fuse bases  
   Assembly kits for ~ 3/24, 4/17, 5/14, 6/13

### C

Cabinet frames 6/3  
 Cabinet mounting lugs  
   Flat 2/11, 3/28, 4/21, 5/17  
 Cable clamping rails 4/22, 5/18  
 Cable entries 9/35  
 Cable entry plates 9/36  
 Cable flange plates  
   made of molded plastic 6/17  
 Cable holders 3/31, 4/26, 5/22  
 Cable space covers 9/43  
 Captive nuts for perforated plates 3/30  
 Circuit diagram pockets 3/29, 4/22, 5/18, 6/17  
 Circular conductors  
   Terminating terminals for ~ 3/31  
 Combination Plug-in Terminals  
   ALPHA FIX 13/2  
 Combs 11/17  
 Compartment partitions 12/22, 12/28, 12/31, 12/34, 12/40, 12/46, 12/49, 12/57,  
   12/64, 13/8, 13/13, 13/15, 13/17, 13/19, 15/11, 15/23,  
   15/25, 15/27, 15/29  
 Complete cable space covers 9/45  
 Components for busbar systems 9/28  
 Configuration 10/2  
 Connecting brackets 9/44  
 Connecting combs 16/11  
 Connecting elements 1/10  
 Connecting kits 6/16, 9/38  
   IP43 / IP55 3/31, 4/26, 5/22  
 Connecting lugs 9/28  
 Connection combs 11/41  
 Connection modules 12/84  
 Copper busbars 9/31  
   for special versions 9/31  
 Corner covers 9/46  
 Corner profiles 9/45  
 Cover profiles 9/30  
 Cover segments 12/22, 12/31, 12/34, 12/46, 13/8, 13/13, 15/11, 15/23, 15/27,  
   15/29  
 Covers 1/13, 11/10, 11/28, 11/30, 11/36, 12/22, 12/25, 12/31, 12/34, 12/40, 12/44,  
   12/46, 12/49, 12/57, 12/59, 12/61, 12/64, 13/8, 13/13,  
   13/15, 13/17, 13/19, 13/22, 14/6, 14/10, 14/15, 15/11,  
   15/23, 15/25, 15/27, 15/29  
   for link rails 11/26, 11/40  
   for screw terminals 14/8, 14/12  
 Covers for three-tier terminals 12/42  
 Crossarms for standard busbar supports 6/18  
 Cu busbars 3/30, 4/25, 5/20  
 Cylinder locks 1/10

### D

Device labels 11/28, 16/14  
 DIAZED fuse enclosures 9/15  
 DIAZED-/NEOZED screw-in fuse links  
   Enclosures with ~ 9/14  
 Diode terminals 11/31, 11/33, 12/45, 12/78  
 Distribution board panels  
   ALPHA 400-ZS 7/8  
 Distribution board panels with S-system  
   ALPHA 400-ZS 7/9  
 Distribution board racks for side-by-side mounting 6/3  
 Distribution boards  
   with mounting plate 8/2  
   with steel sheet door 8/2  
 Distribution Boards with Built-In Distribution Board Panels 2/4  
 Door hinges 3/31, 4/26, 5/21  
 Door locking kits 1/6  
 Door locks 1/6  
 Double flanges 9/46

## Subject index

**E**

EMERGENCY-STOP switches 9/23  
 Empty enclosures  
   8HP 9/10  
   Complete 9/11  
 Enclosures  
   Accessories 9/35  
   Bases 9/11  
   for modular installation devices with snap-on mounting 9/12  
   with DIAZED/NEOZED screw-in fuse links 25 A and 63 A 9/14  
   with fuse switch disconnectors, 160 A to 630 A 9/18  
   with LV HRC fuse bases 9/16  
   with main and EMERGENCY-STOP switches, 63 A to 800 A 9/22  
   with switch disconnectors with fuses, 63 A to 250 A 9/24  
 End cover plates 9/35  
 End labeling plates 16/16  
 End plates 11/30, 11/32  
 End retainers 12/82, 16/17  
   Steel 16/17  
   Thermoplastic 11/10, 11/28  
   with screw fixing 16/17  
 Extension terminals 9/30  
 Extra-deep brackets 3/32, 4/26, 5/22  
 Eyebolts 4/26

**F**

Feeder terminals 12/82, 12/84  
   for neutral busbars 11/26, 11/28, 12/73, 12/82, 14/10, 14/15  
   for neutral isolating terminals 12/73  
 Flanges 1/13, 2/11, 3/29, 4/21, 5/17  
   2-component ~ 2/11  
 Flanges for cable entry, 2-component ~ 1/13  
 Flat clamps 11/24  
 Flat pack, ALPHA 400 - DIN 3/6  
 Flat terminals 11/21  
 Floor plates, multipart 6/4  
 Floor-mounted distribution boards  
   ALPHA 630 - DIN 4/2, 5/2  
 Fluid cartridges for ALPHA FIX PRINT printers 16/3, 16/13  
 Flush-mounting distribution boards 1/4, 1/9  
   unequipped distribution boards 2/5, 3/11  
   with quick-assembly kits 2/4  
 Four-tier motor terminals 12/43  
 Front covers 9/46  
   Closed 4/27, 5/23  
   Supports for ~ 2/12, 3/30, 4/25, 4/28, 5/20, 5/24  
   with cut-out section 4/27, 5/23  
 Front doors  
   made of glass 6/4  
   made of sheet steel 6/4  
 Fuse enclosures  
   DIAZED 9/15  
   NEOZED 9/15  
 Fuse switch disconnectors 9/32, 9/33  
   Assembly kits for ~ 2/10, 3/21, 3/22, 4/13, 4/14, 5/10, 5/11, 6/9, 6/10  
   Enclosures with ~ 9/18  
 Fuse terminals 11/35, 12/26, 12/76

**G**

G fuse links 11/35, 12/76  
 Grip ends 9/36  
 Grounding terminal strips 1/13  
 Group labels 16/16

**H**

High-current PE terminals 11/12–11/16  
 High-current terminals 11/12–11/16  
 Hinged lids with tension spring 9/37  
 Holders  
   for PE/N bars 9/30  
   for standard mounting rails 9/30  
 Hollow-wall distribution boards 1/4  
 Hollow-wall sets 2/11, 3/28  
 Hood-type distribution boards 1/5  
 Hybrid isolating blade terminals 13/16  
 Hybrid isolating terminals 13/18  
 Hybrid through-type PE terminals 12/23, 13/9–13/13, 15/12–15/22  
 Hybrid through-type terminals 12/23, 13/9–13/12, 15/12–15/21  
 Hybrid two-tier PE terminals 13/14  
 Hybrid two-tier terminals 13/14

**I**

Incoming and outgoing terminals 9/28, 9/29  
 Indicator lights 9/39  
 Individual components  
   Empty enclosures for 9/11  
 Initiator terminals 12/84  
 Initiator/actuator terminals 12/83  
 In-line fuse switch disconnectors  
   Assembly kits for ~ 4/16, 5/13, 6/12  
 Inner partitions 1/13  
 Insertion profiles 11/17  
 Insta terminals 11/27, 12/80  
 Installation terminals 14/13  
 Instrument isolating terminals 11/40  
 Insulation carriers 9/38, 16/18  
   for insulated mounting of support rails 11/28  
 Insulation displacement terminals  
   ALPHA FIX 15/2  
 Insulation plates 11/11, 11/30, 11/40, 12/71, 12/75  
 Insulation stops 12/84  
 Intermediate covering strips 9/38  
 Intermediate frames 9/11  
 ISO meter support plates 9/39  
 Isolating blade terminals 12/29, 15/26  
   Compact 12/58  
 Isolating terminals 11/33, 11/39, 12/32, 15/28  
   Compact 12/60

**J**

Joining sheets 9/45  
 Jumpers 11/11, 11/30, 11/40, 12/71, 12/73, 12/75, 12/77, 12/78, 12/79, 12/82  
   PE/N function 12/71

**L**

Label holders 11/26, 12/75, 16/17  
 Label holders for three-tier terminals 12/42  
 Labeling plates  
   Customized inscriptions 16/16  
   for cables 16/16  
   for individual wires 16/14  
   for labeling 8WA terminal blocks using the ALPHA FIX PRINT printer 16/13  
   for manual inscription 16/15  
   for plotter inscription 16/4, 16/14  
   Type 847/848 16/16  
   Type 860/861 16/15  
 Labeling plates, flat  
   for labeling 8WH terminal blocks using the ALPHA FIX PRINT printer 16/3  
   for terminal width 10 mm 16/9  
   for terminal width 12 mm 16/9  
   for terminal width 16 mm 16/9  
   for terminal width 4.2 mm 16/5  
   for terminal width 5.2 mm 16/6  
   for terminal width 6.2 mm 16/7  
   for terminal width 8.2 mm 16/8  
 Labeling plates, front  
   for labeling 8WH terminal blocks using the ALPHA FIX PRINT printer 16/3  
   for terminal width 10 mm 16/9  
   for terminal width 12 mm 16/9  
   for terminal width 16 mm 16/9  
   for terminal width 4.2 mm 16/5  
   for terminal width 5.2 mm 16/6  
   for terminal width 6.2 mm 16/7  
   for terminal width 8.2 mm 16/8  
 Labeling strips 11/42  
 Labeling system  
   Plotter ~ 16/4, 16/14  
   Printer ~ 16/3, 16/13  
   Standard ~ 16/5, 16/15  
 Latches 13/27  
 Lateral mounting test plugs 12/31, 12/64, 15/11, 15/25, 15/27, 15/29, 16/10  
 Lateral profiles 9/45  
 Link rails 11/11, 11/24, 11/28, 11/30, 11/35, 11/36, 11/41, 12/71, 12/74, 12/75,  
   12/77, 12/78, 12/79, 12/82  
 Links 11/10, 11/20, 11/30  
 Load break switches  
   Assembly kits for ~ 9/25  
 Locking systems 2/11, 3/28, 4/22, 5/18, 6/16  
 Lockouts 12/74, 12/82  
 Longitudinal stays 2/7, 3/15, 4/5, 4/8, 4/28, 5/24, 6/16  
 LV HRC fuse bases  
   Enclosures with ~ 9/16

# Appendix

## Subject index

### M

Main and EMERGENCY-STOP switches  
Enclosures with ~ 9/22  
Main switches 9/23  
Marshaling boxes 4/8  
Masking frame for fuse switch disconnectors 9/32, 9/33  
Measuring instruments 9/39  
Measuring transformer terminals 11/37  
Meter enclosures 9/21  
Meter mounting  
Assembly kits for ~ 3/27, 4/20, 5/17, 6/16  
Modular devices  
Enclosures for ~ 9/12  
Modular distribution boards 5/4, 6/2  
Modular installation devices  
Assembly kits for ~ 2/7, 3/16, 4/9, 5/6, 6/5  
Quick-assembly kits for ~ 2/6, 3/13  
Molded-plastic distribution systems  
ALPHA 8HP 9/2  
Molded-plastic partitions 9/34  
Mounting accessories 9/38  
Mounting brackets 6/18, 16/18  
Mounting plates 9/11, 9/36  
Assembly kits for ~ 6/7  
Assembly kits with ~ 2/9, 3/18, 4/11, 5/8  
cabinet high 3/18, 4/11, 5/8, 6/7  
for telecommunication units 3/30  
Mounting rail 9/37

### N

N/PE bars 2/12, 3/30, 4/25, 5/20  
As plug-in terminals 2/12, 3/31, 4/25, 5/20  
N/PE terminal strips 1/6, 1/10, 1/13  
NEOZED fuse enclosures 9/15  
Neutral busbar ends 12/73, 12/82  
Neutral busbar supports 12/73, 12/82  
Neutral busbars 11/46, 12/73, 12/82, 14/10, 14/12, 14/15  
6 × 6 mm 11/26, 11/28  
Neutral conductor terminal strips 1/13  
Neutral isolating terminals 11/25, 12/72, 14/9  
With screw terminals 14/11  
Nuts 9/44, 9/46

### O

Opaque cover 9/11  
Ordering large quantities 4/27, 5/23

### P

Paint spray cans 2/11, 3/29, 4/21, 5/17, 6/17  
Paint sticks 2/11, 3/29, 4/21, 5/17, 6/17  
Parallel switches  
Assembly kits for ~ 9/25  
Partitions 1/6, 1/13, 2/12, 3/31, 4/24, 5/21, 9/28, 11/20, 11/24  
PE plugs 13/23  
without slot for comb 13/26  
PE two-tier terminals 12/35–12/39, 15/24  
Compact 12/62  
Permanent links 11/17  
Planning 10/2  
Platform concept 3/4  
Plotter labeling systems 16/4, 16/14  
Plotters 16/4, 16/14  
Plug-in connectors 13/20  
Plug-in PE connectors 13/20  
Plug-in terminals  
ALPHA FIX 14/2  
Plug-in zone connectors 12/34, 12/61, 13/19, 15/30  
for isolating terminals 16/12  
Plugs 12/71, 12/73, 12/75, 12/77, 12/78, 12/79, 12/82, 13/23  
for components 11/34  
without slot for comb 13/26  
Printer  
ALPHA FIX PRINT 16/3, 16/13  
Printer labeling system  
ALPHA FIX PRINT 16/3, 16/13  
Profile semicylinders 2/11, 3/28  
Protective caps 9/36  
Protective conductor busbars 11/48, 12/64, 13/28, 14/16, 15/31  
Pushbuttons 9/39

### Q

Quick-assembly kits 2/4  
combined 3/15  
for modular installation devices 2/6, 3/13  
for telecommunications 7/10  
for terminal blocks, modular installation devices and fuse switch  
disconnectors 3/15  
for unequipped distribution boards 2/6, 3/13  
without wiring kits 7/11  
Quick-fit end retainers 11/19, 16/10  
Quick-lock screws 4/26, 5/22  
Quick-release cover locks 9/36

### R

Rain guards 9/41  
RCCB terminals 1/6  
Reducing combs 16/10  
Reduction plugs 16/18  
Replacement door hinges 3/31, 4/26, 5/21  
Retaining plates 12/71, 12/75  
Roofing plates  
Closed 6/3  
with flange sections 6/3  
Rubber cable entries 6/17, 9/35, 9/36

### S

Safety cylinder locks 1/13  
Screw terminals  
ALPHA FIX 11/2  
Screwdrivers 16/11  
for 8WA2 16/18  
Screws 9/44, 9/46  
Screws for cover hinges 9/36  
Sealing caps 9/39  
Sealing fasteners 9/39  
Sealing frames 9/35  
Self-tapping screws 9/36  
SENTRON VL circuit-breakers  
Assembly kits for ~ 5/12  
SENTRON VL/VF circuit-breakers  
Assembly kits for ~ 3/23, 4/15, 6/11  
Separating tools 9/41  
Shield terminals 11/43  
Side panels 9/46  
Closed 6/4  
Side supports 9/45  
Siemens nameplates 2/11, 3/29, 4/22, 5/18  
SIMBOX 63 small distribution boards 1/3  
SIMBOX LC small distribution boards 1/9  
SIMBOX WP small distribution boards 1/12  
Single operating mechanisms 9/40  
Sleeves 1/6  
Sliding-link terminals 12/79  
Small distribution boards  
SIMBOX 63 1/3  
SIMBOX LC 1/9  
SIMBOX WP 1/12  
Spacer brackets 16/18  
Spacer plates 16/10  
Spacers 16/18  
Spare keys 4/26, 5/22  
Terminals with spring-loaded connection  
8WA 12/65  
8WH 12/2  
ALPHA FIX 12/2, 12/65  
SR60 busbar systems, 60 mm  
Assembly kits for ~ 3/25, 4/18, 5/15, 6/13  
Standard busbar supports  
for horizontal mounting 6/18  
Standard labeling systems 16/5, 16/15  
Standard mounting rail holders 4/28, 5/24  
Standard mounting rails 3/32, 4/26, 5/22, 9/37, 16/17  
15 mm 4/28, 5/24  
Strain relief cleats 9/36  
Strain reliefs 9/36  
Stud bolts 9/38  
Support brackets 9/28, 11/46, 14/6, 14/10, 14/15  
Support profile extensions 9/44  
Support profiles 9/44  
Support racks 9/43

## Subject index

**S (cont.)**

Support rails 9/37, 9/44, 11/48, 12/64, 13/28, 14/16, 15/31  
 Support struts 9/45  
 Supporting feet 9/44  
 Supports for front covers 2/12, 3/30, 4/25, 4/28, 5/20, 5/24  
 Surface-mounting distribution boards 1/5, 1/10, 1/12  
   IP43 3/8  
   IP55 3/10  
   Marshaling boxes 4/8  
   Unequipped distribution boards 2/5, 3/6, 3/8, 3/10, 4/5  
     with quick-assembly kits 2/4  
 Switch disconnecter with fuses  
   Enclosures with ~ 9/24

**T**

Tap-off terminals 11/17  
 Terminal blocks  
   ALPHA FIX 11/2, 12/2, 13/2, 14/2, 15/2, 16/3  
   Assembly kits for ~ 2/8, 3/17, 4/10, 5/7, 6/6  
 Terminal strip labeling plates 16/16  
 Terminal strip markers for end retainers 16/10  
 Terminal strips 11/11  
 Terminals 14/12  
   for circular conductors 3/31, 4/26, 5/21  
   for components 11/34, 12/77  
   for fuse switch disconnectors 9/29  
   with red LED 11/32  
 Test adapters 14/10, 14/15, 16/10  
 Test plugs 11/11, 11/33, 11/40, 12/74, 16/17  
 Test sockets 11/11, 11/30, 11/40, 16/18  
 Three-tier terminals 11/27, 12/80  
 Through-type PE terminals 11/6–11/10, 12/8–12/22, 12/68–12/70, 13/6, 14/4,  
   15/6–15/10  
   Compact 12/50–12/57  
   with screw terminals 14/7  
 Through-type terminals 11/6–11/10, 11/38, 12/8–12/21, 12/67–12/70, 13/6, 14/4,  
   15/6–15/10  
   Compact 12/50–12/56  
   with screw terminals 14/7  
   with sectionalizing feature 11/33  
   with soldered and plug-in connection 11/36  
 Tools 9/41  
 Top covers 9/46  
 Transformer terminals 11/42  
 Transparent covers 9/11  
 Two-tier diode terminals 12/47  
 Two-tier terminals 11/29, 12/35–12/39, 12/74, 15/24  
   Compact 12/62  
   with electronic components 11/31

**U**

Unequipped distribution boards 6/3  
   ALPHA 160 - DIN 2/5  
   ALPHA 400 - DIN 3/6  
   ALPHA 400-ZS 7/6  
   ALPHA 630 - DIN 4/5  
   Assembly kits 3/15  
   Assembly kits for ~ 2/7, 4/9, 5/6, 6/5  
   Flat pack 3/6  
   Pre-assembled 3/8  
   Quick-assembly kits for ~ 2/6, 3/13  
 Unequipped panels  
   Assembly kits for ~ 2/9, 3/19, 4/12, 5/9, 6/8  
 UV lamps for ALPHA FIX PRINT printers 16/3, 16/13

**W**

Wall anchors 1/6  
 Wall mounting of distribution boards 9/40  
 Wall-mounted distribution boards  
   ALPHA 160 - DIN 2/2  
   ALPHA 400 - DIN 3/2  
 Wall-mounting brackets 9/44  
 Wall-mounting rails 2/11, 3/28  
 Warning covers 12/22

**Z**

Zener diode terminals 11/32

## Terms and conditions of sale and delivery Export regulations

### Terms and conditions of sale and delivery

By using this catalog you can acquire hardware and software products described therein from Siemens AG subject to the following terms. Please note! The scope, the quality and the conditions for supplies and services, including software products, by any Siemens entity having a registered office outside of Germany, shall be subject exclusively to the General Terms and Conditions of the respective Siemens entity. The following terms apply exclusively for orders placed with Siemens AG.

#### *For customers with a seat or registered office in Germany*

The "General Terms of Payment" as well as the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry" shall apply.

For software products, the "General License Conditions for Software Products for Automation and Drives for Customers with a Seat or registered Office in Germany" shall apply.

#### *For customers with a seat or registered office outside of Germany*

The "General Terms of Payment" as well as the "General Conditions for Supplies of Siemens Automation and Drives for Customers with a Seat or registered Office outside of Germany" shall apply.

For software products, the "General License Conditions for Software Products for Automation and Drives for Customers with a Seat or registered Office outside of Germany" shall apply.

#### *General*

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches only apply to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the corresponding pages, - especially with regard to data, dimensions and weights given - these are subject to change without prior notice.

The prices are in € (Euro) ex works, exclusive packaging.

The sales tax (value added tax) is not included in the prices. It shall be debited separately at the respective rate according to the applicable legal regulations.

Prices are subject to change without prior notice. We will debit the prices valid at the time of delivery.

Surcharges will be added to the prices of products that contain silver, copper, aluminum, lead and/or gold if the respective basic official prices for these metals are exceeded. These surcharges will be determined based on the official price and the metal factor of the respective product.

The surcharge will be calculated on the basis of the official price on the day prior to receipt of the order or prior to the release order. The metal factor determines the official price as of which the metal surcharges are charged and the calculation method used. The metal factor, provided it is relevant, is included with the price information of the respective products.

An exact explanation of the metal factor and the text of the Comprehensive Terms and Conditions of Sale and Delivery are available free of charge from your local Siemens business office under the following Order Nos.:

- 6ZB5310-0KR30-0BA1  
(for customers based in Germany)
- 6ZB5310-0KS53-0BA1  
(for customers based outside Germany)

### Export regulations

The products listed in this catalog / price list may be subject to European / German and/or US export regulations.

Therefore, any export requiring a license is subject to approval by the competent authorities.

According to current provisions, the following export regulations must be observed with respect to the products featured in this catalog / price list:

|      |                                                                                                                                                                                                                                                                                                                                                                                                       |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AL   | <p>Number of the <u>German Export List</u></p> <p>Products marked other than "N" require an export license.</p> <p>In the case of software products, the export designations of the relevant data medium must also be generally adhered to.</p> <p>Goods labeled with an "<u>AL</u>" not equal to "N" are subject to a European or German export authorization when being exported out of the EU.</p> |
| ECCN | <p><u>Export Control Classification Number</u></p> <p>Products marked other than "N" are subject to a reexport license to specific countries.</p> <p>In the case of software products, the export designations of the relevant data medium must also be generally adhered to.</p> <p>Goods labeled with an "<u>ECCN</u>" not equal to "N" are subject to a US re-export authorization.</p>            |

Even without a label or with an "AL: N" or "ECCN: N", authorization may be required due to the final destination and purpose for which the goods are to be used.

The deciding factors are the AL or ECCN export authorization indicated on order confirmations, delivery notes and invoices.

Errors excepted and subject to change without prior notice.

| <b>PU (price unit)</b>                             | The PU column (price unit) specifies the quantity to which the price and weight refer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
| <b>PS/P. unit (packaging size/ packaging unit)</b> | <p>The first digit in the PS/P. unit column (packaging size/packaging unit) indicates the minimum order quantity. You can only order this specified quantity or a multiple thereof.</p> <p>The second digit in the PS/P. unit column (packaging size/packaging unit) specifies the number of units contained in larger packaging (e.g. in a carton). You must order this quantity or a multiple thereof if you want the item to be delivered in a larger packaging quantity. Examples:</p> <table border="1" data-bbox="335 772 1452 974"> <thead> <tr> <th>PS/P. unit</th><th>Significance</th></tr> </thead> <tbody> <tr> <td>1</td><td>You can order one item or a multiple thereof.</td></tr> <tr> <td>5</td><td>For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc.</td></tr> <tr> <td>5/100</td><td>One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br/>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units).</td></tr> </tbody> </table> | PS/P. unit | Significance | 1 | You can order one item or a multiple thereof. | 5 | For example, five units are packed in a bag. | 1                                                  | You can order one item or a multiple thereof.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
| 5                                                  | For example, five units are packed in a bag. Because the bags cannot be opened, you can only order a multiple of the quantity contained in the bag: 5, 10, 15, 20 etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
| 5/100                                              | One carton contains (for example) 20 bags, each containing 5 units, i.e. a total of 100 units. If only cartons are available for delivery, you need to order a multiple of the carton quantity: 100, 200, 300, etc.<br>Ordering a quantity of 220 units, would produce the following delivery: two cartons, each containing 100 units (= 200 units) and 4 bags, each containing 5 units (= 20 units).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
| <b>PG (Price Group)</b>                            | Each product is assigned to a price group.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
| <b>Weight</b>                                      | The value specified in the Weight column specifies the weight in kg for the quantity specified in the PU column (price unit).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |              |   |                                               |   |                                                                                                                                                                        |       |                                                                                                                                                                                                                                                                                                                                                                                                       |   |             |   |           |   |            |
