Noncontractual photographs

Notes:

All the reading distances mentioned in this document are indicative. Reading distance for RFID equipment depends on local installation conditions, power supply, identifiers' type and size and on the chip used.

“ RFID has grown from a technological revolution to an economical reality. We are here to help you build your future business from the potential benefits. ”

Guy Pluvinage, CEO

Enter the world of RFID solutions

Whether you are in the security, logistics, or production business, you have strong identification issues and requirements. Radio Frequency Identification is now a reality.

Through constant development and innovation, we make it possible to think about RFID in terms of solutions and not only concepts.

Thinking RFiD another way

STid has developed over the years a unique sense for focusing on what is really important: the best advice leads to the best equipment and the best performance.

Leading manufacturer of contactless products and solutions, our expertise covers all aspects of RFID, from chips to cards and tags, readers, modules and coils, and their implementation.

Company headquarters: Gréasque (Bouches-du-Rhône, 13)

Paris agency (Hauts-de-Seine, 92).

PEOPLE IDENTIFICATION

People Identification, especially for access control, is STid's core business since the company has been created.

People Identification aims at securing access to different spaces through the identification of people having a card. Cards readers are the first link of the security chain of an access control system. They will indeed determine the global coherence of the installation.

There are two types of access controls: the proximity one and the hands free one. Hands free readers can reach reading distances over 1 meter.

In order to give you access to the best suited technology for your project, we have chosen to adopt an independent approach by offering you a wide range of products (readers, modules, identifiers):

- on 125 kHz, 13.56 MHz and UHF frequencies.
- on all the chip technologies already existing (EM Microelectronic, NXP (Mifare), Legic, Inside, Contactless, STMicroelectronics, Impinj, etc.).
- which are compatible with international standards ISO 14443 and ISO 15693, 18092 (NFC).

► LXM Mini Proximity Reader

Compact mini reader. The best size/performance ratio of the category. Thanks to its stylish and functional design it will be integrated easily in any environment. Removable front cover - Bicolor Led - Buzzer - 7-wire cable output of 50 cm or 3 m - 12V DC power supply.

Protocol configurable by card (TTL)

See p.35 for configuration card kit

MIFARE

mifare®

mifare®
Sécurisé

 *Secure
Plus 2*

*EASY
SECURE* 

Mifare® 13.56 MHz STid readers make it possible to integrate different levels of security to your access control system.

The objectives are the following :

- Secured Mifare : Protect the access to the data stored in the card by using private security keys. For that purpose STid has developed production tools for configuration cards which charge the keys in the readers independently from the system.
- Secure Plus 2 : - Ensure confidentiality of all communications between the reader and the management system with STid SSCP secured protocol (encryption and authentication).
 - physically protect your reader.
 - supervise the condition of the reader.
- Easy Secure : Integrate Secure functions + 2 (encryption and authentication) on management systems existing thanks a decoding module.

► LX1 Prox Reader

It is the latest addition to STid product range. Excellent value for money. Compact design to be installed on gate-posts. Removable front cover - 50cm or 3m cable output.

Read-only mode: read unique serial number for Mifare, Desfire chips (compliant with ISO 14443 A). **Protocol configurable by card (TTL).**

Secured read-only mode: read-only mode + Reading of the content from a protected Mifare card sector.

Wiegand - Data / Clock

Reading distance: 0-4 cm (also on metal).

MIFARE *Ultralight* MIFARE *Plus*

New reader simultaneously integrating Ultralight C, Mifare Classic, Mifare Plus and DESFire EVI technologies to ensure optimal security :

- Security between the card and the reader (AES encryption, TDES and AES cryptography algorithms)
- Security between the reader and the management system because of the SSCP (STid Secure Common Protocol) secured protocol using AES and HMAC-SHA1 public algorithms.

Compatible with Classic Mifare for an easy migration of your existing system.

NFC compatibility (ISO 18092).

► LXS Prox Design Reader

ULTRALIGHT C, MIFARE CLASSIC, MIFARE PLUS & DESFire EVI

Read-only mode: reads unique serial number for Ultralight C, Mifare Classic, Mifare Plus, DESFire EVI and PUPU ISO 14443-B chips.

Protocol configurable by card (TTL).

Secured read-only mode: read-only mode + Reading of the content from a protected Mifare card sector.

► Personalization service

We offer you the possibility to adapt our readers to your specific needs to let you personalize your offer to your colors.

We do know that each client is unique, that is the reason why we offer you unique products.

Our range of products :

1/ Proximity Readers:

- Development of a product that will exclusively answer to your needs and constraints: specific protocol, cable length, etc...
- Logo customization.
- Possibility to choose your reader's or spacer's color.

ENGRAVING

COLOR-MARKING

CASING COLOR

COLORLED SPACERS

2/ Hands Free Readers :

- Logo customization.
 - color panel printing
 - plexiglas panel for a better resistance.
- STid artwork department able to create a graphic display upon request.

Conditions apply. Please contact us for any customization request (minimum order quantity)

► MS RFID OEM Module

125 kHz OEM ultra compact proximity RFID module. Very easy to integrate into existing equipment to bring contactless RFID reading or writing.

Read-Only (0-7 cm) / Read-Write (0-3.5 cm). Built-in antenna - Protected resin potted electronics - 5V DC power supply - HE14 connector.

-> Read-only mode

IDENTIFIERS

Technologies, norms, your tag

Throughout the years and projects, STid has constituted a wide range of standard or specific tags answering to very different needs and applications.

Our technological mastery guarantees you today the best results for your RFID application.

By mastering tag components, that is chip, antenna and packaging, STid designs and develops tags perfectly answering to your identification needs in the following industries:

- Access control, person identification
- Cashless applications
- Fidelity
- Multi applications

▶ 125 kHz + 13.56 MHz Contactless Cards

Several versions available:

- Basic, high quality, high resistance, read write, programmable.

«Magnetic stripe» option available upon request.

► Identifiers personalization

In order to increase the security of your access control or just to personalize it, STid offers you a wide range of services to personalize your cards, wristbands, key holders and RFID tags.

Cards

- **Sequential numbering printing***

Consists in printing a sequential number on the card which is independent from the physical number of the chip and enables to make look-up tables with the holder.

- **Physical numbering printing***

Consists in printing the chip's number directly on the card. The printing of the physical numbering makes it possible for cards without the name of its holder to identify who is the holder of the card and to integrate the card into the system.

- **Sequential encoding**

Makes it possible, with programmable cards, to ease the setup of your access control. The identifier number is registered in the card's memory (programmable 125 kHz, Mifare sector, etc.)

- **Monochromatic printing**

Printing on the card in one color. Ideal for companies wanting to print fixed text (the holder's name) and color logo only.

- **Four-color printing**

Four-color printing of your cards. Ideal to promote the image of a company by customizing its cards fleet with its logo and colors.

*Different printing types available: laser, inkjet, thermal transfer.

Key Holders

- **Marking**

Key holders marking: sequential or physical numbering by inkjet or laser engraving.

Markings done on STid key holders.

VEHICLE IDENTIFICATION

STid has developed and patented an identification solution for vehicles.

Thanks to this innovative solution it is possible to identify static or moving vehicles at distances up to 10 meters with a windscreen or an exterior tag (body).

► UROne Vehicle Identification Reader

Middle distance - Built-in antenna

Ideal for vehicle identification at middle distance.
(Up to 4 m in free field with UHF STid tags.)
The electronics of the UROne reader has been optimized to ensure the best price/performance ratio. 12V DC power supply. Loop detector.
Version ETSI : 866 MHz - Version FCC : 915 MHz

OBJECT IDENTIFICATION

Readers and identifiers that are developed by STid are ideal to automatically identify pallets, cartons, agri-food containers and objects.

They all have been conceived to adapt themselves, to be highly resistant to industrial environments and to answer to legal constraints (especially in the agri-food field) while ensuring performance and simple setup.

► MSi Industrial Reader

The MSi is an industrial reader compliant with ISO 15693. Double antenna - short range.

Compliant with the food and beverage industrial requirements.

Input for activation transducer

LOGISTICS

► STR - UHF Reader / Encoder

UHF GEN 2 encoder.

The STR reader / encoder enables the programming of UHF tags.

Intern antenna and USB interface (self-fed).

ABS casing - Bicolour Led - Buzzer

READ WRITE

866 MHz

126x80x24/30 mm

0-8 cm

P/N (USB) CORDON SET SUPPLIED: STR-W45-A/U05-xx

APPLICATIONS :
ENCODING, AUTHENTICATION

Pet Disc Tags

Proximity ultra-thin transparent polyurethane (PET) disc tags.
Dimensions : diam. 20, 26, 50 mm. / Thickness : 0.5 mm.
(Please refer to the price list for available chips.)

Adhesive Pet Disc Tags

Proximity ultra-thin transparent polyurethane (PET) disc tags.
Dimensions : diam. 20, 26, 50 mm. / Thickness : 0.5 mm.
(Please refer to the price list for available chips.)

mifare®

READ ONLY/WRITE

125 kHz / 13.56 MHz

P/N : DTA-xxx/y

XX : CHIP
Y : MODEL / OPTIONS

APPLICATIONS :
LOGISTICS & TRACEABILITY,
INDUSTRIAL APPLICATIONS

Epoxy Disc Tags

Proximity highly resistant fiber-reinforced epoxy disc tags.
Dimensions : diam. 20, 30, 50 mm (standard) / Thickness : 1 or 1.6 mm.
Optional centre hole (3.2 or 8.5 for diam. 30mm / 4.3 for diam 50 mm).
(Please refer to the price list for available chips.)

mifare®

READ ONLY/WRITE

125 kHz / 13.56 MHz

P/N : DTE-xxx/y

XX : CHIP
Y : MODEL / OPTIONS

APPLICATIONS :
LOGISTICS & TRACEABILITY,
INDUSTRIAL APPLICATIONS

ISO 15693 RFID Labels

Wide range of 13.56 MHz labels compliant with ISO 15693,
Self-adhesive or not with different shapes available
Compatible with:
ST: LRI 64 82 K chips - NXP: I-Code chip - INSIDE: PicoTag & PicoPass chips -
Texas: Tag'IT chip.

READ WRITE

13.56 MHz

ISO 15693

ANTICOLLISION

P/N : PLEASE REFER TO THE PRICE LIST AND CONTACT US.

APPLICATIONS :
LOGISTICS & TRACEABILITY,
INDUSTRIAL APPLICATIONS

Agri-food Tags

Wide range of RFID labels and tags complying with the agri-food norms,
Compliance with: ISO 15693-3 chips.

READ WRITE

ISO 15693

ANTICOLLISION

P/N : PLEASE REFER TO THE PRICE LIST AND CONTACT US.

APPLICATIONS :
TRACEABILITY & AGRI-FOOD

► UHF passive labels

Wide range of UHF labels, self-adhesive or not and different shapes available. Specific packaging for any support (metal, cardboard, glass...)

Compliance with:

- ISO180006B : Ucode HSL (NXP)
- ISO180006C : Ucode Gen2 (NXP), Higg 3 (Alien), Monza 3 (Impinj)

READ WRITE

869-915 MHz

ISO 18000-6

EPC GEN2

P/N : PLEASE REFER TO THE PRICE LIST AND CONTACT US.

APPLICATIONS :
LOGISTICS & TRACEABILITY,
INDUSTRIAL APPLICATIONS

► UHF Passive Hard tag

Passive UHF tag (no battery). Works on any support.

Ucode HSL or GEN2 chip.

Anticollision protocol.

IP67

READ ONLY

869 MHz

ANTICOLLISION

0-11 M

P/N ISO 18000 B : TML-W22M-1261
P/N GEN 2 : TML-W36M-1261

Y : MODEL / OPTIONS

APPLICATIONS :
VEHICLE, CONTAINER, PALLET
IDENTIFICATION

ACCESSORIES

STid has developed a complete range of accessories to easily install your RFID readers:

- Spacers for an easy wiring
- Mounting kits
- Converters

► Spacers For LXS & LXE Readers

Spacers for LXS and LXE readers.

The spacers give more room for cables and take away from metallic surfaces. Very discreet, their shape follow the reader profiles.

Reader raising : + 7 mm

(Supplied automatically with LXS 13,56 MHz readers)

P/N : BCK-LXE/NO
P/N : BCK-LXS/NO
P/N : BCK-LX1/NO

(CONTACT US FOR COLOR VARIANTS)

APPLICATIONS :
ACCESS CONTROL AND PERSON
IDENTIFICATION

► Anti-tear spacer for LXS

Built-in contactor used to manage the tear function of the reader. If the contactor opens, the reader transmits the data to the management system to signal the tear.

P/N : BCKS-LXS/NO
P/N : BCKS-LXS/BL

APPLICATIONS :
ACCESS CONTROL AND PERSON
IDENTIFICATION

► Smart RS232/RS485 Converter

Intelligent RS232/RS485 converter. Automatic detection of data flow and communication parameters, or possibility to force them with jumpers.

DIN rack support.

RS485 connection : 5-terminal lever connector.

RS232 connection : Sub D9 plug.

P/N : CNV-232/485

► Protocol converter TTL <-> RS232/RS485

Protocol interface

1) Converter TTL to RS232 or RS485 - Optional relay output (software driven, RS485 model).

2) Converter 232/485 to TTL for Legic or UHF readers.

Communication monitoring leds - optional relay output (RS485) Max

distance Reader/Interface : 100m (TTL->232/485) / 1200m (485->TTL) / 15m (232->TTL).

TTL/RS232 : INT-A-2L/5C
TTL/RS485 : INT-B-2L/7S
AVEC RELAIS : INT-B-2L/7S

FOR LEGIC READER : INT-A-5E/XX

XX : PROTOCOL VARIANT

► Demo Kit / Display For MS & MDS Module

This modular reader / demo kit for MS and MDS module is ideal to record or identify tags by displaying and transmitting tag code on a serial RS232 communication port.

Can be transformed into a 125kHz read-write tag encoder when equipped with a MS-WII module. 12V DC power supply and serial cable supplied.

P/N :
P/N :

DK-MSxx
DK-MDSxx

► Security Screw Kit For AVX Reader

Security screw kit for AVX reader, including :

- 4 snake-eye screws
- 4 brass knuckled plugs
- 1 snake-eye special tool

P/N :

KIT-AVX

► Power Supplies

Power supplies for hands free and UHF readers: XLT, L5I, LBS, URI, URC, URD.

P/N (XLT, L5I, LBS) :
P/N (UR1, URC, URD) :

ALM 220/6-12V
ALM UHF

► Universal UHF Antenna Mounting Kit

Universal mounting kit for patch antenna. Ideal for fast and optimal installation of any RFID antenna. Adjustment on any axis can be done without tools.

- Rapid mounting on sur tube, wall, mast, partitions etc.
- 3 adjustable articulations - Orientation, polarisation and slope.

P/N :

KFX-ANT

► MLT Mounting Leg

Mounting leg for stainless steel MLT readers.

P/N :

PIED_MLT

► Cards Kit

STid offers different cards kits: configuration cards for 125 kHz, 13.56 MHz and UHF readers, but also cards kits to manage the 13.56 MHz readers' life signal.

P/N (CONFIGURATION CARDS 125 KHz READERS) :
P/N (CONFIGURATIONS CARDS 13.56 MHz READERS) :
P/N (LIFE SIGNAL CARDS) :

KIT-BC-125
KIT-BC-13.56
KIT-BSV

TRAINING

MAKE YOUR RFID EXPERTISE MORE DYNAMIC

Reinforce your skills, update your knowledge about the various RFID technologies, distance yourself from your competition by getting innovative know-how: these are STid's goals and it aims to achieve them by offering you RFID trainings most closely corresponding to the needs of your professions.

STid suggests a catalog from the most generic training "Introduction to RFID technologies" to the most technical ones for programmers only.

STid is a funded training organization declared under the activity number 93 13 13328 13. As such, STid trainings are eligible for the Training Program and the Individual Training Rights.

Please contact your commercial department for further information.

Proposal

STid professional services team is at your listening to design and develop custom software application to fulfil your requirements.

Putting together the experience of the mobile computing, remote data collection and radio frequency identification, STid has a unique match of those keys technology to easily develop the most advanced application.

Two Lines of Business: The same Commitment

As a RFID reader manufacturer, STid develops and manufactures products to rigorous demands of performance, usability, visual quality and reliability in order to meet customer's expectations. STid acts as well as a partner of your RFID project and therefore offers services including technical support, consulting and feasibility studies and training.

Consulting and Technical Expertise Services

You need a feasibility study or technical expertise on a specific RFID topic? Take advantage of the expertise gained by our R&D team during the last 10 years.

CONTACT US FOR FURTHER DETAILS!

When starting your project with STid, all the steps of the development are clearly defined and documented. The process of development is documented at each step in our SOW (Scope Of Work) document.

With STid, professional services team, you keep control of your project and schedule as well as all the benefit of a clear visibility on the deliveries.

Specific tags developments (125 kHz, 13.56 MHz and UHF)

Upon request, we can make custom tags with any kind of chip or packaging: adhesive labels, special tags for metallic parts, performance optimization, special shapes or sizes, etc.
